AMERICAN COUNCIL ON EDUCATION

Preface

Educational practice in the United States has been developed and promoted by a great variety of educational associations and institutions. The efforts of these divers associations and institutions, when viewed over a series of years, have been helpful and effective. There has long been a widespread realization, however, that a unifying agency to correlate the efforts of these organizations and to consider the many overlapping problems of fundamental importance in American education was much needed.

The American Council on Education was formed in 1918 to serve this purpose. It is composed of representatives from approximately 400 national and regional educational associations, higher institutions, state departments of education, and city school systems. The Council is, therefore, truly representative of the whole of American education.

As an agency for cooperation, the American Council on Education works with educational leaders representing various levels and phases of American education. Through research it seeks the solution of important problems confronting the educational system. Through numerous conferences and commissions it attempts to bring to a focus the best thought and accumulated experience of representative educational leaders. Its purpose is to assist in formulating and promoting sound principles of educational procedure in keeping with the best ideals of the American people.

In addition to the studies which serve as a basis for the formulation of educational policies, the Council publishes pamphlets and books for ready reference and public information. Among these none is more important than the handbook on higher education, *American Universities and Colleges*. The present volume, made possible by a grant from the Carnegie Corporation of New York, is the third edition of the book.

A factual picture of colleges and universities in America in 1936, such as is presented in this book, should contain reliable and significant information. Part I, a comprehensive yet concise survey of higher education in America, including the American college, the university, the professional schools, and the foreign student in America, supplies a general background of information for the reader of the institutional exhibits in Part II. The amount of the endowment, the annual budget, the number of students enrolled, the variety of courses offered, and all other items of information concerning each college or university appearing in Part II are vouched for by an administrative officer in

each institution, under whose direction the report was prepared and submitted to the American Council. No attempt has been made to evaluate the work of individual universities and colleges. The book is a record of what is being done today in the field of higher education in America.

GEORGE F. ZOOK

President, American Council on Education

Washington

April 28, 1936

Acknowledgments

The third edition of *American Universities and Colleges* follows closely the plan of the first edition prepared in 1928 by David Allan Robertson, then associate director of the American Council on Education, now president of Goucher College, and of the second edition prepared in 1932 by John Henry MacCracken when he was associate director

It is a tribute to Dr. Robertson's wise planning and his prodigious labor that the Handbook found instant and widespread use as a reference work. So well, indeed, was his material written that this edition continues to reprint it, except for revisions, additions, and deletions necessary to record current practices. All of which is to say that our first debt is to Dr. Robertson.

Thanks are due to John W. Studebaker, United States Commissioner of Education, Bess Goodykoontz, Assistant Commissioner, Fred J. Kelly, chief of the Division of Higher Education, and to chiefs of other divisions in the Office of Education for assistance in the revision of Chapter I. Also we acknowledge the helpful cooperation of Robert L. Kelly and staff of the Association of American Colleges, Stephen Duggan and staff of the Institute of International Education, Kathryn McHale and staff of the American Association of University Women, and other leaders in the field of higher learning who helped in the writing and the editing of Chapters II, III, IV, and V, and who gave valuable suggestions that have been incorporated in this edition.

Special acknowledgment is due the following persons for assistance in revising or writing anew these sections as indicated: *Education for Women*, Meta Glass, president of Sweet Briar College, *Libraries*, Donald B. Gilchrist, librarian of the University of Rochester, and L. R. Wilson, dean of the Graduate Library School of the University of Chicago, *Alumni*, Felix A. Grisette, president of the American Alumni Council, *Entrance*, R. M. West, registrar of the University of Minnesota, *The Examination Plan*, Thomas S. Fiske, secretary of the College Entrance Examination Board, *Instruction*, Homer L. Dodge, dean of the Graduate School, University of Oklahoma, *Organization of Curriculum*, Ernest H. Wilkins, president of Oberlin College, and Henry M. Wriston, president of Lawrence College, *Orientation Courses*, Eugene G. Bewkes, Colgate University, *Honors Courses*, Karl W. Bigelow, director of Tutorial Instruction, University of Buffalo, *Personnel Procedures*, Albert Beecher Crawford, director of the Department of Personnel Study and Bureau of Appointments, Yale Uni-

versity, *Health Program* Dr J E Raycroft, director of the Department of Physical Education, Princeton University, *Awards and Aids* Warren E Bristol, president of the Institute of Student Aid, *Theology* Gould Wickey, general secretary of the Council of Church Boards of Education, *Extracurricular Activities* W H Cowley, Ohio State University, *College Unions* Paul B Hartenstein, secretary of the Association of College and University Unions, University of Pennsylvania, *Dramatics* F H Koch, director of the Carolina Playmakers of the University of North Carolina, *Music* Earl V Moore, director of the School of Music, University of Michigan, *Athletics* C R Griffith, University of Illinois, *The Junior College* Walter Crosby Eells, editor of the *Junior College Journal*, Stanford University, *Museums* Paul J Sachs, associate director of the Fogg Art Museum, Harvard University, *Graduate Study* Edgar S Furniss, secretary of the Association of American Universities and dean of the Graduate School of Yale University, and William J Robbins, dean of the Graduate School, University of Missouri, *Universities and Adult Education* Leon J Richardson, director of University Extension, University of California, and Gwladys W Jones, National Education Association, Department of Deans of Women. Thanks are also due to the secretaries of the accrediting associations for material appearing in the Appendices, and to William E Slade, of the Library of Congress for the essay on the Congressional Library. The compilation of the data in Part II would have been an impossible task without the generous help of administrative officers in American colleges and universities.

In a more personal way I acknowledge the services of Rena Christian, my editorial assistant, who carried the responsibility for assembly and editorial arrangement of all materials, of Helen Hurley, of the Council staff, for helpful counsel growing out of her editorial experience on the 1932 edition, of Martha Goodlett, my secretary, and of other members of the staff of the American Council on Education for their keen interest and loyal assistance.

C S MARSH, Editor
Associate Director,

 SOCIATIONS OF UNIVERSITIES AND COLLEGES AMERICAN COUNCIL ON
 EDUCATION COMPARISON OF NATIONAL SYSTEMS EDUCATION AND THE
 DEMOCRATIC STATE

In the United States, contrary to the situation in France, Italy, and many other nations, there is no national system of education. That is to say, the responsibility for the administration of public education has not been assumed to be a function of the federal government. Instead, each state, in accordance with its constitution and statutes, has developed its own separate and self-contained system of education, quite independent of the systems of all other states.

It would not be correct to assume, however, that the absence of national control has resulted in sharply divergent policies of education among the states. In spite of differences in many important details, the general current of education follows essentially the same course in all the states.

Three major factors have brought about this general uniformity. First, the movements of population within the country have in large measure harmonized the sectional theories and practices current in schools of the North, South, East, and West. Second, the continuous study of educational problems in countless conferences of administrative officers and through the more formal researches of educational organizations, such as the National Education Association, has greatly influenced and modified all state systems of education, generally in the direction of agreements in practice. Third, the federal government

through its United States Office of Education, though lacking power to give official direction and control, has nevertheless effectively promoted the interests of education throughout the territorial bounds of the nation. The federal government has also given financial assistance to a number of educational projects carried on within the states. Although free to reject these projects, in nearly all instances the states have accepted them and assimilated them into the school systems. Thus further impetus has been given by the federal government to the trend toward uniformity.

THE UNITED STATES OFFICE OF EDUCATION

The United States Office of Education is in the Department of the Interior. Agitation for the creation of a national educational office began in the middle of the nineteenth century, and led to the establishment, in 1867, of a Department of Education. In that year a Commissioner of Education was appointed and was provided with a budget of \$9,400 "for the purpose of collecting such statistics and facts as shall show the condition and progress of education in the several States and Territories, and of diffusing such information respecting the organization and management of schools and school systems, and methods of teaching, as shall aid the people of the United States in the establishment and maintenance of efficient school systems, and

otherwise promote the cause of education throughout the country " Two years later this Department of Education was superseded by the Office of Education in the Department of the Interior.

In 1933 the Federal Board for Vocational Education, created by Act of Congress in 1917, was placed in the Department of the Interior under the Commissioner of Education.

The names of the United States Commissioners of Education with the years of their tenure follow Henry Barnard, 1867-70, John Eaton, 1870-86, N H R Dawson, 1886-89, William T Harris, 1889-1906, Elmer E Brown, 1906-11, Philander P Claxton, 1911-21, John James Tigert, 1921-28, William John Cooper, 1929-33, George F Zook, 1933-34, J. W Studebaker, 1934-

The chief executive officers of the United States Office of Education are—J W Studebaker, Commissioner, Bess Goodykoontz, Assistant Commissioner, and J C Wright, Assistant Commissioner for Vocational Education

The Office of Education has two principal administrative functions first, those connected with the expenditure of funds appropriated by Congress for the maintenance of colleges of agriculture and mechanic arts (land-grant colleges) in the several states and in Hawaii and Puerto Rico, and second, those functions mandated by law as former responsibilities of the Federal Board for Vocational Education, such as cooperating with the states in promoting vocational education in agriculture, the trades, and industries, and in preparing teachers of vocational subjects Additional functions of the Office include field service, research and investigation of various educational problems, educational surveys, and dissemination of information It publishes bulletins and leaflets on education, *School Life*, a monthly periodical, and biennially a statistical and textual survey of education

The operating budget of the United States Office of Education for the fiscal year ending June 30, 1936, is as follows

General Education	
For administrative expenses	\$ 313,220
For distribution to land-grant colleges	3,530,000
Vocational Education	
For administrative expenses	319,500
For allotment to states	11,195,000
Total	\$15,357,720

In the field of higher education the Office of Education was engaged until 1910 chiefly in the preparation of statistics and historical treatises Since the creation of the position of Specialist in Higher Education by Congress in 1910, the Office has become a powerful agent in stimulating individual colleges to greater effectiveness, and associations of colleges to united effort for betterment

The Office has been the chief agency in the United States for conducting state, city, county, and higher education surveys, ascertaining the kind and amount of education needed in each field, together with the degree to which the school systems appeared to meet the demands, and recommending improvements It has made more than 100 such surveys, and in addition, the specialists often act as consultants to school officials regarding some particular problem

The Office has furnished the basic information for many important studies of various phases of education. In 1927 it made a study of Negro institutions and a survey of the colleges of agriculture and mechanic arts, in 1929, a study of secondary education, in 1930, a study of training of teachers, and in 1931, a study of school finance

Acting in an advisory capacity to strengthen and broaden the educational plans of the Civilian Conservation Corps which are carried out under the immediate direction of the War Department, the Office of Education selects and appoints the camp educational advisers and recommends to the Secretary of War the outlines of instruction, teaching procedures, and types of materials for use in the camps.

It maintains the largest library in the United States devoted exclusively to education, containing approximately 205,000 volumes. The books in this library, including some 2,000 unpublished theses in education, are available by inter-library loan to students and specialists in education, in all parts of the country. The library also prepares and distributes bibliographies on all phases of education.

OTHER FEDERAL AGENCIES

Many other federal offices and departments besides the United States Office of Education carry on public education activities, as reported in *Federal Relations to Education*.¹ The Department of Agriculture, for example, conducts agricultural experiment stations, and extension work in agriculture and home economics, besides disseminating knowledge of interest to farmers through radio programs and free bulletins. The War Department is responsible for the Panama Canal Zone school system, as is the Navy Department for that of the island of Guam, the Department of the Interior operates the educational programs for Indians and for Alaskan natives, the Department of Labor sponsors naturalization classes for immigrants, supplying the textbooks therefor, and also approves American schools and colleges for foreign students.

THE EXPENDITURES FOR EDUCATION

For the year ended June 30, 1932, total expenditures for education in the continental United States, not including commercial and correspondence schools, amounted to \$2,968,010,400, according to statistics prepared by the Office of Education. Of this amount nearly three-fourths, 73 per cent, or \$2,174,650,555, was for public elementary (including kindergarten) and high schools, about 8 per cent, or \$229,563,702 was for private schools of similar grade, and about 18 per cent, or \$543,855,466 was expended by colleges, universities, and teachers colleges.

Emergency Federal Aids During the year 1933-34 for the first time in the history of public education in the United States, the federal government advanced funds directly to schools, or as wages to individuals engaged in educational work. For example, the government, through the Federal Emergency Administration of Public Works, made loans and grants for school building purposes, through the Federal Emergency Relief Administration it provided wages for needy college students, and for the employment of needy idle persons who were qualified to instruct adults, to work in nursery schools, or to teach in rural areas and in small cities, also through the Civil Works Administration it allotted funds for various school-improvement projects.

During 1934-35 similar federal assistance was extended to education. During the two years 1933-35, approximately \$133,000,000 of federal funds was allotted to nearly 1,000 non-federal educational institutions for building and improvement purposes, and more than \$60,000,000 was granted through the Emergency Education Program for rural school extension, literacy classes, vocational training, vocational rehabilitation, general adult education, and nursery schools. The Emergency Education Program of the federal government was continued during the year 1935-36.

In addition to the regular operating budget for 1936, the Office of Education has been allotted emergency relief funds amounting to \$1,983,000 to carry on the five following projects for the advancement of education in the United States:

- 1 A university research project to enable needy unemployed graduates of universities and colleges to engage in a variety of co-operative studies of important educational problems.

- 2 A public affairs forum project to give the country, in a number of other localities, a further demonstration of the Des Moines plan of adult civic education.

- 3 A study of opportunities for vocational education and guidance for Negroes in 34 states (approximately 150 communities) to be used as a basis for improvements.

¹ *Federal Relations to Education*, prepared by the National Advisory Committee on Education. 1931. Washington, D. C.

in standards of education for Negroes

4 An educational radio project to develop the potentialities of radio for education in the United States

5 A project in ten state departments of education to collect information about school districts as a basis for planning economies and improvements in the organization and administration of education

As another emergency activity, the Office of Education has also been allotted \$100,000 by the National Youth Administration for the purpose of administering surveys of youth

Education During the Depression Several years after the beginning of the prosperous era following the World War, the schools in nearly every community, especially in urban communities, began to develop at an unprecedented rate. Needed school buildings were erected, salaries of teachers were increased, the qualifications of teachers were raised, and many activities and services were added to the school program. The outlook was indeed bright for further advancement, but in 1929 the business world entered upon a period of economic depression. About two years later, the effects of the depression began to be reflected in the schools. At first only a school district here and there was seriously affected, but by 1932 the schools in practically every city and hamlet were feeling the loss of their usual income caused by uncollected taxes and decreased school budgets. In many communities regression set in, in other communities all plans for the development of the schools were halted.

Many rural school districts were faced with the necessity of closing their schools because of lack of public revenue, but beginning in 1933 federal emergency funds were authorized for the purpose of employing teachers to keep the schools open in financially embarrassed districts. During the year 1933-34, federal allotments for this purpose amounted to \$16,924,000.

From 1930 to the present (1936), school building construction has almost ceased in spite of the fact that thousands of new buildings are needed. Outlays for school

buildings and grounds decreased from \$371,000,000 in 1930 to \$59,000,000 in 1934, or a decrease of 84 per cent. The granting of federal funds by the Works Progress Administration has, however, enabled a number of school districts to launch school building programs.

There was a reduction not only in capital outlay but also in current expenses, which for the country as a whole amounted to 17.8 per cent within the four-year period 1930 to 1934. In several states the average decrease was between 30 and 40 per cent, and in some districts within these states the reduction amounted to as much as 50 or 60 per cent.

Decreased budgets for current expenses resulted in reduced teaching staffs and salaries, and in the elimination or curtailment of certain activities and services necessary for a modern educational program. These eliminations and curtailments included (1) special schools and classes, such as night, summer, and kindergarten schools, and schools for handicapped children, (2) staffs for specialized services, such as music and art, and health directors, (3) instruction in certain fields, such as music, art, home economics, and physical education.

Although within the past four years the schools have been financially handicapped, they are recovering. The situation has been carefully analyzed and laws have been enacted in many states whereby the schools may be more equitably financed. The schools are emerging from the depression with sharpened public and professional interest in education. There is evidence of an intention on the part of the public and educational administrators to outline more clearly the aims and purposes of the schools.

STATE ORGANIZATION OF EDUCATION

Since 1900 the relation of the community to the school has dominated not only American educational discussion, but also the large amount of school legislation in the several states. There is emphasis in certain states on the responsibility of the town for developing schools, in other states the

county is the unit. State supervision varies from nominal oversight to a strong central control. There are over 150,000 school districts in the United States, each of them acting as a quasi-corporation of limited powers, and most of them possessing the power to levy a "school tax." The State of New York is unique in the strength of its centralized control of all educational enterprise in the state. The state organization of education is still, however, in process of evolution, but the direction of progress seems to be away from the local township responsibility and toward the county system of organization with stronger state supervision.

Public school administrative units are organized and schools are established according to legal provisions of the several states, with the schools functioning under the supervision of state, county, and local officials. Each state has a plan for financing its schools at public expense, such plans vary in the method of raising revenue and apportioning it to the schools. The quality of education which the respective states attempt to provide also differs.

In all states, teacher training institutions are supported at public expense, except for certain student fees, also, practically all states provide in the same manner for universities and for colleges of agriculture and mechanic arts. The latter, however, benefit by considerable annual federal aid.

Charters conferring the power to grant degrees are issued by the state to many privately controlled schools, colleges, and universities. Regulations governing issuance of charters vary with the state. In general there is but slight provision for state control of these chartered organizations either at the time of incorporation or subsequently.

ELEMENTARY EDUCATION

In 1934 the public elementary schools enrolled 20,729,511 boys and girls in the kindergartens and the eight elementary grades which comprise the basic unit of the American school system. This unit serves the great majority of the population falling

within the ages of compulsory school attendance, indeed within this unit more than one-fourth of the citizens of the country complete their education. Since 1930, however, there has been a decrease of between two and three per cent in the actual number of elementary school pupils enrolled.

With the movement of population from rural areas to urban and suburban districts, increased demands are made upon the elementary schools to supplement home life and to supply recreation, health, and guidance services. Many school systems maintain cooperative relationships with other agencies such as libraries, parks and recreation departments, museums and art galleries, dental and other clinics, guidance and mental hygiene centers.

Although the organization and the curricula of the elementary grades are determined by the individual states and local school authorities, certain general trends are significant, such as the 6-3-3 organization, i.e., six elementary grades, three years of junior high school, and three years of senior high school. Such junior high schools are designed to meet the special needs of pupils approximately 12 to 14 years of age, and to discourage withdrawal at the age when school attendance is no longer compulsory. To aid the children's transition from home to school life, kindergartens are maintained by most of the large cities and in about one-half of the smaller cities. Moreover, there is a tendency to add pre-primary classes between the kindergarten and the first grade for those children who, chronologically eligible for first grade, are nevertheless incapable of learning to read. During the depression nursery schools have been established for children two to five years of age under the federal relief program to aid unemployed and needy parents. It remains to be seen to what extent these emergency provisions will be made permanent. There is a significant effort on the part of school administrators to retain many of the nursery schools, both as a part of the elementary school and as laboratories for high school students in pre-parental education.

Curricula, texts, and teaching methods

the results of such tests and measurements may be given full consideration, but it is a fundamental principle of vocational education that guidance service shall be continuous throughout the period of training.

In 1935, 1,247,523 youths and adults enrolled in vocational classes operated under state plans. Classified by broad fields of vocational training, this enrollment included in round numbers 329,000 farm youths and adult farmers taking vocational agriculture, 537,000 boys and girls and adult workers taking trade and industrial courses, and 381,000 girls and women taking home economics courses. State boards reported for 1934 over 1,100 different subjects taught in these vocational classes. As organized under the Act of 1917, evening school vocational programs have constituted one phase of adult education.

For 1935, appropriations to the states and territories for vocational education totaled \$10,251,603, and for vocational rehabilitation, \$1,097,000. These appropriations were made available for expenditure by the states on condition that for each dollar of federal money used, a dollar of state or local money would be expended for the same purpose. From year to year the states and territories have exceeded this requirement for matching federal funds. In 1935 even under the extraordinary pressure for economy, they expended \$19,917,943, or more than \$2 of their own money for each dollar of federal money used for vocational education, and \$1,216,120, or \$1.20 of their own money for each dollar of federal money expended for vocational rehabilitation. These expenditures in 1935 under state plans of federal, state, and local money totaled \$31,537,871, exclusive of expenditures of local communities and states for plant and equipment of vocational schools.

ADULT EDUCATION

General. In March of 1926, the American Association for Adult Education was formed to promote the interests of adult education by sponsoring studies, by issuing information, by furthering community projects in this field, and in numerous other ways.

Under the direction of an able staff, by means of membership dues, and by grants from the Carnegie Corporation, this Association has issued many books, has published quarterly *The Journal of Adult Education*, and has made possible studies of adult education in Brooklyn, Buffalo, Cleveland, and other localities. The activities of the Association have resulted in better opportunities for adults through the university and the school, the library, the museum, the theater, the radio, recreation, workers' education, alumni education, and Negro education.

The annual meetings of the American Association for Adult Education in May bring together the leaders of education for adults in all fields of endeavor, and the programs of the meetings result in notable contributions to the literature of this field. The Association issues an annual handbook³ and has also summarized the first ten years of its activities in *Ten Years of Adult Education*.⁴

When a specialist in adult education was appointed to the staff of the United States Commissioner of Education in 1925, the problems and the opportunities in the education of adults were brought definitely within the scope of active interests of the Office of Education.

It is estimated that during the year 1935 more than two million adults were enrolled in adult education classes under the Emergency Education Program. Other reports indicate that in addition to these Emergency Program enrollments the attendance upon most types of formal classes for adults increased in 1935 over the two preceding years. Further details may be found in the *Handbook of Adult Education*.

Parent Education. Parent education is one aspect of adult education which has now become integrated in the programs of many public and private institutions and agencies. This year (1935-36) brings to a

³ *Handbook of Adult Education in the United States*. Compiled under the auspices of the American Association for Adult Education. New York: J. J. Little and Ives Company.

⁴ Morse Adams Cartwright, *Ten Years of Adult Education*, New York: Macmillan, 1935.

close a decade of effort in parent education under grants from a large foundation through which the professional aspect of this work has been assured. Departments of the federal government, state departments of education, public schools, colleges and universities, organizations, churches, and various other agencies have instituted increasingly effective programs in parent education. Colleges and universities have trained professional leaders, sponsored research studies, and added to the literature in the field of parent education. The program of the Office of Education includes a project of assisting parents' organizations in developing educational programs. One specialist is engaged in studies of the progress of parent-teacher associations (known membership approaching 2,000,000), and of parent education.

EDUCATION OF SPECIAL GROUPS

In the American plan of education increasing emphasis has been placed upon the need of adjusting school organization and curriculum to meet the special problems of deviating and minority groups. Of outstanding importance among these are children who are exceptional by reason of intellectual genius, children who are found, upon clinical examination, to be under a physical, mental, or emotional handicap, the Negro population of the country, and other native and minority groups, such as the Spanish-speaking population of the Southwest, the Indians, and people in outlying parts of the United States. Each of these groups presents its own peculiar problems which many state and local school systems are attempting to solve for the welfare of the individual child and of the group which he represents.

Gifted children are assisted to some extent through special classes, individualized instruction, and special cooperative arrangements between high schools and colleges, but progress and adjustment in the public schools are less satisfactory for this group of children than for the handicapped.

Special schools and classes for seriously

retarded children who cannot profit by the instruction given in regular classes are an established part of local school organization in most large cities and in many smaller ones, and the methods for determining the requirements of children so retarded are becoming increasingly scientific. Provisions are also made for the crippled, the sight defective, the deaf and the hard of hearing, the speech defective, and for children of lowered vitality. Child guidance clinics organized in connection with city school systems or other agencies deal with serious behavior problems.

The education of Negroes in America must be considered in the light of the peculiar relation which the race bears to the body politic in order to appreciate the progress which has been made in recent years. Seventy years ago approximately 95 per cent of the race was illiterate, today nearly 85 per cent can read and write. Seventy years ago only a few thousand Negroes were enrolled in school, today two and a quarter million are enrolled in the elementary grades, 160,000 in high school, and approximately 30,000 in institutions of higher learning. The number of Negro teachers has increased during this period from a negligible number to nearly 60,000, with a corresponding improvement in their preparation.

Religious denominations and philanthropic agencies have been responsible for most of this educational advancement, although at the present time somewhat less assistance is being received from that source. Recently the public has turned its attention increasingly to the support of the education of Negroes as a matter of public concern. Before the World War there were fewer than a hundred public high schools for Negroes in the states maintaining separate schools for the colored and white races, today there are nearly 2,000. At the beginning of the World War publicly supported colleges for Negroes, enrolling less than 100 students, received annually from public funds about a third of a million dollars. Today such colleges enroll approximately 10,000 students and receive annually

Among other organizations of educational institutions whose names explain their purpose are the American Association of Colleges of Pharmacy, American Association of Dental Schools, American Association of Junior Colleges, American Association of Teachers Colleges, Association of American Colleges, Association of American Medical Colleges, Association of Urban Universities, National Association of State Universities, National Catholic Educational Association

AMERICAN COUNCIL ON EDUCATION

National cooperation for the national defense in 1918 led universities, colleges, and educational associations to form the American Council on Education. This organization proved to be so useful that it was continued after the War, and now includes as institutional members 317 colleges, universities, teachers colleges, and state and city educational departments, as constituent members 27 national educational associations, and as associate members 23 other national organizations with educational interests.

The Council is a central organ of cooperation and coordination which, without invading the autonomy of institutions and interests within the American educational system, has promoted concerted action in matters of common concern. The Council devotes itself to scientific inquiry in any field of education and to the stimulation of experimental activities by institutions and groups of institutions. Through conferences and investigations it seeks to clarify educational issues of national significance, to define problems and to enlist appropriate agencies for their solution. As a result of the exchange of opinion and the discovery of facts it fosters agreements designed to improve educational practice. In these ways, the Council, representing the educational institutions and organizations throughout the country, acts as a mobilizing force for the energies of the American educational profession. Further details concerning the Council are given in Appendix I.

COMPARISON OF NATIONAL SYSTEMS

The relationship of the years of elementary, secondary, and university education to the years of a student's age differs in the various countries of the world. An educational level attained in one country at a given age is not the same as that reached in another country. A baccalaureate degree is not a standard like a meter, even within a single country the baccalaureate degree may vary in character. The important thing is to know the purpose and character of the curriculum pursued by a student, and the quality of the work done by him. A measure of achievement, rather than of time spent in study, makes possible a proper adjustment of a student from one nation in the system of another.

As a rough indication of general practice in America at the present time it may be said that the French Baccalaureate *ès lettres* or Baccalaureate *ès sciences* is accepted for admission to the sophomore year of a standard college, the German *Abiturium* or *Reifezeugnis* is accepted for admission to the junior year of a standard college, the Spanish *Licenciado en filosofía y letras* is accepted for admission to candidacy for the master's degree.

EDUCATION AND THE DEMOCRATIC STATE

"Evidence abounds that parents consider both high school and college to be the places best suited for youth during the period that precedes initial placement in occupations. There is widespread belief that each added increment of 'education' of almost any kind contributes to advancement in the struggle for preferment. Organized education on all these levels represents the supreme attempt of American democracy to provide, at public expense or on private foundation, a complete preparation for life open to all, irrespective of religious, social, political, or economic differences. Colleges and universities have been made possible only through great sacrifice. Their founders have been actuated by a supreme faith in the value of education. The institutions have been dedicated to the perpetuation of

the best idealism of the time, together with the transmission of the approved knowledge, practices, and traditions. The publicly controlled institutions have paralleled the establishment of popular government and are recognized in organic law as well as in countless statutory provisions as essential to our form of civilization. The combined offering of publicly and privately supported institutions cares for some six million secondary school students and upwards of one million college and university students.

"It is easy to cavil at this growth in attendance, yet in no field of institutional activity that is peculiarly identified with our national life have our people been clearer in their determination to provide an educational opportunity equally open to all, which will express our ideals, and our national spirit. These institutions, secondary and collegiate, at first voluntary and more or less exclusive, have steadily gained in the affections of the public until now attendance at one or both levels is expected of almost everyone. No American com-

munity, local or state, has for long turned a deaf ear to the needs of its schools, elementary, secondary, or collegiate. The details of the picture may not be uniformly pleasing, but a fundamental faith in education is as much a part of the typical citizen of our country as is his determination to separate church and state or to maintain representative government. Churches, both Catholic and Protestant, have uniformly sponsored education. Labor and capital, farmers and tradesmen, North and South, East and West—all have been united under this belief. Millions of persons have been attracted to our shores by our educational opportunities. Our program of secondary and collegiate education is distinctively our own. Unless there is a fundamental change in our attitude, there is every evidence to suggest that the doors of American educational institutions will continue to swing wide."⁵

THE INSTITUTION

"The American college was founded to meet the 'spiritual necessities' of the new continent."¹ Not only the colonial colleges, but nearly all the colleges founded before the Civil War were organized, supported, and in most cases controlled by religious interests. Emphasizing the purpose of the college as an institution for the training of ministers and the development of Christian character through formal mental and moral discipline, Harvard College was founded in 1636, the College of William and Mary in 1693, Yale College in 1701, and the College of New Jersey, later to be known as Princeton University, in 1746. English colleges were the accepted model for these early colleges.

Graduates of the colonial colleges and leaders of the religious denominations followed the American frontier westward, establishing colleges like the "mother college" in the East. No less than 16 colleges were founded by Yale graduates before the Civil War, and Princeton claims that 25 colleges indirectly owe their existence to the efforts of Princeton alumni. Of the 182 permanent colleges founded before the Civil War, 17 were in Ohio, 16 in Pennsylvania, and 15 in New York. West of the Mississippi, the first permanent colleges founded were St. Louis University, 1818, and the College of Louisiana (Centenary College), 1825, in the Northwest, Willamette University, Oregon, 1842, and in the Southwest, California Wesleyan College (College of the Pacific), 1851.

During the latter part of the nineteenth century, influenced by continental universities, especially those of Germany, and compelled by the needs of American communities, the colleges began to liberalize their curricula. The free elective principle, modern languages and sciences, specialization and professional training, and individual responsibility for conduct were introduced in a number of colleges. The religious character of the institutions became less pronounced, and Harvard, in 1886, abolished compulsory chapel attendance. Upon the establishment of the land-grant colleges and the state universities in the latter part of the nineteenth century, state support and state control of colleges began to play an increasingly important role in the development of the American college.

Education of Women. Schools, academies, and colleges for young men were established centuries before society seemed to think it important to provide formal education for young women. As people became interested in the provision of adequate education for women they sought to have girls educated with boys in the existing schools. In the elementary schools, coeducation began in the late eighteenth century. By 1935, about 96 per cent of the pupils of American elementary schools were in co-educational institutions. In public secondary schools, coeducation is general but private secondary schools are almost all organized for separate education. In colleges, coeducation prevails in the West, separate colleges for women exist particularly in New England and the Atlantic states, North and South.

Between 1825 and 1875, the idea of

¹ Donald G. Tewksbury, *The Founding of American Colleges and Universities before the Civil War*, New York Teachers College, Columbia University, 1932, p. 55.

collegiate education for women was developing in several sections of the country. Emma Willard and Catherine Beecher, before 1830, protested against the type of education women were permitted to receive. In 1837, as the result of Mary Lyon's enthusiasm and energy in stirring the people of Massachusetts, Mount Holyoke Seminary was founded. Before the Civil War many southern state legislatures granted charters and the right to confer degrees to institutions for women.

The earliest college for women in the United States was the Georgia Female College (Wesleyan College) at Macon, Georgia, chartered in 1836 and conferring its first degrees in 1840. In the North the first chartered college for women was Rockford Female Seminary (Rockford College) in Illinois in 1849. In Ohio, Oberlin College when it was opened as Oberlin Collegiate Institute in 1833, admitted both women and men. In Wisconsin the Female Normal Institute and High School (Milwaukee-Downer College) was chartered in 1851 and given the right to confer degrees. Elmira College was chartered in 1853, Vassar, chartered in 1861, admitted its first students in 1865. After the Civil War came Wells (1868), Wellesley (1875), Smith (1875), Bryn Mawr (1885), Goucher (1888), all in the East, and in California, Mills (1885).

The state universities early opened their doors to women. Missouri in 1869, Michigan, California, and Illinois in 1870, Ohio State in 1873, and Wisconsin in 1874. Utah (1850), Iowa (1856), Kansas (1866), Minnesota (1868), and Nebraska (1871), were coeducational from their foundation. All state universities except the University of Florida now admit women to some part of the university, and Florida has provided a separate institution, State College for Women.

Of the privately controlled institutions, Cornell in 1872 opened its doors to women, Massachusetts Institute of Technology in 1883; Tufts College in 1892. Boston, Stanford, and Chicago have always been coeducational.

The coordinate college, a college separately organized for women but operating parallel with a college for men, is illustrated by Radcliffe, in which practically all the teaching is done by members of the Harvard faculty. When this institution was opened in 1879, it was popularly called the Harvard Annex. Others of this type are Barnard College of Columbia, H. Sophie Newcomb College of Tulane University, Flora Stone Mather College of Western Reserve University, and Pembroke College in Brown University.

In the graduate schools the education of women shows a similar historical development. The very expensive provision for graduate work cannot easily be provided in duplicate. Although some graduate work has been done in Bryn Mawr College and Radcliffe, most of the graduate opportunities for women, especially in training for the doctorate, have been provided by state universities and privately controlled universities such as Chicago, Columbia, and Stanford. In 1892 Yale and the University of Pennsylvania opened their graduate schools to women.

Definition. A "college" as defined by the National Conference Committee on Standards of Colleges and Secondary Schools in 1918 is an institution requiring for admission graduation from a standard secondary school, or the equivalent, and offering a four-year curriculum leading to the first degree in arts or science, of such character as to qualify for admission to a graduate school of recognized standing.

The three fairly distinct purposes or functions of the American college are preparatory, cultural or non-vocational, and vocational, according to Fred J. Kelly, Chief of the Division of Higher Education, United States Office of Education.

The desired outcome of that college work, the aim of which is preparatory, is largely facility in connection with cultural or vocational study. The desired outcome of that college work, the aim of which is cultural, is largely subtle changes in personality. The desired outcome of that college work, the aim of which is vocational, is largely knowledge and skill for meeting vocational

situations . The schemes of evaluating results of students' work in the three types of courses should be different. In the preparatory courses the test is, "Can he use it in the further study for which it is a tool?" In the cultural courses the test is, "Is he living it?" In the vocational courses the tests are, "Does he know it?" and "Can he apply it to vocational situations?"^{*}

The number of American colleges and universities listed by the Office of Education in 1936 was 928, in addition to 438 junior colleges and 262 professional schools. As explained in Chapter I, the Office of Education does not undertake to evaluate the work of institutions. The colleges themselves in voluntary associations have set up standards and, measuring institutions by these, have published lists of colleges approved or accredited by the several associations. In Part II of this volume 679 accredited institutions of higher education are described.

Types There are many types of colleges. Some are independent foundations, others are incorporated in universities. Some are state controlled, others are privately controlled by self-perpetuating boards of trustees. A large number of the latter are related, directly or indirectly, to religious denominations. There are colleges exclusively for men, colleges exclusively for women, coeducational colleges, in which men and women use libraries and laboratories at the same time, and attend classes together, coordinate colleges, in which women receive separate instruction and sometimes use separate libraries and laboratories but are guided by the same instructional staff as in the related college for men. The term "institute" is frequently used for an educational organization of college grade specializing in science and technology.

College Criteria In order to appraise institutions of higher education, accrediting organizations of various types have developed in this country. Such an agency as the Association of American Universities has formulated standards for accrediting those institutions capable of preparing students

for advanced study, the American Association of Teachers Colleges has accredited institutions on the basis of the quality of their work in preparing teachers. The regional agencies, such as the New England Association of Colleges and Secondary Schools and the North Central Association of Colleges and Secondary Schools, have developed standards for the appraisal of institutions within their constituent areas.

In 1923 the American Council on Education, through its Committee on Standards, an outgrowth of the National Conference Committee on Standards of Colleges and Secondary Schools, adopted and recommended to the various regional associations a series of eight standards defining the minimum requirements which should be observed in accrediting colleges. These standards included criteria for the admission of students, graduation, faculty, income, buildings and equipment, preparatory schools, educational practices, and inspection. This series, which attempted to define in quantitative terms the principles upon which institutions of high education should operate, was widely adopted.

Time passed. Doubt arose concerning the validity of such quantitative measures arbitrarily applied. And so in 1929, the North Central Association of Colleges and Secondary Schools established a Committee on Revision of Standards with the dual responsibility of evaluating the old type of standards then in use and developing new criteria for the measurement of institutions. For several years this committee conducted a comprehensive survey and in 1933 recommended to the North Central Association a series of criteria based upon qualitative rather than quantitative measures.

The significant factor in the development of the new criteria is the decision that an institution shall be accredited upon the basis of its announced objectives. Each institution is required to define these objectives. Criteria have been evolved which will indicate the manner in which the objectives are attained.

In the light of this progressive step in accreditation, the Committee on Standards

^{*} *The American Arts College*, New York: Macmillan Company, 1925, pp. 21-22.

of the American Council on Education recommended in 1935 that the Council discontinue the publication and promotion of the standards adopted in 1923. At the same time the committee voted an expression of sympathetic interest in the new qualitative

criteria of the North Central Association.

The implications of this development in criteria are illustrated in the following comparison of the old standards formerly used by the North Central Association and those recently adopted.

OLD AND NEW STANDARDS OF THE NORTH CENTRAL ASSOCIATION

OLD STANDARD *Admission*

The college shall require for admission at least fifteen units of secondary work as defined by this association, or the equivalent (It should however be noted that the Association has voted to permit its member institutions to accept 11 or 12 units from grades ten, eleven and twelve when these are organized as a senior high school.) These units must represent work done in a secondary school approved by a recognized accrediting agency or evidenced by the result of examinations. The major portion of the units accepted for admission should be definitely correlated with the curriculum to which the student is admitted.³

OLD STANDARD *Finances*

The college, if a corporate institution, shall have a minimum annual income of \$50,000 for its educational program, one-half of which shall be from sources other than payments by students, and an additional annual income of \$5,000, one-half of which shall be from sources other than payments by students, for each 100 students above 200. Such college, if not tax-supported, shall possess a productive endowment of \$500,000 and an additional endowment of \$50,000 for each additional 100 students above 200. Income from permanent and officially authorized educational appropriations of churches and church boards or duly recognized corporations or associations shall be credited to the extent actually received as 5% income toward the endowment requirement, but to an amount not exceeding the average annual income from such appropriation in the preceding five years, provided, however, that this shall not apply to more than the amount required in excess of \$300,000, and provided, further, that colleges electing to qualify under this interpretation be subject to annual review for accrediting.⁴

NEW CRITERIA *Induction of Students*

The policy of an institution in admitting students should be determined on the one hand by the purposes of the institution and on the other by the abilities, interests, and previous preparation of applicants. An institution should admit only those students whose educational interests are in harmony with the purposes of the institution and whose abilities and previous preparation qualify them to pursue the studies to which they are admitted.

In evaluating the practices of an institution in the induction of students, attention will be given to the provision for preregistration guidance in cooperation with secondary schools, to the criteria used in the selection of students, to the administration of the stated entrance requirements, and to the arrangements for introducing new students to the life and work of the institution.⁵

NEW CRITERIA *Finances*

The institution should provide evidence of financial resources adequate for and effectively applied to the support of its educational program.

The items of information to be considered in determining the adequacy of the financial support are the expenditure per student for educational purposes, the extent to which the institution is dependent upon student fees, the stability of the financing, as indicated by the amount of income per student from stable sources, and the avoidance of burdensome indebtedness, and the procedures in financial accounting and reporting. Necessary adjustments will be allowed for contributed services of instructors and administrative officers in Catholic institutions.⁶

GENERAL CHARACTERISTICS

Grounds and Buildings: For the site of a college, trustees have usually chosen land in the country or on the edge of a town where values made possible a generous allowance of space. In the beginning, "campus," the word usually applied to the college grounds, was an appropriate term for the wide unenclosed grassy space. The word has survived, even though the grounds are crowded with buildings and cities encircle and push in upon the universities.

The first American college buildings were Georgian in design, simple in line and detail. Sir Christopher Wren prepared the plans for the first building at the College of William and Mary, which is today the only authentic Wren building in the United States and the oldest academic building. It is included in the general restoration work recently done in Williamsburg, Virginia, by a private corporation supported by John D. Rockefeller, Jr. New England examples of early Georgian college buildings are Harvard Hall at Harvard and Connecticut Hall at Yale.

The classical form of architecture was used by a French emigré, Joseph Ramée, at Union College in Schenectady, and in 1819 by Thomas Jefferson at the University of Virginia. McKim and White, the architects who restored buildings of the University of Virginia after a fire, later designed buildings at Columbia University and New York University in the same classical spirit.

English Collegiate Gothic architecture, introduced in the late nineteenth century by two young architects, Walter Cope and John Stewardson, at Bryn Mawr, Princeton, and the University of Pennsylvania, greatly influenced the style of later college buildings. It is used at Yale, Chicago, and Duke, and at Northwestern on the McKinlock Campus, and at Michigan in the Law Quadrangle.

Definitely American types of architecture have developed at Stanford University where the buildings are reminiscent of the California mission, and at the University of New Mexico, where the style of the Indian pueblo has been adapted to modern use.

Finances. Sound financial management is of vital importance in so complex an institution as a college or university, and of course the depression has greatly complicated the problems. Inter-institutional exchange of information concerning financial practices has been extended and has proved very helpful.

Attention has been drawn to the value of comparable data and of standard forms for financial and enrollment data by the report of the National Committee on Standard Reports for Institutions of Higher Education.⁷

Financial stability may be measured to some extent by the amount of endowment funds in the possession of an institution, the amount of income received from various sources over a period of years, and the amount expended for the various functions performed by the institution.

The older and larger privately controlled universities possess large endowment funds. In 1935, Harvard reported such funds in the amount of \$128,827,000, at least seven of the Harvard endowment funds were established in the seventeenth century, as early as 1634. Columbia, in 1935, reported endowment funds of \$152,594,964, Yale, \$95,838,569, Chicago, \$59,478,904, Stanford, \$32,005,239, Duke, \$29,880,267, and Princeton, \$26,929,810.

The endowment funds of some of the privately controlled liberal arts colleges in 1935 were—Oberlin, \$17,093,699, Dartmouth, \$17,209,302, Vassar, \$8,800,000, and Bryn Mawr, \$6,400,000.

In endowed institutions the chief sources of income are student fees, endowment fund investments, and gifts and grants from individuals, boards, and foundations. In publicly controlled institutions government appropriations and tax levies are the chief source of income. The University of Texas found an unexpected source of income when oil, gas, and minerals were discovered on

⁷ National Committee on Standard Reports for Institutions of Higher Education, *Financial Reports for Colleges and Universities*, University of Chicago Press, 1935.

land belonging to the University. Through oil and gas royalties and mineral leases, the University endowment funds were increased by \$19,676,093.

In some standardizing associations it is the practice to estimate the value of the services contributed by members of religious groups on the basis of salaries paid to faculty and staff members of similar training and experience in other institutions, and to include such amounts in the statements of income and expenditures. This should therefore be borne in mind when considering the financial status of institutions controlled by religious groups. The amounts of income and expenditures reported in Part II for institutions controlled by religious orders frequently do not include the value of contributed services.

Gifts and grants from individuals, boards, and foundations, are a source of income that should be significant to students considering attending any type of institution, either publicly or privately controlled. Fund-raising for the support of higher education, both in the form of gifts for current use and gifts for additions to endowment funds and for plant additions, has become of such importance that professional agencies as well as individuals are employed for this type of specialized service. One of the largest professional fund-raising agencies reported in 1926 that nearly \$150,000,000 was raised through financial campaigns for the support of 67 institutions. Gifts were obtained from 491,893 donors, the average gift amounting to a little over \$300. For the four-year period 1930-31 to 1933-34, thirty-one institutions reported to the same agency the receipt of over \$165,000,000 from gifts and grants. This is an average of over \$41,000,000 a year.

Publicly controlled institutions are more frequently receiving additions to endowment funds as well as gifts for current purposes. During the four-year period mentioned above, the University of California received \$7,388,000 in gifts, the University of Minnesota, \$2,009,000, the University of Virginia, \$2,500,000. In 1935 the Univer-

sity of Michigan was the recipient of a single gift of \$6,500,000 for the Graduate School.

The current expenditures of a college or university afford another means of determining from a financial point of view something of the institution's worth. This is especially true if the expenditures are itemized according to the functions performed by the institution, and if those items of expense for the educational program are related to the number of students served by the program. Total annual expenditures reported for some of the institutions are as follows: Harvard, \$9,552,000, Yale, \$7,479,211, Chicago, \$7,345,537, Stanford, \$2,775,440, Princeton, \$2,750,499, Duke, \$2,669,616, Dartmouth, \$1,719,893, Vassar, \$2,200,000, University of California, \$12,736,019, Michigan, \$7,910,581, Minnesota, \$8,483,992, Ohio State, \$6,392,739, and Illinois, \$5,901,170.

Official and Unofficial Publications. The college catalog is a volume which contains the register of students for the preceding year and the announcements of courses, their content and value in terms of semester hours, the names of instructors, equipment of library and laboratory, provision for dormitory accommodations, and expenses, not only tuition but the cost of lodging, board, and other items. The president's annual report, published by the universities and larger colleges, contains a financial report, a statement of the progress of the institution and a review of the principal advances in policy during the year. The report usually includes detailed statements by the treasurer, the college dean, the examiner, the registrar, the health officer, and other administrators. Since the catalogs have become too bulky to be conveniently or economically used for general distribution, large universities publish and distribute without charge separate bulletins giving complete information concerning each college or school, and bulletins of general information. It is customary to issue well in advance of the beginning of the term a "time schedule" which gives the hour and place of meeting of each class as well as the

name of the instructor and the title and credit value of the course

In recent years colleges have undertaken to provide incoming students with handbooks containing excerpts from university regulations and general information important for new members of the college community. Student organizations, usually the local Y M C A , have instituted the practice of publishing a pocket volume, commonly called the "Frosh Bible." It contains not only official announcements and information of importance to the new student, but also statements concerning student activities—publications, dramatic and musical clubs, literary societies and fraternities—student yells, songs, athletic records, traditions, a glossary of local terms, and announcements of all the religious organizations in the community

The Calendar Each institution is a law unto itself concerning the academic calendar. There is, however, a fair degree of uniformity with respect to the beginning and ending of the academic year. In most institutions the academic year begins late in September and ends the middle of June. It is most frequently divided into two semesters, the first semester ending 18 weeks after the opening of college, usually the first week of February. The academic year includes a Christmas vacation, a spring vacation, and a long summer vacation, usually extending from the middle of June to late in September. Some colleges have instituted what is called the trimester system, consisting of three sessions, October–December, January–March, April–June. A few who deem it unwise to have an expensive educational plant idle for one-fourth of the year have followed the lead of the University of Chicago and established a four-quarter system. In these the summer quarter is an integral part of the university year. The quarter is 11 weeks in length with a week of vacation between quarters. Students may enter at the beginning of any quarter, or receive degrees at the end of any.

The Library: Many educators are of the opinion that the heart of the college is the library. During recent decades the college

library has undergone a change in function which has served to increase its importance as a part of the educational structure. This change has been due to several factors, among which are the increasing numbers of students attending colleges and universities, the growth in importance of the social studies, the advent of survey courses with their requirement of wide reading, the introduction of honors courses, and the emphasis on the necessity for enabling the student to continue his education for himself after his formal schooling is at an end.

This increase in the importance of the library has been recognized by the educational world. Evidence of this is furnished by the action of accrediting associations. At least one of these associations, as a result of an extensive study, has changed the purely formal and practically meaningless criterion for library service which heretofore served, into a carefully considered series of standards, the fulfillment of which will require from the college an expenditure of both money and thought which should result in a library able to perform efficiently the functions demanded of it by the modern institution of higher education.

The building which houses the library is important. It is significant when an institution provides for the housing of its books an architectural monument like the Low Library designed for Columbia University by Stanford White, but the monumental significance of the library building must be made secondary to its suitability for service. This has been achieved of late years in several important libraries among the universities—the Widener Library of Harvard, and the University of Minnesota Library, and among smaller colleges, in the library buildings of Reed College, Scripps College, and Elmira College, to name but a few.

The library should have clean, airy, and accessible stack rooms for books, and reading rooms that are quiet, comfortable, and well lighted, as well as carefully planned to provide space for the different types of undergraduate and graduate study.

The number of volumes in a library is significant. The Library of Congress in

Washington, D C , contained 4,992,114 volumes in 1936 The Harvard University Library includes 3,598,040 volumes, the Yale University Library has 2,400,000, Oberlin, 366,396, Princeton, 720,000, Vassar, 195,000, Haverford, 130,000, Chicago, 1,100,000 A well developed system of inter-library loan makes it possible for a library to borrow from the Library of Congress or another library rare volumes needed by a professor or an advanced student

Smaller colleges of a purely liberal arts character can be adequately served by smaller book collections The addition of graduate courses to an institution involves enormous increases in library resources Government documents constitute an important problem in their acquisition and use, a problem particularly pressing today, because such publications are essential source material in social science courses. Books for recreational or non-curricular reading require care in their selection and special facilities for their use

The number of volumes is useful in determining the character of the college library, but it can never serve as a basis for a final judgment concerning the adequacy of a book collection A college library must be considered in relation to the college curriculum, and to the non-curricular objectives of the institution Every course offered in college should be supported adequately on the book shelves, in the periodical room, and in the general reference room Only an inspection of the catalog and the shelves of a library can yield data really useful for the determination of its adequacy, approval by one of the accrediting agencies implies such an inspection

The number of current periodicals received is significant Contrast the number reported by universities in which research workers must have access to the latest journals in their field with the number received by institutions offering only a liberal arts curriculum of a college Yale, 13,000, Chicago, 5,000, Dartmouth, 1,500, Carleton, 441, Haverford, 200

The non-curricular function of the college library is receiving considerable emphasis

as the result of the feeling that the college should furnish to the student an opportunity for an acquaintance with the world of thought wider than prescribed by the curriculum, and best provided through reading It is also believed that the college should demonstrate to the student the value of the book as a leisure-time source of inspiration, enjoyment, and self-education This necessitates the provision of books carefully selected for their known values, the provision of space for their use under conditions somewhat less formal than those involved in curricular reading, and a program of quasi-instruction in the use and value of books as recreational instruments Browsing rooms and dormitory libraries are the outward evidences of this movement

A collection of books which is not used by the students for whom it is intended cannot, of course, fulfill its function The use of books in a college depends not only upon the teaching staff, who make the assignments in the classroom, but also upon the professionally trained librarian, who should be a master of bibliographical devices, and who should also stimulate and guide the student's interest in reading beyond the bare necessity of the curriculum

Formal courses in bibliography and the use of library apparatus are becoming a necessity in colleges and universities A study made at two western universities has demonstrated this beyond question It appears doubtful whether the somewhat sketchy program given in orientation week is sufficient It is probable that work of a more substantial character must be undertaken, either by the library or by some other department of the college

GOVERNMENT AND ADMINISTRATION

Trustees In America it is customary for colleges and universities to be controlled by a self-perpetuating board of trustees, formerly dominated by clergymen, now more frequently composed of business men These trustees elect a president and members of the faculty, formulate the statutes for the government of the institution, receive and invest funds for the use of the college, and

occasionally determine the development of educational policies. In some institutions membership in the board of trustees is determined by relationship to some religious body. Often there is provision for nominations by members of the existing board, subject to confirmation by a church board. Frequently a given number of alumni are annually elected to the board by the alumni association. In state universities a different form of control exists. The regents of a state university may be elected by the people, as in Illinois, or appointed by the governor, as in the states of Washington and Arizona. In Idaho, Oregon, Montana, Kansas, Iowa, Georgia, and North and South Dakota, all state institutions of higher education are placed under a single board. In the majority of states there are separate boards for the different types of institutions.

Officers The actual administration of the college itself is in the hands of various administrative officers. The most important single officer in an American college or university is the president. He has far greater responsibility and authority than has a German pro-rector, an English vice-chancellor, or a Scottish principal. On the character, intelligence, and energy of the president the efficacy of an American institution largely depends. In the larger colleges the dean is likely to be of more direct importance to the student than is the president, for it is the function of the dean to supervise all the relations of the individual student. An able dean makes a college desirable for the individual student. The registrar is in charge of admissions and is custodian of the student's academic record. The dean of men and the dean of women are consulting officers whose special province is the student's extracurricular activities and interests.

Faculty The college catalog affords information concerning the members of the teaching staff, usually called the faculty. In evaluating a college it is important to consider the distribution of professors, associate professors, assistant professors, and instructors among the departments. Fre-

quently a college takes advantage of the presence of some expert in its neighborhood and appoints such a person to give occasional courses of lectures on a part-time basis. The American college, unlike the British university, is likely to have several professors in a department, one of whom may be named head or chairman. The record of the training and experience of each member of the faculty can be learned from his degrees and the names of the institutions from which degrees were secured, positions previously held, membership in organizations like the American Academy of Science, the American Academy of Arts and Letters, editorial positions on scholarly journals, authorship of notable contributions to learning, and receipt of national and international honors. It is important to know also the teaching load of a member of the staff, inasmuch as the individual student is likely to derive the best results from study under an instructor who is not carrying an unduly heavy load, whether in number of students under his tutelage or in number of hours of instruction.

Alumni Organization of those who have been students is characteristic of American universities and colleges. In 1821 an alumni association was formed at Williams College and in 1840 at Harvard College. For many years alumni organizations were chiefly social, affording opportunity for reunion of friends. Sentiment determined even the use of the word "alumnus" instead of "graduate" for one who had received a degree from an institution fondly denominated "Alma Mater." The social purpose still adheres in the case of clubs like the Harvard Club of New York and the metropolitan university clubs, the latter including graduates of universities abroad as well as in the United States.

As alumni associations developed they proved useful not only in welding men together in friendship based on a common interest in a single institution, but in maintaining their interest in that institution. In many institutions, loyalty has expressed itself for many years in the support of athletic teams. Alumni have been influential in

providing efficient coaching and complete equipment, their interest has brought about large expenditures for the comfort of spectators in grandstands like the Illinois Stadium and the Michigan Bowl.

Gifts to the university have come to be a Commencement time activity of graduating classes. The class may unite to give a stained glass window for the chapel, or to establish a fund for the purchase of books for the library, or to contribute funds for loans, scholarships, or endowment. The custom of adding to the Commencement gift on certain anniversaries of graduation has become increasingly important, and has resulted in such funds as the Cornell Fund and the Dartmouth Fund. Alumni have been generous contributors also in campaigns to increase endowment funds, and today no campaign for funds for an endowed institution is undertaken without complete organization of the alumni.

Alumni secretaries have formed several intercollegiate organizations: the Association of Alumni Secretaries, in 1913, the Alumni Magazines Associated, in 1918, the Association of Alumnae Secretaries, in 1919, and the Association of Alumni Funds, in 1925. These bodies consolidated in 1927 to form the American Alumni Council, with three main divisions of the alumni task: the encouragement of the alumni office, the alumni fund, and the alumni magazine. The Council publishes a report of the annual conference each year, with the text of addresses, membership lists, and other useful data. In 1936 the Council had approximately 500 paid memberships, divided as follows: secretaries, 250, funds, 100, and magazines, 150.

One function of the alumni secretary is to prepare and publish a list of alumni. The alumni directory, which is an important official document in 140 institutions, contains the correct addresses of holders of degrees, and sometimes of former students not holding degrees. It is indispensable in a campaign for fund raising. The last issue of the *Yale Alumni Directory* is a volume of 1,132 pages, that of Harvard, 1,183, Michigan, 1,380. A few college classes pub-

lish quinquennial or decennial records of the achievements of members of the class, with photographs and biographies. Some of the older institutions also publish necrologies.

The medium of communication among the alumni is a magazine or paper published weekly, monthly, or quarterly by the alumni association or by the institution for its alumni. More than two hundred such publications are regularly circulated.

The influence of alumni has been felt not only in financial campaigns but in matters of educational policy. Between 1860 and 1870 a movement arose to bring about representation of alumni interest in governing boards, and since 1866 the Harvard Board of Overseers has consisted of 30 members elected by the alumni. The extent of the present practice may be understood by consideration of the boards described in Part II.

Alumni advisory bodies sometimes exist along with alumni representation on governing boards as at Brown, Williams, and Yale. These bodies may have a power of veto, or may have no powers beyond giving expression to alumni thought. Members may represent classes as at Beloit, or alumni clubs according to membership as at Yale. In some institutions such as California, and Vanderbilt, members are elected at large. The tendency seems to be to make the term of office five years. Occasionally this advisory function is lodged in an alumni board of visitors, who may conduct surveys, as at Bryn Mawr, California, Kansas, Lafayette, Ohio State, Wellesley, and Wisconsin. At California, reports are made to the alumni council, at Wisconsin, directly to the board of regents.

Alumni also cooperate with the employment bureau and appointment office in placing students and alumni in positions, temporary or permanent. The rapidly increasing emphasis on personnel methods makes this an important part of alumni activity.

From the point of view of the university it is desirable to have its graduates interested in study and criticism of the education received in the institution, and in contributing from professional experience

occasionally determine the development of educational policies. In some institutions membership in the board of trustees is determined by relationship to some religious body. Often there is provision for nominations by members of the existing board, subject to confirmation by a church board. Frequently a given number of alumni are annually elected to the board by the alumni association. In state universities a different form of control exists. The regents of a state university may be elected by the people, as in Illinois, or appointed by the governor, as in the states of Washington and Arizona. In Idaho, Oregon, Montana, Kansas, Iowa, Georgia, and North and South Dakota, all state institutions of higher education are placed under a single board. In the majority of states there are separate boards for the different types of institutions.

Officers The actual administration of the college itself is in the hands of various administrative officers. The most important single officer in an American college or university is the president. He has far greater responsibility and authority than has a German pro-rector, an English vice-chancellor, or a Scottish principal. On the character, intelligence, and energy of the president the efficacy of an American institution largely depends. In the larger colleges the dean is likely to be of more direct importance to the student than is the president, for it is the function of the dean to supervise all the relations of the individual student. An able dean makes a college desirable for the individual student. The registrar is in charge of admissions and is custodian of the student's academic record. The dean of men and the dean of women are consulting officers whose special province is the student's extracurricular activities and interests.

Faculty: The college catalog affords information concerning the members of the teaching staff, usually called the faculty. In evaluating a college it is important to consider the distribution of professors, associate professors, assistant professors, and instructors among the departments. Fre-

quently a college takes advantage of the presence of some expert in its neighborhood and appoints such a person to give occasional courses of lectures on a part-time basis. The American college, unlike the British university, is likely to have several professors in a department, one of whom may be named head or chairman. The record of the training and experience of each member of the faculty can be learned from his degrees and the names of the institutions from which degrees were secured, positions previously held, membership in organizations like the American Academy of Science, the American Academy of Arts and Letters, editorial positions on scholarly journals, authorship of notable contributions to learning, and receipt of national and international honors. It is important to know also the teaching load of a member of the staff, inasmuch as the individual student is likely to derive the best results from study under an instructor who is not carrying an unduly heavy load, whether in number of students under his tutelage or in number of hours of instruction.

Alumni Organization of those who have been students is characteristic of American universities and colleges. In 1821 an alumni association was formed at Williams College and in 1840 at Harvard College. For many years alumni organizations were chiefly social, affording opportunity for reunion of friends. Sentiment determined even the use of the word "alumnus" instead of "graduate" for one who had received a degree from an institution fondly denominated "Alma Mater." The social purpose still adheres in the case of clubs like the Harvard Club of New York and the metropolitan university clubs, the latter including graduates of universities abroad as well as in the United States.

As alumni associations developed they proved useful not only in welding men together in friendship based on a common interest in a single institution, but in maintaining their interest in that institution. In many institutions, loyalty has expressed itself for many years in the support of athletic teams. Alumni have been influential in

providing efficient coaching and complete equipment, their interest has brought about large expenditures for the comfort of spectators in grandstands like the Illinois Stadium and the Michigan Bowl.

Gifts to the university have come to be a Commencement time activity of graduating classes. The class may unite to give a stained glass window for the chapel, or to establish a fund for the purchase of books for the library, or to contribute funds for loans, scholarships, or endowment. The custom of adding to the Commencement gift on certain anniversaries of graduation has become increasingly important, and has resulted in such funds as the Cornell Fund and the Dartmouth Fund. Alumni have been generous contributors also in campaigns to increase endowment funds, and today no campaign for funds for an endowed institution is undertaken without complete organization of the alumni.

Alumni secretaries have formed several intercollegiate organizations: the Association of Alumni Secretaries in 1913, the Alumni Magazines Associated, in 1918, the Association of Alumnae Secretaries in 1919, and the Association of Alumni Funds, in 1925. These bodies consolidated in 1927 to form the American Alumni Council, with three main divisions of the alumni task: the encouragement of the alumni office, the alumni fund, and the alumni magazine. The Council publishes a report of the annual conference each year, with the text of addresses, membership lists, and other useful data. In 1936 the Council had approximately 500 paid memberships, divided as follows: secretaries, 250, funds, 100, and magazines, 150.

One function of the alumni secretary is to prepare and publish a list of alumni. The alumni directory, which is an important official document in 140 institutions, contains the correct addresses of holders of degrees, and sometimes of former students not holding degrees. It is indispensable in a campaign for fund raising. The last issue of the *Yale Alumni Directory* is a volume of 1,132 pages; that of Harvard, 1,183; Michigan, 1,380. A few college classes pub-

lish quinquennial or decennial records of the achievements of members of the class, with photographs and biographies. Some of the older institutions also publish necrologies.

The medium of communication among the alumni is a magazine or paper published weekly, monthly, or quarterly by the alumni association or by the institution for its alumni. More than two hundred such publications are regularly circulated.

information likely to be useful to the college in meeting its educational responsibilities.

ENTRANCE

Admission Requirements. In general, admission to college presupposes the completion of eight years of elementary school, followed by four years of secondary school or the equivalent of this training as measured by some form of entrance examination.

In practice, admission is either by examination, by certificate from an approved secondary school, or by some combination of these two methods. Recent studies on the relation between entrance requirements and subsequent success in college, together with the increasing necessity for limitation of enrollments and the opportunity for selection which such limitation presents, has led to the use of supplementary admission criteria such as rank in high school class, recommendations from high school principals and others, results of personal interviews, and aptitude and placement tests.

The Examination Plan. Prior to 1871 all applicants for admission to college were required to take entrance examinations. These examinations originally were devised and administered by each college for its own applicants. Most of those institutions in which admission is still on the basis of examinations are now associated in the College Entrance Examination Board.

This Board was organized in 1900 to consider educational problems involved in the formation and administration of college entrance examinations and to conduct them through organized cooperation with colleges and secondary schools.

In June, 1935, the College Entrance Board examined 15,394 candidates from 1,841 schools at 329 examination centers. More than half of these students were candidates for admission to New England colleges. Twenty-two foreign countries were represented by the students who took examinations. Argentina, 2, Austria, 2; Belgium, 2; Canada, 17, China, 34, Cuba, 12, England, 11, France, 18, Italy, 4, Japan, 6, Mexico, 6, Panama, 2, Peru, 2, Switzer-

land, 10, Syria, 2, Venezuela, 2; and six other countries each by a single representative.

The College Entrance Examination Board's annual bulletin of general information,^{*} explains the procedure and requirements for examinations in the following subjects. Biology, Botany, Chemistry, English, French, German, Greek, History, Latin, Mathematics, Mechanical Drawing, Physical Geography, Physics, Spanish, and Zoology. A ten dollar fee covers the examinations a student takes in any one year.

On June 20, 1936, the College Entrance Examination Board begins its examinations at the various centers listed in the *Bulletin of General Information for 1936*. In 1937, the examinations are to be given on June 21-26.

Many colleges not directly associated with the College Entrance Examination Board still offer and administer their own entrance examinations as a method of admission alternative or supplementary to the certificate plan.

In many states, too, examinations in secondary school subjects are offered by the state department of education and certificates of these examinations are generally acceptable for meeting college entrance requirements.

The Certificate Plan. The certificate plan of admission which was introduced by the University of Michigan in 1871 is based upon the premise that preparation for college can be measured by continuous testing of the student throughout his four-year course of study at least as accurately as by a single set of entrance examinations. This plan assumes further that the secondary school whose graduates are accepted on certificate has complied with various standards relative to preparation of teachers, library and laboratory facilities, classroom equipment, and conditions for and character of instruction. In most states the responsibility for setting up and administering

^{*} *College Entrance Examination Board Bulletin*, College Entrance Examination Board, 431 West 117th Street, New York City. Price 30 cents.

the standards to be met by the secondary school for the certificate privilege rests either with the state university or the state department of education. In a few instances the responsibility is shared by these two agencies. In addition there have developed a number of regional accrediting associations in which both secondary schools and colleges have cooperated to establish standards for accreditation.

Secondary schools complying with these standards are generally classified as "accredited." More or less uniformity exists in the standards set by these various accrediting agencies, and in practice a college will usually accept applicants from schools accredited by any recognized state college or regional association.

In a few states the state supported colleges are required by law to accept any graduate of an accredited state high school. While in all cases the first requisite for admission on certificate is graduation from an accredited secondary school, most colleges have set up certain specified subject-matter patterns for the applicant to follow during his high school course of study in order to be eligible for admission to college.

The subject-matter pattern which comprises the entrance requirements is usually describe in terms of "units." The National Conference Committee on Standards of Colleges and Secondary Schools has described a unit in this way

"A unit represents a year's study in any subject in a secondary school, constituting approximately a quarter of a full year's work.

"A four-year secondary school curriculum should be regarded as representing not more than sixteen units of work.

"This statement is designed to afford a standard of measurement for the work done in secondary schools. It takes the four-year high school course as a basis, and assumes that the length of the school year is from 36 to 40 weeks, that a period is from 40 to 60 minutes in length, that the study is pursued for four or five periods a week, and that under ordinary circumstances, a satisfactory year's work in any subject cannot be

accomplished in less than 120 sixty-minute hours or their equivalent. Schools organized on any other than a four-year basis can, nevertheless, estimate their work in terms of this unit."

The tendency in many school systems toward a reorganization of the upper grades of the elementary school and the secondary school into a "junior high school" (grades 7, 8, and 9) and a "senior high school" (grades 10, 11, and 12) has resulted in a restatement of the college entrance requirements in a number of instances, to include only subjects pursued in the senior high school. This has been true particularly in the area of the North Central Association of Colleges and Secondary Schools. In interpreting college announcements, it should be understood that there is no essential difference between the preparation required by the college which specifies 12 senior high school units and that of the institution that requires 15 or 16 high school units.

Although in the early years of admission by the certificate method it was customary for the colleges to specify almost the entire content of the preparatory course of study for its applicants, in recent years a definite tendency toward liberalization in these specifications has developed. Objective studies in this field have failed to show any significant differences in performance in college that can be traced to a particular subject-matter pattern of high school work.

Other Admission Procedures. A recent survey of modifications in admission procedures among member institutions of the Association of American Universities shows a definite tendency toward waiving all subject-matter requirements for applicants from the upper percentile ranks of their high school classes, and an increasing tendency toward the use of supplementary data such as the results of aptitude and placement tests in determining an applicant's fitness for admission to college.

Psychological tests to measure individual differences of students are now used by most colleges. In 1924, the National Research Council assembled a committee under the chairmanship of Professor L. L.

Thurstone of the University of Chicago to formulate a model scholastic aptitude test. In the autumn of 1924 this test was taken by 40,000 students in 121 colleges. Since that time a new edition of the *Psychological Examination*¹ has been prepared each year and in 1935 over 200,000 copies were used in more than 400 colleges and universities.

Psychological, intelligence, mental alertness, scholastic aptitude, and other such tests represent only one phase of the new emphasis on the importance of discovering the individual's abilities. The selective admission plans of Columbia, Dartmouth, Princeton, Stanford, and the University of Chicago include ways of learning directly and indirectly from the student, and from his teachers and others who have known him best the indications of his interests and qualities. It is not unusual to require a family physician's statement regarding the applicant's health, specific letters concerning moral qualities as known to teachers who have had an opportunity to observe them; a statement concerning the use of leisure; and a short autobiography, which has been especially valuable in revealing character, achievement, and ambition.

Entrance Conditions: Before admission requirements were generally agreed upon among the colleges, many institutions allowed entrance conditions. An applicant unable to qualify completely was admitted to the college on condition that he make up his deficiencies while pursuing his college course and before a certain date. With the definition of a "unit" and the length of the secondary curriculum, and with the extension of the list of subjects acceptable to the colleges, it is not difficult for a student to present the required total number of units. Colleges generally announce therefore that conditions are not allowed. In some colleges this refers only to conditions due to deficiency in total number of units. Conditions due to a student's inability to satisfy

the specified requirements as in mathematics or foreign language may be allowed if he is able to present a total of 15 units acceptable for admission. A condition in quantity is not allowed, sometimes a condition due to distribution of subjects is permitted.

Special or Unclassified Students: Most colleges permit mature persons (usually defined as not less than 21 years of age) to register as "special" or "unclassified" students. Persons so registered may become candidates for degrees, if they so desire, only by satisfying the usual requirements for admission as well as the degree requirements. They must be qualified to pursue work in the departments of their choice. Frequently such students are required to submit for approval a statement of their objectives in applying for special instruction, and detailed plans of study leading toward their objectives. Foreign students may be interested in the possibilities of this kind of classification, especially if they are expecting to enroll for a limited period of time.

Advanced Standing: A student who has spent a year or more in one college may, under certain conditions, transfer to another college at the same level, securing credit for the work done in the first institution. Such "advanced standing" may be allowed on examination, or assigned on the basis of a transcript of the previous college record. In accepting transfer students, colleges are accustomed to use the list of colleges and universities accredited by the state university of their respective states, the list of one of the regional associations, or the list of those approved by the Association of American Universities. In general, students transferring between such institutions receive credit "hour for hour" for all work completed if the quality of achievement was equal to that required in the receiving college. If, as it sometimes happens, a student has done work in one college which is not offered in the second, the latter may refuse to assign credit toward its degree. Sometimes only a part of the credit claimed may be allowed. This is particularly true in transfers between different types of colleges and

¹ *Psychological Examination for High School Graduates and College Freshmen*, prepared by L. L. Thurstone and Thelma Gwinn Thurstone, The University of Chicago.

institutions with distinctly different objectives. Even if the college from which a student comes has not been accredited by one of the associations acceptable to the receiving college, the student may be received upon his merits. In this case he is subjected to examination, formal or informal, for the purpose of determining the amount of credit which the receiving institution can permit him to receive for work previously done. After a probationary period, the student's advanced standing is confirmed. It is especially important for the student desiring advanced standing to do well in courses which continue work begun in the first college.

A letter of honorable dismissal is almost universally required for transfer. Although few colleges decline to issue letters of honorable dismissal for students with scholastic deficiencies, in general the following definitions of "honorable dismissal" and "statement of record" as formulated by the National Conference Committee on Standards of Colleges and Secondary Schools in 1913 are accepted:

"The term 'honorable dismissal' should be used to refer to conduct and character only, and honorable dismissal should never be given unless the student's standing as to conduct and character is such as to entitle him to continuance in the institution granting the dismissal. Furthermore, there should in every instance be given, in the statement of honorable dismissal full mention of any probation, suspension, or other temporary restriction imposed for bad conduct, the period of which restriction is not over when the papers of dismissal are issued.

"The term 'statement of record' should be used to refer to the recorded results of a student's work in the classroom, and this statement should in every instance contain all the important facts pertaining to the student's admission, classification, and scholarship. In particular, no partial or incomplete classroom record (for example, with failures omitted) should ever be given without clear evidence that it is partial or incomplete; if the student's scholarship has been such as to prevent his continuance in

the institution issuing the statement of record or to render him subject to any probation, suspension, or other temporary restriction, the period of which is not closed at the date of the record, a plain statement of any and all such facts should be included; and such information should be given as will make clear the system of grades employed, the number of exercises per week devoted to each course, etc."

Advanced standing assumes the equivalence of degrees from different institutions. The frequent measurement of progress in an American college, particularly in the completion of an individual course, facilitates the adjustment of students who migrate from one college to another. This migration takes place most commonly at the end of the first two college years. College examiners are experienced in evaluating the credentials of students from institutions abroad, and in case of necessity have at command the expert service of the United States Office of Education.

INSTRUCTION

Methods of Instruction The American college has given up the catechetical method of instruction based upon a single textbook. Instead of a body of principles to be memorized, the student, especially in the social sciences, has a mass of cases which must be inductively considered. Sometimes a large body of source material is assembled in a "source book" or in a "case book," but usually the student is given a bibliography and is expected to become familiar with all pertinent material available in the college library, a demand which makes important the ability to read rapidly and accurately, and to take notes clearly. Library cards or loose-leaf notebooks are favored by the American student because of convenience in carrying and in sorting. No limit can be set to the time required in preparing for a recitation. The average is possibly two hours of preparation for one hour of recitation. In a typical recitation the instructor guides a discussion of questions raised by the assigned readings. While thus informally developing his subject, the instructor at the

same time informs himself of the progress of his students. To test the promptness and fullness of their comprehension he resorts from time to time to reports prepared outside of the classroom and to brief written examinations, at the end of the course he is required to give a final examination which normally lasts two hours

Regular attendance is emphasized much more than in European institutions. Excessive absence leads to penalties

Among the required courses is English, which is fundamentally a course in rhetoric and composition. While studying the principles of the art of rhetoric, and especially their illustration in successful writings, the student submits "themes" for the criticism of the instructor in English. The latter writes his comment on each page and a general constructive criticism on the whole exercise. The instructor confers with each student concerning each theme. This conference is an important and valuable college engagement. The student, after conference with the instructor on the points criticized, revises or rewrites the theme and receives a grade not only on the original exercise, but also on his rewritten work. It is clear that the work in English is informal and directed to the individual.

The preservation of conditions which permit such informal discussions in a recitation and such resultant knowledge of the student's abilities is a concern of every college and of the accrediting associations. The latter have declared that classes of more than 30 students, except in the case of lectures, endanger educational efficiency. It is of course recognized that instructional methods differ with subjects and with the skill of instructors. Some subjects can be developed in formal lectures. In many universities and colleges some professors, especially skilled in presentation, lecture to groups of 60 to 150 students. In the University of California professors have been known to lecture to classes of 1,200 students. Obviously there must be found some way to measure the student's progress in such a course.

The "quiz section" is a subdivision of a

large class which ordinarily meets for lectures by a professor, this subdivision, made up of ten to twenty students in charge of an assistant to the professor, meets once, twice, or three times a week for discussion of points made by the professor in his lectures before the entire class, and for oral examination of members of the subdivision on the lectures and readings of the week. In a sense it is a use of the method of the scientific laboratory in the field of the humanities. Frequently members of the quiz section are expected to present prepared papers, and occasionally the assistant resorts to a written "quiz" or examination. Even in a class of hundreds of students the individual student, therefore, is expected to fulfill his responsibilities promptly, to bring his difficulties to the assistant in charge, and to submit himself regularly to testing of his progress.

There is a constant consideration of the progress of each individual. At regular intervals—usually four weeks—instructors send to the dean or registrar the names and current records of those students who are doing unsatisfactory work in their classes. Students are warned by instructor and dean, and helped in diagnosing causes of difficulties and assisted in removing them by personal advice and sometimes by invoking institutional regulations. In case of continued failure, marked by inability to secure certain grades or quality points at the end of courses, a student is placed on probation and subjected to a loss of privileges, such as participation in athletic competition and other student activities. Quality points or grade points are assigned on the basis of grades attained in courses. Colleges require a certain number of semester hours (quantity) and a related number of grade points (quality). If, after a period of probation, a student fails to secure the requisite number of grade or quality points, he may be asked to withdraw from college. This checking up of the progress of the individual college student with elimination on the basis of current records is completely different from anything in the European university or the American graduate school.

The great increase in the number of

undergraduates has compelled the colleges to adopt devices which will make available to administrative officers facts regarding the individual student which formerly came to their attention through informal personal acquaintance. Many schools on the elementary, secondary, and college level now prepare cumulative records covering observations of the personality, character, extracurricular activities, and other non-academic aspects of the student's history. Such a record when supplemented by complete files of the student's academic work and his standing on objective examinations becomes an excellent tool for instruction and guidance.

This analysis of the individual becomes the basis of the effort to develop him in college. The health record is essential in determining the extent of his educational and recreational program. Personnel officers—deans and advisers—as well as instructors, welcome every fact useful in guiding the student's development. Records which make significant data available for his professors and future employers are being developed. This is the special interest of the Committee on Personnel Methods of the American Council on Education

Organization of Curriculum: The first two years in the liberal arts college are frequently called the Lower Division or Junior College, and the last two years the Upper Division or Senior College, however, in few institutions have the functions of the first two years and of the last two years been completely differentiated. The use of the terms Junior College and Senior College implies a horizontal division either in the structure or the function of the two—the structural division being apparent in only a few institutions, chiefly state and urban universities. Most American colleges adhere to a closely related program of four years. Even in colleges announcing the upper and lower divisional structure an examination of the curriculum often reveals that organization on such a basis is not apparent in the curriculum or in the administration. The significant difference between the two levels lies in the character of the work offered or

expected. Since most progressive colleges allow the student to advance with his special interests as rapidly as his abilities allow, many students are well into the studies of their "field of concentration" before the close of the lower division period. The functional division therefore is much more often vertical than horizontal and is adapted to the needs of the individual student.

Having chosen his "field of concentration" or "major," the student, usually with the counsel of his faculty adviser, elects a group of related courses. The number of courses required in one department differs with student interest and with institutional requirements. In some colleges the student is required to pursue a "minor" or "minors" consisting of courses in another department. The "concentration" leads by natural transition into specialization characterizing the graduate school. While the first two years are more nearly related to the secondary school and the last two years to the graduate school, there is in most institutions no marked tendency toward cleavage between the two levels.

In some colleges students are permitted to begin professional studies in the third or fourth college year and to receive a baccalaureate degree at the end of the first or second year of professional training. This holds particularly in Law, Medicine, and Engineering.

The degree requirements established in each college are specified in Part II.

Orientation Courses: Orientation courses for freshmen include in general a study of the organization and administration of the institution, its educational objectives, the general content of the curriculum, description of the libraries including special collections, directions for using the libraries to the best advantage, some account of the laboratories and the best methods of securing results in them, general advice on methods of study, a discussion of causes of failure, the importance of diagnosis and remedial measures, methods of budgeting time and energy, the importance of preserving health, the wisdom of establishing social relations, general opportunities in the institution and

community for broadening one's self in art, literature, and religion.

In many institutions, a period known as Freshman Week is given to intensive study of the foregoing subjects before the regular college program begins. In some universities, such as Columbia, the orientation course becomes a fully developed study of current problems.

Honors Courses—Tutorial Instruction—Comprehensive Examinations During recent years American colleges in rapidly increasing numbers have adopted the British plan of providing Honors Courses as a special stimulus to superior students. The aim has been to encourage maximum endeavor, and to develop initiative, independence, originality, and self-reliance. Honors work has usually commenced with the junior year, at which time abler students have been challenged to elect the more difficult program. They have ordinarily been aided and rewarded by being given individualized instruction in seminars or tutorial conferences and relief from many, sometimes all, conventional requirements. Thus trust in their powers of intelligent self-direction has been demonstrated, and, at the same time, allowance has been made for individual differences. Honors work has commonly been integrated about some central core, usually some "subject" (such as English, Physics, or Economics) or a logically related combination of "subjects", and general supervision of a student's plans and progress has ordinarily been entrusted to some departmental or divisional representative. There has resulted a certain tendency towards increasing specialization. A further development has been greater emphasis upon terminal evidences of accomplishment, such as senior theses and final comprehensive examinations. The total consequence, it might be declared, has been to provide outstanding juniors and seniors with many of the opportunities and much of the atmosphere of graduate study.

A few colleges have gone further than those whose Honors Courses have just been described, in that they have offered to all students many of the advantages more com-

monly limited to the superior. Thus Harvard's tutorial system has, from its inception, offered every undergraduate intimate and usually individual contact with some faculty member, although special requirements and special freedoms affect "candidates for the degree with distinction." The University of Buffalo, after experimenting with Honors Courses for eight years, extended its tutorial plan in 1931 to all students, with a maximum of flexibility as regards details of operation in individual cases.

As has been suggested, Honors Courses and tutorial systems have been accompanied by waiving tests and examinations in regular courses, and by increasing employment of comprehensive examinations at the end of the senior year. The latter are designed to test simultaneously the student's grasp of essential facts and methods, his ability to think intelligently about significant problems, and his capacity to express his views cogently and lucidly. Oral as well as written examinations are often administered, and Swarthmore has laid much emphasis upon the exclusive use, for such purposes, of examiners from outside its own faculty.

Colleges which have established Honors Courses and related educational devices report numerous desirable consequences, including (a) an increasing willingness on the part of gifted students to endeavor to establish their claims to distinction, and an increasing success, on their part, in these efforts, (b) a distinct raising of the level of undergraduate instruction, and a consequent stimulus to good teaching, (c) an improved relationship between faculty members and students, and (d) a growth in the percentage of able students who go on to graduate study.

Among the pioneers in the movement under discussion were, in addition to the colleges already mentioned, Princeton, Reed, and Smith. By 1930 some type of Honors plan was in use in more than a third of the universities and colleges comprising the approved list of the Association of American Universities. Two years later, in

an exhaustive study of changes and experiments in liberal arts education, the National Society for the Study of Education listed 100 institutions offering Honors Courses, ten of which provided tutorial instruction, and 68 of which required comprehensive examinations.

PERSONNEL PROCEDURES

As yet there is no unanimity in the definition of the term "educational guidance." President Wilkins of Oberlin implies the need for a broad definition in his statement that a student's "central experience is curricular; but his whole life for the time being is lived in the college community, and that life teems with a bewildering variety of interests, of personal relations, of difficulties ranging from the financial to the inmost psychological."¹⁰ On the other hand, George E. Myers, Professor of Vocational Education and Guidance at the University of Michigan, defines educational guidance as "a process concerned with bringing about between an individual pupil with his distinctive characteristics on the one hand, and differing groups of opportunities and requirements on the other, a favorable setting for the individual's development or education."¹¹ In this definition, he implies that the opportunities and requirements about which the student must make a choice concern only different subjects, curricula, schools, and extracurricular activities.

Different institutions have accepted different interpretations of the term "educational counseling" and therefore have different plans for administration of guidance programs. Usually the dean of men and the dean of women are the counselors. A large university often has a special dean in charge of guidance and a staff of assistants, as the Dean of Students in the College at the University of Chicago who is assisted by eight advisers. In some universities faculty members or graduate students serve as ad-

visers. Yale University has a Department of Personnel Study and Bureau of Appointments.

There are a myriad of duties that can be assigned to the counselors according to the interpretation of educational guidance accepted by the college. The personnel officer may have to initiate a study, or at least must understand available studies on academic incentives and penalties. He can supply information to break the lock-step that keeps the brilliant students to the pace of the average student. He may have to study the implications of student survival and mortality and the effect of the system of marks. He should be acquainted with educational opportunities open to all types of students, and their requirements. He may have a hand in the selecting of students for admission to the university. The counselor should understand the science of mental hygiene and remedial methods for problem cases. Often the counselor is also the disciplinarian though the trend is toward separation of these two functions. The planning and administration of orientation week for freshmen, investigation of financial need, and supervision of student activities are other duties which may be undertaken by the educational counselor.

In the field of occupational counseling the guidance officer can help each student understand himself in relation to occupations which may be open to him. The counselor must use all the devices available to him to know each student, his abilities, interests, personality, and experience, and on the other hand to understand the work-a-day world and the implications to the individual of our complicated economic system. Most universities have placement bureaus, the services of which are available to students.

The devices which make counseling a science rather than guess work are the different kinds of tests to determine capacities and interests, carefully constructed entrance examinations, high school records, follow-up records of graduates, and occupational analyses. The tests most frequently used by counselors are aptitude tests for

¹⁰ *The College and Society*, Century, 1932, p. 117

¹¹ *Relation Between Vocational and Educational Guidance*, University of Michigan, 1935, p. 112

intelligence, and for special aptitudes such as the University of Minnesota and the Detroit Mechanical Aptitude Tests, and achievement tests. Interest tests include the Strong Vocational Interest Test and the Thurstone Interests Inventory. Scrutiny of personality traits can be made through the Bernreuter Personality Inventory and the Hartshorne and May Tests in Honesty and Deceit. The studies of the requirements in ability, training, and experience for specific jobs and professions are called occupational analyses. Many such analyses have been made and are available to counselors.

HEALTH PROGRAM

Educational authorities in this country have for many years shown a varying amount of concern over the physical welfare of students. They shared a conviction that health was dependent upon physical exercise, but they made almost no provision during the first half of the last century for either formal or directed exercise.

Little attention was given to student health until the 1850's when gymnasiums were built at Amherst, Harvard, Princeton, and Yale. These gymnasiums were commonly built from funds raised by subscriptions among students and friends. They were small, poorly equipped, and no trained teachers were provided. The one exception was at Amherst College, where, in 1860, a Department of Hygiene and Physical Education was organized and put in charge of a physician, Dr. Edward Hitchcock. He gave a course of lectures on personal hygiene, devised a plan of measurements and medical examinations, inaugurated a program of physical exercises and sports which extended throughout the four years, and treated the students who were sick. The Trustee resolution on this latter point was phrased: "It is distinctly understood that the health of the students shall at all times be an object of his special watch, care, and counsel." This was the first unified department that was established and supported by an American college and was the only one for more than 30 years.

The modern development of the work in health and physical education began in the early 1890's when two newly established universities, Stanford and Chicago, organized regular departments devoted to the physical welfare of students. The popularity and growth of intercollegiate athletics, however, retarded the establishment of unified departments with comprehensive programs in colleges and universities. Athletic fields, many gymnasiums, and a few college infirmaries were built, but usually there was no cooperation among those in charge of these facilities. The various units were conducted along independent lines and for widely varying objectives.

During the past 25 years, a strong movement to coordinate the services of medical supervision with the programs of exercise and clinical care has developed. In a few cases the intercollegiate athletic program has been included with these activities under the same university officer.

These programs of physical activities range all the way from special exercise for the correction of physical defects, through the intermediate grades of regular gymnasium exercise and intramural sports to the most vigorous forms of intercollegiate competition. The medical supervision includes not only the initial medical examinations and treatment of the sick, but follow-up examinations of the physically sub-normal and the normal. The physical welfare of the members of the intercollegiate teams is frequently supervised during the sport season by specially assigned team doctors.

During recent years the study and treatment of various types of maladjustments to which students are susceptible is being provided by a constantly increasing number of institutions. These conditions may be caused by family or financial troubles, social problems, illness, physical defects, or scholastic difficulties, and frequently lead to the development of anxiety states, neuroses, and in some cases true psychoses.

The American Student Health Association which now has a membership of over 120 colleges and universities has been an important factor in impressing upon

educational authorities the desirability of making provision for the protection of the physical welfare of students.

RESIDENCE

Residence Requirements As used in the United States, "residence" is a term which refers primarily to the regular full-time attendance upon courses of instruction offered by members of the teaching staff in the buildings of the college. The resident student may live in a college dormitory or may live elsewhere and go to the college campus only to attend his classes and use the library and laboratories. As a rule a college or university requires for a baccalaureate degree at least one academic year (nine calendar months) of residence work, usually the last year, in the institution which confers the degree. Advanced standing is allowed for residence work in other institutions. Students pursuing extension courses by correspondence or otherwise, even if they are living in or about the college, are not resident students, though a few colleges allow a limited amount of correspondence or other extension work to be counted toward the degree. No institution on the accredited list of the American Council on Education confers a degree for nonresident work only.

Residence is used in a secondary sense with regard to the requirements concerning lodging. Many institutions require students to live in the college dormitories. Sometimes all students not living at home or with relatives are subject to such a requirement, sometimes it is exacted of all women, sometimes all new students must live during their first year in a college residence hall. College catalogs, therefore, use the term *residence requirement* in two senses, pertaining to the amount of attendance on courses at the institution conferring the degree; and pertaining to lodging in college quarters.

The word is used in a third sense by some state universities in naming charges for tuition. Students who reside in a state pay no tuition, or a lower rate than that paid by nonresidents.

Residential Colleges. The establishment

of residential colleges at Yale, Harvard, and the California Institute of Technology provides in a large university or college the educational and social advantages inherent in small groups of students. The residential college plan at Yale is described as follows in the Yale catalog:

In the life of the colleges every undergraduate has opportunities for membership in a social unit, for participation in informal college games, and for frequent meetings with members of the faculty. Surrounded by the resources of a large University, the colleges offer the advantages of small student bodies and the directness of social relationship which characterized Yale a generation ago, before the advent of large and unwieldy classes. The colleges cooperate with the Undergraduate Schools of the University to evolve whatever combinations of formal and informal instruction will make the work of each undergraduate most interesting and effective. Through this effort should come a closer approach to the ideals of a university education . . .

Physically the colleges are self-contained, each with its own library, dining hall, kitchen, common rooms, squash courts, and accommodations for 160 to 200 students. Each college has at its head a Master who lives in the college. Associated with him as active Fellows are ten or twelve members of the faculty, some of whom reside in the college, and all of whom have rooms there in which to meet students. Attached to each college is a group of Associate Fellows who have a share in its life.

Recognizing the values of the residential college plan, a number of colleges and universities have encouraged Greek letter fraternities and sororities to adopt various features of it.

Residence Halls: When residence halls, usually called dormitories in the United States, are provided by the college, lodging in such a building is to be preferred because of the social and educational opportunities, and because the cost is likely to be lower than that of private lodgings. These residence halls may be large hotel-like structures as at Columbia, or smaller units like those at Princeton. Naturally there is greater intimacy in the smaller units, an intimacy which at its best is not unlike that of an Oxford or Cambridge college.

Sometimes, as at Harvard, new students are grouped together in a dormitory; and sometimes, as at Chicago, undergraduates and graduates, theological, medical, and law students live under the same roof, contributing to the education of each other.

In some universities women—especially those studying home economics—have conducted cooperative housekeeping dormitories with social success and with a saving to themselves financially

STUDENT FINANCES

Expenses Most institutions charge their entering students a matriculation fee, payable once only, ranging from \$5 to \$25. Tuition is calculated by the term, semester, or quarter, and usually is based on the normal amount of instruction allowed a student. In such cases additional instruction is charged for at a rate announced in the catalog. Many institutions, such as Columbia, have established a charge based on the credit-hour. Most state universities require no tuition fee, or a nominal tuition fee though they usually require supplementary fees of various amounts and kinds. Some state universities require the payment of tuition by students whose homes are located in other states. Laboratory fees, usual in all institutions, depend upon the course elected. A health fee, covering the charge for medical examination, dispensary service, and hospital care, and a student activities fee, assessed by the institution on request of the students for the support of athletics, publications, student union, and other student interests, are levied by many colleges and universities. In some institutions the number of separate fees has so increased that for the relief of the business offices they have been lumped into a single fee. In Part II the principal charges of each institution are specified. The living expenses of a student vary with the community in which he lives.

Awards and Aids: Scholarships, which are available in nearly every college, are annual grants of cash or credit, varying in amount from a part of the tuition charge to a sum covering tuition and living expenses, as-

signed on account of merit, including high scholastic attainments. A scholarship may be tenable for one or more years, continuance usually dependent upon the holder's maintaining a high record.

In many places a scholarship holder is required to render some service to the institution, such as assisting in a laboratory, marking student papers, or serving as a library attendant or as a clerk in an administrative office. Such awards, sometimes called "service scholarships," are really a form of student employment.

Awards to graduate and post-doctorate students are called fellowships and customarily are of sufficient cash value to cover minimum expenses through the academic year.

Financial aid from loan funds maintained at most institutions of higher learning is available to students as deferred tuition or as cash for emergency purposes. Interest charges range from nothing to full legal rates, such charges frequently do not begin until graduation.

In addition to the aids available in academic institutions, off-campus organizations administer funds usually in the form of loans to students.

Self-Support: The democracy of the American college is illustrated in the attitude of students toward those who work their way through college. The number of men and women who are engaged in remunerative labor while pursuing college courses is very large, in some institutions as many as 60 per cent of the men are employed. The college exhibits indicate the percentages of students employed. Reports of the college officers who place student workers show some unusual occupations: six men at one institution had regular employment as professional pallbearers; one student, an announcer in a broadcasting station, received a salary and developed a large circle of unseen friends who made generous gifts; another student, a pilot in the air mail service, managed to fit a severe flying program into his schedule of college appointments.

A few institutions have a cooperative plan like the "sandwich" plan in England

by which students spend alternate periods in the classroom and in the shop. The University of Cincinnati and Antioch College are the outstanding illustrations, somewhat different are the Ford Schools in Detroit which have interested many students from abroad.

Several colleges, particularly Berea College and Park College, have special industrial plans under which a large part of the necessary work about the college is performed by students, who in this way reduce their expenses to a comparatively small sum.

During the recent years of financial stringency, cooperative housing arrangements in which the student lessens expenses by contributing domestic services, have become increasingly common. Such houses now exist in at least 35 colleges, probably more.

A report on self-help among women college students presents the conclusions of a committee of the College Club of St. Louis after considering reports received from 190 institutions ¹²

While the facts here presented hardly warrant the drawing of definite conclusions, they perhaps embody some practical suggestions to the prospective self-help student. Such a student should probably have at least half her first year's expenses in cash when she starts off to her chosen college, and it is highly desirable that she have an equivalent amount each of the later college years. If she must be wholly, or almost wholly, self-supporting, she will therefore need a well paid and not too exhausting summer position each year (or a remunerative year intervening in her college course) in addition to what she can earn during the college year, and she will probably need to avail herself of some scholarship or loan fund opportunities as well. She should be certain of good health and ability to handle college work easily, if she plans to carry a full course while devoting much time to self-help. Three hours of self-help a day will, in any case, mean that her recreational activities at least will be seriously curtailed, and other things may suffer. In laying her plans she should remember that the

advantages of self-help accrue to the student who does a limited amount of it, and that its disadvantages are inherent in undertaking too much of it.

While these conclusions are probably generally applicable at most of the institutions included in this study, the wide variation between them is more important than their similarities, and it is essential that the prospective self-help student familiarize herself with conditions at the particular college or university she selects. Expenses vary widely, as do opportunities for earning money; at some institutions there are more jobs than workers, at others more workers than jobs. The rate of pay varies somewhat, the official welcome to the self-help student varies not a little, and not always in the way that might be expected. If she has a taste for business she should choose a college where agencies are not discouraged, for there she will certainly find a fruitful field, if she does not mind housework, she can find work at most of the institutions, while stenography is usable everywhere, though perhaps less in demand than housework. She will probably find herself at home more quickly in a college or university where there are a number of other women students like herself, but in general it will depend on her and not upon her college whether or not she succeeds in combining earning and learning into normal living.

In spite of the many opportunities for self-help, and in spite of the Federal Emergency Relief Administration student aid program under which the National Government has during some of the years of depression assisted needy youths to work their way through college, the needs of students still outrun the amount of aid available through self-help. These are some of the findings of the recent Student Employment Survey at Yale University.¹³

What are some of the problems which with us, and I assume with others, have too long been neglected? One of the first is the necessity for debunking impressions regarding how little college costs, and how easy it is to earn that little. We found through our recent Survey that the average gross cost to self-supporting students at Yale was about \$1,400 a year, exclusive of vacation and travel. Those who, by a scholarship

¹² Helen T. Graham, et al., *Self-Help for Women College Students*, Washington, D. C.: American Association of University Women, 1926.

¹³ Wm. S. Gray, *Provision for the Individual in College Education*, Chapter XVII, reported by Albert B. Crawford, University of Chicago Press, 1932.

covering tuition and a board job, had succeeded in eliminating these major portions which make up about \$800 of the gross cost, still had to receive from their families or from other sources outside the University the remaining \$600 or else earn this much more than board, by their own efforts. But not many students can earn during term-time more than board or its equivalent, or can count on netting toward their next year's expenses more than one or two hundred dollars during the summer vacation. Consequently these facts showed that no one ought to try to work his way through Yale or any comparable University without \$500 a year from home as the nucleus of his total budget. A really first-rate individual—and that means the *exceptional* boy or girl—can in all probability work his way through any college which lives up to the best American traditions and ideals. The trouble is, that encouraging those who are definitely *first-rate* invites on this basis too many who are only average or a little superior thereto, and whose aspirations, admirable no doubt, unfortunately exceed their capacity to carry the heavy double load of self-support and studies. The individual who can just barely keep up by concentrating his energies upon scholastic effort is not likely to keep up at all, no matter how worthy and earnest he may be, if he has to earn his bread and butter at the same time. We can allow a certain leeway here for his probably excellent motivation and determined efforts, there is, however, a critical point—with us approximately the top of the fourth quarter—where even this extreme effort cannot overcome the handicaps of mediocre academic ability, plus a heavy drain upon one's time and effort through outside employment. I emphasize this, because it seems to me that many of the most tragic cases of academic failure fall in this category, and the effort and earnestness of the individuals concerned is just what makes these cases so tragic. By all means let us continue to offer opportunities whereby students of outstanding promise—not merely as scholars but as citizens—may work their way through college, but let us not thereby tempt masses of average youths into a situation with which they will not be able to cope. Less conservatism in the figuring of college costs, and more in the estimates of earning possibilities, appears called for.

EXTRACURRICULAR ACTIVITIES

Chapel and Convocation: The requirement of chapel attendance is a heritage from the original purpose in the founding of Ameri-

can colleges by religious leaders for the training of ministers. The strictest obligations are those laid upon students in church institutions—those of the Roman Catholic Church and of some of the Protestant denominations. Students in residence halls at such colleges are frequently required to be present at brief religious services each day of the week, and to attend a service on Sunday. More commonly students are obliged to attend chapel three or four times a week, and still more usual is the requirement to attend one chapel service during the week. Many colleges, and a few universities such as Princeton, Chicago, Pennsylvania, Columbia, and Syracuse, have college or university officers appointed by the trustees as the dean of the chapel, or the dean of religion.

In church colleges the chapel service retains its distinctively religious character. In institutions requiring chapel attendance in which the student body is made up of representatives of many faiths, there is an inclination to lay emphasis on religious elements common to all denominations, sometimes this brings about a formalizing of the order of service, so that the only vestiges of a religious program are a brief prayer and the benediction. The purpose of the nonsectarian institutions in their chapel requirement is well expressed in the letter of Mr. and Mrs. Leland Stanford in establishing the University named for their son, "To prohibit sectarian instruction, but to have taught in the University the immortality of the soul, the existence of an all-wise and benevolent creator, and that obedience to His laws is the highest duty of man . . . while it is our desire that there shall be no sectarian teaching in this institution, it is very far from our desire to exclude divine service."

In those colleges and universities not requiring chapel attendance it is common to bring all students together at stated or special times in what is called an assembly or convocation. The program consists of administrative announcements and an address of general inspiration to good citizenship.

Although almost every institution provides an opportunity for worship, only when chapel attendance is compulsory is it noted in Part II of this book. The absence of a chapel requirement does not imply a lack of religious spirit or of an opportunity to express it.

Student Organizations Especially during the last fifty years students in American colleges have formed organizations for dozens of purposes, ranging from the promotion of intellectual, aesthetic, and religious interests to the carrying forward of many varieties of social and leisure-time activities. One large middle western university reports 204 student groups, exclusive of fraternities and sororities, and every college and university has its imposing quota.

In general these groups are of two types: those in which faculty members participate, and those which confine their membership to students. Typical of the first are clubs associated with academic departments, such as the Physics Club, the Cercle Française, and the Sociology Society. These groups meet regularly, usually twice a month, and while students manage the organization and direct the discussions, members of the faculty are present and participate more or less actively. In a sense these groups are curricular rather than extracurricular societies, since they are promoted by curricular departments.

Much more important in the life of the average student are the extracurricular organizations which are concerned with dramatics, publications, athletics, hobbies, student government, debating, political and economic discussion, religion, and social service work.

A growing number of institutions require that these organizations be sponsored by one or more members of the faculty and approved by a council or board of student affairs. Some also require that accounts be audited and that lists of members be filed with the administration. By means of these devices student groups are supervised, but student initiative is seldom hampered.

When large numbers of extracurricular

groups began to be organized by students during the last half of the nineteenth century many faculty members were opposed to them. In recent years, however, most educators have come to recognize their important contributions to the education of the student; some administrators are attempting to coordinate them more adequately with the formal work of their institutions.

Attempts are also being made by students to develop inter-college cooperation. The Y. M. C. A., Y. W. C. A., and other groups have long been nationally organized, but during the past decade student leaders have sought to develop national student unity upon social and political, as well as student problems. In 1925 the National Student Federation came into existence with a fairly conservative program. In December 1935, two left-wing groups, the National Student League and the student branch of the League for Industrial Democracy, merged as the American Student Union. It may be said in general that students continue to be interested chiefly in their local activities and groups rather than in larger political and economic problems and organizations.

The College Class Unlike the European university student who is known by the year of his admission, the American student becomes a member of the class which will be graduated four years later. He is classified in all of his college relationships as a member of a graduating class—even if, as sometimes happens, he takes his degree at another time. In college publications the numerals following a name refer to the class in college. John Smith, '92, is a member of the class of 1892, the year in which he received his bachelor's degree. In some institutions a member of the class who did not take his degree is marked thus: George Ray, ex-'92.

When the college classes were small and personal relationship with each classmate possible, the solidarity of a college class was notable. Despite the increase in enrollment, the spread of the elective system, and development of combined courses leading

into the professional schools, the tradition of solidarity has survived but the intimacies characteristic of earlier classes are to be found now in clubs.

Loyalty to a class is most conspicuous on alumni day in June, when graduates of an institution return to their Alma Mater to foregather with members of their college class. This loyalty finds expression not only in the carnival spirit of such a day, but in an organization which serves to keep its members in touch with each other, and often works to increase the financial resources of the college.

Class Initiation Fifty years ago when American colleges were small, compact, and homogeneous, freshmen became members of a body of students conscious of their unity. Upperclassmen, following a tradition from medieval times, cherished their prerogative of hazing new students. As the colleges became larger and diverse curricula were developed, the sense of group unity faded, and initiation practices began to disappear.

Early in the twentieth century the chastisement of freshmen gave way to class warfare between sophomores and freshmen in the form of push ball rushes, tugs-of-war, and cane rushes. In recent years these too have begun to disappear, and even freshman hats have vanished from most campuses. Small groups of students sometimes protest against these changes and attempt to "preserve the old traditions," but the initiation of freshmen by upperclassmen is rapidly becoming a thing of the past. Freshmen are now inducted by means of an orientation period which has become almost universal (See Orientation, page 31.)

Student controlled initiations have not, however, entirely disappeared. Organized groups, especially fraternities and sororities, continue to follow age-old patterns of inducing new students into membership.

Honor Societies Honors are awarded to students who attain high grades in all their courses, and special honors for distinction in the work of a department. In a large number of colleges the highest academic honor is election to the Society of Phi Beta Kappa, which is based primarily on

the grades attained, with some consideration of other qualifications. Other honor societies to which undergraduates are eligible are listed in *Baird's Manual of American College Fraternities*, fifteenth edition, 1935.

Fraternities and Sororities From earliest times American college students with common interests or backgrounds have joined together for social purposes. During the eighteenth and early nineteenth centuries, these organizations were primarily literary, and on every campus such societies as The Flat Hat Club at William and Mary, the Linonia Society at Yale, and the Philophusion Society at Brown were established for the "advancement of literature" and for the "promotion of friendship and social intercourse."

At first the societies were local and independent, but in 1780, one of them, Phi Beta Kappa, founded at William and Mary in 1776, granted a charter to a group of students at Yale, and the next year to another group at Harvard. Soon thereafter chapters were established at Dartmouth and Union College and in time at a large number of other colleges. Especially during the 1820's and 1830's the idea of granting charters to local societies took hold of the imagination of students, and groups were organized with nationalization prominent in the thinking of the founders. Through the decades others came into existence, practically all with Greek letter names, and today 75 national fraternities as well as 29 sororities sponsor from five to 110 chapters each. Sororities, patterned after fraternities, were first established in the 1850's.

Phi Beta Kappa after a few years became an honorary society and as such lost most of its social characteristics. Other fraternities especially since 1900 have generally neglected the literary interests of their founders and have put most of their stress upon social intercourse and the promotion of student extracurricular activities. They have continued, however, to be ritualistic and, with one or two exceptions, secret.

Despite considerable early opposition

from faculties and state legislatures, fraternities have flourished. They have grown in numbers and in strength especially since the decades immediately following the Civil War when they began to buy houses in which their members live. Today 4,526 fraternity and sorority units, 3,921 of which are nationally affiliated, house approximately 80,000 students. The chapter houses of these national organizations have been erected at a total cost of about \$90,000,000. All but ten per cent of national chapters occupy residential buildings.

Becoming, because of their houses, a physical as well as a spiritual part of the American college campus, fraternities and sororities are today the most important social centers for their members in the 418 colleges in which they are established. Their influence has spread into every crevice of college life, and one cannot possibly comprehend American higher education without considering them. A full description of fraternities and sororities will be found in *Barrd's Manual of American College Fraternities*.

Most educators and many fraternity leaders are intelligently aware of the complex problems caused by the growth of the fraternity system. Efforts are being made to remove some of the more persistent points of friction, and a plan is being evolved for an "audit of experience" in which both colleges and fraternities will participate. The proposal was approved by the National Interfraternity Conference at its twenty-seventh annual meeting held in November 1935.

College Unions A union, as defined by the Association of College Unions, is "an organization in any college or university composed primarily of students whose purpose is to further and promote social, educational, and cultural activities."

In some universities the unions are open to both men and women. In others where only men may belong to the union, the women students have been provided with separate quarters, as the Women's League at the University of Michigan and Ida Noyes Hall at the University of Chicago.

The union may be open to all students without charge, or a small annual membership fee may be required.

The Association of College Unions is composed of unions in 37 colleges and universities. It offers an associate membership to institutions which are interested in developing the student union idea.

The Cambridge Union (1815) and the Oxford Union (1823) which began as debating societies and developed into fully equipped clubs, in which debating still persists, have been the forerunners of the American college unions. In the club house of the American college union one finds a lounge, a library, sometimes a cafeteria or dining hall, a barber shop, sometimes a swimming pool, billiard and pool tables, bowling alleys, game rooms, committee rooms, and rooms for dances or other entertainment. Houston Hall was opened at the University of Pennsylvania in 1896, the Harvard Union in 1899, the Reynolds Club of the University of Chicago in 1901, and the Michigan Union in 1904.

International Houses International houses and clubs provide centers for foreign and American students in many colleges and universities. Forums, lectures, receptions, teas, and Sunday night suppers are all part of the program to foster national groups of students who will interpret their cultures to each other.

On Riverside Drive in New York City, also at the University of California, Berkeley, California, and at the University of Chicago, handsome international houses have been erected by John D. Rockefeller, Jr., to serve as homes and headquarters for the international groups.

Dramatics. Especially in colleges and universities in which some sympathetic member of the teaching staff has aided the students, there has been outstanding success in play writing and producing. Professor George P. Baker's "English 47" Workshop, at Harvard University, has been the most famous. Later, at Yale, Professor Baker supervised the erection of a theater for the Yale School of Drama. The first Department of Drama, a school of acting,

direction, and design, was inaugurated at the Carnegie Institute of Technology in Pittsburgh, in 1913, and the following year a beautiful theater was built for the Department of Drama. At California, Stanford, Chicago, Iowa, Cornell, Northwestern, and North Carolina, students have creditable records in dramatic classes and clubs

The women's colleges have been leaders in the development of outdoor pageantry for which the students write the text, act the parts, and take entire charge of production. At the open air theaters of Iowa, North Carolina, Washington, Oregon, and Western, both pageants and drama are produced.

Latin and Greek plays are frequently produced under the direction of members of the related departments of instruction. Modern language departments encourage their students to produce plays in French, Spanish, and German. A deliberate attempt to stimulate folk drama has resulted in the writing and the production of excellent American folk plays such as Paul Green's plays at the University of North Carolina.

Music. Recognizing the value of music courses in secondary schools, many colleges are accepting one or more units in music as part of the college entrance requirements. Far more students during the past few years have been entering college with a rich experience in music as an art, and greater emphasis is being placed on the importance of music by institutions of higher learning. Approximately 70 universities, colleges, and conservatories give courses in music toward a bachelor of arts or a bachelor of music degree, and at least ten universities confer the master of music degree.

Appreciation of the best in music is fostered not only in the courses of instruction, but by the actual performance of music under concert conditions. The oldest music festival in connection with an academic institution is at the University of Michigan where for 44 consecutive years a music festival has been given with the assistance of the Boston, Chicago, and Philadelphia Symphony Orchestras. Among other schools that have presented festivals are Converse

College, Cornell University, and Northwestern University. The Eastman School of Music at the University of Rochester has sponsored unique festivals of American compositions. Many universities present a series of orchestral and miscellaneous concerts by visiting orchestras and by world-famous soloists.

Nearly every college or university has choral societies, and a few, such as the Harvard Glee Club, the St. Olaf Choir, the Augustana Choir, and the Northwestern A Capella Choir have won fame for the quality of their programs. Many of the larger universities have maintained student organizations which unite music and drama in the form of comic operas, usually written and produced by the students. The Mask and Wig Club of Pennsylvania, the Princeton Triangle Club, the Black Friars of Chicago, and the Mimes of the University of Michigan are typical organizations of this sort.

Student Publications Student publications in most of the colleges include a newspaper, daily or weekly, a humorous publication, a literary magazine, and an annual. The newspaper is managed and edited by students. Since both the business and the editorial responsibilities may be very heavy, the position of business manager or editor is one of great repute among students. In many institutions the newspaper is under the supervision of the school or college of journalism, as at the University of Missouri. In many places the student newspaper, with telegraphic news service as a member of a press association, functions not only as a university medium, but as a newspaper for the town. *The Daily Illini*, published by the students at the University of Illinois, is the only morning paper in the cities of Champaign and Urbana. Among other student papers that subscribe to telegraphic news service are *The Michigan Daily* of the University of Michigan, the *Daily Iowan* of the University of Iowa, and *The Oklahoma Daily* of the University of Oklahoma. College newspapers have joined in the creation of an intercollegiate press association.

The oldest and best known of student humorous publications is *The Harvard*

Lampoon. Some others are the Dartmouth *Jack O'Lantern*, the Iowa *Friol*, and the Utah *Humbug*. Those interested in understanding the attitude of the American student toward humorous publications will do well to remember that in no field is convention—as to subject and treatment—more firmly established and nowhere does youth more clearly exhibit its desire to be thought naughtier than it really is.

Literary magazines have existed as academic conventions for many years. In most universities literary publications are established by enthusiasts who keep them alive during their residence, but who cannot find in succeeding generations students interested in continuing the publications, consequently they rapidly appear and disappear. One reason for this lies in the desire of undergraduate writers to publish their creations in magazines of national circulation. Moreover, the old notion of a literary journal like that of a literary society no longer appeals to as many undergraduates. Literary expression is found in the plays prepared for dramatic clubs, the poems contributed to magazines and newspapers, or serious articles in publications like the *Virginia Quarterly*, or in some technical journal like the *Harvard Law Review*.

The college annual, a potpourri of art and letters, is a volume that has been known for generations in England and the United States. The chief purpose of the college annual is the preservation of a current record of individuals and of student organizations. Arizona calls its year book *The Desert*, Carnegie, *The Thistle*, the University of Southern California, *El Rodeo*; West Point, *The Howitzer*.

Several journals attempt to serve the students of the country as a whole. The two most important are the *National Student Mirror*, published by the National Student Federation of America, and the *Intercollegian*, published by the Y.M.C.A.

Athletics Athletics, a title which in the United States includes all sports, and not merely track and field events as in England, has long since passed from the condition of spontaneous unorganized play to a highly

developed, officially financed, and closely supervised division of physical education. To begin with, players had no coaching; then came the voluntary coaching of teachers and alumni. Now universities employ highly paid coaches whose services are used not only during the season of a sport but throughout the year. The Middle West, some 30 years ago, showed that the athletic director and coach might well be members of the faculty. This system gains favor every year.

Competition in a given region among colleges of comparable size has led to the formation of athletic conferences variously named and sometimes nicknamed as "The Big Three," or "The Big Ten." Where there is a commissioner, as in "The Big Ten," or where there are faculty representatives on a central board, direct influence can be, and has been exerted on the development of sportsmanship, the avoidance of professionalism, and upon many other phases of intercollegiate competition. For an understanding of the popular interest in college sports, it is only necessary to read the "sports page" of any daily newspaper.

For the attitude of professors toward the development of athletics in the United States, see the *Bulletin* of the American Association of University Professors, Volume XII, Number 4, April, 1926, and the report on college athletics published by the Carnegie Foundation for the Advancement of Teaching, Bulletins Number 23 and 24, 1929. Many coaches and physical directors are now taking the initiative in the study of the problems created by athletics, and there is a tendency to discover and to emphasize educational values.

There are major sports and minor sports. The former include football, crew, basketball, baseball, track and field athletics. The latter include swimming, water polo and water basketball, association football, lacrosse, hockey, golf, tennis, handball, squash, fencing, wrestling, boxing, gymnastics, outboard motor racing, shooting, and polo. Just as the oarsman of a varsity crew at Oxford is honored by the award of

his "blue," the member of an American team is awarded his letter, a large one for a major sport, with certain additional symbols for a captaincy or for more than one year of membership on a team, and for minor sports a smaller letter frequently of different design from the major letter.

There has been a marked increase in the development of corrective gymnastics, and of intramural sports which afford each student an opportunity to participate in some athletic competition. As a part of the health program in most of the American colleges, teams are organized to represent classes, fraternities, dormitories, class numerals or other symbols are awarded for distinction. Out-of-door recreation is general. The Dartmouth Outing Club, for example, is an undergraduate organization of 2,000 members. It owns sixteen cabins and seven shelters, the nearest one two miles from Hanover, the most distant 60 miles away. These are provided with blankets, mattresses, fire wood, kitchen utensils, and other essentials of a well equipped camp, always ready for members of the club engaged in tramping or climbing. Under its direction the winter sports culminate in a carnival in February in which contestants from all over New England participate. At Minnesota a similar winter carnival affords exhibitions of ice boating, skiing, hockey, and skating. Every college has tennis courts, usually with a hard surface; an increasing number have their own golf links.

THE JUNIOR COLLEGE

The junior college movement is a significant and in many respects a unique development in American higher education. The junior college, offering two years of education in advance of the regular high school course, is a product almost entirely of the twentieth century, while its greatest growth has come during the past decade. The enrollment (122,514 in 1935) in the recognized junior colleges of the country has more than doubled in the past seven years while the number of such institutions has increased 25 per cent in the same period.

Junior colleges are of a wide variety of

types, both publicly and privately supported and controlled. Historically some have developed as upward extensions of the public high school or of the private academy or seminary; others have resulted from the amputation of the last two years of small four-year colleges, especially some of those founded in the last century with more denominational zeal than educational foresight and financial backing, still others, especially in the Far West, have been independently established *de novo*. While pre-vaillingly a small institution, with an average enrollment in 1935 of only 235 students, there are sixteen, all publicly controlled, with enrollments in excess of 1,000, while the largest enrolls almost 5,000 students. Geographically they are found in all but four states, but pre-vaillingly in the Middle West, South, and Far West.

Many of the publicly controlled junior colleges are locally supported, but some receive substantial support from the state though retaining local control, while still others have been established and are supported entirely by the state. In some cases a substantial tuition is paid by the students, but in many of the stronger ones education is as free of cost to the individual student as it is in the local high school.

While the publicly controlled junior colleges are fewer in number than those under private auspices (only 40 per cent), yet they enroll over two-thirds of the junior college students of the country and their growth has been more rapid than that of the private type. Over half of the privately controlled institutions are under denominational auspices. The Methodists lead with 41 institutions, followed by the Baptists with 36, Catholics, 26, Presbyterians, 19; Lutherans, 16, and fifteen other denominational groups, with one to five each, 32. At least 27 junior colleges are Negro institutions.

The junior college is pre-vaillingly coeducational, since about three-fourths of them admit both men and women. Practically all of the publicly controlled institutions and over half of those privately controlled are coeducational. Over forty admit men only,

while about one hundred are limited to women.

Last year over 5,000 full-time and over 3,000 part-time instructors were reported in junior colleges, an average of 13 full-time instructors per institution, giving a faculty-student ratio of one to eighteen.

Of the entire group of institutions, 87 per cent are accredited by some state, regional, or national accrediting agency.

The fully organized junior college aims to meet the higher educational needs of the community in which it is located, including preparation for a university, general education for those not going to a university or equivalent institution, specialized preparation for particular occupations, and appropriate courses of college grade for adults in the community. The junior college offers a widely diffused, inexpensive, and convenient opportunity for two years of collegiate education in small units to thousands of young people who otherwise would be deprived of such an experience. It is an institution where intimate contact is possible with sympathetic instructors more interested in teaching and students than in research and specialization—an institution making transition easier from the guarded restrictions of the high school to the freedom and independent responsibility of the university or of life.

As an institution preparatory to further formal study in the university, numerous studies made during the past decade have shown that junior college graduates transferring to standard colleges and universities have been adequately prepared for upper division work and responsibility—that, on the whole, they have done their scholastic work satisfactorily and in many cases more satisfactorily than students whose lower division work was taken in the university.

Even more important, however, has been the opportunity the junior college has offered to the larger number of young people, high school graduates, who, because of economic or intellectual limitations, cannot and probably should not attempt or expect to complete a full college course. There is a considerable group of so-called semi-pro-

fessions between the trade school level and the professional level for which two years of college training are considered necessary and sufficient. These are especially numerous in the commercial, engineering, agricultural, secretarial, and health fields. In engineering, for example, a careful study has shown the existence of three positions on the semi-professional level for every one on the full graduate level. Except for certain proprietary institutions, the junior college has almost a unique field here, which has been fully developed only in a few schools but which is attracting increasing interest and is sure to be given much greater attention in junior colleges in the near future.

To other thousands of students who probably will complete their formal education at the sophomore level, the junior college offers an opportunity to contribute to better citizenship by providing two years of general education designed to promote broader and better social understanding in the courses that emphasize breadth, unity, and understanding. Curricula for "social intelligence" in the junior college are being designed to give the student about to complete his general education a unitary conception of our developing civilization.

As a local institution close to the tastes and needs of the community, the junior college also has a peculiar opportunity, which it is meeting in many localities, for conducting courses, both technical and general, for the adults of the community. With increasing technological unemployment, with increasing leisure whether voluntary or forced, with shortened hours of work, there is developing more and more a realization of the fact that education, especially for social citizenship, never can be and never should be terminated. In many cases the local junior college is particularly well equipped to meet this situation. All its resources of plant, of equipment, of library, of laboratories, and of staff can be used to correlate and to unify the general cultural needs of the adults of the community who have finished their formal education but feel the need of further

study, discussion, and stimulus to intellectual growth. In many cases the junior college has organized community forums for the discussion of political, social, and economic issues. In some junior colleges the enrollment of adults in courses organized especially to fit their needs is several times as great as the enrollment of regular students.

The junior college is not designed to supplant but to supplement the traditional American college and university. The educational needs and tastes in a country the size of the United States are highly varied. On the whole, the university is distinctly selective, while the junior college, open by law in many states to all high school graduates, is broadly democratic, offering the opportunity for at least two years of appropriate general education of collegiate grade at a minimum cost. It occupies a unique position in the American educational ladder, unquestionably higher than a glorified high school, distinctly lower than the scholarly specialization of the university. In a peculiar sense it may be termed the People's College. Undoubtedly it is a permanent addition to American higher education—a development which promises to popularize and “democratize” American collegiate education for the masses.

The following table which is a summary of the 519 junior colleges¹⁴ listed in the *Junior College Journal* by Doak S. Campbell, Secretary of the American Association of Junior Colleges, shows the extent of the junior college movement throughout the United States in 1935.¹⁵

¹⁴ *The Educational Directory of 1936 of The United States Office of Education* reports 438 junior colleges but does not include institutions enrolling less than 50 students. Mr. Campbell's report of 519 junior colleges includes all institutions recognized by the American Association of Junior Colleges as doing any junior college work.

Chapter III

The American University

THE COLLEGE IN THE UNIVERSITY GRADUATE STUDY THE GRADUATE
SCHOOL THE GRADUATE STUDENT TEACHER TRAINING EXPENSES
FELLOWSHIPS · PROBLEMS CONFRONTING GRADUATE SCHOOLS THE UNI-
VERSITY AND ADULT EDUCATION

In the United States a university is an institution of higher learning comprising a college or colleges of arts, literature, and science—historically the first part of the American university to come into existence—and professional colleges such as schools of law, medicine, and theology, and especially a graduate school of arts, literature, and science. Though the Ph.D. degree was first awarded in the United States in 1861 by Yale University, it was not until the founding of Johns Hopkins University in 1876 that emphasis in graduate study was shifted to research and the American university as it now exists came into being. In addition to schools and colleges devoted to instruction and research, the university includes divisions of laboratories, libraries, and museums, and sometimes research institutes and a university press.

Not every institution which calls itself a university measures up to this definition. Just as the founders of the University of Dublin expected that other colleges would be added to Trinity College as the University of Dublin grew, and certainly did not anticipate the fact that Trinity College, Dublin, would remain the only member of the degree-conferring University of Dublin, American optimists have sometimes given the name "University" to an institution which is, in reality, an undergraduate college around which the founders planned to develop a university. Many of the institutions entitled university in this volume are colleges rather than universities, thus designated with that sincere and buoyant hopefulness which characterized the University of Chicago, in 1892, when the Grad-

uate Quadrangle was so named although it as yet had only one side. In this case the four sides were completed in 1926, but in many institutions only the base stands for the completed figure. Some foundations, named universities in anticipation, have frankly recognized the title to be a misnomer, some of these have secured new charters in which the institutional name is changed to college. For the universities in the United States, see the list of Association of American Universities, Appendix II.

THE COLLEGE IN THE UNIVERSITY

Historically the college of liberal arts has been the center about which the American university has developed, exceptions are Johns Hopkins University and Clark University. In many the college is still the most conspicuous part of the institution. Obviously most of the functions, interests, and facilities of the college, as considered in the preceding chapter, are also common to the university. Specifically these include such topics as teaching, research, libraries, laboratories, personnel procedures, student life, and extracurricular activities, all of which have been discussed in Chapter II.

This chapter on the university is largely devoted to matters that go beyond the interests of the college, at the same time, however, specific treatment of the several types of professional study offered by the university is reserved for later treatment in Chapter IV.

Though the college in a university differs little from the independent college in the objectives toward which its degree program is directed, nevertheless the setting of the

former provides advantages in the form of intellectual enrichment and disadvantages in the form of administrative problems. Enrichment comes to the faculty of the college in the university through intimate association with scholars in the faculties of the professional schools, and it comes to the student in the form of programs of study in which subjects from a professional curriculum may be correlated with those in the college. For instance, a college student who is interested in economics may supplement his program with courses from the school of business, one who is interested in fine arts may enrich his program by courses in music or the graphic arts from the school of fine arts. Other advantages are more abundant library resources, and the influence of the large body of mature graduate students who are inspired by university ideals. On the other hand, administrative and curricular problems are more complicated in the college within a university whose professional schools require for admission less than the baccalaureate degree (i.e., two or three years of pre-professional collegiate training). In such an institution there are large numbers of students for whom specialized pre-professional requirements must be provided. The claims of these freshman and sophomore pre-professional students tend to disturb the balance of the well-rounded college. Occasionally, too, the criticism is voiced that in the college within the university the interests of the graduate students overshadow those of the undergraduates.

Two new developments of the college within the university are such general colleges as the General College of the University of Minnesota and the General College of the University of Florida. The former is an attempt to give a general education to those students who are not interested in, or not prepared for regular university courses; and the latter is an attempt to give a general comprehensive education to all freshmen and sophomores.

The independent college, particularly the small non-urban college, has been thought by many to have peculiar advantages. Acknowledgment and study of such ad-

vantages have led the college in the university to work out devices for accomplishing some of the same ends. The residential colleges at Harvard and Yale are outstanding examples.

GRADUATE STUDY

While no plan or scheme of grading or ranking graduate schools in order of their merit has been generally accepted, nevertheless several attempts have been made. One of the most ingenious of such efforts was that of a committee of the American Council on Education in 1933, under the chairmanship of President Raymond M. Hughes of Iowa State College of Agriculture and Mechanic Arts. This committee obtained the judgments of scholars in various subject-matter fields concerning those member institutions of the Association of American Universities whose graduate work in designated departments was acceptable or distinguished. For instance, those botanists whose names are starred in American Men of Science were asked to name universities in the Association of American Universities whose departments of botany were doing acceptable graduate work, and to designate those doing distinguished work. The report aroused much criticism, chiefly on two counts. That it included only those universities that belonged to the Association of American Universities, and that it was based on opinion rather than scientific objective data.

At present the most comprehensive survey of graduate study in the United States is that of Walton C. John of the United States Office of Education. He shows the number of graduate students as follows¹

NUMBER OF GRADUATE STUDENTS			
Year	Men	Women	Total
1890	1,973	409	2,382
1900	4,112	1,719	5,831
1910	6,504	2,866	9,370
1920	9,837	5,775	15,612
1926	20,159	12,341	32,500
1928	26,540	17,625	44,165
1930	29,070	18,185	47,255

¹ *Graduate Study in Universities and Colleges in the United States*, Bulletin, 1934, No. 20 United States Department of the Interior, Office of Education, p. 13

Since 1890 graduate enrollments doubled each decade until 1930 when the enrollment figure was more than treble that of 1920. In 1932 there were 78,120 graduate students,² nearly twice as many as in 1930.

The yearly totals of numbers of doctors' degrees earned, by subjects and by universities, are shown in the tables on pages 54-75.

Admission to the Graduate School: For admission to any graduate school in the Association of American Universities, an applicant must present a baccalaureate degree or its equivalent from an institution on the approved list of the Association of American Universities. A candidate who does not hold such a degree from a recognized institution is always considered on his merits. Such a student will be expected to present to the admissions officer of the graduate school the diplomas or other certificates in his possession, and a transcript of the record of his achievement in college or a similar institution. Inasmuch as the graduate schools are interested in developing students in some particular field, letters of recommendation from recognized authorities in the student's proposed field, if such letters are based upon personal acquaintance with the student's work and are expressed in specific terms, are especially helpful to university authorities in adjusting a student to his graduate work.

The American graduate school differentiates between admission to the graduate school and admission to candidacy for higher degrees.

Admission to Candidacy for Higher Degrees. Frequently the holder of a baccalaureate degree has credit for courses in foreign languages but does not possess enough facility in the use of languages to pursue investigation in his special field. Before a student is admitted to candidacy it is customary to test his skill in the use of these language tools. Formally or informally, the student's ability to express himself in the English language is tested. Furthermore, a student may be required to submit to an

examination, which may be an informal oral one, to measure his experience in the special field chosen. Some of the graduate schools which have already felt the pressure of numbers have proposed to select as rapidly as possible those who give promise of success in graduate work by requiring intelligence tests and full records of previous training and professional activities, and by refusing further registration to those who do not qualify for admission to candidacy within a definite period.

Requirements for the Master's Degree: In Part II the institutional exhibits give in detail the special requirements for the several masters' degrees. In general it may be said that the master's degree requires graduate study for at least one academic year (nine months). In a few institutions this time may be divided among successive years so that a student may satisfy the requirements by residence during successive summer quarters, or combinations of autumn or spring semesters with summer sessions. In practice the requirements vary with the departments, even in a single institution. In some graduate schools the minimum period of study is two academic years. Whatever the requirement may be, many students spend more than the minimum amount of time in preparation for the degree.

Although the graduate schools place their prime emphasis upon research and independent achievement in some special field, the graduate faculties in most American universities have carried over into the administration of the graduate school some of the educational bookkeeping which has characterized the American college. This is shown particularly in the departmental requirements for the master's degree, such requirements being in terms of required courses, both quantitatively and qualitatively. It is usual to require some 30 semester hours of work chosen from courses approved by the departmental representative. Of course, the principle of requiring progressively difficult courses characterizes the administration of the best graduate schools as it does that of the best colleges. In some

² U S Office of Education, *Biennial Survey of Education 1930-32* (1933) Part II, p. 28.

institutions a course is not counted for the degree unless the student receives a grade B. In others the student receives in a course only the grade "passed" or "not passed." In such institutions the quality of the student's work is tested in the examination for the degree and in the thesis.

The Master's Thesis: The character of the master's thesis varies with institutions and departments. In some graduate schools the master's thesis differs little from the doctor's dissertation. When this is the case a student intending to qualify for the doctorate sometimes takes the master's degree on the way, presenting for a thesis a section of what ultimately becomes the doctoral dissertation. As the number of candidates for the master's degree in American colleges has enormously increased in recent years the conception of the master's thesis has been modified in certain institutions. Some institutions do not require a contribution to knowledge but expect a competent presentation of existing knowledge in the form of a well written essay; others omit the thesis requirement entirely.

The Examination for the Master's Degree: This is a general examination distinct from the final examinations in courses pursued by the student. Only the student who is successful in his courses is admitted to the examination for the degree. This may be written or oral or both. In some institutions in which certain departments have many candidates for the master's degree, searching written examinations are required. In those in which few candidates come up at a given time, the departmental representatives conduct an oral examination. Sometimes a candidate is subjected to a written examination during one or two hours, and an oral examination which lasts not longer than one hour. The examiners include the chairman of the department and all other members of the faculty who choose to attend. The examiners are for the most part members of the department, professors who have had the candidate in their classes. In some institutions it is required that a representative of another department attend the examination and participate in

it. The use of external examiners, professors from other institutions, is not common.

The Degree of Doctor of Philosophy: The degree characteristic of the graduate schools of the United States is doctor of philosophy —Ph.D. Influenced in the first place by graduate work in the German universities, those responsible for the rapid development of American graduate institutions have formulated ideals and standards through the Association of American Universities, organized in 1900 by fourteen American institutions with a common interest in graduate study. The time requirement for the doctorate is not generally a matter of legislation but students rarely receive the doctorate in less than three years. A great many students take more than three years to prepare themselves not only for the examination but for a significant thesis. As in the case of the master's degree, requirements are sometimes stated in terms of courses which must be offered by a candidate, and in the distribution of these courses in a department or departments. Generally a student is required or advised to arrange his work with regard to a major and a minor, or minors. In any case, the record of achievement in a student's individual course is important chiefly in enabling him and his departmental advisers to measure the likelihood of his success in qualifying for the degree. The doctor's degree is never conferred on the basis of success in these courses only. Moreover, if a department sets up a minimum number of courses for the student, it does so with the distinct understanding that the student must not limit himself to those courses but must undertake by every possible means to make himself a master of his special field.

This mastery of a special field under the guidance of a particular professor or department may lead the student to undertake research away from the university from which he expects to take his degree. A candidate for a doctorate in Spanish language and literature may be required to spend a year in Spain. A candidate for a degree in botany may find it desirable to work under

the direction of a specially equipped department in another institution for a brief period, or may find it desirable to take advantage of the laboratory provisions in a marine biological station in the United States or abroad. A candidate for a doctorate in physics or chemistry may find it advantageous to pursue his investigations in some government bureau or industrial laboratory celebrated in his special field of research. Such migration for the purpose of getting the best available material or guidance is encouraged. It is usual to accept work done elsewhere, provided the work has been under supervision of the student's professor, even if it is done in an industrial plant or government bureau. Usually the last year of residence must be in the institution which confers the degree.

The Doctor's Dissertation. While pursuing studies which make him a master of his subject, the candidate for the doctorate, as he becomes familiar with the frontiers of his field, determines at what points he may successfully press into the unknown. If he can find for himself a thesis subject, he should be encouraged to do so. Initiative is one of the qualities of a research worker. The thesis must be agreed upon, however, in conference with the professor under whom he is working. He may find it inspiring and profitable to choose a phase of a problem already engaging the attention of his professor. In any event, it is important to select a dissertation subject as early as possible in order that courses may be elected which will contribute to the preparatory work on the thesis. Sometimes the dissertation may be so well organized that term papers submitted in the graduate courses can be used as chapters of the thesis. The student is expected to pursue his thesis subject with all of his power, sacrificing personal considerations to the end that he may discover some truth. Even if the long search proves to be fruitless, a student must not be discouraged. He must find a new subject and pursue it with persistent enthusiasm. When he is satisfied that his research is worth reporting to fellow workers in his special field, he organizes his dissertation,

under the criticism of his colleagues.

The doctor's dissertation itself cannot be measured in number of words or pages. Examination of dissertations presented in a certain field by successful candidates is possible because all dissertations are filed in the library of an institution and an exchange is maintained with those of other universities. In some universities, authorization for the loan of theses is required, either from the author, or from the dean of the graduate school, or from the faculty adviser under whom the thesis was written. Formerly it was required that the dissertation be printed. The mounting costs of composition and presswork have led many institutions to withdraw this requirement. At present most of the American universities require the deposit of a certain number of typewritten copies of the dissertation. There is a tendency to permit substitution of a printed abstract for the complete thesis.

A list of all doctoral dissertations accepted by American universities is edited annually by Donald B. Gilchrist for the National Research Council and the American Council of Learned Societies, under the auspices of the Association of Research Libraries. Of the 2,630 dissertations comprising this list in 1933-34, only 966 were categorically required to be printed by the universities accepting them, and another 698 may have been printed either in full or in part. Annual lists of doctoral dissertations in progress in the humanities and the social sciences are published in various scholarly journals. *American Literature*, a journal of literary history, criticism, and bibliography, publishes the list of doctoral dissertations in progress in American literature, *The Canadian Historical Review*, the list of graduate theses in progress in Canadian history and economics, *The American Economic Review*, the list of dissertations in progress in political economy, the Carnegie Institution of Washington, Department of Historical Research, the list of dissertations in progress in history, the annual bulletin of the Medieval Academy of America, the list of dissertations in progress or completed in the medieval studies; *The American*

Political Science Review, the list of dissertations in political science; and *The American Journal of Sociology*, the list of both doctors' and masters' theses in progress in sociology

The Examination for the Degree of Doctor of Philosophy. A graduate student is admitted to examination for the Ph D. degree when he has satisfied the dean of the graduate school and the department in which he is working that he is able to use whatever foreign languages may be required, that he can express himself proficiently in English; that he has displayed promise of success in independent investigation while pursuing graduate work. His mastery of the subject matter must be satisfactory to his department and he must have presented an original dissertation contributing to existing knowledge in his field. In some institutions this examination is given in two parts. The first part may be a written examination intended to test the extent of the student's familiarity with his general subject. If he passes this he may be allowed to present himself for the final examination. This ordeal normally takes three hours. The examiners may be any members of the graduate faculty, but in any case those members of the department who have been responsible for training the student. In some institutions and in some departments the examination is conducted with great formality, cap and gown being required. In other cases the chairman of the department has been known to use every possible means to set the candidate at his ease, contributing to the informality of the occasion by providing cigars or cigarettes to be smoked during the examination. It is customary for each examiner to press question after question for the purpose of testing the extent and depth of the candidate's knowledge of parts of his subject. Representatives of other departments are at liberty to participate and usually do ask questions of a general character. Some departments make a special point of the defense of the thesis. In American universities, however, this part of the examination which has been conspicuous in the program in the European universities since the Middle Ages, has already been

met in conferences during the preparation of the thesis. Obviously a sound and well developed thesis which has survived the long continued criticism of members of the department is a very important factor in the recommendation of a candidate for a degree.

Spurious Masters' and Doctors' Degrees:

The number of institutions conferring the masters' and the doctors' degrees is steadily increasing. In 1934, higher degrees were conferred by 210 privately controlled institutions, and 105 publicly controlled institutions. Some of these 315 colleges and universities are not accredited by any of the recognized accrediting agencies. Although 10 states have enacted laws against the conferring of fraudulent degrees, and 21 states have adopted other restrictions, the remaining 17 states place no specific restraint on the right of institutions to grant higher degrees. "In approximately one-half of the states the statutes provide little or no supervision over the institutions either at the time of granting their charters or after their incorporation."⁴ Securely within the law, it is possible for self-styled "universities" with a mailing room for a campus to bestow advanced degrees, flagrantly reducing both masters' and doctors' degrees to common currency. "During the period immediately preceding the World War, the demand for the Ph.D. and other higher degrees proved a temptation to a number of individuals who organized, under lax incorporation laws, universities that conferred these degrees primarily on the basis of monetary consideration. Little real work was expected or required. A great many of these spurious degrees were granted not only to residents in this country but also to residents of other countries."⁴

Some institutions of higher education are guilty of granting degrees far out of proportion to the size of the graduate school faculty. One institution, for example, with a faculty of 13 teachers, only four of whom were Ph.D.'s, in one year granted 48 masters' degrees and 22 doctors' degrees.

Choosing a University: In choosing a

⁴ U. S. Office of Education Bulletin, 1934, No. 8, p. 60

⁴ U. S. Office of Education Bulletin, 1934, No. 20, p. 55.

university for graduate study, the student in a particular field will want to ascertain the number of men of distinction on the faculty, the annual output of published research, the number of the staff who are on editorial boards of scholarly journals and who hold important offices in research societies, the library equipment, the available fellowships, the number of post-doctoral fellows in residence, the number of Ph.D. degrees recently conferred, and something of the scientific reputations of those who have obtained advanced degrees there. Such information can best be obtained from the institution by catalog, correspondence, or interview.

Summary Tables of Doctors' Degrees The tables in this chapter present, probably for the first time in a single publication, a statistical record of doctorates granted by universities and colleges in the United States from 1925 to 1935.

This information was compiled from three general sources (1) The records for the sciences for the period 1925-26 through 1932-33 were taken, with slight alterations, from *The Reprint and Circular Series of the National Research Council*, Numbers 75, 80, 86, 91, 95, 101, 104, and 105 (2) For the years 1933-34 and 1934-35 the records for all fields were taken from *Doctoral Dissertations Accepted by American Universities*, Numbers 1 and 2, edited by Donald B. Gilchrist for the National Research Council and the American Council of Learned Societies. (3) The records for the humanities, arts, and social sciences for the period 1925-26 through 1932-33 were prepared for the present volume by D. H. Daugherty, under the direction of the American Council of Learned Societies. Circumstances made it necessary to collect this information from a variety of sources including college catalogs, commencement programs, published volumes of abstracts, and bibliographies of dissertations furnished by deans, secretaries, and librarians.

The statistics for the first eight of the years covered in psychology, anthropology, and archaeology are from results of the latter investigation and not from parallel records

in the National Research Council reports.

In every case the statistical summaries are based on doctoral dissertations accepted. The scheme of classification followed is that used in *Doctoral Dissertations Accepted* and is intended to indicate trends in graduate research rather than to describe all the varieties of investigation sanctioned by the modern graduate school. From some points of view a more complex classification would have been desirable, but to have included here all the named fields of study would have been to destroy the purpose of this report.

The fields named have been arranged according to the order used in the Gilchrist tables: philosophy, religion, earth sciences, biological sciences, social sciences, literature, and art.

By doctorate was understood not only the Ph.D. but all of the earned doctorates described as being equivalent in quality to the Ph.D.

Entries by year are to be understood as being within the 12 months' period ending June 30 of the year named. Thus the period marked 1926 extends from July 1, 1925 to June 30, 1926.

Entries by subject have been made, where possible, according to the subject matter of the dissertation rather than the department in which the student majored. For example, a dissertation produced in a department of psychology may seem properly to belong under the heading, "education", or a dissertation produced in a school or department of religion may be relevantly listed under oriental studies or medieval history. However, in general, the subject matter of the dissertation was found to be best placed under the field of the student's major, and the tables, therefore, should be a reasonably dependable index of the mass production of doctors by university departments.

The subject, pathology, appears only in the first eight years of the report because in *Doctoral Dissertations Accepted* such studies were distributed among the fields of botany, agriculture, zoology, entomology, and medicine.

Another feature of graduate study is the growing number of those who are engaged in post-doctoral study. Dean R. G. D. Richardson makes the statement that "the number of Ph D's awarded in 1900 was 342, in the present year of 1935, according to the best estimate I can make, the number of American students who have received the degree and who are continuing to devote all of their time to their studies in universities and research institutions, exceeds that figure."⁵

In a few universities, graduate study privileges are given to advanced students who may not necessarily be working toward a degree. The new Division of General Studies of the Yale Graduate School is designed for graduate students who are preparing for careers that require a somewhat broader program of advanced study than is usually pursued by departmental students. Among those for whom this general type of advanced study is provided are individuals connected with libraries, museums, parks, forums, and other community and educational organizations.

The First Year of Graduate Study In selecting a graduate school, the student, having determined his department, seeks first a renowned teacher. At once the problem arises, will a great man be accessible to a first-year student? Who will actually instruct the graduate student in his early work and guide him into a special field for investigation? The accessibility of the famous investigator is affected by the character of his own investigation, and by his teaching obligations. The teaching load which is so important in colleges is even more important in the graduate school. Success in research and teaching inevitably brings about a heavy registration of students. A graduate course, and especially a seminar, to which first-year graduate students are not usually admitted, must have a membership small enough to permit personal direction of students by the professor. Already in American graduate schools the

registration in some departments is so heavy that it has been necessary to reorganize the departmental staff in order that the famous teacher may supervise through competent assistants. A distinguished scholar can inspire in all his colleagues—professors and graduate students alike—zeal for scientific research and enthusiasm for recruiting true researchers.

THE GRADUATE SCHOOL

The graduate faculty ordinarily is made up of those members of the teaching staff who give at least one-half of their time to graduate instruction or the direction of research. The executive officer of this group is the dean of the graduate school. Usually the administration of admission requirements is entrusted to the examiner or admissions officer in charge of such matters for the entire university, only special problems are laid before the dean or faculty. Many of the responsibilities carried by a college dean are naturally assumed in the graduate school by the chairman of the department in which the student is working, especially that of giving advice concerning studies. The student will do well, however, to keep in touch with the dean's office for the purpose of making sure that all credentials and other documents necessary for his admission to candidacy are promptly filed for consideration by the graduate faculty.

The Department Graduate students in American universities are allied to a particular department. Each department has great pride in the success of its own members, professors, former and present students. In the course of years the departmental organization has become very strong, and departmental pride very sensitive. Against the narrowing effect of this departmental organization certain institutions have undertaken definite measures by encouraging coordination of scholarly effort. Allied departments frequently meet as groups: social science, languages, earth sciences, or biological sciences. Some noteworthy achievements in research have been the result of such interdepartmental

⁵ *Journal of Proceedings and Addresses of the 37th Annual Conference, The Association of American Universities 1935*, Chicago: University of Chicago Press, p. 122.

cooperation; for example, in the departments of geology, astronomy, physics, and mathematics.

The Professor: The factor which chiefly determines the selection of a graduate school is the professor under whom a student desires to study and pursue investigation. The training and experience of such a faculty member is even more important than that of the college teacher. Ordinarily the person sought is known to the graduate student because of his contributions to the literature of his subject and the reputation gained by his scholarly achievements. If such a professor is unknown, however, his value to a graduate student may be estimated by various criteria. In the first place, his academic training is important. What was his college? Who were his teachers? What scholarship honors, such as membership in Phi Beta Kappa, did he receive in college? Even more important is his graduate training. In what institution did he pursue his graduate study? Under whose direction did he earn his degree? It is common to characterize a teacher or investigator as "one of Kittredge's men," "one of Dewey's doctors." Degrees are significant, as are fellowships held before and after taking the doctorate. A professor's general training and teaching experience can be found in *Who's Who in America*, the annual catalog of his university, and in the case of scientists, in *American Men of Science*. In the last named volume asterisks indicate the names of those whom their colleagues have voted the most distinguished scientists in their fields. The character of the institutions in which he has taught is important, and may be determined in ways mentioned elsewhere. Sometimes experience outside of the academic world contributes to the effectiveness of a professor. A teacher of economics whose special field is labor may have been a specialist in the Research and Planning Division of the National Recovery Administration, or an expert in charge of investigations for a United States immigration commission. Membership in learned societies, particularly an official position in such organizations, membership in foreign

academies, and receipt of distinguished honors like the Nobel Prize are indications of a man's reputation.

The research achievements of the professor are even more important than pedagogical skill or care in guidance. The spirit of the American graduate school is not unlike that of the universities of Germany: the entire strength of the professor and of the student is devoted to search for truth, the recruiting and training of scientists are secondary. Research achievement is indicated in part by book titles and by the character of journals accepting contributions. Publications, however, are not always a test. Departments vary with respect to practice in the attribution of credit for research. In some departments and in some institutions a professor, although he may have made significant contribution to an investigation while guiding his young colleague, may insist on publication of a report under the name of the graduate student, in other instances it is the custom to publish the article under the names of both the professor and graduate student. Men, moreover, have been inspiring investigators and leaders in research through the direction of their students rather than through publication of the record of their own achievements.

Research. Announcement of large gifts to universities, institutes, and associations for the encouragement of research are frequent. Research funds are not usually reported as such in university budgets, but included in the amounts allowed to departments. In the university a professor's responsibility to pursue research is emphasized. The president's annual report sometimes includes a statement of research in progress. In addition to the reports on such investigations by members of the permanent staff, there is an announcement of the titles of dissertations presented by candidates for the doctor's degree, and an occasional publication of the projects of graduate students. The National Research Council compiles annually a list of degrees conferred in the sciences by American universities. The National Research Council, the Social

Science Research Council, the American Council of Learned Societies, the Association for the Advancement of Science, the Association of American Universities, and other bodies have encouraged the spirit of research not only in the graduate school, but in the colleges where most of the doctors of philosophy find themselves teaching. Fellowships for doctors of philosophy qualified to continue research are provided by the Guggenheim Foundation, the Rockefeller Foundation, the National Research Council, the Social Science Research Council, and other agencies. These fellowships include substantial financial grants to outstanding students on the pre-doctoral and post-doctoral levels. The National Research Council, for example, awarded fellowships to 103 individuals in 1934-35 with a total grant of more than \$200,000. The Social Science Research Council has recently inaugurated a series of fellowships on the pre-doctoral level designed to encourage outstanding students to investigate social science problems.

Research institutes in which members of the staff, relieved of responsibility for teaching, give all of their time to research, have been created. One of the earliest and perhaps the best known is the Rockefeller Institute in New York City. Others are Carnegie Institution of Washington, the Wistar Institute of Philadelphia, the Mellon Institute at the University of Pittsburgh, the O. S. A. Sprague and the McCormick Institutes in Chicago, the Brookings Institution in Washington, including the Institute of Economics and the Institute of Government Research, and the Institute of Higher Studies at Princeton. Definite expression has been given to a fear that these institutes without responsibilities for instruction may unfortunately influence the training of the best type of research worker with the result that many excellent investigators and teachers may be drawn away from the recruiting and training of new researchers. Partly in consequence of this feeling some institutes have been associated with universities, as in the case of the Oriental Institute of the University of Chicago.

In government bureaus like the Bureau of Standards in the Department of Commerce, and many bureaus of the Department of Agriculture, and in many industries, a great amount of genuine research is in progress.

A list of 1,575 laboratories for industrial research is given in Bulletin 91 of the National Research Council, compiled by Clarence J. West and Callie Hull, and published in August, 1933.

Cooperative Research. Cooperation in research is encouraged through the National Research Council, Social Science Research Council, and the Council of Learned Societies. Although research probably must always be more or less the activity of an individual of genius, it is less individualistic in the United States and Canada than in some countries where research is primarily valuable as a means to promotion in a state system.

An outstanding example of such research is the Basic Science Research Laboratory of the University of Cincinnati. Organized in 1924, the personnel of the laboratory is made up of a well-balanced group from the several sciences (e.g., mathematics, physics, chemistry, biochemistry, and biology) who are able to work together cooperatively.

The laboratory started with an idea and some young men. Young men rise to adventure, flout the chance of failure, have reputations to make instead of to jeopardize, and, when carefully chosen, have hunches beyond the horizon.

The groups represent the various sciences. They teach each other their particular knowledge, build their apparatus, and, most important, pool their efforts cooperatively. It will be evident that in addition to the spear-head research undertaken, the Laboratory furnishes the undergraduate and graduate students involved a basic training obtained largely within their own group by interchange, as well as training in research from the conception of problems to the solution, including the development of new apparatus and the patient background study necessary to work in a number of scientific fields.⁶

⁶ Herman Schneider, Report of the Acting Director of the Basic Science Research Laboratory, *Report of the President, University of Cincinnati, 1934-35*, pp. 138-141.

Libraries: In choosing a graduate school a student of the humanities will be especially interested in the character of accessible libraries. In Part II will be found the total number of volumes in each university library, together with the number of periodicals currently received. The library becomes of supreme importance after the candidate's special field and thesis subject have been determined. It is to be remembered that the Library of Congress (see Appendix III) generously offers an opportunity to secure works not in the local library. With certain limitations this exchange operates among the university libraries. Students will desire to know community resources, which in the case of Washington, New York, Boston, Philadelphia, Chicago, and Los Angeles are excellent. Attention is called to the *Special Libraries Directory*, described in Appendix III. In addition to the collections of books, graduate students will be interested in the provision of cubicles, desks in the stacks, or reading room space, such provision is of course limited, and must be considered in relation to the number of graduate students desiring such facilities.

Laboratories The scientist is more important than his test-tubes and balances. Costly equipment is not in itself a guarantee of full and wise use of that equipment. Moreover, some ingenious scientists have achieved success in research with meagre facilities. Nevertheless it is useful for the scientist, even the college student of science, to know the character of equipment available for his study and research. This may be gauged in part by the building used for laboratory purposes, its cost and date of erection being in general significant for the convenience and completeness of its planning. The extent of the curriculum and the number of persons served by the building and equipment must always be kept in mind. Trinity College, Hartford, Connecticut, erected in 1888 the Jarvis Laboratory Building, devoted to chemistry and physics, at a cost of \$59,729.62. The Baker Laboratory of Chemistry of Cornell University was erected in 1923-24 at a cost of \$1,800,-

000. Obviously, one may suppose that the provision of laboratories at Cornell will accommodate a larger number of persons than the building at Trinity, and that the larger expenditure in a recent year has a relationship to the extent of laboratory arrangements for advanced study and research. Of course the smaller building of earlier date, doubtless frequently remodeled, may be entirely adequate for the number of students it serves and the laboratory work offered. The cost of equipment is likewise significant. The value of scientific equipment in all departments of the University of Pennsylvania, June 30, 1935, was \$953,597, a similar evaluation at the California Institute of Technology was \$965,800. It is interesting to observe the relative cost of building and equipment in various scientific departments, and to consider the relationship of laboratory equipment to the staff and students of the department and the curriculum offered. It has not been possible in this book to include a detailed account of the laboratories in all institutions. Such descriptions appear in the catalogs and circulars of the schools. These publications mention also funds available for the purchase of laboratory equipment needed for any special investigation. The figures given in this volume merely raise questions which can be fairly answered only by securing additional facts from the catalogs and presidents' reports.

Museums The museum is becoming an increasingly important adjunct of the classroom, the library, and the laboratory in graduate study. Members of the museum staff not only conduct courses in the university but, in their particular fields, supervise the work of candidates for the Ph.D. degree who study materials in the museum collections. For instance, the Fogg Art Museum of Harvard University serves as a laboratory for those engaged in graduate study in the Fine Arts at Harvard University and at Radcliffe College. The Fogg Museum is an integral part of the Fine Arts Department of the University, and through such intimate, close, and actual co-operation it has been possible for the

Department not only to make of its graduate students competent teachers, but to prepare them, as well, to be curators, directors of museums, critics, and connoisseurs

In addition, this Museum (and hence, the Fine Arts Department) is equipped to initiate graduate students into the field of technical research, because the director of the Museum and his staff have developed a course of specialized study in this important field. Furthermore, the associate director and his staff have developed a course in "Museum Work and Museum Problems" also designed primarily for graduate students, who are thus taught to approach the whole subject "through the object." In this course graduate students study the history, philosophy, and organization of museums, come to know public and private collections, scholars, critics, and dealers.

Moreover professional training, on the graduate level, for administrative positions in museums is offered in a number of universities, such as California, Harvard, Iowa, and Michigan

The University Press. The university press as an adjunct of scholarly research and instruction has been a development of the last forty years. In some institutions the press is a publishing organization which uses the printing facilities of some commercial printing house. In others the university press not only publishes but composes and prints its own books and journals. Among the important university presses are those at the following universities: Chicago, Columbia, Harvard, Johns Hopkins, Stanford, Yale, California, Minnesota, North Carolina, and Pennsylvania. The presence of such an organization has been a genuine aid to scholarly productivity. Graduate students, like permanent members of the staff, aspire to have their research published by the university press, either in books or in the learned publications issued by the institution.

THE GRADUATE STUDENT

The character of the graduate student body is an important consideration. Requirements for admission to the graduate

school are such as to make it possible that in the larger institutions there may be two general groups. Those interested in continuing work not unlike that begun in the third and fourth years of college undertake a certain amount of work leading to a master's degree in order to secure promotion and increase in salary dependent on such added "credits." Among these will be some genuinely interested in research but the presence of a large body of such students interested primarily in individual advancement in general culture, position, or salary, may interfere with the full use of libraries and laboratories by graduate students interested in research. It is important, therefore, to note the registration statistics in departments which interest the prospective student. These may be found in the president's annual report. It is particularly desirable to make sure that the number of students in a given department is not too great for the available library and laboratory facilities, and teaching staff. The character of the student body may be determined from the geographical tables which show local, national, and international registration. Usually the annual report of the dean of the graduate school or the register of students printed in the college catalog shows the institutions from which graduate students have received baccalaureate degrees. A graduate student may desire to associate with those who have been prepared at the best colleges. It must be remembered, however, that from the less well equipped colleges there may come a very capable individual. The graduate schools generally prefer to receive a first-rate man, even if he is a graduate of a second-rate college, rather than a second-rate man from a first-rate institution. In some reports additional information may be found concerning ages of students, professional experience, and the number of married students. Migration of graduate students is naturally commoner than migration among undergraduates. The graduate student interested in pursuing a subject has always sought the master of that subject in whatever institution he may happen to be,

or special facilities for the investigation of the subject wherever they are available in the United States or abroad

TEACHER TRAINING

The colleges and more recently the universities themselves are deeply interested in the proper training of those who must be not only masters of their subject and skillful independent investigators, but competent teachers. At present candidates for the doctorate frequently have an opportunity to teach elementary courses in their own department, sometimes under the supervision of senior colleagues expert in teaching. Indeed, the assistantship which affords a graduate student some financial aid in return for a specified amount of teaching is a well recognized form of both financial subsidy and teacher training. Each department is glad to have its promising candidates present papers at the annual meetings of the learned society. Attendance at these annual meetings and especially participation in them is recommended to all graduate students. Such annual meetings sometimes take on the appearance of an academic fair in which professors proudly put forward their best students for evaluation by other professors possibly interested in securing staff members. Of great importance also to the student desiring an appointment, especially in a university, is contribution to the literature of the subject in the form of books, monographs, or articles in one of the scholarly periodicals. Knowledge of the subject, publication, some teacher training experience such as an assistantship comparable to the internship in medicine are of special interest to appointing authorities.

EXPENSES

Tuition in graduate schools is very much lower than in colleges or schools of law, medicine, and engineering. The estimates of living expenses made in the institutional reports in Part II apply to graduate as well as undergraduate students.

In some universities residence halls are provided for graduate students. The beauty and convenience of the Princeton Graduate

Quadrangle are famous. In some institutions, Columbia, Chicago, and Harvard, for instance, there is provision for suitable living quarters for married students. Although the social environment of the graduate student is not a primary interest of the graduate school authorities who have assumed the German attitude toward such provision for students, some institutions have provided not only dormitories and apartments, but have encouraged the formation of social organizations among the wives of married students—University Dames—and in some cases have provided, in connection with the kindergarten and elementary schools of the school of education, nursery schools which admit the children of graduate students on equal terms with those of members of the faculty, and have provided graduate clubs like the student unions of the undergraduates.

FELLOWSHIPS

In every graduate school in addition to graduate scholarships, which usually include a stipend equivalent to the tuition fee, there are fellowships which carry awards varying from the amount of the annual tuition fee to \$1,500. A few postgraduate fellowships amounting to \$3,000 are available for those who already have the degree of doctor of philosophy. The general exhibit of each university in Part II indicates the number of fellowships and scholarships available. Full information about those of each institution will be found in the circular of the graduate school, and in special bulletins describing fellowships, scholarships, and other awards and aids. In all institutions represented in the Association of American Universities applications must be received before March 1, awards are announced April 1. Each institution issues its own application form, which may be secured without charge from the dean of the graduate school. Awards are made on nomination of each department after consideration of pertinent information. In some graduate schools it is still the practice to expect fellows to render some service as assistants in laboratory, library, or elementary

classes The present tendency, however, is to require no service of those appointed as fellows, and to afford additional aid to others through the establishment of assistantships which afford a graduate student an opportunity to earn a moderate stipend in return for some teaching in a special field. Such assistants in the work of the university are likely to find the burden of instruction interfering somewhat with progress in their graduate work. Some professors disapprove of such a program except in cases of sheer financial necessity, favoring rather a resort to loan funds which have been established in most institutions for the encouragement of such students. This is particularly true in schools of business, engineering, and law, fields in which graduates are likely to earn adequate salaries soon after graduation

PROBLEMS CONFRONTING GRADUATE SCHOOLS

Besides the ever present problems of securing a faculty personnel of high distinction, a supply of first-rate graduate students, and adequate financial backing, there are certain very timely problems confronting graduate schools

Humanistic studies need more intensive cultivation in these days of unrest, their natural home is in the university circle.⁷ Money for research in science is obviously easier to obtain than in the other great divisions of learning, and care must therefore be taken to direct attention to these other fields. When terms of gifts are extremely broad, such as "to be expended for the benefit of the school," which accompanied a gift of \$6,500,000 to the Graduate School of the University of Michigan in 1935, the graduate school and the university are free to apportion a proper amount to the cultivation of humanistic studies. In some fields of research, such as in agriculture, competition or duplication between institutions is leading to prodigious waste. Universities might well voluntarily cooperate to "agree on limitation and division of the fields in which advanced training is offered, and what degrees should be awarded."⁸

The phenomenal increase in the number of masters' degrees and doctors' degrees conferred and the accompanying increase of specialization in certain fields of knowledge have resulted in an overwhelming terminology confusing not only to the layman but to directors of graduate schools themselves. One is impressed by the lack of uniformity of designation in the 300 abbreviations of degrees appearing in Part II of this book and listed in Appendix VI. Walton C. John lists 62 different masters' degrees in 34 classifications.⁸

The supply of highly trained Ph.D. men and women might be adjusted to meet the demand by limiting the number of Ph.D. candidates in certain fields. While the situations are not altogether parallel, it is instructive to compare the growth of numbers in the graduate schools of arts and sciences with those in medicine and law. Using the years 1900 to 1932, the figures for the medical schools are 25,000 and 24,000, a decrease of 4%, for law, they are 12,500 and 37,000, an increase of 200%, for the graduate schools, they are 6,000 and 42,000, an increase of 600%.⁷

And yet American universities in one field, at least, are failing to meet a need. America has no body of young men to enlist in the government personnel service "whose training is at all comparable with the group of Oxford and Cambridge graduates who give character and stability"⁹ to the British government. Only a few universities are organizing and developing proper courses of study for training civil servants. For example, the Fletcher School of Law and Diplomacy at Medford, Massachusetts, administered by Tufts College with the co-operation of Harvard University, trains students for leadership in international affairs, in foreign trade and finance, in historical research, and for teaching international affairs, and for the foreign service.

If the report on the Study of Public

⁷ *Proceedings, The Association of American Universities, 1935*, pp. 120-130

⁸ Bulletin No. 20, United States Office of Education, 1935, pp. 16-18

Service Personnel is correct in saying that there is on the one hand evidence that many young people "of finest quality and promise" look toward public service, and that on the other hand we need "competent man power to administer our programs and bring our plans (whatever they may be) to realization,"⁹ little prophetic skill is necessary to forecast in our universities the development of programs, schools, or divisions of public service or public affairs to meet this interest and need. Such circumstances brought about the development of the School of Education, the School of Library Service, and the School of Social Service.

It may well be, moreover, that the School of Public Affairs will develop mastery in teaching a technique which has not formerly been taught in the university, *viz* the technique of conference. The following comments of the Administrative Committee of the Princeton University School of Public and International Affairs are significant:

"The procedure in which the students are trained is that of conference, not that of debate. The distinction is important. The spirit of debate is to win, by means of almost any device. The object of conference is to reach agreement. The students are taught that their work will be appraised not alone by the clarity and strength of their own presentation but also by the insight which they show in penetrating the thought of others, discovering points of agreement and common interest and constructing on that basis sound and viable compromise. The complexity and divided justice of almost all international and national issues are emphasized, together with the need for understanding, tolerance, balanced judgment, moderation in word and bearing. In a constantly more intricate and crowded world only the growth of such a spirit can in the end bring order and peace."¹⁰

"Other significant problems confronting graduate schools are (1) the influence of graduate work on the lower grades of instruction, (2) the line of demarcation be-

tween college work and university work, (3) the multiplicity of courses sometimes offered to graduate students when they should be acquiring habits of independent scholarly work, (4) the optimum ratio between number of graduate students and number of faculty engaged in creative work, (5) migration of students, (6) the status of university teaching as a profession, (7) relations with foreign universities, (8) the desirability of a list of accredited institutions giving the master's degree."¹¹

THE UNIVERSITY AND ADULT EDUCATION

State universities, most urban universities, and some colleges, conduct programs of study for adults through adult education divisions. Some of the work is informal, but most of it is formal and leads to baccalaureate and advanced degrees. Indeed, in many urban universities, the number of adults, *i.e.*, teachers, accountants, social workers, and others working for advanced degrees, exceeds the number of full-time graduate students. In member institutions of the Association of Urban Universities, the registration of adults in 1934-35 in resident credit bearing classes was 108,981, in non-resident credit bearing classes, 8,488, and in informal non-credit courses, 18,084.¹²

University Extension. The state universities have highly developed extension divisions each with teachers and administrative staff. They offer vocational service especially in agriculture and engineering, improvement of rural home life through home economics agencies, aids to health conservation, civic improvements, and definite public school betterment. This service is rendered at centers outside of the university community through group instruction in late afternoon and evening classes, and individual instruction is provided through correspondence courses.

Extramural Courses: Certain universities in metropolitan centers arrange instruction in nearby districts which duplicates residence instruction. It is conducted by the

regular teaching staff, for students meeting the same entrance requirements as the students at the university itself. The difference is that the teacher travels instead of the student. These courses are known as extramural courses to distinguish them from extension courses not restricted to students of university grade

The Summer Session The summer schools of American universities and colleges may be said to have as antecedents the summer courses in biological sciences offered by Professor Louis Agassiz and Professor Asa Gray of Harvard University in the early 1870's. The establishment of the Marine Biological Laboratory at Woods Hole, Massachusetts, in 1888, gave impetus to a type of intensive summer study of a subject which for many students was impossible during the regular academic year. In the closing decades of the nineteenth century, the Chautauqua Assembly influenced thousands to study during the summer.

Within the universities, the summer session idea was greatly stimulated by William Rainey Harper, who, as president of the University of Chicago, established the four-quarter system in 1892, and later developed the summer quarter. By the turn of the century, the summer session had become a part of the university administrative structure in many institutions.

In 1917, the Association of Summer Session Deans and Directors was organized. The annual meeting of the Association serves as a clearing house for ideas concerning administrative procedures.

The summer session enrollment in 1933 was 387,289. Of this number, 288,317 were in summer schools of universities, colleges, and professional schools, 81,174 in teachers colleges, and 17,798 in normal schools.

Correspondence Study An interesting

phase of adult education in the United States is the immensely developed business of offering courses by correspondence. In an effort to help coal miners in a district in Pennsylvania to assure their own greater safety and skill in mining coal, a newspaper conducted in its columns lessons for coal miners. Out of this grew the International Correspondence School of Scranton, Pennsylvania, a private corporation offering courses for persons who have had at least an elementary or secondary education, and who wish to receive technical training in vocational fields, but not degrees. In 1891, William Rainey Harper included in his plan for the University of Chicago a division which should offer courses like those offered in residence, courses conducted by regular members of the university faculties who themselves organized the lessons, read the papers submitted by students, set the examinations and assigned credit for the work done. To a limited extent such work was accepted in satisfaction of requirements for baccalaureate degrees but no degree was conferred for work done by correspondence only. Conservatively administered by reputable universities, the correspondence study system has become important especially in connection with the extension work of land-grant colleges.

The student abroad who desires to undertake correspondence study should remember that remoteness may make such a program inadvisable because of the inevitable loss of time in sending lessons a long distance to a teacher and awaiting the receipt of corrected papers before undertaking the preparation of the next lesson. Especially he should remember that the courses are valuable in themselves, but are not recognized by most institutions as qualifying for any degree.

AGRICULTURE

By Thomas Cooper

Secretary-Treasurer of the Association of Land-Grant
Colleges and Universities

Agricultural education is confined almost entirely to the land-grant colleges in the several states. These offer a four-year course leading to the degree of bachelor of science or the equivalent and they are essentially professional or technical schools training specifically for agriculture. As the exhibits of these institutions show, however, they perform other important functions. Through their extension divisions they disseminate information among farmers, chiefly by means of bulletins, lectures, and demonstrations on the farms. Through their experiment stations they conduct research. In 1935-36, the federal government contributed new funds through the Bankhead-Jones Act of June 29, 1935, amounting to \$9,980,000, of which \$9,000,000 is supervised by the United States Department of Agriculture, and \$980,000 is supplemental to the Morrill-Nelson funds supervised by the Department of the Interior.

Land-grant colleges are so-called because they owe their creation or continued support to certain grants of land made by Congress to encourage higher education in the states and territories. The first was made to Ohio in the Ordinance of 1787. The Morrill Act (1862) granted land for the development of colleges of agriculture and mechanic arts. In 1890, in 1907, and in 1935 provision was made for direct annual grants to each state for the further development of these colleges. In 1935 the total federal appropriations for them amounted to \$24,736,000.

As agricultural conditions vary from state to state it is natural that the work of the agricultural colleges and experiment stations should vary. In Iowa, Ohio, and Wisconsin, animal husbandry is conspicuous, in Illinois, field husbandry, genetics, and soil management, in California, semi-tropical farming, genetics, and soil work, in New York and Wisconsin, dairying, in Minnesota, agricultural economics and animal nutrition, in Arizona, farming in semi-arid regions, in Michigan and New York, fruit growing.

BUSINESS

By Charles C Fichtner

Secretary of the American Association of Collegiate Schools of Business

The American Association of Collegiate Schools of Business was organized at a conference of collegiate schools of business which was held at the University of Chicago, June 17, 1916. Dean Edwin F Gay, Harvard University, was elected Chairman of the Executive Committee

The purpose of the organization and the activities of the Association have been to promote and improve higher business education in North America. Membership is composed of 47 institutions whose programs of instruction in business subjects have achieved the standards set up by the Association.

The first annual meeting was held at Harvard University in November, 1919, under the chairmanship of Dean L. C. Marshall of the University of Chicago. Regular meetings, usually in April, have been held every subsequent year. Member institutions may send any number of delegates to the annual meetings and attendance by administrative officers of non-member collegiate schools of business is welcomed.

New members are admitted by a two-thirds vote at an annual meeting. Applications for membership should be submitted to the Secretary at least one month before the annual meeting. One copy of the application, together with a copy of the catalog,

should be sent to each member of the Executive Committee

The American Association of Collegiate Schools of Business amended, in April, 1935, its standards for institutions desiring membership

1 The college or school shall require for admission at least 15 units of secondary work as defined by the North Central Association of Colleges and Secondary Schools, or its equivalent

2 The school shall require for the undergraduate degree the completion of a minimum quantitative requirement of 120 semester hours of credit or the equivalent. A portion of this work may be taken in some other college, such as a liberal arts college of approved standing.

3 The school shall have been established as a *distinct* school or college (not as a department of a college of liberal arts) of a college or university, and its affairs shall be administered under the control and with the active support of such college or university. In general, an institution to be considered must be on the list of colleges and universities approved by the Association of American Universities

4 The school shall have been established and operated in accordance with the standards indicated herein for a period of at least three years, but a school which has been in operation for not less than three years, and which may have failed, in that period, to meet all the requirements herein stated, may, at the discretion of the Executive Committee, be admitted to membership whenever such requirements have been fulfilled by the school

5 The faculty of the school shall include at least three instructors of full professorial rank, giving full time, or nearly full time, to instruction in courses in business administration or economics, in general, the majority of all members of the faculty shall give the greater part of their time to such instruction

6 Those holding full professorial rank shall have the doctor's degree or their professional or technical training and experience shall be such as will enable the Executive

Committee of this Association to give them a rating equal to those who have received doctors' degrees. In general, all teachers of business subjects in collegiate schools of business above the grade of assistant shall have a master's degree, or their training and experience shall be such that the Executive Committee of this Association gives them a rating equal to those who have the master's degree.

7 The school shall maintain a scale of teachers' salaries which, in the judgment of the Executive Committee, is adequate to the successful conduct of the work of a high grade school of business.

8 The school shall have so apportioned the teaching load of members of its staff that the teaching burden will not be excessive. In general, teachers should not teach elementary work in excess of 15 hours a week, and advanced work in excess of 12 hours a week.

9. All collegiate schools shall offer a reasonable amount of work in at least five groups of study, such as business finance, accounting, business law, marketing, and statistics.

10 At least 40 per cent of the 120 credit hours or its equivalent required for the bachelor's degree must be taken in commercial and economic subjects, a liberal proportion of the courses in this group shall be professional in character in that they deal with problems of management or administration.

11. At least 40 per cent of the 120 credit hours or its equivalent required for the bachelor's degree shall be taken in subjects other than economics and commerce providing that general economics and economic history may be counted in either the liberal or commercial groups.

12. The school shall have such library facilities as are in the judgment of the Executive Committee adequate.

The American Association of Collegiate Schools of Business in 1935 published the fourth edition of *Faculty Personnel*, edited by J. Anderson Fitzgerald, University of Texas. The directory of 279 pages contains personnel records of 1,401 persons on the

faculties of 47 member schools, including details of academic careers, publications, present faculty status, and field or fields of specialization. The Association also publishes its annual Proceedings, and from time to time reports on economic and business research in American colleges and universities. Copies of these publications may be obtained from the Secretary of the Association, University of Arkansas, Fayetteville, Arkansas.

In October, 1935 the membership of the American Association of Collegiate Schools of Business included the following:

ALABAMA

Alabama, University of, School of Commerce and Business Administration, University

ARKANSAS

Arkansas, University of, School of Business Administration, Fayetteville

CALIFORNIA

California, University of, College of Commerce, Berkeley

Southern California, University of, College of Commerce and Business Administration, Los Angeles

Stanford University, Graduate School of Business, Stanford University

COLORADO

Denver, University of, School of Commerce, Accounts and Finance, Denver

FLORIDA

Florida, University of, College of Commerce and Journalism, Gainesville

GEORGIA

Georgia, University of, School of Commerce, Athens

ILLINOIS

Chicago, University of, School of Business, Chicago

— — — — —

DENTISTRY

By Gerald D. Timmons

Secretary-Treasurer of the American Association of
Dental Schools

The American Association of Dental Schools was formed in 1923 by the amalgamation of the American Institute of Dental Teachers, the National Association of Dental Faculties, the Faculties' Association of American Universities and the Canadian Faculties' Association. The formation of this Association has been due largely to Dr. W. J. Gies in conducting a survey of the teaching of dentistry in the United States. Dr. Gies's report, published by the Carnegie Foundation for the Advancement of Teaching in 1927, is the only comprehensive and reliable presentation of the general history of dentistry and the history of dental education in the United States, the conditions of the practice of dentistry that determine the educational requirements, including the statutory definition and regulation of dental practice, the types, numbers, and distribution* of dental practitioners, the efficiency of dental service for Negroes, and a history of organizations in dentistry leading up to the formation of the American Association of Dental Schools. There is a very full and accurate consideration of the curriculum and methods of teaching, the equipment and financial support of dental schools, and a discussion of the importance of original investigation in the field. The itemized reports on individual schools include data which enable one to understand the quality of the schools—academic affiliations, history, building facilities, hospital and dispensary facilities, library, administrative officers, minimum academic requirements, proposed measures of advancement, number of graduates, attendance, number of patients treated, financial data including the value of land and buildings, debt, fees paid by students, fees paid by patients, budgetary provisions, and other funds. There is a presentation of budget items for equipment, research, library, salaries, average student-year cost and student-year payment of fees. In addition to these objective items

there are frank and specific expressions of opinion by the author. The volume is invaluable for the serious student of the teaching of dentistry. It may be secured from the Carnegie Foundation for the Advancement of Teaching, 522 Fifth Avenue, New York City.

In April, 1935, the American Association of Dental Schools published a 425-page report of the Curriculum Survey Committee. This report is the result of a four-year project which was made possible by grants from the Carnegie Corporation of New York. It outlines the history and plan of the survey, summarizes oral health conditions of the people, and describes the responsibilities of dentistry in its modern relationships. The objectives of dental education are stated, the knowledge, skill, and experience which the dental student should acquire are set forth in detail, and the preliminary college education of dental students is discussed at some length. Finally, a series of recommendations is made regarding policies of dental education. These recommendations were adopted by the Association. Copies of this report may be obtained from the Secretary of the Association.

The American Association of Dental Schools admits as members those schools of the United States which are classified as of A or B grade by the Dental Educational Council of America. It also admits as members those schools of Canada which are of comparable standing.

The dental schools in the United States holding membership in the American Association of Dental Schools are as follows:

CALIFORNIA

California, University of, College of
Dentistry, San Francisco
College of Physicians and Surgeons,
School of Dentistry, San Francisco

DISTRICT OF COLUMBIA

Georgetown University, School of Den-
tistry, Washington
Howard University, College of Den-
tistry, Washington

EDUCATION

By Charles W. Hunt

Secretary-Treasurer of the American Association
of Teachers Colleges

There are 163 teachers colleges and normal schools in the United States accredited by functional or regional accrediting associations. In addition to these teacher training institutions, universities and liberal arts colleges play an important part in the training of teachers for both high schools and elementary schools. In the high schools, approximately one-fifth of the teachers are graduates of teachers colleges, while four-fifths are graduates of universities and liberal arts colleges. In the elementary schools, approximately two-thirds of the teachers are graduates of teachers colleges and normal schools, while one-third are graduates of the universities and liberal arts colleges.

A department or school of education within the university or liberal arts college is an integral part of the institution, its standards and policies determined by the institution. Teachers colleges and normal schools have formed the American Association of Teachers Colleges, which first adopted standards for the accrediting of teachers colleges in 1926. The 1935 revised standards of the American Association of Teachers Colleges* are as follows:

I DEFINITION OF A TEACHERS COLLEGE

Teachers College (Four-Year Institution Granting Degrees) A teachers college, within the meaning of these standards, is a state, municipal or incorporated private institution, or an independent unit of a recognized college or university having at least one four-year unified curriculum, which is devoted exclusively to the preparation of teachers, which has legal authority to grant a standard bachelor's degree, which has granted and continues to grant such degree, and which requires for admission the completion of a standard four-year secondary school curriculum, or equivalent training approved by this Association.

Normal School A similar institution offering curricula of two or more years in length but not granting a degree.

II REQUIREMENTS FOR ADMISSION

The quantitative requirements for admission to a teachers college or normal school accredited by this Association shall be at least 15 units of secondary school work or the equivalent. These units must represent work done in an accredited secondary school or must be evidenced by the results of examinations. Evidence of a program of selective admissions should be submitted to the accrediting committee. Experience in teaching shall in no case be accepted for entrance, or credit toward graduation.

III STANDARDS FOR GRADUATION

The quantitative requirement for graduation from a teachers college shall be the completion of at least 120 semester hours of credit, or the equivalent in term hours, quarter hours, points, majors or courses. The requirement for graduation from a normal school with a two-year curriculum shall be at least 60 semester hours or the equivalent, and from a normal school with a three-year curriculum, at least 90 semester hours or the equivalent.

Not more than one-fourth of any curriculum leading to a degree or a certificate or a diploma in a teachers college or normal school shall be taken in extension classes or by correspondence. These classes shall be conducted by regularly appointed teachers who meet all the qualifications of Standard IV, Preparation of the Faculty. If extension teachers are regularly employed on a part-time basis and hold educational administrative or supervisory positions, they shall not be permitted to offer courses enrolling individuals who are under their administrative or supervisory jurisdiction. No courses shall be offered for credit either in extension or by correspondence which are not also offered as part of the regular residence work. These courses should likewise meet the requirements of sequence and prerequisites as set forth in Standard VII, Organization of the Curriculum.

* For membership, see Appendix II

No degree or certificate or diploma shall be issued by a teachers college or normal school to a student who has not spent a minimum of one year (30 semester hours) in regular residence work in the institution issuing the degree, certificate, or diploma. One year of residence work shall be understood to mean one year of full-time study, or two half years, or the equivalent of one year in summer sessions.

IV. PREPARATION OF FACULTY

The minimum scholastic requirement for members of the faculty (college and training schools) shall be the possession of a master's degree or its equivalent. Preparation should include at least 24 semester hours of undergraduate and/or graduate work in the field taught and also professional courses in that field

Because of local conditions, and because of the difficulty of securing degrees in some of the special subject fields, an institution may be considered to have met this standard if not more than 15 per cent of the teaching faculty does not have the master's degree or its equivalent.

The quality of instruction and the professional spirit of the school, to the extent that they can be determined, should be considered in applying this standard

V. TEACHING LOAD OF FACULTY

The following teaching load shall be the maximum for a teachers college or normal school faculty 16 recitation periods not exceeding 60 minutes each per week or its equivalent. Equivalence shall be based upon the ratio of one class period to one and one-half class periods in shop, laboratory work and physical education

VI. TRAINING SCHOOL AND STUDENT TEACHING

Each teachers college or normal school shall maintain a training school for purposes of observation, demonstration, and supervised teaching. The use of an urban or rural school system, under sufficient control and supervision of the college, will satisfy this requirement.

In the training school there shall be at

least one full-time training school teacher in charge of at least 30 children for every 18 college students each of whom does during the year a total of 90 clock hours of student teaching or an equivalent load

When affiliated urban or rural schools are used as training schools, the institution shall provide supplementary supervision to maintain standards comparable to those of the institutional training school.

The minimum amount of student teaching required of every graduate of a teachers college or normal school shall be 90 hours of supervised teaching

At least two-fifths of the teaching in the training school should be done by regular teachers of the training school or by other members of the faculty

VII. ORGANIZATION OF THE CURRICULUM

The curriculum of the teachers college must recognize definite requirements with respect to sequence of courses Senior college courses must not be open to freshmen who have not taken the prerequisites for these courses Programs consisting mainly of freshman and sophomore courses carrying full credit shall not be available for students in the junior and senior years

Every teachers college must, therefore, adopt an organization of its curricula which will provide in its junior and senior years courses which require prerequisite courses in the freshman and sophomore years or courses which are open only to juniors or seniors The number of such courses taken by a student in the junior and senior years must total at least one-third of the requirements for the completion of a four-year college curriculum In a normal school with a three-year curriculum, two-thirds of the work of students in the last year shall consist of advanced courses to which freshmen are not admitted.

VIII STUDENT HEALTH AND LIVING CONDITIONS

Health Service. Provision shall be made, by means of suitable organization, for the following phases of student health service:

(a) physical examinations, (b) consultations on health matters, and dispensary treatment, (c) correction of remediable defects, and (d) hospitalization or infirmary care (This type of service, (d), may be provided through cooperative arrangement with independent hospitals)

The student health service shall be rendered by qualified physicians, nurses, dental hygienists, psychiatrists, and others on such basis and in such manner as local conditions require. Offices and rooms of the health service department or organization shall be equipped with modern scientific apparatus and provision shall be made for essential clerical services.

Health Education Suitable courses in health education shall be offered and provisions made in the training school department for observation and practice teaching in health education

Physical Education Facilities shall be provided for instruction in physical education and for indoor and outdoor physical recreational activities

Each teachers college or normal school shall make definite provisions to insure for its students living conditions which provide proper safeguards for health, morals, and mental efficiency, and shall foster a responsible type of citizenship and leadership on the part of individuals

When dormitories are maintained these shall be of fire-resistive construction, shall be kept in wholesome, sanitary condition, and shall be under responsible supervision

IX LIBRARY, LABORATORY AND SHOP EQUIPMENT

Each teachers college library shall have at least 15,000 volumes, exclusive of public documents and bound periodicals. For normal schools offering only two- and three-year curricula the minimum shall be 10,000 volumes. In computing the number of volumes in a library not over 15 per cent shall be allowed for duplicates. Each teachers college library shall provide not less than 150 periodicals appropriate to the academic, cultural and professional needs of the institution. Institutions offering cur-

ricula not more than three years in length shall have not less than 100 periodicals.

It is recommended that other items essential to an efficient library, such as: the number of books in different classifications, training-school libraries, training of library staff, budgetary provisions, and physical equipment should approximate the recommendations published in the 1931 edition of the A. A. T. C. standards

Each teachers college or normal school shall be provided with laboratory equipment sufficient for instructional purposes for each course offered, including suitable shops and shop equipment, gymnasiums for physical education, equipment for courses in commerce, suitable kitchens, dining rooms and laboratories for household arts, and adequate farm buildings and demonstration farms for work in agriculture.

X. BUILDINGS AND GROUNDS

The location, size and care of campus, the location, construction and care of buildings, including maintenance and effective operation of service systems, shall be such as to insure hygienic conditions for students and teachers

XI FINANCIAL SUPPORT

Each state or municipal teachers college or normal school shall have an annual appropriation sufficient to maintain the standards herein established

If the teachers college or normal school is a private incorporated institution, it must have a minimum annual income of \$50,000 for its teachers college program. If such teachers college or normal school is not tax-supported, it shall possess a productive endowment of \$500,000 or more

MEMBERSHIP, ACCREDITING, AND CLASSIFICATION

These standards shall be administered by the Committee on Accrediting and Classification provided by the Constitution.

The character of the curriculum, the efficiency of the instruction, the scholarly spirit and the professional atmosphere of the institution, the standard for granting degrees, and the general tone of the teachers

college shall be factors in determining eligibility for accrediting. It is understood that carefully planned experiments dealing with the education of teachers should be encouraged by the Committee on Accrediting and Classification.

The Secretary-Treasurer of the Association shall be the executive secretary of the Committee on Accrediting and Classification.

Each teachers college accredited under these standards shall file annually with the Committee on Accrediting and Classification a report on a blank provided for that purpose by the Committee.

The Secretary shall publish two lists

- (1) A list of member institutions, arranged alphabetically by states, and designated by the length of the longest curriculum offered as follows—2-year, 3-year, 4-year not granting degrees, 4-year granting degrees, and graduate.
- (2) A list of accredited institutions arranged alphabetically by states and designated by the length of the longest curriculum which has been approved.

To be placed on this accredited list an institution may fail to meet not more than two standards, provided these shall not be Standards I and XI, but all institutions failing in any standard shall show satisfactory progress from year to year and meet all standards within five years. The time limit set by this regulation shall be interpreted as referring to the report upon which the accreditation of February 1938 shall be made.

The number of the Standard or Standards which an accredited institution fails to meet shall be listed after the name of that institution.

The Committee on Standards and Surveys may authorize investigations and research concerning standards and the improvement of the education of teachers which it deems necessary or desirable, and may make such provision for the financing of this work as may be approved by the Executive Committee.

ENGINEERING

By F. L. Bishop

Secretary of the Society for the Promotion of
Engineering Education

There are now more than 160 colleges in the United States and Canada which offer complete engineering curricula leading to degrees. With two exceptions, Dartmouth and Columbia, these schools are all organized as undergraduate colleges, with or without associated postgraduate departments. Only four institutions in all have organized their curricula in two distinct stages under separate direction. There are 19 polytechnic institutes such as Rensselaer and Massachusetts Institute, and seven colleges of mines such as Colorado (Golden) and Missouri (Rolla) which are devoted primarily to technological curricula and research and are committed by tradition and circumstances to an integral educational process. Forty-nine of the engineering colleges are included in the land-grant system established by the Morrill Act of 1862 with the intent of providing a liberal type of technical education which should be widely accessible to the industrial classes, and should aid in investing industrial pursuits with a professional quality. The land-grant colleges have unquestionably been a powerful influence tending to hold engineering education to its original ideal of a unified educational process. Forty-two other institutions, exemplified by Lafayette and Swarthmore, are colleges devoted largely or exclusively to undergraduate studies and without distinct professional schools. Fifty-three engineering colleges, or slightly less than one-third of the total, are included in institutions with a university type of organization which provides for separate professional schools.

The Society for the Promotion of Engineering Education has been active in guiding the development of engineering schools. It publishes the *Journal of Engineering Education* and conducts conferences.

In 1923 the Society began a comprehensive study directed toward the improvement of engineering education under the

direction of W. E. Wickenden. The initial funds for the investigation were provided by a grant from the Carnegie Corporation. These were supplemented by contributions from engineering societies, from individuals, and from industries. The complete report was published by the Society and can be secured from the Secretary, F. L. Bishop, University of Pittsburgh, Pittsburgh, Pennsylvania.

The Society has two types of memberships, individual and institutional. American Institute of Chemical Engineers, American Institute of Electrical Engineers, American Institute of Mining and Metallurgical Engineers, American Society of Mechanical Engineers, and American Society of Civil Engineers have individual memberships.

The Engineers' Council for Professional Development, which is an organization composed of individual organizations, is now preparing, through inspection and otherwise, a list of accredited engineering schools. The Council is composed of the following participating bodies: Society for the Promotion of Engineering Education, American Society of Civil Engineers, American Institute of Mining and Metallurgical Engineers, American Society of Mechanical Engineers, American Institute of Electrical Engineers, American Institute of Chemical Engineers, and the National Council of State Boards of Engineering Examiners.

The engineering schools listed by the United States Office of Education in the Educational Directory, 1935, are as follows:

ALABAMA

Alabama Polytechnic Institute, Auburn

Alabama, University of, University

ALASKA

Alaska, University of, College

ARIZONA

FORESTRY

By Franklin W. Reed

Secretary of the Society of American Foresters

Forestry as a profession is of recent growth in America. The first professional school was established in 1898. At present there are 21 schools offering four-year undergraduate courses leading to the degree of bachelor of science in forestry or bachelor of science in agriculture, and three schools offering only graduate courses leading to the degree of master in forestry or doctor of science or doctor of philosophy. Special courses in forestry are offered in a number of other institutions.

JOURNALISM

By H. H. Herbert

Secretary-Treasurer of the American Association of Schools and Departments of Journalism

The American Association of Schools and Departments of Journalism and the American Association of Teachers of Journalism adopted December 30, 1924, principles and

standards of education for journalism formulated by the Council on Education for Journalism of the American Association of Schools and Departments of Journalism.

GENERAL PRINCIPLES

Because of the importance of newspapers and periodicals to society and government, adequate preparation is as necessary for all persons who desire to engage in journalism as it is for those who intend to practice law or medicine. No other profession has a more vital relation to the welfare of society and to the success of democratic government than has journalism. No other profession requires a wider range of knowledge or greater ability to apply such knowledge to current events and problems than does journalism. Adequate preparation for journalism, therefore, must be sufficiently broad in scope to familiarize the future journalist with the important fields of knowledge, and sufficiently practical to show the application of the knowledge to the practice of journalism.

Under present conditions the best means of acquiring this essential knowledge and of learning its application is a four-year course of study in a college or university, including such subjects as history, economics, government and politics, sociology, literature, natural science, and psychology or philosophy. Not merely acquisition of knowledge but encouragement to independent thinking and fearless search for truth should be the purpose of all courses in preparation for the profession of journalism. Instruction in all subjects in the curriculum should be vitalized by research and contact with current developments on the part of instructors.

Preparation for journalism should also include instruction and practice in journalistic technique, and consideration of the responsibility of the journalist to society. All instruction in journalism should be based on a recognition of the function of the newspaper and other publications in society and government, and should not be concerned merely with developing proficiency in journalistic technique. The aims and methods of instruction should not be those of a trade

school but should be of the same standard as those of other professional schools and colleges.

Since a liberal education is recognized as essential for the journalist, the amount of instruction in journalistic technique should not constitute so large a part of the four-year course as to exclude courses in other essential subjects. Although courses in the technique of journalism will naturally be concentrated in the last two years of the four-year course, students in these years should also have the opportunity to pursue advanced work in such subjects as economics, government and politics, history, and literature.

In all courses in journalism, as in courses in other subjects, instruction should be given by teachers with adequate preparation. The requirements for an instructor in journalism should include at least a bachelor's degree as well as practical journalistic experience. Moreover, instruction in journalism should be vitalized by contact with current journalistic conditions on the part of the instructor.

STANDARDS

The American Association of Schools and Departments of Journalism consists of those institutions which originally formed the organization in 1912 and those which have since been added by election after meeting the requirements for membership.

In 1935 these requirements were as follows:

- 1 Instruction in preparation for journalism shall be organized as a separate academic unit with professional courses organized to meet the standards approved by this association, e g , a school, course, or department of journalism, with a dean, director, or full professor at its head, and with at least two full-time teachers of journalism of professorial rank, and offering a degree in journalism, certificate in journalism, or notation indicating completion of professional courses.

- 2 Non-professional and introductory courses in journalism, preferably for the purpose of vocational guidance or of

determining the ability and aptitude of students for journalism, may be offered in the freshman and sophomore years, but distinctly professional courses in journalism should be open only to students who have successfully completed at least two years of a regular four-year course leading to a baccalaureate degree

3. The successful completion of four years' work in a college or university, consisting of not less than 120 semester units, shall be required for a bachelor's degree by the school, course, or department of journalism.

4 The majority of full-time students in the school, course, or department of journalism shall be regularly enrolled as candidates for bachelors' or masters' degrees

5. In addition to the bachelor's degree, some form of recognition should be conferred indicating that students receiving the baccalaureate degree have successfully completed the professional requirements in journalism

6. The four-year course leading to the bachelor's degree in journalism shall normally include, in addition to professional journalism courses, history, economics, government and politics, sociology, literature, natural science, and psychology or philosophy

7 The professional courses offered in journalism shall afford instruction and practice in reporting, copy reading, editorial writing, and the writing of special articles, and instruction in the history of journalism, the principles or ethics of journalism (with particular reference to the duties and responsibilities of the journalist to society), and the law of the press

8 In journalism courses requiring writing and copy reading, the students shall have the advantage of constant individual criticism of their work by competent instructors, not by students or other assistants, and as far as possible students shall be given the benefit to be derived from seeing their work in print.

9 In courses in reporting students shall be required to cover regular news assignments, and shall have the benefit of con-

stant criticism by competent instructors, not students or assistants, on the manner in which they handle such assignments

10. Students shall not be given credit for practical journalistic work unless such work is done under the immediate supervision of an instructor in journalism as a part of a regular course in journalism

11. The number of instructors in journalism shall be sufficient to insure careful attention to the individual needs of students, particularly in writing and copy reading courses, and the amount of class and laboratory work required of each instructor shall not exceed that of instructors in similar departments

12 Instructors shall be encouraged to carry on research work and to contribute to the literature of the subject

13 A collection of the standard books on various phases of journalism shall be available for use of the students and students shall be required to familiarize themselves with these books

14. Sufficient laboratory equipment shall be available for use in connection with instruction in the technique of journalism to familiarize students with the methods of copy reading, typography and make-up

15. A complete course in preparation for journalism shall have been organized in accordance with this section and the professional courses outlined shall have been given for at least three academic years in accordance with this section before an institution shall be eligible for membership

The membership of the American Association of Schools and Departments of Journalism on October 1, 1935, consisted of the following institutions

CALIFORNIA

Stanford University, Division of Journalism, Stanford University
Southern California, University of,
School of Journalism, Los Angeles

COLORADO

Colorado, University of, Department of Journalism, Boulder

GEORGIA

Georgia, University of, Henry W.

LAW

By Will Shafroth
 Adviser of the American
 Bar Association

American legal education has been discussed in Annual Reports of the Carnegie Foundation for the Advancement of Teaching since 1913

Copies of all publications of the Foundation, not out of print, may be had without charge upon application to its office, 522 Fifth Avenue, New York City, by mail or in person.

The Association of American Law Schools established in 1900 for the improvement of legal education in America set up certain

qualifications for membership. Amended from time to time these criteria offer standards for law schools in the United States.

In 1928 only about one-third of the law school students of the United States attended schools which were members of the Association. This number is now approaching the half-way mark.

The American Bar Association in 1921 adopted certain standards of admission to the bar which, together with certain rulings made by its Council on Legal Education and Admissions to the Bar, are set forth below. These rulings were endorsed by a representative conference of Bar Association delegates called the following year in Washington. As a result of the recommendations of that conference the Bar Association approved the suggestion that where the applicant has not actually attended college before studying law, he should be permitted by examination to show that he is possessed of an equivalent education. Progress in the adoption of these standards has been remarkable, and particularly in the last few years the movement has become general throughout the country. At the present time (October 1, 1935) there are 28 states which require, either presently or prospectively, that substantially all of their applicants shall have two years of college education or its equivalent before admission to the bar. Practically all of these states also require a definite period of law study and in some cases the recommended requirement of graduation from an approved law school has also been adopted.

The list of schools approved by the American Bar Association continues to grow, there are now on that list 87 law schools, of which number 78 are members of the Association of American Law Schools.

STANDARDS OF THE AMERICAN BAR ASSOCIATION

With Rulings thereon by its Council on Legal Education and Admissions to the Bar, in effect June 1, 1935

Resolutions of the American Bar Association are printed in italics, Rulings of the Council in roman

1 *The American Bar Association is of the opinion that every candidate for admission to the Bar should give evidence of graduation from a Law School complying with the following standards*

A It shall require as a condition of admission at least two years of study in a college

An approved school shall require of all candidates for any degree at the time of the commencement of their law study the completion of one-half of the work acceptable for a Bachelor's degree granted on the basis of a four-year period of study either by the state university or a principal college or university in the state where the law school is located.

Each school shall have in its records, within 20 days after the registration of a student, credentials showing that such student has completed the required pre-legal work.

Students who do not have the required preliminary education shall be classed as special students, and shall be admitted to approved schools only in exceptional cases.

The number of special students admitted in any year shall not exceed ten per cent of the average number of beginning law students admitted during each of the two preceding years.

No student shall be admitted as a special student except where special circumstances such as the maturity and the apparent ability of the student seem to justify a deviation from the rule requiring at least two years of college work. Each school shall report to the Council the number of special students admitted each year, with a statement showing that the faculty of the school has given special consideration to each case and has determined that the special circumstances were sufficient to justify a departure from the regular entrance requirements.

The following classes of students are to be considered as special students unless the

law school in which they are registered has on file credentials showing that they have completed the required pre-legal work.

- (a) Those transferring from another law school either with or without advanced standing in law,
- (b) Those doing graduate work in law after graduation from an unapproved school,
- (c) Those taking a limited number of subjects either when registered in another department of the University or when on a purely limited time basis.

B It shall require its students to pursue a course of three years' duration if they devote substantially all of their working time to their studies, and a longer course, equivalent in the number of working hours, if they devote only part of their working time to their studies

A law school which maintains a course for full-time students and a course for part-time students must comply with all of the requirements as to both courses.

The curriculum and schedule of work of a full-time course shall be so arranged that substantially the full working time of students is required for a period of three years of at least 30 weeks each

A part-time course shall cover a period of at least four years of at least 36 weeks each and shall be the equivalent of a full-time course

Adequate records shall be kept of all matters dealing with the relation of each student to the school

The conferring of its degree shall be conditioned upon the attainment of a grade of scholarship ascertained by written examinations in all courses reasonably conformable thereto.

A school shall not, as a part of its regular course, conduct instruction in law designed to coach students for bar examinations.

C. It shall provide an adequate library available for the use of the students.

An adequate library shall consist of not less than 7,500 well selected, usable volumes not counting obsolete material or broken sets of reports, kept up to date and owned or controlled by the law school or the university with which it is connected.

A school shall be adequately supported and housed so as to make possible efficient work on the part of both students and faculty

D It shall have among its teachers a sufficient number giving their entire time to the school to ensure actual personal acquaintance and influence with the whole student body.

The number of full-time instructors shall not be less than one for each 100 students or major fraction thereof, and in no case shall the number of such full-time instructors be less than three.

E It shall not be operated as a commercial enterprise and the compensation of any officer or member of its teaching staff shall not depend on the number of students or on the fees received

2. The American Bar Association is of the opinion that graduation from a Law School should not confer the right of admission to the Bar, and that every candidate should be subjected to an examination by public authority to determine his fitness.

3 The Council on Legal Education and Admissions to the Bar is directed to publish from time to time the names of those Law Schools which comply with the above standards and of those which do not and to make such publications available so far as possible to intending Law students

Schools shall be designated "Approved" or "Unapproved"

A list of approved schools shall be issued from time to time showing the schools that have fully complied with the American Bar Association standards

No school shall be placed upon the approved list without an inspection prior to such approval made under the direction of the Council

All schools, in order to be upon the approved list, are required to permit full inspection as to all matters when so requested by any representative acting for the Council, and also to make such reports or answers to questionnaires as may be required

In compliance with the policy announced by the American Bar Association in 1921,

we recommend the establishment in each State, where none now exist, of opportunities for a collegiate training, free or at moderate cost, so that all deserving young men and women seeking admission to the Bar, may obtain an adequate preliminary education, and that the several States be urged through the Council on Legal Education and Admissions to the Bar, to provide at stated times and places, for Pre-Legal examinations to be held by the University of the State or by the Board of Law Examiners thereof, for those applicants for admission to the Bar obliged to make up their preliminary qualifications outside of accredited institutions of learning

STANDARDS OF THE ASSOCIATION OF AMERICAN LAW SCHOOLS

Articles Six and Seven

Article Six Law schools may be elected to membership at any meeting by a vote of the Association, but no law school shall be so elected unless for at least two years immediately preceding its application it has complied with the following requirements

1 It shall be a school not operated as a commercial enterprise, and the compensation of any officer or member of its teaching staff shall not depend on the number of students, nor on the fees received

2. It shall require of all candidates for any degree at the time of the commencement of their law study the completion of one-half of the work acceptable for a bachelor's degree granted on the basis of a four-year period of study by the state university or the principal colleges or universities in the state where the law school is located

3. A school whose curriculum and schedule of work are so arranged that, in the opinion of the Executive Committee, substantially the full working time of its students is required for the work of the school, shall be considered a full-time school. A full-time school shall require of its candidates for the first degree in law resident study of law during a period of at least 90 weeks and the successful completion of at least 1,080 hours of classroom instruction in law.

A school whose curriculum and schedule of work are so arranged that, in the opinion of the Executive Committee, substantially the full working time of its students is not required for the work of the school, shall be considered a part-time school. A part-time school must maintain a curriculum which, in the opinion of the Executive Committee, is the equivalent of that of a full-time school. The action of the Executive Committee under this paragraph shall in each instance be reported to the Association at its next annual meeting and shall stand as the action of the Association until set aside by a vote of a majority of all the members of the Association

Any school now or hereafter a member of the Association, that conducts both full- and part-time curricula, must comply as regards each with the requirements therefor as set forth in the preceding paragraphs

No school shall be or remain eligible to membership if the institution of which it is a part shall through any other agency conduct instruction in law designed to prepare students for admission to the Bar or for Bar examinations, save in conformity with the provisions of the preceding paragraphs

4 The conferring of its degree shall be conditioned upon the attainment of a grade of scholarship ascertained by examination

5 Students with less than the academic credit required of candidates for the law degree by Section 2 of this article, may be admitted as "specials" provided

a They are at least 23 years of age, and

b There is some good reason for thinking that their experience and training have specially equipped them to engage successfully in the study of law, despite the lack of the required college credits, and

c The number of such "specials" admitted each year shall not exceed ten per cent of the average number of students admitted by the school as beginning regular law students during the two preceding years.

6. Commencing September 1, 1932, it shall own a law library of not less than

10,000 volumes, which shall be so housed and administered as to be readily available for use by students and faculty.

Commencing September 1, 1932, for additions to the library in the way of continuations and otherwise there shall be spent over any period of five years at least \$10,000, of which at least \$1,500 shall be expended each year

7. Commencing September 1, 1932, its faculty shall consist of at least four instructors who devote substantially all of their time to the work of the school, and in no case shall the number of such full-time instructors be fewer than one for each 100 students or major fraction thereof

8. Each member shall maintain a complete individual record of each student, which shall make readily accessible the following data: credentials for admission, the action of the administrative officer passing thereon, date of admission, date of graduation or final dismissal from school, date of beginning and ending of each period of attendance, if the student has not been in continuous residence throughout the whole

period of study, courses which he has taken, the grades therein, if any, and the credit value thereof, and courses for which he is registered; and a record of all special action of the faculty or administrative officers.

9 It shall be a school which possesses reasonably adequate facilities and which is conducted in accordance with those standards and practices generally recognized by member schools as essential to the maintenance of a sound educational policy.

Article Seven Any school which shall fail to maintain the requirements provided for in Article Six, or such standard as may hereafter be adopted by resolution of the Association, shall be excluded from the Association by a vote at the general meeting, but may be reinstated at a subsequent meeting on proof that it is then bona fide fulfilling such requirement

Any member school which shall fail to be represented by some member of its faculty at the annual meeting at least once in any three-year period shall be deemed to have discontinued its membership.

MINIMUM REQUIREMENTS FOR ADMISSION TO LEGAL PRACTICE IN THE UNITED STATES, CANADA, AND NEWFOUNDLAND AT THE BEGINNING OF THE ACADEMIC YEAR 1934-35

PREPARED BY CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING, 522 FIFTH AVENUE, NEW YORK CITY

	Minimum amount of general education required before		Duration and distribution of period of law study if pursued		System of examinations in legal attainments
	Beginning period of law study	Taking final examination	Wholly outside of a law school	Partly in a law school	Wholly in a law school
UNITED STATES American Bar Association Recommendations of 1921	Two years of study in a college		Not permitted	At least the law school study recommended in the next column. No recommendation as to supplementary office work	Three years of full-time or "a longer course, equivalent in the number of working hours," of part-time study
Washington Conference Recommendations of 1922				American Bar Association recommendations endorsed with the explanation "Educational experience other than that acquired in an American college may, in proper cases, be accepted as satisfying the requirement of the rule, if equivalent to two years of college work."	
American Bar Association Recommendation of 1927				"Pre-legal examinations [should] be held by the university of the state or by the Board of Law Examiners thereof, for those applicants for admission to the Bar, obliged to make up their preliminary qualifications outside of accredited institutions of learning."	
Alabama	2 years college or examination conducted by the State University		Not permitted	No credit for office work	4 years, or if school is approved by A B A, 3 years
Arizona	Equivalent of high school, prior to registration		3 years full-time (under supervision of a lawyer) Registration required	3 years or more Registration required for other than law school study	Final examination, conducted by a central board, but graduates of the law school maintained by the State University, and graduates of any law school approved by the A B A, who teach in any such school, take its examinations only
Arkansas	None	None	No rule	No rule	Final examination, conducted by a central board
California	None	Equivalent of high school	4 years (43 months, 3456 hours)	4 years (43 months, 3456 hours)	Final examination, conducted by a central board
Colorado	2 years college or examination conducted by the State University		Not permitted	3 years school and office, of which at least 2 must be in a school Registration required for office work	Final examination, conducted by a central board

Connecticut	2 years college or College Entrance Board examination	4 years full-time (office only, 6 hours daily, 5 days each week, 40 weeks each year, semi-annual reports) Registration required	3 to 4 years. Registration required as in next column	3 years of full-time or 4 years of part-time sessions. Registration required except for non-residents studying in out-of-state schools	Final examination, conducted by a central board
Delaware	Degree in approved course of approved college, or examination conducted by faculty of the State University, prior to registration. Law school graduates need not register until beginning of supplementary education. Those who begin law study with 2 years college or special admission to law school approved by A. B. A.	3 years (under direction of a local lawyer). Registration required	3 years including at least six months of office work which may be interpolated into the law school vacations. Registration required for office work	Not permitted	Oral examination on prescribed textbook, prior to registration, and final examination, conducted by a central board
District of Columbia	None	Equivalent of high school	3 years (office only)	3 years	Final examination, conducted by a central board
Florida	None	None	No rule	No rule	Final examination, conducted by a central board, but graduates of three-year law schools take law school examinations only
Georgia	None	None	No rule	No rule	Final examination, conducted by a central board
Idaho	2 years college or special admission to law school approved by A. B. A. (for those preparing entirely in such schools)	2 years college or 4 years full-time (office only) outside of law schools approved by A. B. A.	3 to 4 years	3 years, full-time of daytime or 4 years of evening sessions	Final examination, conducted by the Board of Commissioners of the State Bar
Illinois	2 years college or examination conducted by the State University	... 4 years (office only, 120 hours of instruction annually)	4 years	3 years	Three intermediate examinations and one final, conducted by a central board, but for study pursued in a law school the final examination only
Indiana	None	None	No rule	No rule	Final examination, conducted by a central board
Iowa	None	Equivalent of high school	3 years (office only). Registration required	3 years	Final examination, conducted by a central board
Kansas	3 years college, prior to registration	3 years full-time (office only, 40 hours weekly, 36 weeks each year, semi-annual reports) Registration required	3 to 4 years. Registration required for office work	3 years of daytime or 4 years of evening sessions	Final examination, conducted by a central board

MINIMUM REQUIREMENTS FOR ADMISSION TO LEGAL PRACTICE IN THE UNITED STATES, CANADA, AND NEWFOUNDLAND AT THE BEGINNING OF THE ACADEMIC YEAR 1934-35 (Continued)

	Minimum amount of general education required before		Duration and distribution of period of law study			System of examination in legal attainments
	Beginning period of law study	Taking final examination	Wholly outside of a law school	Partly in a law school	Wholly in a law school	
Kentucky	None	Eligibility to take entrance examination of a college requiring for entrance equivalent of high school	Not permitted	No credit for office work	2 years	Final examination, conducted by a central board
Louisiana	None	Equivalent of high school	3 years (under supervision of a local lawyer) Registration required	3 to 4 years required for other than law school study	3 years, or 4 years if in a four-year school	Final examination, conducted by a central board
Maine	None	Equivalent of high school	3 years full-time (office only)	3 to 4 years	3 years, full-time of daytime or 4 years of evening sessions	Final examination, conducted by a central board
Maryland	Equivalent of high school, prior to registration		3 years (office only) Registration required	3 years Registration required of all except students in out-of-state schools	3 years Registration required of all except students in out-of-state schools	Final examination, conducted by a central board
Massachusetts	Equivalent of high school, but after Sept. 1, 1938, 2 years college or equivalent		3 years (office only) Registration required	3 to 4 years Registration required for office work	3 years of full-time or 4 years of part-time sessions	Final examination, conducted by a central board
Michigan	2 years college or, in the case of special students in local law schools, equivalent of high school, prior to registration	4 years (office only, 4 hours daily 6 days each week, 36 weeks each year) Registration required	4 years Registration required	3 years of full-time or 4 years of part-time sessions, and two years college in the case of students who are admitted to the 95 per cent of its entrants	Final examination, conducted by a central board
Minnesota	2 years college, or examination conducted by the State University, prior to registration		4 years (office only, 18 hours weekly, 36 weeks each year) Registration required	4 years Registration required for office work	3 years of daytime or 4 years of evening sessions	Three intermediate examinations and one final, conducted by a central board, but for study pursued in a law school the final examination only
Mississippi	None	Equivalent of high school	No rule	No rule	No rule	Final examination, conducted by a central board, but graduates of the law school maintained by the State University take its examinations only
Missouri	None, but after Nov. 1, 1934, 2 years college or equivalent	Until Nov. 1, 1934, equivalent of high school	3 years (office only, 40 weeks each year, 40 hours each week) Registration required	3 to 4 years Registration required for office work	3 years of daytime or 4 years of evening sessions	Final examination, conducted by a central board

	Twenty-four months	Twenty-four months	Twenty-four months	Final examination, conducted by a central board, but graduates of the law school maintained by the State University take its examinations only
Montana	2 years college or specified equivalent	Twenty-four months	Twenty-four months	Final examination, conducted by a central board, but graduates of the law school maintained by the State University take its examinations only
Nebraska	Equivalent of high school	3 years (office only, 20 hours weekly, 40 weeks each year) Registration required	3 years, with increased requirements for students not graduating Registration required of those studying in a local law office or in one of the three local law schools	Final examination, which in the case of registered students may be supplemented by intermediate examinations, conducted by a central board, but graduates of two of the three local law schools take law school examinations only
Nevada	None	No rule	No rule	Final examination, conducted by a central board
New Hampshire	None	Equivalent of high school	3 years (office only)	Final examination, conducted by a central board
New Jersey	2 years college or equivalent approved academic courses	3 years full-time (office only 6 hours daily, 40 hours each week) Registration required	3 years, including at least two months of office work which may be obtained into the law school vacations Registration required for office work	Final examination, conducted by a central board, but graduates of the law school take law school examinations in local practice, additional examination for admission as counsellor
New Mexico	2 years college or special admission to law school approved by A B A	Not permitted	No credit for office work	Final examination, conducted by a central board, yields a temporary license, which may be made permanent after 1 year
New York	2 years college, or examinations conducted at a college authorized for this purpose by the State Department of Education Other than college graduates must file proof prior to registration	4 years full-time (office only) Registration required For non-college graduates, details vary in the nine judicial districts, registration required	For college graduates, 4 years Registration required for office work For non-college graduates, clerkship requirement, details vary in the nine judicial districts, registration required	Final examination, conducted by a central board
North Carolina	None	2 years	2 years	Final examination, conducted by a central board
North Dakota	None	3 years (office only) Registration required	3 years Registration required for office work	Final examination, conducted by a central board

MINIMUM REQUIREMENTS FOR ADMISSION TO LEGAL PRACTICE IN THE UNITED STATES, CANADA, AND NEW FOUNDLAND AT THE BEGINNING OF THE ACADEMIC YEAR 1934-35 (Continued)

	Minimum amount of general education required before		Duration and distribution of period of law study if pursued			System of examinations in legal attainments
	Beginning period of law study	Taking final examination	Wholly outside of a law school	Partly in a law school	Wholly in a law school	
Ohio	2 years college, prior to registration		4 years (office only, 200 hours of instruction annually) Registration required of residents	4 years Registration required of residents	3 years of full-time or 4 years of part-time sessions Registration required of residents	Final examination, conducted by a central board
Oklahoma	None	Graduation from high school or teacher's certificate	3 years full-time (office only) Registration required	3 to 4 years Registration required	3 years of full-time or 4 years of part-time sessions Registration required	Final examination, conducted by a central board
Oregon	None	High school or, prior to Aug. 1936, examination	4 years (office only) Registration required	4 years	3 years	Final examination, conducted by a central board
Pennsylvania	Non-scientific degree, or scientific degree representing two years of Latin or French and sufficient percentage from an approved college, or College Entrance Board examination, largely in prescribed subjects, prior to registration		4 years full-time (office only) Registration required	3 years of full-time or 4 years of part-time sessions, including at least two semesters of instruction daily, which may be interpolated into the law school vacations, but except by special permission at least four months must be served after final examination Registration required except for nonresidents studying in out-of-state schools	Not permitted	Final examination, conducted by a central board
Rhode Island	2 years college or equivalent		4 years full-time (office only) Registration required	3 years in and graduation from an approved full-time law school, otherwise 4 years, including at least six months of office work, which may be interpolated into the law school vacations Registration required for office work	Not permitted	Final examination, conducted by a central board
South Carolina	Equivalent of high school		2 years (under direction of a local lawyer)	2 years	2 years	Final examination, conducted by a central board, but graduates of the law school maintained by the State University take its examinations only
South Dakota	None	Equivalent of high school	3 years (office only) Registration required	3 years Registration required of residents	3 years Registration required of residents	Final examination, conducted by the law school maintained by the State University

Tennessee	Equivalent of high school	2 years (office only)	2 years	Final examination, conducted by a central board
Texas	Equivalent of high school, prior to registration	3 years (office only, under supervision). Registration required	Not permitted	Final examination (which may be deferred in annual examinations), but graduates of local law schools and of 13 other schools, take law school examinations only
Utah	None	Indefinite	3 years	Final examination, conducted by a central board
Vermont	None	Equivalent of high school	4 years, or in the case of applicants with two years of college training, 3 years (office only). Registration required	Final examination, conducted by a central board
Virginia	2 years college or special admission to law school approved by A. B. A. (for those preparing entirely in such schools)	None, but after July 1, 1935, 2 years college or equivalent (for other applicants)	No rule except as to residents aged 19 to 21 at time of examination (2 years local, office only)	Final examination, conducted by a central board
Washington	2 years college or special admission to law school approved by A. B. A.	4 years (office only, 30 hours weekly, 40 weeks each year; annual sessions). Registration required	3 to 4 years law school work, satisfactorily completed but not yielding a degree, for 3 years school and office Registration required for office work	Final examination, conducted by a central committee
West Virginia	None	2 years college or examination conducted by the Registrar of the State University	Not permitted	Final examination, conducted by a central board, but graduates of the law school maintained by the State University take its examinations only
Wisconsin	2 years college or special admission to law school approved by A. B. A. (for law school students)	2 years college or examination conducted by any approved university or college (for office students)	4 years (office only, quarterly reports). Registration required	Final examination, conducted by a central board, but graduates of the two local law schools, take law school examinations only

MINIMUM REQUIREMENTS FOR ADMISSION TO LEGAL PRACTICE IN THE UNITED STATES, CANADA AND NEWFOUNDLAND AT THE BEGINNING OF THE ACADEMIC YEAR 1934-35 (Continued)

	Minimum amount of general education required before		Duration and distribution of period of law study pursued			System of examination in legal attainments
	Beginning period of law study	Taking final examination	Whole or outside of a law school	Partly in a law school	Wholly in a law school	
Wyoming	2 years college or special admission to law school approved by A. B. A. (for those preparing entirely in a law school)	2 years college or special admission to law school approved by A. B. A. (for those preparing partly in a law school)	Not permitted	3 years school and office, of which at least 1 must be in a school	3 years of full-time or 4 years of part-time sessions	Final examination, conducted by a central board
CANADA Alberta	2 years college, prior to registration		5 years, or in the case of college graduates, 3 years (office only). Registration required	3 years local school, followed by 1 year office. Registration required for office work	Not permitted	Two intermediate and two final examinations, conducted jointly by the Law Society and the local university, but graduates of the law school maintained by the local university take its examinations only
British Columbia	Graduation from college, subject to certain exceptions, prior to registration		Not permitted in Vancouver, elsewhere 5 years, or in the case of college graduates, 3 years (office only). Registration required	5 years, or in the case of college graduates, 3 years, including 3 years concurrent local school, or 3 years extra-provincial school interpolated into the office work. Registration required	Not permitted	Two intermediate and separate Solicitor and Barrister examinations, conducted by the Law Society
Manitoba	2 years college supplemented by oral and written examination, prior to registration		Not permitted in or near Winnipeg, elsewhere 5 years, or in the case of college graduates, 4 years (office only). Registration required	5 years or in the case of college graduates, 4 years, including 4 years concurrent local school and office. Registration required	Not permitted	Three intermediate examinations and one final, conducted by the school maintained jointly by the Law Society and the local university
New Brunswick	2 years college or examination, prior to registration		4 years, or in the case of college graduates, 3 years (office only). Registration required	3 years concurrent local school and 3 years extra-provincial school with office work interpolated into the law school vacations. Registration required	Not permitted	Two intermediate examinations and one final, conducted by the Bar. The final examination of the law school maintained by the local university take its examinations only, and graduates of other law schools the final examination only, interval of one year before call to the Bar

Nova Scotia	2 years college including specified subjects, or examination, prior to registration	4 years, or in the case of college graduates, 3 years (office only) Registration required	3 years school, and nine months office work, of which at least six must be in the law school, may be interpolated into the law school's vacations Registration required	Not permitted	Two intermediate examinations and one final, conducted by the Barristers' Society, but graduates of the law school maintained by the local university take its examinations only, in which the Barristers' Society participates
Ontario	1 year college or equivalent in specified subjects, prior to registration	Not permitted	3 years concurrent local school and office, preceded, except in the case of college graduates, by 2 years office Registration required	Not permitted	Two intermediate examinations and one final, conducted by the Law Society
Prince Edward Island	Graduation from college, or examination equivalent to 2 years college, including specified subjects, prior to registration	5 years, or in the case of college graduates, 4 years (office only) Registration required	5 years, or in the case of college or law school graduates, 4 years, with office work during nonattendance at law school and during entire final year Registration required	Not permitted	Two intermediate examinations and one final, conducted by the Law Society, but in any subject the corresponding examination of any one of 3 Canadian law schools may be substituted, unless a certain standard of excellence is obtained, in which case the student must wait one year before call to the Bar
Quebec Notaries	Complete course of classical and scientific studies, prior to registration	5 years (office only) Registration required	3 years concurrent local school and office, or 4 years office including 2 years concurrent local school Registration required	Not permitted	One final examination, conducted by the Chamber of Notaries
Bar	College degree, or examination under authority of the Bar, prior to registration	4 years (office only) Registration required	3 years concurrent local school and office, or 3 years office including 1 year office Registration required for office work	Not permitted	One final examination, conducted by the Bar
Saskatchewan	2 years college, prior to registration	Not permitted	3 years school, followed by 2 years, or in the case of college graduates by 1 year office Registration required for office work	Not permitted	One final examination in statutes and court procedure, conducted jointly by the Law Society and the university maintaining the local law school
NEWFOUNDLAND	1 year college, prior to registration	5 years, or in the case of college graduates, 3 years, or for intermediate cases, 4 years (office only) Registration required	4 years, or in the case of college graduates, 3 years, including 3 years law school interpolated into the office work Registration required	Not permitted	Four intermediate examinations and one final, conducted by the Law Society

AMERICAN BAR ASSOCIATION
APPROVED LAW SCHOOLS

The following law schools comply with the Standards of the American Bar Association and have been approved by the Council of the American Bar Association on Legal Education and Admissions to the Bar. Unless otherwise indicated, the following law schools are members of the Association of American Law Schools.

ALABAMA

Alabama, University of, School of Law, Tuscaloosa

ARIZONA*

Arizona, University of, College of Law, Tucson

ARKANSAS

Arkansas, University of, School of Law, Fayetteville

LIBRARY

By Anita M. Hostetter

Secretary of the Board of Education for Librarianship
of the American Library Association

In October, 1933, the Council of the American Library Association adopted the following qualitative standards presented by the Board of Education for Librarianship, to replace quantitative standards adopted in 1925

MINIMUM REQUIREMENTS FOR LIBRARY SCHOOLS

The term "library school" is used to des-

ignate an agency which gives in a single academic year at least one coordinated professional curriculum in library science, for which credit for a full year of study is granted in accordance with the practice of the institution.

The character of the curriculum, efficiency of instruction, professional spirit and atmosphere of the library school, the professional achievement of its graduates, and the standards and general reputation of the institution of which it is a part, shall be factors in determining the eligibility of a library school for accreditation, in addition to the more quantitative factors enumerated as requirements. The interpretation of these requirements by the Board of Education for Librarianship will be in accordance with the spirit of the qualitative standard movement

CLASSIFICATION The classification of library schools neither includes nor implies a comparative rating or grading of the schools. Provision is made for three classes of library schools, Types I, II, and III

Type I comprises library schools which require at least a bachelor's degree for admission to the first full academic year of library science, and/or which give advanced professional training beyond the first year

Type II consists of library schools which give only the first full academic year of library science, requiring four years of appropriate college work for admission

Type III consists of library schools which give only the first full academic year of library science, not requiring four years of college work for admission

ORGANIZATION Type I and Type II library schools shall be a part of a degree-conferring institution approved by the Board of Education for Librarianship for giving professional instruction.

A Type III library school shall be a part of a degree-conferring institution or of a library or other institution approved by the Board of Education for Librarianship for giving professional instruction

ADMINISTRATION The executive officer shall have such administrative authority as shall enable him to conduct the library

school in accordance with these requirements

Secretarial and clerical assistance shall be provided for the performance of duties relating to the administration of the library school

FINANCIAL STATUS The adequacy of the financial provision for a library school shall be judged in relation to its program of professional education, the salary schedule of the institution, and necessary instructional facilities and equipment

ADMISSION REQUIREMENTS The selection of students for admission to a library school should be based on the ability and capacity of the candidates to perform satisfactorily the work which will be required of them in the library school and in library service

Type I library schools, for admission to professional study beyond the first year in library science evidence satisfactory to the institution and the library school of (1) graduation from an approved college or university representing study in fields appropriate to the requirements of librarianship and meeting specific subject and scholarship requirements for graduate study of the institution and the library school, (2) successful completion of one full academic year in an accredited library school and four years of appropriate college work, (3) aptitude and personal qualifications for library service, and (4) ability profitably to pursue advanced professional study

Type I and Type II library schools, for admission to the first year in library science evidence satisfactory to the institution and the library school of (1) graduation from an approved college or university representing study in fields appropriate to the requirements of librarianship and meeting specific subject and scholarship requirements of the library school, (2) aptitude and personal qualifications for library service, and (3) ability profitably to pursue the curriculum A reasonable period of satisfactory experience in a library of recognized standing is strongly recommended as highly desirable.

Type III library schools, for admission evidence satisfactory to the institution and

the library school of (1) successful completion of fewer than four years of college work appropriate in scope and content to the requirements of librarianship and meeting specific subject and scholarship requirements of the library school, (2) aptitude and personal qualifications for library service, and (3) ability profitably to pursue the curriculum A reasonable period of satisfactory experience in a library of recognized standing is strongly recommended as highly desirable

In conformity with the policies of the institution, a library school should reserve the right, first, to refuse to admit persons who present proper credentials but who fail to show evidence of aptitude and personal qualifications for library service and ability profitably to pursue the curriculum, and second, to interpret admission requirements in favor of a few persons of exceptional ability who fail to meet formal requirements

CURRICULUM In judging a curriculum, the following factors will be considered objectives of instruction, adequacy of courses to meet the objectives and the changing needs of the library profession, correlation of courses, and provision for specialization through elective courses or separate curricula

The first-year curriculum shall be one full academic year in length and shall include courses providing instruction in the various aspects of librarianship functions and administration of libraries, bibliography and technical processes In accordance with the policies of the institution, a library school should reserve the right to accept elective courses in related fields and to admit to courses in library science qualified students who are enrolled in other schools or departments of the institution

A library school may also give the same curriculum or curricula, as a whole or in part, in cumulative summer sessions under conditions equivalent to those obtaining in the regular college year.

Advanced study in library science, leading both to the master's degree and the doctorate, shall be conducted under conditions

conforming to university graduate instruction.

CREDENTIALS For satisfactory completion of the first year of professional training taken as a fourth year of an undergraduate college course B A or B S , or a certificate if the first year of professional training is not taken toward completion of a degree.

For satisfactory completion of the first year of professional training following a bachelor's degree if the first year offered to graduates is organized at least on a basis equivalent to an undergraduate major and if it constitutes a complete curriculum in itself which fits for general or specialized library service, and is approved by this board, a second bachelor's degree may be conferred in accordance with the general policy of the individual institution with respect to the granting of a second bachelor's degree. It is recommended by the Board of Education for Librarianship that the second bachelor's degree be followed by the qualifying phrase "in library science." Or a certificate may be granted for satisfactory completion of the first year of professional training following a bachelor's degree.

For satisfactory completion of advanced professional study conducted in conformity with regulations for graduate study of the institution M.A or M.S for successful completion of a minimum of one year beyond the first year of professional training, and Ph.D for additional years which may include the second year.

FACULTY The faculty should be adequate in number and in qualifications to determine and carry out the program of the library school in accordance with these requirements.

Qualifications. In general, teachers in library schools should have a degree representing four years of appropriate work in an approved college or university, they should have completed at least two years of work in an accredited library school, and have had sufficient practical knowledge of the subjects taught and demonstrated ability in teaching to satisfy the institution and the Board of Education for Librarianship. In lieu of these requirements, teachers may

present equivalent academic and professional preparation and experience.

In addition, graduate study and training in research equivalent to that required for the doctorate are urgently recommended, particularly for teachers in library schools giving advanced professional instruction.

Number The number of teachers required, whether full-time or part-time, shall be determined by the character of the library school, the number and content of required and elective courses, the average number of enrolled students and similar factors.

The majority of teachers shall have professional rank.

Necessary assistants shall be provided to cover the revision of student work and other duties.

Teaching Schedules Teaching schedules shall be governed in general by the practice of the institution. In view of the professional nature of the courses, the widely scattered materials of instruction, the necessity for revision of student work and for conference with students, an unduly heavy teaching schedule for each instructor will be discouraged.

QUARTERS AND EQUIPMENT Quarters and equipment shall be adequate and commensurate with those provided for other departments of the institution.

LIBRARIES Adequate book and library facilities for study and practice shall be provided. The character and organization of the library of the institution, as well as the special collections provided for the library school itself, will be judged in relation to the curriculum offered. In addition, libraries of various types shall be readily accessible for practical work and observation.

SUMMER COURSES Summer courses in library science, with the exception of cumulative courses given as equivalent of or credited toward the completion of a full professional curriculum, cannot be considered the equivalent of a library school curriculum. No library school credits correspondence courses toward the completion of a professional curriculum.

The Board of Education for Librarianship is very definitely of the opinion that training on the part of non-accredited institutions, normal schools, teachers colleges, and particularly undergraduate liberal arts colleges, should be directed toward acquainting students with the use of libraries and with their functions, to the end that students may be prepared to make full and profitable use of libraries, and perhaps later as teachers to train their students to use libraries successfully as readers. For this type of instruction there is a definite need—instruction in the history of libraries, in the history of books and bookmaking, in the graphic arts of illustration and printing, in the historic development of book-binding, and, in short, in all those “bookish” subjects which aid in the formation of an educated man and help him to use books successfully and easily. Training in the use of books and libraries which involves an understanding of indexes, card catalogs and bibliographies, is likewise most advantageous and desirable. Further, studies in the literature of childhood and adolescence, and bibliographical instruction in the materials for directed study in various subject matter fields, are distinctly within the province of teacher training agencies. Such instruction, however, should not be confused with the professional training of librarians.

Directors of library schools report an increasing number of persons desiring to enter on second-year professional study who have taken a certain number of courses in library science as undergraduates in non-accredited colleges, normal schools and other institutions. No library school can ordinarily accept as candidates for its second degree, persons with only this type of training.

As a result of the oversupply of professionally trained librarians during the general economic depression and the reduction of enrollment in library schools, more students have been selected for their qualities of leadership, aptitude for library service, and likelihood of placement, as well as for high scholastic standards. A number of the library schools have raised their admission requirements to college graduation, and a

reading knowledge of French and German, as well as a good scholarship record.

With the exception of one, each accredited library school now in existence is connected with a degree-conferring institution. The library schools of Columbia University and the universities of California, Illinois, and Michigan offer a two-year curriculum leading to the master's degree in library science. The University of Chicago Graduate Library School offers instruction and research on a graduate basis only, in special phases of library science, and awards the degrees of master of arts and doctor of philosophy.

The library schools accredited by the Board of Education for Librarianship as of 1935 are the following:

CALIFORNIA

California, University of, School of Librarianship (Type I), Berkeley

COLORADO

Denver, University of, School of Librarianship (Type III), Denver

GEORGIA

Emory University Library School (Type II), (formerly Library School, Carnegie Library of Atlanta), Atlanta

ILLINOIS

Chicago, University of, Graduate Library School (Type I), Chicago
 Illinois, University of, Library School (Type I), Urbana

KANSAS

Kansas State Teachers College, Library School (Type III), Emporia

LOUISIANA

Louisiana State University, School of Library Science (Type II), Baton Rouge

MASSACHUSETTS

Simmons College, School of Library Science (Types II and III), Boston

MICHIGAN

Michigan, University of, Department of Library Science (Type I), Ann Arbor

MINNESOTA

Minnesota, University of, Division of

Library Instruction (Type III), Minneapolis

St. Catherine, College of, Library School (Type III), St. Paul

NEW JERSEY.

New Jersey College for Women, Library School (Type III), New Brunswick

NEW YORK

Columbia University, School of Library Service (Type I), New York
New York State College for Teachers, Department of Librarianship (Type III), Albany

Pratt Institute, School of Library Science (Type III), Brooklyn

Syracuse University, School of Library Science (Type II), Syracuse

NORTH CAROLINA

North Carolina, University of, School of Library Science (Types II and III—Tentative), Chapel Hill

OHIO

Western Reserve University, School of Library Science (Type II), Cleveland

OKLAHOMA

Oklahoma, University of, School of Library Science (Type III), Norman

PENNSYLVANIA

Carnegie Institute of Technology, Carnegie Library School (Type II), Pittsburgh

Drexel Institute, School of Library Science (Type II), Philadelphia

TENNESSEE

George Peabody College for Teachers, Library School (Type II), Nashville

VIRGINIA

Hampton Institute, Library School (Type II), Hampton

WASHINGTON

Washington, University of, School of Librarianship (Type II), Seattle

WISCONSIN

Wisconsin, University of, Library School (Type III), Madison

CANADA

McGill University, Library School (Type II), Montreal

MEDICINE

By William D. Cutter

Secretary of the American Medical Association

Medical education affords an excellent illustration of how an unofficial, voluntary agency can exert a powerful influence in behalf of high standards of professional training. Since 1907 the American Medical Association, through its Council on Medical Education and Hospitals, has classified medical schools on the basis of personnel, equipment, administration, and the standing of graduates in the various state licensing examinations. Although its findings have, of themselves, no legal authority, many states have enacted statutes accepting the Council's ratings of medical schools as the basis for determining the eligibility of applicants for admission to the licensing examinations.

Public interest in medical education was aroused by the publication in 1910 of a report prepared for the Carnegie Foundation for the Advancement of Teaching by Abraham Flexner. The elimination of the unfit decreased student enrollment and the number of medical schools, but since the war there has been a steady increase in the number of applicants seeking admission to medical schools. During the last five years, hundreds of those who found themselves unable to matriculate in medicine in the United States or Canada have migrated to European institutions.

Recently the Council has undertaken a comprehensive resurvey of medical education and by the end of the academic year 1935-36 will have revisited all of the recognized schools north of the Rio Grande.

The Council, with headquarters at 535 North Dearborn Street, Chicago, consists of Dr. Ray Lyman Wilbur, *Chairman*, Stanford University, California, Dr. Merritte W. Ireland, Washington, D. C., Dr. Charles E. Humiston, Chicago, Dr. Frederic E. Washburn, Boston, Dr. John H. Musser, New Orleans, Dr. Fred Moore, Des Moines; Dr. Reginald Fitz, Boston, and Dr. William D. Cutter, *Secretary*, Chicago.

The Council on Medical Education and Hospitals of the American Medical Association issues seven lists of approved institutions

1 *Medical Schools* From 1907 to 1928 medical schools were classified as A, B, and C. Since 1928 all recognized medical colleges have been considered as approved. As a result of the resurvey of medical schools now in progress the approval of three schools has been withdrawn. These schools with qualifying footnotes can be noted in the list which follows. Prior to 1907 prospective medical students had no means of knowing the character of the institutions which they intended to enter. Graduates of unapproved schools are eligible for licensure in only a few states.

2 *Graduate Medical Schools* A list of recognized graduate medical schools and courses is appended. The Council is planning in the future to survey the field of graduate medical education and as a result the compilation referred to is incomplete.

3 *Hospitals Approved for the Training of Interns* Inspection of hospitals has enabled the Council to list 697 hospitals which provide internships for 6,443 graduates.

4 *Hospitals Registered as Reputable* This list is printed in the Journal of the American Medical Association annually and the American Medical Directory.

5 *Approved Colleges of Arts and Sciences and Junior Colleges* For the guidance of prospective medical students and admitting officers, the Council publishes annually a compilation of colleges of arts and sciences approved by the following agencies:

Association of American Universities

Middle States Association of Colleges and Secondary Schools

New England Association of Colleges and Secondary Schools

North Central Association of Colleges and Secondary Schools

Northwest Association of Secondary and Higher Schools

Southern Association of Colleges and Secondary Schools

6 *Physicians Specializing in Pathology and Clinical Pathology* This list was begun in 1924 as requested by a joint committee of pathologists, chemists, and bacteriologists. At first the list was published under the heading of "Approved Clinical Laboratories." More recently the name was changed to its present form. The "Essentials" for approval were prepared by a joint committee of pathologists, chemists, and bacteriologists cooperating with the Council. There have been subsequent revisions by the Council and representatives of the other groups. The guiding principle is that the practice of clinical pathology is the practice of medicine—hence, only licensed physicians specializing in clinical pathology are eligible for the list. The latest list published in the Journal of the American Medical Association on October 20, 1934, contained 795 names.

7 *Physicians Specializing in Radiology* A tentative list of radiologists together with a full report of the survey of departments of radiology appeared in the Journal of the American Medical Association for May 23, 1931. The list was prepared at the request of radiologists acting through their respective national organizations. During subsequent years the Council continued to develop and enlarge the lists and in cooperation with radiologists to improve the "Essentials." Around 1932 the name of the list was changed to its present form. The latest list was published in the Journal of the American Medical Association for February 23, 1935, and contained 1,286 names. With the organization of the American Board of Radiology and its recognition by the Council on Medical Education and Hospitals, the Council discontinues the preparation of the list which is hereafter to be prepared by the American Board of Radiology who will administer examinations to applicants. The board consists of Dr. H. K. Pancoast, *President*, Philadelphia, Dr. A. C. Christie, *Vice-President*, Washington, D. C., Dr. R. B. Kirklin, *Secretary-Treasurer*, Rochester, Minnesota, Dr. E. C. Ernst, St. Louis; Dr. G. W. Holmes, Boston, Dr. E. L. Jenkinson, Chicago, Dr. L. C.

Kinney, San Diego; Dr W F Manges, Philadelphia, Dr. L. J. Menville, New Orleans, Dr. J W Pierson, Baltimore, Dr L. R. Sante, St Louis, Dr. H. Schmitz, Chicago, Dr. A Soiland, Los Angeles, Dr M. C. Sosman, Boston, and Dr R H Stevens, Detroit

Special issues of the Journal of the American Medical Association containing approved lists, statistics, and current information regarding medical schools, medical licensure, and hospitals appear each year

PRE-MEDICAL EDUCATION

Since 1918 one of the essentials of an acceptable medical school has been a pre-medical requirement of two years of college work including courses in physics, chemistry, and biology.

In June, 1933 the following statement from the By-Laws* of the Association of American Medical Colleges was adopted by the Council as its pre-medical standard. In substance it does not differ from the two-year college prerequisite. No attempt is made to outline courses to be pursued in secondary schools.

Section 2 Requirements for Admission. Admission to medical schools and medical colleges in membership in the association may be by

(1) Satisfactory completion of a minimum of collegiate instruction, as provided below in subsection I, or by

(2) Examination, as provided in subsection II.

Subsection I The minimum of collegiate credit required for entrance to medical schools and colleges in membership in the association shall be not less than two full academic years, which shall include English, theoretical and practical courses in physics and biology,† and in general and organic chemistry, completed in institutions approved by accrediting agencies accept-

able to the executive council of the association.

Exception may be made under this section in that any member may admit applicants who have fulfilled the requirement in American and Canadian institutions not approved by such accrediting agencies, provided that all admissions so made be reported to the executive council and shall be published in the next annual report of the council.

All collegiate instruction given in satisfaction of this requirement must be based on the same entrance requirements and must be of the same quality and standard of instruction as that required for a baccalaureate degree in the institution in which the candidate received his preparation.

Subsection II Admission to medical schools and medical colleges in the association may be by examination.

Examinations for the purpose of admission by this method shall be conducted by institutions acceptable to the executive council of the association, under the following conditions:

(a) Candidates who have completed two years of collegiate instruction and present evidence of general scholarship of high order, but who lack credits in not more than two of the required subjects, may be admitted on passing examinations in these subjects.

(b) Candidates who have completed three years of collegiate instruction and present evidence of having accomplished work of distinction in one or more fields of learning, but who lack credits in any or all of the required subjects, may be admitted on passing examinations in these subjects.

CURRICULUM

The Council recognizes as the standard curriculum that provided in the By-Laws* of the Association of American Medical Colleges, which is as follows:

Section 3 Curriculum. The entire course of four years shall consist of from 3,600 to 4,400 hours, distributed as from 900 to 1,100 hours per year, and shall be grouped as set forth in the following schedule, each

* Constitution and By-Laws of the Association of American Medical Colleges, amended Oct. 30, 1934.

† Exceptions may be made in these subject requirements only in unusual cases. Proposed exceptions shall be presented to and approved by the executive council.

group to be allotted approximately the percentage of hours of the whole number of hours in the courses as stated.

	Hours	Per Cent
1 Anatomy, including embryology and histology	14	18 5
2 Physiology	4 5	6
3 Biochemistry	3 5	4 5
4 Pathology, bacteriology and immunology	10	13
5 Pharmacology	4	5
6 Hygiene and sanitation	3	4
7 General medicine	20	26 5
Neurology and psychiatry		
Pediatrics		
Dermatology and syphilis		
8 General surgery	13	17 5
Orthopedic surgery		
Urology		
Ophthalmology		
Otolaryngology		
Roentgenology		
9 Obstetrics and gynecology	4	5
Total	76	100
Electives	24	0

When the teaching conditions demand it, a subject may be transferred from one division to another

MEDICAL COLLEGES

Below are given brief descriptions of the medical colleges of the United States which have been approved by the Council on Medical Education and Hospitals. Changes in the classification can be noted in the notes following certain schools. The name, address, year of organization, history, and date when first class graduated are given in each instance. Unless otherwise stated, a class was graduated each year thereafter. Where official reports have been received from the college, information regarding faculty, entrance requirements, length of term, fees, students (excluding specials and postgraduates), graduates, name of dean, and dates of next session is given without discrimination. Figures for graduates include all graduated in the year beginning July 1, 1934. Extracts from the Constitution and By-Laws of the American Medical Association with regard to the pre-medical requirements and the medical school curriculum, which have been adopted by the Council on Medical Education and

Hospitals as its standards are stated in the two preceding sections

ALABAMA

UNIVERSITY

UNIVERSITY OF ALABAMA SCHOOL OF MEDICINE—Organized in 1859 at Mobile as the Medical College of Alabama. Classes graduated in 1861 and subsequent years excepting 1862 to 1868, inclusive. Reorganized in 1897 as the Medical Department of the University of Alabama. Present title assumed in 1907, when all property was transferred to the University of Alabama. In 1920 clinical teaching was suspended and the medical school was removed to the university campus near Tuscaloosa. Coeducational since 1920. Minimum entrance requirements are 90 semester hours of collegiate work. The course of study covers two years of 36 weeks each. The faculty includes 13 professors and 10 instructors, assistants, etc., a total of 23. The tuition fees are \$271 each year. Total registration for 1934–35 was 130.

ARKANSAS

LITTLE ROCK

UNIVERSITY OF ARKANSAS SCHOOL OF MEDICINE, 300 West Markham Street—Organized in 1879 as the Medical Department of Arkansas Industrial University. Present title in 1899. In 1911 the College of Physicians and Surgeons united with it and it became an integral part of the University of Arkansas. The first class was graduated in 1880. Clinical teaching was suspended in 1918 but resumed in 1923. Coeducational since organization. The faculty consists of 34 professors and 65 lecturers and assistants, a total of 99. The curriculum covers four years of nine months each. Entrance requirements are two years of collegiate work. The B.S. degree in medicine is conferred at the end of the second year. The fees for the four years for residents of Arkansas are \$200, nonresidents are charged \$150 additional each year. The total registration for 1934–35 was 230, graduates, 42.

CALIFORNIA

BERKELEY-SAN FRANCISCO

UNIVERSITY OF CALIFORNIA MEDICAL SCHOOL, University Campus, Berkeley, Medical Center, San Francisco—Organized in 1862 as the Toland Medical College. The first class graduated in 1864. In 1872 it became the Medical Department

of the University of California. In 1909, by legislative enactment, the College of Medicine of the University of Southern California, at Los Angeles, became a clinical department but was changed to a graduate school in 1914. In 1915 the Hahnemann Medical College of the Pacific was merged, and elective chairs in homeopathic materia medica, and therapeutics were provided Coeducational since organization. Three years of collegiate work are required for admission. The work of the first year is given at Berkeley and that of the last three years at San Francisco. The faculty is composed of 138 professors and 243 associates and assistants, a total of 381. The course covers four years of eight months each, and an additional fifth year consisting of an internship in a hospital or of special work in a department of the Medical School. Fees for the four years, respectively, for residents of California are \$277, \$240, \$235, and \$235, nonresidents are charged \$300 additional each year. Total registration for 1934-35 was 239, graduates, 51.

LOMA LINDA-LOS ANGELES

COLLEGE OF MEDICAL EVANGELISTS—Organized in 1909. The first class graduated in 1914. The laboratory departments are at Loma Linda, the clinical departments at Los Angeles. Coeducational since organization. The faculty is composed of 59 professors and 237 associates, assistants, and instructors, a total of 296. The course covers a period of five years, including one year of internship. During the first and second years, the students are in school 12 months each year. This is accomplished by means of the "cooperative plan," the student spending alternate months in an approved hospital in practical lines of medical training. Sixty-four semester hours of collegiate work are required for admission. The total fees for the four years, respectively, are \$385, \$375, \$480, and \$440. The total registration for 1934-35 was 404, graduates, 83.

LOS ANGELES

UNIVERSITY OF SOUTHERN CALIFORNIA SCHOOL OF MEDICINE, 3551 University Avenue. Organized in 1885 as the University of Southern California College of Medicine. First class graduated in 1888. In 1908 it became the Medical Department of the University of California in Los Angeles. In 1909 the College of Physicians and Surgeons, established in 1904, became the Medical Department of the University of Southern California. Its activities were suspended in 1920, reorganized in May, 1928, under present title. The faculty consists of 132 professors and 126 instructors, assistants, and others, a total of

258. An internship is required for graduation. Three years of collegiate work are required for admission. Coeducational since organization. Annual fees amount to \$450. The total registration for 1934-35 was 176, graduates, 35.

SAN FRANCISCO

STANFORD UNIVERSITY SCHOOL OF MEDICINE, 2398 Sacramento Street, San Francisco—Organized in 1908, when, by agreement, the interests of Cooper Medical College were taken over. The first class graduated in 1913. Coeducational since organization. The faculty consists of 109 professors and 156 lecturers, assistants, and others, a total of 265. Three years of collegiate work are required for admission. The course covers four years of eight and one-half months each, plus a fifth year of intern work. The fees for the four years, respectively, are \$470, \$446, \$364, and \$364. The total registration for 1934-35 was 220, graduates, 47.

COLORADO

DENVER

UNIVERSITY OF COLORADO SCHOOL OF MEDICINE, 4200 East Ninth Avenue—Organized in 1883. Classes were graduated in 1885 and in all subsequent years except 1898 and 1899. Denver and Gross College of Medicine were merged, January 1, 1911. Coeducational since organization. The faculty is composed of 57 professors and 130 lecturers, instructors and assistants, a total of 187. The course covers four years of nine months each. The entrance requirements are three years of collegiate work. The fees for residents of Colorado, for each of the four years are, respectively, \$211, \$231, \$181, and \$191. Nonresidents are charged \$132 additional each year. The total registration for 1934-35 was 205, graduates, 47.

CONNECTICUT

NEW HAVEN

YALE UNIVERSITY SCHOOL OF MEDICINE, 333 Cedar Street—Chartered in 1810 as the Medical Institution of Yale College. Organized in 1812, instruction began in 1813, first class graduated in 1814. CANADA

ALBERTA

UNIVERSITY OF ALBERTA FACULTY OF MEDICINE, Edmonton—Organized in 1913 Coeducational since organization Has given the complete six-year medical course since 1924 The faculty includes eight full-time and 66 part-time professors, instructors, assistants and others, a total of 74 Fees for the first year are \$150, for the second, third and fourth years, \$215, for the fifth and sixth years, \$225 The registration for 1934-35 was 197, graduates, 29

MANITOBA

UNIVERSITY OF MANITOBA FACULTY OF MEDICINE, Corner of Emily and Bannatyne Avenues, Winnipeg Organized in 1883 as Manitoba Medical College, first class graduated in 1886, and a class graduated each subsequent year The college transferred all its property to the University of Manitoba in 1919 and assumed the present title Coeducational since organization The faculty includes 31 professors, 79 instructors and assistants, a total of 110 Matriculation requirements include two years of collegiate work in the faculty of arts and science of a recognized university The course extends over four years of eight months each and a hospital internship The total fees for the five years, respectively, are \$270, \$265, \$275, \$275, and \$145 Total registration for 1934-35 was 202, graduates, 44

NOVA SCOTIA

DALHOUSIE UNIVERSITY FACULTY OF MEDICINE, Halifax—Organized in 1867 Incorporated as the Halifax Medical College in 1875 Reorganized as an examining faculty, separate from the Halifax Medical College, in 1885 In 1911, in accordance with an agreement between the Governors of Dalhousie University and the Corporation of the Halifax Medical College, the work of the latter institution was discontinued and a full teaching faculty was established by the university By an arrangement between Dalhousie University and the Provincial Medical Board of Nova Scotia, the final professional examinations are conducted conjointly by the university and the board, and candidates may qualify at the same time for their academic degrees and the provincial license First class graduated in 1872 Coeducational since 1871 It has a

faculty of 23 professors and 43 demonstrators, lecturers and others, a total of 66 Requires for matriculation two years of arts The medical course covers four years and a hospital internship of one year The fees are \$312, \$312, \$312, \$302, and \$302 for each year, respectively, \$200 additional registration fee payable by students outside the British Empire The total registration for 1934-35 was 151, graduates, 22

ONTARIO

QUEEN'S UNIVERSITY FACULTY OF MEDICINE, Kingston—Organized 1854, first class graduated in 1855, and a class graduated each subsequent year The faculty was originally a department of the university, but a separation took place in 1866, when the school was conducted under the charter of the Royal College of Physicians and Surgeons at Kingston It admitted women from 1880 until 1883 In 1892 the school again became a part of Queen's University The faculty numbers 56 The fee for the first year is \$175 and \$220 for each of the other five years There is an additional registration fee of \$50 for students outside the British Empire The course covers six years of 30 teaching weeks each The total registration for 1934-35 was 310, graduates, 48

UNIVERSITY OF WESTERN ONTARIO MEDICAL SCHOOL, Ottawa Avenue, London—Organized in 1881 as the Western University Faculty of Medicine, first class graduated in 1883, and a class graduated each subsequent year Present title in 1923 The medical school has been under the control of the Board of Governors of the University of Western Ontario since 1913 Coeducational since 1913 The faculty numbers 83 The course of study covers six years of eight months each The total fees to residents of Canada for the last four years, respectively, are \$225, \$225, \$233, and \$258 The registration for 1934-35 was 229, graduates, 34

UNIVERSITY OF TORONTO FACULTY OF MEDICINE, Toronto—Organized in 1843 as the Medical Faculty of King's College Abolished in 1853 Reestablished in 1887 In 1902 it absorbed Victoria University, Medical Department, and in 1903 it absorbed the Medical Faculty of Trinity University Coeducational since 1903 The course of study covers six years of eight months each The B S degree in medicine is conferred at the end of the third or sixth year It has a faculty of 62 professors and 255 lecturers, associates and others, a total of 317 The fees are \$195 for the first year, for the second, \$370, \$265 for the third year, \$290 for the fourth and fifth years, and \$322 for the sixth year The total registration for 1934-35 was 816, graduates, 110

QUEBEC

MCGILL UNIVERSITY FACULTY OF MEDICINE, 3640 University Street, Montreal—Founded in 1824 as Montreal Medical Institution, became the Medical Faculty of McGill University in 1829, first class graduated under the university auspices in 1833. No session between 1836-39, owing to political troubles. In 1905 it absorbed the Faculty of Medicine of the University of Bishop College. Coeducational since 1919. Three years of collegiate work are required for admission. The length of the medical course is five years. The faculty consists of 62 professors and 152 lecturers and others, a total of 214. The total fees for each of the five medical years are \$393. The total registration for 1934-35 was 504, graduates, 103.

UNIVERSITY OF MONTREAL, FACULTY OF MEDICINE, 1265 St. Denis Street, Montreal—Organized in 1843, incorporated in 1845 as the Montreal School of Medicine and Surgery. In 1891, by act of Parliament, the Medical Faculty of Laval University (organized in 1878) was absorbed. Present name by act of Parliament in 1920. A class was graduated in 1843 and in each subsequent year. Coeducational since 1925. The faculty numbers 117. One year of premedical college work is required for admission to a five-year medical course. The total fees for each of the five years, respectively, are \$252, \$229, \$275, \$243, and \$218. The total registration for 1934-35 was 184, graduates, 35.

LAVAL UNIVERSITY FACULTY OF MEDICINE, Quebec—The Quebec School of Medicine, organized in 1848, became in 1852 the Laval University Faculty of Medicine, first class graduated in 1855, and a class graduated each subsequent year. The faculty numbers 88. The fees for each of the medical years are \$160, \$170, \$160, \$160, and \$180 for residents of Canada. Nonresidents are charged an extra fee of \$190 each year. The premedical requirement is a B.A. degree. Total registration for 1934-35 was 246, graduates, 32.

SASKATCHEWAN

UNIVERSITY OF SASKATCHEWAN SCHOOL OF MEDICAL SCIENCES, Saskatoon—Organized in 1926. Coeducational. Offers the first two years of the medical course. Students require three more years of medicine for graduation. Two years of collegiate work are required for admission. The B.S. degree in medicine is conferred at the end of the second year. The medical faculty includes eight professors and four lecturers and assistants, a total of 12. The fees are \$150 for each year. The total registration for 1934-35 was 52.

RECOGNIZED GRADUATE MEDICAL SCHOOLS AND COURSES

Revised to March 1, 1934

CALIFORNIA

STANFORD UNIVERSITY SCHOOL OF MEDICINE, San Francisco—Higher degree courses in clinical subjects. Loren R. Chandler, dean.

UNIVERSITY OF CALIFORNIA GRADUATE DIVISION, Berkeley—Higher degree courses. Address the dean of the Graduate Division, 113 California Hall, Berkeley.

COLORADO

UNIVERSITY OF COLORADO SCHOOL OF MEDICINE, Denver—Higher degree and general review courses. Special course leading to the degree of doctor of ophthalmology. Maurice H. Rees, dean.

CONNECTICUT

NEW HAVEN SCHOOL OF PHYSIOTHERAPY, New Haven—Short courses for physicians given throughout the year. Harry Eaton Stewart, director.

YALE UNIVERSITY SCHOOL OF MEDICINE, New Haven—Higher degree courses. Edgar S. Furniss, dean.

ILLINOIS

CHILDREN'S MEMORIAL HOSPITAL, Chicago—Special courses in pediatrics (four weeks).

NORTHWESTERN UNIVERSITY MEDICAL SCHOOL, Chicago—Postgraduate course in physical therapy. One-month course three or four times a year. Irving S. Cutter, dean.

UNIVERSITY OF CHICAGO, RUSH MEDICAL COLLEGE, Chicago—Special courses offered to a limited number of physicians who wish to spend a year or more in improving their preparation for the practice of a specialty in dermatology and syphilology, ophthalmology, otolaryngology, and radiology. Ernest E. Irons, dean.

UNIVERSITY OF ILLINOIS COLLEGE OF MEDICINE, Chicago—Extension courses for practitioners. David John Davis, director of graduate work in medicine.

INDIANA

INDIANA UNIVERSITY SCHOOL OF MEDICINE, Indianapolis—General practice courses. Willis Dew Gatch, dean.

IOWA

STATE UNIVERSITY OF IOWA COLLEGE OF MEDICINE, Iowa City—Higher degree courses. John T. McClintock, chairman of Executive Committee.

KANSAS

UNIVERSITY OF KANSAS SCHOOL OF MEDICINE, Kansas City—Higher degree courses Harry R Wahl, dean

LOUISIANA

TULANE UNIVERSITY GRADUATE SCHOOL OF MEDICINE, New Orleans—Higher degree and general review courses H W Kostmayer, dean

MARYLAND

JOHNS HOPKINS UNIVERSITY SCHOOL OF HYGIENE AND PUBLIC HEALTH, Baltimore—Courses for graduates leading to degrees in public health and hygiene Allen West Freeman, dean

JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE, Baltimore—Offers graduate study in various departments to a limited number of physicians Alan M Chesny, dean

MASSACHUSETTS

HARVARD MEDICAL SCHOOL, COURSES FOR GRADUATES, Boston—Basic review and general practice courses Frank R Ober, assistant dean

HARVARD SCHOOL OF PUBLIC HEALTH, Boston—Tropical medicine and review courses and higher degree courses in public health David L Edsall, dean

MASSACHUSETTS INSTITUTE OF TECHNOLOGY, Cambridge—Review courses and higher degree courses in public health S C Prescott, Sc D, head of the Department of Biology and Public Health

MICHIGAN

UNIVERSITY OF MICHIGAN MEDICAL SCHOOL, Ann Arbor—General practice courses James D Bruce, director of Postgraduate Medicine, University Hospital, Ann Arbor

WAYNE UNIVERSITY, COLLEGE OF MEDICINE, Detroit—Courses in public health, hygiene and preventive medicine, leading to the degree of doctor of public health W H MacCracken, dean

MINNESOTA

UNIVERSITY OF MINNESOTA GRADUATE SCHOOL OF MEDICINE, Minneapolis—Rochester—Fellowships, higher degree, and public health courses Guy Stanton Ford, dean, Minneapolis, Louis B Wilson, Mayo Foundation, Rochester

MISSOURI

WASHINGTON UNIVERSITY SCHOOL OF MEDICINE, St Louis—Research opportunities for graduates in all departments Short postgraduate courses offered annually in pediatrics, obstetrics

and gynecology, and otolaryngology W McKim Marriott, dean

NEW YORK

ALBANY MEDICAL COLLEGE, Albany—Courses in medicine for the general practitioner, also in public health, hygiene and preventive medicine Opportunity provided for small groups of physicians to receive personal clinical instruction Thomas Ordway, dean

CORNELL UNIVERSITY MEDICAL COLLEGE, New York—Higher degree and general practice courses G Canby Robinson, director

SCHOOL OF OPHTHALMOLOGY AND OTOTOLOGY, NEW YORK EYE AND EAR INFIRMARY, New York

Six months' course in ophthalmology and otology beginning January 1 and July 1 of each year, also special courses for graduates Address Secretary of Committee on School

NEW YORK POLYCLINIC MEDICAL SCHOOL AND HOSPITAL, New York—General practice and advanced special courses F H Dillingham, medical executive officer

NEW YORK POST-GRADUATE MEDICAL SCHOOL AND HOSPITAL, New York—General practice courses Willard C Rappleye, director Raymond B Allen, associate director

NEW YORK STATE HOSPITAL, Ray Brook—Three months' course in tuberculosis offered in the fall of each year Harry A Bray, superintendent

NEW YORK UNIVERSITY, UNIVERSITY AND BELLEVUE HOSPITAL MEDICAL COLLEGE, New York—Review and higher degree courses Address Graduate School of New York University

TRUDEAU SCHOOL OF TUBERCULOSIS, Saranac Lake—Scholarships, preferably for tuberculous physicians and medical students (Six weeks' course, four weeks' course, given usually in May and June each year) Edward R Baldwin, director

UNIVERSITY OF BUFFALO SCHOOL OF MEDICINE, Buffalo—Courses are offered in anatomy, biochemistry, pathology and bacteriology, pharmacology and physiology, and weekly clinics Edward W Koch, dean

OHIO

OHIO STATE UNIVERSITY COLLEGE OF MEDICINE, Columbus—Higher degree courses J H J Upham, dean

UNIVERSITY OF CINCINNATI COLLEGE OF MEDICINE, Cincinnati—Higher degree courses L T More, dean of the Graduate School

WESTERN RESERVE UNIVERSITY GRADUATE SCHOOL, Cleveland—Higher degree courses Elbert J Benton, dean.

PENNSYLVANIA

UNIVERSITY OF PENNSYLVANIA GRADUATE SCHOOL OF MEDICINE, Philadelphia—Higher degree, general practice and special courses George H Meeker, dean

PUERTO RICO

UNIVERSITY OF PUERTO RICO SCHOOL OF TROPICAL MEDICINE, San Juan—(Under the auspices of Columbia University) Courses in tropical medicine and public health given throughout the school year George W Bachman, director

TENNESSEE

VANDERBILT UNIVERSITY SCHOOL OF MEDICINE, Nashville—Four months' course for physicians of Tennessee who are holders of Commonwealth Fund Fellowships Graduate courses in public health (two courses of three months each) John B Youmans, director of postgraduate instruction

WISCONSIN

UNIVERSITY OF WISCONSIN MEDICAL SCHOOL, Madison—Higher degree courses, intramural and extramural postgraduate courses C R Bardeen, dean

NURSING EDUCATION

By Ernestine Wiedenbach

Secretary of the American Nurses Association

Schools of nursing in the United States must meet certain minimum requirements set by law in each individual state, in order to qualify as accredited schools. In addition, the National League of Nursing Education has set up standards for good schools of nursing, which it encourages all schools to adopt. Since some schools of nursing meet only the minimum requirements set by law, while others approach or exceed the standards set by the National League, a wide divergence in the quality of nursing schools exists.

Definition of a Good School of Nursing

A good school of nursing develops in students the skills of ministering to the sick, of caring for the patient's mental, environmental, and physical needs, and of giving health service to families and communities as well as to individuals. It instructs them in the principles and methods of health conservation and health education, and

"helps them to realize as fully as possible their potentialities as individuals and as nurses, to the end that they may give their best service to society and at the same time achieve the greatest happiness and satisfaction in their own lives."

The good school is accredited by the state education department or by some other body empowered to do so by statute of the state. It adheres to a definite educational plan, under especially qualified instructors. This plan includes class work in theory, practice work on hospital wards, and an introduction to the field of public health nursing. The National League of Nursing Education recommends the following courses in the basic sciences: anatomy, physiology, chemistry, bacteriology, nutrition and cookery, sociology, and psychology. Courses are also recommended in the principles and practice of nursing as related to all the experiences which the students receive on the hospital wards, such as medical, surgical, mental, and communicable disease nursing, and nursing in children's diseases. The hospital of which the school may be a part employs a sufficient number of graduate nurses to insure good nursing care to patients and balanced nursing experience to the students. Graduation from the school entitles the student to take the state board examinations which must be passed before she can qualify as a registered nurse.

Types of Courses Offered In January, 1935, the number of nursing schools in the United States which met the minimum requirements set by state laws, was 1,472. Most of these offer a three-year course which leads to the nursing diploma. One hundred and thirty-two of them are known to offer courses leading to a B.S. degree as well as to the diploma in nursing, and to have students working for the degree. Some of these offer a four-year and some a five-year course. In addition, two schools offer undergraduate courses which lead to a Master of Nursing degree. An entrance requirement of these two is satisfactory completion of the course leading to the bachelor's degree.

Admission Requirements The admission

requirements of individual accredited schools of nursing vary. In general, however

Students should be within the ages of 18 and 35. Should a student plan to take the combination course which leads to a college degree as well as to a nursing diploma, she may be admitted as early as age 17.

Students should have completed high school and should have been graduated in the upper half or third of their classes. All things being equal, preference is given to young women who have had college work. Students are advised to include in their high school or college curriculum cultural subjects as well as physical and social sciences. English, history, a foreign language, chemistry, biology, physics, sociology and psychology are considered a useful background to the nursing course.

Students should be able to pass an aptitude test which they are often required to take upon entrance to the nursing school.

Students should be able to pass a stringent physical examination; they should have no physical abnormalities.

Postgraduate Courses in Nursing. In 1935, 17 colleges and universities in the United States conducted organized courses in teaching and administration for graduate nurses, and 16 conducted organized courses in Public Health Nursing.

Courses in clinical specialties have also been organized for graduate nurses.

Information. Information about the scope, preparation for, and opportunities in nursing may be obtained from the headquarters offices of the National Nursing Organizations—the American Nurses' Association, the National League of Nursing Education and the National Organization for Public Health Nursing—at 50 West 50th Street, New York City. They maintain a Nursing Information Bureau to which all questions may be addressed.

2 No college of pharmacy conducted for financial gain shall be eligible for membership in this Association

3 In order to qualify for membership, a college must have been in continuous operation for at least three years prior to the date of application. All curricula of undergraduate work must be in operation at the time of visitation by the examining committee

4 An application for membership must be accompanied by the approval of the state university, the state department of education or the state pharmaceutical association of the state in which the college is located. Application forms indicating information required by the Association will be furnished by the Chairman of the Executive Committee. A copy of the latest college catalog should also accompany the application for membership

5 In order to qualify for membership in the Association, the applicant college must possess a faculty which, in the judgment of the inspection committee, is sufficient in number and in every way qualified properly to carry on the work being undertaken by the college under consideration. The applicant college must number among its staff members at least three full-time professors in pharmaceutical subjects in the college of pharmacy, this requirement to become effective September, 1937. A full-time professor in a college of pharmacy shall be interpreted as meaning a person of professorial rank whose chief interest and activity is that of teaching or research in the college of pharmacy and who is readily available for consultation with students

The training of the members of the teaching staff of full professorial rank shall be that represented by the doctor of philosophy (Ph D) degree, or its equivalent, from a standard graduate school, or a corresponding amount of technical or professional preparation, together with successful teaching experience. Adequate administrative experience, in addition to the above qualifications, shall be required of a professor chosen to act as a department head or dean or director

Associate and assistant professors shall

PHARMACY

By Zada M. Cooper

Secretary-Treasurer of the American Association of Colleges of Pharmacy

The American Association of Colleges of Pharmacy has set up the following qualifications for members of the Association

1 An applicant for membership in this Association must be incorporated as a college of pharmacy, or be a school or college of pharmacy in a state university or other regularly incorporated, or legally empowered educational institution.

have had at least two (preferably three) years of study in a standard graduate school, or an equivalent amount of technical or professional preparation

Instructors shall possess as a minimum the training represented by the master's degree in their respective fields, or an equivalent amount of technical or professional preparation

In general, publications of meritorious original work, participation in professional meetings and sound teaching, indicate a superior faculty such as will meet the requirements of the Association

6 *The minimum requirements of member-colleges for admission of students as candidates for a degree shall be

Good moral character

Evidence of satisfactory completion of four years of high school work or its equivalent, which is of such a nature as adequately to prepare him for the work which he is undertaking

Students who are candidates for a degree shall be admitted to courses leading to such degrees only during the first 30 days of each session and all necessary certification of entrance requirements must be completed within 60 days of the opening of the college term

A student desiring to transfer from one college to another shall be required to present a transcript of his record and a certificate of honorable dismissal from the college he is leaving. If the above conditions are complied with, the admittance of the student is optional on the part of the second college, provided all entrance requirements can be met

Credits earned in a standard college, one recognized by the state educational depart-

* For students who have matriculated prior to the academic year 1932-33, the college shall require of each candidate for graduation not less than 2,250 hours of instruction, of which at least 1,000 hours shall consist of lectures and recitations such work to be given in a period of not less than three full college years of at least 30 weeks each. At least two months must elapse between the first and second and between the second and third years

September 1, 1936, shall be the latest date on which any member college may confer a degree for any course of less than four years' duration

ment or by the state university in the state in which it is located, may be accepted for face value in a college of pharmacy insofar as such work applies on the course in pharmacy, but regardless of amount of credit offered no student shall be permitted to complete the course in pharmacy in less than two collegiate years

Member-colleges shall prepare each year, before April 1, a statement of the students enrolled who have not been previously reported upon. There shall be included in this report a brief statement of the entrance credentials of each student reported. Such reports shall be certified to by the proper officers of the college, seal attached, and shall be forwarded to the Chairman of the Executive Committee, who shall carefully examine these lists and report to the Association at the next annual meeting any irregularity or evidence that the spirit or letter of the Association standards has been violated. The failure of any member-college to comply with this requirement shall be published in the Proceedings, and if the offending member, after due notification, fails to meet this requirement for two consecutive years, it shall be subject to expulsion from the Association. Said member-college may, upon the recommendation of the Executive Committee, be reinstated by a two-thirds vote of the entire Association

7 The institution shall include in its course of instruction oral lectures, recitations and personal laboratory work

Approximately 50 per cent of the total number of hours in the curriculum shall be professional and applied subjects and the remainder of a foundational or cultural nature. The professional and applied subjects shall include the pharmaceutical chemistries, the strictly pharmacy and business subjects, and the closely allied scientific subjects such as pharmacognosy, pharmacology, drug analysis and biological assay. The natural and biological sciences, English, economics, foreign languages, mathematics, psychology, and others, are classified as general, foundational or cultural subjects. In general, the curriculum should conform to that recommended

in the latest published edition of the National Pharmaceutical Syllabus

All subjects offered for the baccalaureate degree must be of collegiate grade. The general collegiate subjects must be taught in such a manner and under such conditions as to warrant credit in a non-pharmacy educational institution and to merit the admission of its graduates to standard graduate schools as candidates for advanced degrees in pharmacy or closely allied fields of science.

Member-colleges must publish an annual catalog in which the college calendar, members of the teaching staff, requirements for the various degrees offered, names and descriptions of courses, together with the names of the members of the teaching staff responsible for such courses, are clearly stated. The number of clock hours of class and laboratory work devoted to each course shall be clearly set forth, together with the credit afforded each. The semester hour shall be interpreted as representing one period of not less than 50 minutes of classroom work (lecture or recitation) per week for one semester. Three hours of strictly laboratory work or two of laboratory work with one hour of correlated reference or written work, shall be considered the minimum equivalent of one hour of classroom work.

Member-colleges may give credit for work done in absentia or in night school courses for academic, non-technical subjects only, provided such work has been taken in a recognized college or university which is a member of the Association of American Universities and whose credits are accepted by the state department of education or by institutions holding membership in the Association of American Universities.

Member-colleges may accept transfer students without examination from such non-member colleges as have been approved by the American Council on Pharmaceutical Education. Member-colleges may extend such credit to a transferring student as they deem wise and appropriate.

8. The laboratory equipment and apparatus shall be sufficient to carry on

properly all experimental work of the scientific and professional courses announced in the annual catalog. Such equipment must be replenished or increased by adequate annual appropriations. Ten thousand dollars' worth of laboratory apparatus and equipment may be considered the minimum amount necessary to carry on undergraduate laboratory work under the most restricted circumstances.

9. The library must contain such standard texts, reference books, and scientific journals as, in the judgment of the committee of inspection, may be essential for the type and scope of work being undertaken by the college under consideration. The library must also be supported by an annual appropriation which the committee deems adequate for upkeep and normal growth. The Association suggests as a guide to its inspection committees that, for a college carrying on only bachelor of science work, approximately 4,000 standard text and reference volumes would constitute the minimum requirement, provided they are supplemented by necessary scientific journals. The library should be properly cataloged, in charge of a trained librarian and open for student use not less than eight hours per day. Included among the library facilities should be an adequately lighted and ventilated reading room, large enough to accommodate at least 15 per cent of the student body.

10. Degrees to be awarded are as follows. The degree of bachelor of science (B S) or bachelor of science in pharmacy (B S in Phar), and these degrees only, may be given for the completion of the four-year course of not less than 3,200 hours. It is understood that these degrees are awarded for work of collegiate standard such as is done in our better arts and sciences colleges.

The degree of master of science (M S), master of science in pharmacy (M S. in Phar), doctor of philosophy (Ph D) or doctor of science (D Sc), may be given for work in course, providing the requirements of standard graduate schools are fully met. Graduate work shall be interpreted

as meaning work done after the completion of the requirements for the baccalaureate degree in a college of pharmacy. Graduate credit may not be given for undergraduate courses in the subject in which the candidate for a higher degree is doing his major work.

After July 1, 1938, the degree of doctor of pharmacy shall not be given for work in course.

11 The graduation requirements of all member-colleges for entering students shall be the satisfactory completion of not less than 3,200 clock hours of instruction, of which at least 1,300 hours shall consist of lectures and recitations and at least 1,300 hours shall consist of laboratory work. Such instruction shall be given within a period of not less than four full college years of at least 32 weeks each, and shall be scheduled over a minimum of five days per week in accordance with approved academic procedure. At least two months must elapse between the first and second years, the second and third years, and the third and fourth years.

A college may, with the approval of the Executive Committee, be permitted to shorten this time provided additional work is done in a regularly organized summer session in an approved institution and provided further that all the required hours have been completed.

Before being awarded a degree, every candidate must be adjudged by the combined faculty as having made a satisfactory record in the courses offered for graduation and to be a person suitably equipped, morally and otherwise, for the profession he is about to enter.

Member-colleges shall send each year to the Chairman of the Executive Committee, within one month following their spring Commencement, the names and addresses of all persons on whom degrees have been conferred during the past year, together with the degree awarded in each instance. All honorary degree awards shall be included in this report.

12 The educational policy of the administration, the thoroughness of scholar-

ship, the presence of the scientific spirit, the soundness and inspiration of instruction, effective faculty supervision of all extra-curricular activities, the quality of publicity indulged in, conservatism in awarding honorary degrees—indeed, the general tone of the institution, including students, as well as faculty—are important items concerning which definite regulations can hardly be established, but which will furnish the investigating committee important data bearing upon the decision which they are to make.

13 Should any member of the Association be guilty of flagrant violation of the Association's regulations or requirements, the Executive Committee may, if deemed advisable, suspend such member-college until its case can be formally acted upon at the next annual meeting of the American Association of Colleges of Pharmacy.

14 No change in qualifications for admission to or membership in the Association shall be made unless the same has been presented in writing to the Association at a regular meeting, or to the members of the Association by mail at least four months prior to its adoption. In either case, a two-thirds majority of all member-colleges voting on the proposed change is necessary for its adoption.

SOCIAL WORK

By Marion Hathway

Secretary-Treasurer of the American Association of
Schools of Social Work

The American Association of Schools of Social Work prepared a statement of standards for admission to that organization for publication in 1927. The membership in June, 1935, included the following institutions in the United States:

- CALIFORNIA**
California, University of, Graduate Curriculum in Social Service, Berkeley

*New York School of Social Work,
New York

OHIO

Ohio State University, School of Social
Administration, Columbus

Western Reserve University, School of
Applied Social Sciences, Cleveland

THEOLOGY

By Luther A. Weigle
Dean of the Yale Divinity
School

The scope of theological education has widened in recent years. To their original purpose of training men for the preaching ministry and pastoral service many theological seminaries have added curricula designed for other types of Christian vocation, such as foreign missionary service,

religious education, community service through religious agencies, and religious leadership in colleges and universities. To the original subjects of Old and New Testament, church history, systematic theology, and practical theology, the curricula for all vocational groups have added newer fields of study, such as comparative religions, Christian missions, the psychology of religion, mental hygiene, Christian ethics, Christian sociology, and religious education. In some cases provisions for the newer vocational groups and the newer fields of study have simply been added to the existing resources of the seminary without a fundamental reconsideration of their bearing upon the curriculum as a whole. In the last decade, however, many seminaries have made thoroughgoing revisions of their curricula.

Sixty-five of the stronger Protestant theological seminaries are members of the Conference of Theological Seminaries and Colleges in the United States and Canada, which was organized in 1918. The present officers of this Conference are President, Richard Davidson, Emmanuel College, Toronto; Chairman of the Executive Committee, Luther A. Weigle, Yale Divinity School; Secretary-Treasurer, Abdel Ross Wentz, Gettysburg Theological Seminary; Executive Secretary, Lewis J. Sherrill, Presbyterian Theological Seminary, Louisville.

Under the joint auspices of this Conference and the Institute of Social and Religious Research, a comprehensive study of theological education was undertaken in 1927. Mark A. May, professor of educational psychology and now director of the Institute of Human Relations at Yale University, was director of this study, for which an adequate staff was employed for the three years from June 1, 1929, to June 1, 1932. The results of the study were published in 1934 in four volumes under the general title, *The Education of American Ministers*. These volumes can be procured from Harper and Brothers, who have taken over the publications of the Institute of Social and Religious Research.

It is difficult to make out an exact list of institutions of theological education, for these institutions are of widely different sorts, from theological seminaries which are graduate professional schools in the full sense of the term, offering a three- or four-year course of study beyond college education, on down through theological colleges which offer an undergraduate professional course, to Bible schools which offer various courses for ministers and other religious workers which do not lead to professional or vocational degrees. The Study of Theological Education investigated 176 Protestant theological seminaries, of which 138 may properly be classified as theological seminaries which aim, at least, to be graduate professional schools. The remaining 38 are of the undergraduate or Bible school type. Twelve of these institutions only are non-denominational, the remainder are under the control of the denomination.

A number of seminaries have made thorough revisions of their curricula within the last few years. Features of many of these revisions are: the abolition of the old departmental divisions in the interest of a more coherent, intelligible curricular pattern, the effort to bring the curriculum closer to everyday living and to help students to see more clearly the relation which the students in the seminary sustain to the problems of the vocation which they plan to enter, the encouragement of student initiative and the provision of ample opportunity for specialized and intensive work, abolition of the old system of academic bookkeeping in favor of more comprehensive tests, better student counseling and a closer approximation to tutorial methods, integration of the student's field work into the curriculum as clinical practice and the institution of methods of supervision which seek to direct this work to the full educational advantage of the student, lengthening the theological course to four years instead of three in the case of men engaged upon field work of a major character, the frank recognition of the principle of experimentation in curriculum building, and the institution by a number of semi-

naries of processes of selection among candidates for admission and limitation of their enrollment.

The Conference of Theological Seminaries and Colleges has taken action looking toward the standardization of degrees in theological education and has appointed a Commission on Standards of Admission to Theological Seminaries, a Commission on the Accrediting of Institutions of Theological Education, and a Commission on Cooperation in Theological Education. These commissions will report at the next meeting of the Conference in June, 1936.

For information regarding the organization of theological training in institutions of the Roman Catholic Church, see an article entitled *Seminaries*, Volume XIII, page 694 of the Catholic Encyclopedia, Cyclopaedia Press, Inc., New York, 1913, and see also the pamphlet, *Catholic Seminaries in the United States*, 1936, National Catholic Welfare Conference, Department of Education, 1312 Massachusetts Avenue, N.W., Washington, D.C.

The information concerning Jewish, Protestant, and Roman Catholic seminaries for theological training tabulated on pages 152-159 has been secured from church board secretaries, and in many instances from the seminary administrative officers. Occasionally the reports included college figures as well as seminary figures. When this could be determined, the figures in the table were starred. Dashes in the columns indicate that no information was received from the institution nor from the church board secretary.

For the reader's convenience, the Protestant seminaries have been grouped under major classifications. Of course such a grouping does not imply the presence of a church organization which embraces the various sects within the major classification.

Divinity schools, schools of religion, and theological seminaries which confer the doctor of philosophy degree in theology, religious education, or church history, are listed in the summary tables on pages 54-76 as institutions conferring the Ph.D. in the field of religion.

VETERINARY MEDICINE

By H Preston Hoskins

Secretary-Editor of the American Veterinary
Medical Association

Ten state universities and colleges have organized separate schools or divisions of veterinary medicine, all of which are recognized by the American Veterinary Medical Association. All require graduation from a four-year high school for admission. The course of study extends over four years and leads to the degree of doctor of veterinary medicine. Some of the veterinary colleges require one year of pre-veterinary work for entrance. This work does not necessarily have to be taken in the institution where the regular veterinary course is taken. At some of the schools there is opportunity for graduate research work. *The Journal of the American Veterinary Medical Association*, 221 North La Salle Street, Chicago, Illinois, for November, 1931 (single copy, 40 cents), contains a report of the Association's Committee on Education, giving very complete data regarding the schools. The schools are as follows:

ALABAMA

Alabama Polytechnic Institute, College of Veterinary Medicine (1907), Auburn

COLORADO

Colorado State College of Agriculture and Mechanic Arts, Division of

Veterinary Medicine (1907), Fort Collins

IOWA

Iowa State College of Agriculture and Mechanic Arts, Division of Veterinary Medicine (1879), Ames

KANSAS

Kansas State College of Agriculture and Applied Science, Division of Veterinary Medicine (1905), Manhattan

MICHIGAN

Michigan State College of Agriculture and Applied Science, Division of Veterinary Science (1909), East Lansing

NEW YORK

Cornell University, New York State Veterinary College (1894), Ithaca

OHIO

Ohio State University, College of Veterinary Medicine (1885), Columbus

PENNSYLVANIA

Pennsylvania, University of, School of Veterinary Medicine (1884), Philadelphia

TEXAS

Texas, Agricultural and Mechanical College of, School of Veterinary Medicine (1916), College Station

WASHINGTON

Washington, State College of, College of Veterinary Medicine (1895), Pullman

Chapter V

The Foreign Student in the United States

IMMIGRATION REGULATIONS SOURCES OF INFORMATION EDUCATIONAL
CREDENTIALS TRAVEL IN AMERICA CLOTHING AND LODGING EXPENSES
AND FUNDS VACATIONS ORGANIZATIONS OF STUDENTS FROM ABROAD
UNIVERSITY OFFICERS AND FOREIGN STUDENTS CONSTRUCTIVE INFLUENCE OF
FOREIGN STUDENTS NUMBERS OF STUDENTS FROM FOREIGN COUNTRIES

The student from abroad has always been welcome in the universities of the United States. It must be said, however, that the foreign student will meet all sorts and conditions of men during his travels and during his residence even in a university community. Many he meets will be sympathetic, helpful, hospitable, and cosmopolitan in their point of view, these represent the best heart and mind of America. University officials, professors, and the various Christian associations on the campus extend a cordial welcome to students from other lands.

IMMIGRATION REGULATIONS

A foreign student desiring to study in a university of the United States must first satisfy the American immigration authorities. The Immigration Act of 1924 provides for admission to the United States on a quota basis. The Act provides, however, for certain non-quota immigrants of which the following paragraphs of Section 4 are important for students desiring to enter the United States for a period of study.

Section 4 When used in this Act the term "non-quota immigrant" means (c) An immigrant who was born in the Dominion of Canada, Newfoundland, the Republic of Mexico, the Republic of Cuba, the Republic of Haiti, the Dominican Republic, the Canal Zone, or an independent country of Central or South America, and his wife, and his unmarried children under 18 years of age, if accompanying or following to join him,

(d) An immigrant who continuously for at least two years immediately preceding the time of his application for admission to the United

States has been, and who seeks to enter the United States solely for the purpose of, carrying on the vocation of minister of any religious denomination, or professor of a college, academy, seminary, or university, and his wife, and his unmarried children under 18 years of age, if accompanying or following to join him, or

(e) An immigrant who is a bona fide student at least 15 years of age, and who seeks to enter the United States solely for the purpose of study, at an accredited school, college, academy, seminary, or university, particularly designated by him and approved by the Secretary of Labor, which shall have agreed to report to the Secretary of Labor the termination of attendance of each immigrant student, and if any such institution of learning fails to make such reports promptly the approval shall be withdrawn.

Section 15 The admission to the United States of an alien declared to be a non-quota immigrant by subdivision (e) of section 4, shall be for such time as may be by regulations prescribed, and under such conditions as may be by regulations prescribed to insure that, at the expiration of such time or upon failure to maintain the status under which admitted, he will depart from the United States.

Non-quota immigration visas are issued by consular officers of the United States on satisfactory proof that the applicant is entitled to be approved as a non-quota immigrant. It is most important that the consul be consulted as soon as possible, because immigration regulations are changed from time to time, and the effort to simplify and expedite the work of the Immigration and Naturalization Service leads to changes in practice. It is to be noted, moreover, that consuls, and not ambassadors and ministers, issue visas.

According to Section 4, paragraph (e), the student must designate the "accredited school, college, academy, seminary, or university," and the institution named must have the approval of the Secretary of Labor. The student, as soon as possible, must submit his credentials to the registrar of the institution he desires to enter. After the credentials have been approved by the registrar, the student will be notified by letter. This letter should be shown to the consul at the time of application for a visa as a non-quota immigrant student.

Migration from one college or university to another is permitted provided the receiving institution is one approved by the Department of Labor.

Many cases have arisen of persons in possession of non-quota student visas desiring to remain in the United States permanently. Students are warned that the Department of Labor does not permit change to a permanent status while the student is in the United States. To effect such a change, the student must leave this country and secure a new visa from an American consular officer abroad. This regulation is necessary to protect those residents abroad who apply in good faith for inclusion in the quota. If a student, therefore, expects to remain permanently in the United States, he ought, while in his native land, to make early application for inclusion in the quota from his country.

SOURCES OF INFORMATION

In Other Countries For specific information not here presented, the student abroad will be wise to make inquiry at one of the following offices:

The first authoritative source of information is the office of the American consul. The Institute of International Education maintains foreign offices in many countries. *Argentina* Instituto Cultural Argentino-Norte Americano, Maipú 686, Buenos Aires, *Austria* Austro-American Institute of Education, Elizabethstrasse 9, Vienna I, *Czechoslovakia* Student Information and Travel Bureau, Akademický dum, Pod Letnov, Prague III, America Institute, Na

Porčí 12, Prague II, *England* American University Union, 1 Gordon Square, London, W C 1, National Union of Students, 3 Endsleigh Street, London, W C 1, *France* American University Union, 173 Boulevard St Germain, Paris, Fondation des Etats-Unis, 15 Boulevard Jourdan, Paris, 14e, *Germany* Deutscher Akademischer Austauschdienst, Kronprinzen Ufer 13, Berlin N W. 40, Amerika-Institut, Universitätsstrasse 8, Berlin, *Hungary* National Federation of University Students, Kínizsy ut 10, Budapest IX and Ferenc korut 38, Budapest, National Union of Students, Semmelweiss ut 2, Budapest IV, *Italy* Associazione Italo-Americana, Corso Umberto I, 271, Rome, Centro Italiano Informazioni Universitarie, Ministry of Justice, Via del Conservatorio, Rome, Italo-American Institute, Via dei Corsi 1, Florence, *Spain* Junta para Ampliación de Estudios, Duque de Medinaceli 4, Madrid, *Switzerland* Verband der Schweizerischen Studentenschaften, 44a Eidgenössische Technische Hochschule, Zurich, Schweizerische Zentralstelle für Hochschulwesen, Zeitglockenlaube 2, Berne, Students' International Union, 177 Chemin Rigot, Geneva.

In the United States Students who are interested in American universities and colleges will obtain most helpful information by writing to the Institute of International Education, Stephen Duggan, director, 2 West 45th Street, New York, for the *Guide Book for Foreign Students in the United States*. This guide book is complete with general and specific information regarding education in America. Much of the information in this chapter has been secured from the Institute.

The Travelers' Aid Society, with offices in ports of entry and in large cities throughout the United States, will also gladly assist an inquiring student. A representative of this society can usually be found at railway stations in the large cities, but if no representative is at the railway station, the city office of the society can be reached by telephone. Other agencies which give similar friendly guidance are the Committee on

Friendly Relations Among Foreign Students, Charles D Hurrey, Secretary, 347 Madison Avenue, New York, the International Student Committee, Anne Wiggin, the National Young Women's Christian Association, 600 Lexington Avenue, New York, and on the Pacific Coast, the International Secretary of the University Young Men's Christian Association, the University of California, Berkeley, California

EDUCATIONAL CREDENTIALS

If the information in this volume is not sufficient to enable a student to choose an institution of higher education, he may write to the administrative officers named herein, requesting circulars or bulletins of information, time schedules for the ensuing year, and application forms for use in seeking admission. When the candidate has selected the college or university he wishes to attend, he should submit his application with properly authenticated copies of his credentials. These may include diplomas or certificates of achievement, together with the catalog of the institution formerly attended marked to show what the student's curriculum has been in satisfaction of the degree requirement. A letter from an educational authority known to American education officers will be helpful if it specifically shows the scope of a student's work and the quality of his achievement, not in technical terms such as American semester hours and grades, but in language clearly understood by any intelligent person.

The majority of American colleges or universities require foreign students to submit evidence of a good working knowledge of English. Mastery of the English language is essential not only for the perusal of books and for the understanding of lectures, but also in connection with oral and written reports required in American institutions. Students from other lands must have adequate control over English as a tool, they are advised to secure in advance one or two source books used in an American class in order that the reading required may be appreciated to some extent.

TRAVEL IN AMERICA

On arrival at the port of entry, students must pass the immigration and customs officers. Passports and other credentials will be shown to the former. For the latter a full declaration of dutiable articles should be made. Prohibited and dutiable articles are listed in the declaration forms issued on the steamship. Such a list may also be examined at any consulate.

Travel in the United States is likely to be considered expensive because of the long distances involved. From New York to Chicago is 909 miles, from Chicago to New Orleans, 930 miles, from Chicago to San Francisco, 2,271 miles. Other than student holiday excursion rates, there are no special student transportation fares. Relative costs of travel by motorbus, by railway, and by airplane are indicated in the following table.

Average Fares from New York City February, 1936

	To Chicago	To New Orleans	To San Francisco
Bus Fare	\$16 00	\$18 60	\$42 25
Railway Fare	\$32 70	\$41 64	\$92 44
Railway Fare including Pullman accommodations, lower berth	\$41 70	\$52 64	\$120 79
Airplane Fare including meals	\$47 95	\$73 85	\$149 00

Motorbus transportation is very popular among students because it is usually the least expensive. In addition, traveling by bus affords an opportunity to see more of the country than is possible by train or plane. Every town and city has bus stations where information regarding routes and rates may be secured. In general the bus rates vary from less than a cent a mile to three cents or more. Bus travelers may take 65 pounds of hand luggage and a trunk weighing not more than 100 pounds without extra charge.

The cost of railway transportation varies in different sections of the United States. West of the Mississippi River, railway travel per mile, in what is known as the day

coach, is about 1.5 cents; east of the River, in the southern states, it is 2 cents per mile, and in the northern states, 3.6 cents per mile.¹ Accommodations in the sleeping car and in the parlor car, or "Pullman accommodations," cost considerably more. Each railway ticket includes transportation for 150 pounds of baggage in addition to whatever hand luggage the passenger may have. The baggage master in the railway station, upon examining the passenger's ticket, checks the trunk and heavy baggage, and gives the passenger a claim check to be used in identifying the luggage at his destination.

The average cost of airplane travel is 5 or 9 cents a mile and in any instance where time is a factor, the cost of airplane transportation compares favorably with railway Pullman transportation. Thirty-five pounds of luggage may be carried by each passenger without extra charge. Trans-oceanic passengers who fly from an inland airport to a seaport enroute to their ocean liner may carry 100 pounds of baggage free.

Eastern Time, Central Time, Mountain Time, and Pacific Time are the four divisions of Standard Time in America. Eastern Time is five hours later than that of Greenwich, and Central, Mountain, and Pacific Time each successively marks an hour's change. Thus, Central Time is one hour later than Eastern Time. Daylight Saving Time, known as Summer Time in Belgium, France, Great Britain, Holland, and Spain, is one hour earlier than Standard Time, and is adopted locally by some cities. Railways usually operate on Standard Time.

CLOTHING AND LODGING

Foreign students must bear in mind the wide range of climates in the United States and should anticipate the climatic conditions of the part of the country in which the selected college or university is located. Winters in New England, for instance, are very different from winters in Arizona, and

necessitate very different types of clothing.

Not a few colleges and universities have specific lodging regulations which apply to students from other countries. Information regarding lodging should be secured from the office of the dean of the college, or from the officer in charge of foreign students.

EXPENSES AND FUNDS

The Institute of International Education recommends that the student bring with him, in addition to his sea and land fares, at least \$1,000 to carry him through the first academic year and the summer vacation. Too frequently the cost of the first year is underestimated. If a foreign student is in need of additional funds, he may, in some institutions, secure them from the "Student Loan Fund." However, since demands from American students usually exceed the amount of money available, the fund is seldom large enough to meet the needs of foreign students.

Scholarships and fellowships in the universities and colleges are generally open to students from other countries on the same terms as to American students. In addition, certain scholarships are open to foreign students only, a list of such scholarships is published by the Institute of International Education.

Foreign students should change their foreign currency, Letter of Credit, or Travelers' Checks to American currency at reputable banks or travel agencies. Funds may be deposited in the university cashier's office, if the university undertakes to care for student funds, or in a bank. The latter affords the convenience of paying all larger bills by check, the cancelled check being a valid receipt for payment.

American students both admire and respect fellow students who earn their way through college. Self-help is usual among American students, thousands of them, approximately 40 per cent of the student population, earn part or all of their educational expenses.

The question naturally has arisen: can foreign students with non-quota immigrant student visas engage in such occupations?

¹ A reduction of fare to 2 cents per mile to take effect June 2, 1936, has been ordered by the Interstate Commerce Commission.

The attitude of the Department of Labor has thus far been generous. Bona fide students who have engaged in earning funds to pay for their university expenses have not been discouraged. Many students find employment during the summer vacation in orchards, harvest fields, and resorts. Some colleges disapprove of a student's earning money while carrying on college work on the ground that such activities interfere with a student's prime responsibilities, most colleges, however, not only approve of self-help, but provide employment bureaus to enable students to find positions. All colleges and universities advise students not to undertake such employment during their first term, but to devote that time to their studies and to observation of opportunities for remunerative employment in the community. American students intending to study in other lands are usually advised to be prepared to finance the entire period of study before going abroad.

VACATIONS

Vacations in American colleges make it necessary for the foreign student to include in his budget an item for room and board during the time the colleges are not in session. The long vacation begins late in June and extends until late in September. This time may well be devoted to a summer session at a university, or to travel. Railways frequently announce excursions at reduced rates during the vacation season. Break of journey (stop-over) is permitted on round-trip tickets. There are vacations of approximately ten days at Christmas and in the spring. During the Christmas holidays many of the learned societies hold their annual meetings. Students expecting to specialize are advised to attend the annual meeting of the learned society. Special railway rates are usually available for conventions. The exact time of the spring vacation depends on the calendars of the institutions, those using the semester system have holidays at Easter, those with a three-term or four-quarter system have an interval at the end of March.

ORGANIZATIONS OF STUDENTS FROM ABROAD

In many colleges there are local organizations of foreign students, Cosmopolitan Clubs, and International Clubs. Students of all nations, including a minority made up of citizens of the United States, are eligible for membership. (See International Houses, Page 41.) The *Guide Book for Foreign Students in the United States* of the Institute of International Education contains a list of all such organizations of interest to foreign students.

Of course a foreign student will be aware of the guidance which the diplomatic representative of his country resident in Washington, D C, may be able to give. For instance, Chinese students holding scholarships of the Central Government and the Provincial Governments are supervised by the Chinese Embassy in Washington. Moreover, a student is likely to find a national society existing in any of the larger universities: a Japanese Club, a Filipino Club, a Chinese Club, a Korean Club, a Cercle Français, a Deutsches Verein, and others. Some of these have a national organization. These associations have frequently been of service in the interpretation of the university to a new student, and of a new student to an officer of the institution. It is to be observed that all educational authorities in the United States encourage foreign students to associate with Americans as much as possible in order to assure practice in the use of English and the experience of meeting Americans of various types. It is for this very reason that American educators advise American students in France to study in provincial universities where there are few Americans to tempt them to the use of English, rather than in Paris, where there are so many opportunities to be with citizens of their own country. So it is very often desirable for a student from abroad to begin his studies in the United States in a small college where there are few or no citizens of his homeland to induce him to resort frequently to the use of his mother tongue. After all, one of

the foreign student's principal reasons for studying in the United States is to increase as much as possible his control of the English language. Moreover, association with the people of the country entails an understanding of their interests, customs, and ideals. Foreign students are advised to keep in touch with national societies, especially those which function among returned students for the best interests of such students and of their country. They are urged to make contacts with American students of like interests, ambitions, and culture.

UNIVERSITY OFFICERS AND FOREIGN STUDENTS

In every institution the foreign student will find an official who is ready to confer with him regarding his special problems—admission credentials or the choice of curriculum, financial problems, living conditions, health, and other points on which questions arise. Usually the institution desires to have the student from abroad receive exactly the same treatment as the American student, and expects the foreign student to take advantage of the university provision of a dean or adviser. Sometimes, when there are many foreign students whose problems show a community of interest better cared for by a member of the university who is especially responsible for the student from abroad, there is an adviser of foreign students, or a committee on foreign students. In any case, these officers in accepting appointment have shown themselves to be ready to serve, and may be confidently relied on to do their best for the interest of the individual student as well as the group.

CONSTRUCTIVE INFLUENCE OF FOREIGN STUDENTS

The Unofficial Ambassadors, 1936, a publication of the Committee on Friendly Relations Among Foreign Students, makes the following comment on the influence of foreign students in American college communities, and the value of foreign study: "Seen through the years, foreign students have been a transforming factor in American life. Their frank criticism has influenced

the revision of some textbooks in our schools, attitudes of teachers and students have been changed in many instances to a more friendly consideration of the 'alien' and his problems because he is in the American classroom. Protests of Oriental students and those of the darker races against discrimination in some churches and by some missionaries have pricked the consciences of clergy and laity. 'How can we make our practice more clearly conform to our idealistic preaching about Christian brotherhood?' they are now asking. The cause of justice and fair play for the foreign student is now championed by an influential minority in nearly every American community.

The question is often raised regarding the wisdom of encouraging students to come to America. Perhaps the most satisfactory answer is the testimony of the former students themselves. Fully ninety per cent agree that they gained knowledge, skill, and experience which could not have been obtained in their home lands. Moreover, their outlook on life and its responsibilities has been greatly widened, they see their own nation and civilization from a new angle, they have stepped from narrow provincialism to world citizenship. From the American viewpoint the gains far outweigh any possible disadvantages of student migrations. Students from every land have shown us ourselves, with courtesy and frankness they are disclosing our weak and strong points. They are supplying American youth with original source material concerning the trend of thought and action within their national domains."

NUMBERS OF STUDENTS FROM FOREIGN COUNTRIES

Each year the Committee on Friendly Relations Among Foreign Students compiles a statistical summary by countries of foreign students in the colleges and universities of the United States. In 1935-36, the Committee reported a total of 7,763 foreign students, of whom 5,962 were men, and 1,801 were women. This census included 910 American-born Orientals. Canadian institutions in 1935-36 reported a total of 243 students from 37 foreign countries.

‡ These figures, supplied by the Institute of International Education, include only bona fide foreign students, viz., those students who have come to the United States from other countries for the express purpose of pursuing courses in our institutions of higher education. The large number of students of foreign birth who are citizens or residents of the United States have been excluded from this table. However, in the figures for the years 1932-33 through 1934-35, students born in the United States of Oriental parentage are also included.

PART II

UNIVERSITIES AND COLLEGES*

Accredited by the Middle States Association of Colleges and Secondary Schools, the North Central Association of Colleges and Secondary Schools, the Northwest Association of Secondary and Higher Schools, the Southern Association of Colleges and Secondary Schools, the Association of American Universities and the American Association of Teachers Colleges, and college members of the New England Association of Colleges and Secondary Schools

ADELPHI COLLEGE GARDEN CITY, NEW YORK

College of liberal arts, for women, privately controlled, undenominational

Founded in 1896 as coeducational institution and remained so for 21 years. College originally located in Brooklyn but in 1929 it moved to Garden City, a suburb on Long Island within commuting distance of New York City. Adelphi is a day college.

Self-perpetuating board of not more than 22 trustees.

Finances: Endowment, \$894,540, income from endowment, \$30,702.43, income from other sources, not including dormitories and dining hall, \$131,779. Total annual expenditures, \$215,674. Budget, 1935-36, \$210,000.

Grounds and Buildings: 70 acres valued at \$409,105, present worth of buildings, \$1,654,280.

Library (1935). 35,064 volumes, 90 current periodicals.

Laboratories. Science Building (1929) houses laboratories of Biology, Chemistry, Geology, Physics, and Drawing.

Observatory (1929). Equipped with 6½-inch motor driven telescope made by Alvan Clark, Sr., a sidereal chronometer by Egbert and Son, a Browning spectroscope, and other apparatus for laboratory work.

Requirements: For Admission. Graduation from accredited preparatory or high school with recommendation of school principal. 15 units of secondary school subjects including English, 3, Mathematics, 3, His-

tory, 1, 3 in one Foreign Language and 2 in another, and 3 in electives. Conditions sometimes allowed but must be removed before entrance upon sophomore year.

For Degree A.B., 120 semester units, Language and Literature Group, 18, Social Studies Group, 12, Natural Science and Mathematics Group, 12. Major of 30 semester units in the last 3 years, exclusive of group requirements. At least 18 units of the major must be in one department. A minimum of 120 quality points is required.

B.S. in Education. Graduation from an approved normal or training school maintaining a professional course of at least 2 years' duration together with 60 units of college work as prescribed, i.e., English, 6, Foreign Language, 6, Science of Education, 3, Methods of Teaching (special subject), 3, major, 18 units, minor, 12 units.

A.M. A.B. from a recognized college and a full year of residence study, thesis, final oral and written examinations upon the general field of work.

General. All students are required to take 2 years of work in the Department of Physical Education. Chapel attendance once a week required.

Departments and Staff: Art Professors, 0, associate professors, 0, assistant professors, 0, instructors, 1. Astronomy 1, 0, 0, 0. Biology 1, 0, 0, 3. Business Administration 1, 0, 0, 1. Enrollment: For year ending June 30, 1935, 431 Total number of matriculants since foundation, 14,527

Degrees: Conferred year ending June 30, 1935, 102 A B, 101, LL D, 1 Total number of degrees conferred since foundation, 2,730

Fees: Tuition, \$350 a year, matriculation fee, \$10, graduation fee, \$5, student fee, \$12, library fee, \$2, gymnasium fee, \$7, laboratory fee, \$15, Art fee, \$10, Type-writing fee, \$10 Annual expenses. Liberal, \$425, low, \$200

Scholarships: 35, varying in amounts from \$350 to \$90 Applications for scholarship aid close on May 15

Employment bureau In 1934-35, 20% of students earned part of expenses

Dates of beginning and ending sessions Third Monday in September, Wednesday nearest June 15th

Summer session July 8 to August 16, 1935 Enrollment, 46

Extension work 23 adults enrolled in classes

Catalog in March.

Administrative Officers: *President*, Frank Dickinson Blodgett, *Dean*, Signe E Hagelthorn, *Registrar*, Ruth Stratton Harley

AGNES SCOTT COLLEGE

DECATUR, GEORGIA

College for women; legally non-sectarian, but sympathetically related to Presbyterian Church

Chartered in 1889 as Decatur Female Seminary, offering elementary instruction Name changed to Agnes Scott Institute in 1890 in honor of mother of Col George W Scott, a benefactor In 1906 name changed to Agnes Scott College and degrees first conferred

Self-perpetuating board of 27 members, of

whom 11 are chosen from various synods of the Presbyterian Church

Finances: Endowment, \$1,600,000, income from endowment, \$75,000 Total annual expenditure, including dormitories and dining room, \$352,000

Grounds and Buildings: 40 acres in the City of Decatur, less than a mile from the City of Atlanta 35 buildings, including residences, with capacity of 300 boarding students Present worth of buildings, grounds, and equipment, \$1,700,000

Library (1913) 35,000 volumes, 85 current periodicals New \$225,000 library building in process, ready for use in September 1936

Laboratories Lowry Science Hall (1913) houses Biology, Chemistry, and Physics Psychology laboratory in Buttrick Hall

Requirements: For Admission Graduation from approved preparatory school with 16 acceptable units, including English, 4, Algebra, 2, Geometry, 1, Latin, 2, Modern Language, 2, and History, 1 The College also requires a psychological examination, personnel data, a personal letter to the president from each applicant, and a medical examination

For Degree 120 semester hours plus 4 years of Physical Education A major of at least 24 semester hours and a minor of not less than 18 hours At least half the work must be of "merit" quality Nearly half the hours limited by group selections

Departments and Staff: Art *Professors*, 0, *associate professors*, 0, *assistant professors*, 1, *instructors*, 0 Astronomy. 1, 0, 0, 0 English Bible 1, 1, 0, 0 Biology 1, 1, 0, 3 Chemistry 1, 1, 0, 1 Economics and Sociology 2, 0, 0, 0 English 2, 2, 2, 1 German 1, 0, 0, 0 Greek 1, 1, 0, 0 History 1, 1, 1, 0 Latin 1, 1, 0, 0 Mathematics 1, 1, 0, 0 Music 2, 1, 1, 1 Philosophy and Education 1, 1, 1, 0 Physical Education 1, 1, 1, 2 Physics 1, 0, 0, 0 Romance Languages 1, 2, 2, 1

Enrollment: 1935-36, 505 Total number of matriculants since foundation, 6,500

Degrees: May, 1935, 87 Total number of degrees since college status in 1906, 1,512.

Fees: Tuition, \$300, board, room, laundry,

and medical attention, \$400 No special fees except for laboratory courses or for private lessons in Art, Music, or Spoken English

Scholarships: 95, derived from endowment, open to all students Competitive scholarship for full expenses for year open to freshmen on examinations, given about March 1 each year Research fellowship open to Agnes Scott graduates.

Employment bureau 90% of graduates accept positions, and nearly half of students helped to work way in 1934-35

Dates of opening and closing sessions
Third Wednesday of September, first Tuesday of June

Catalog in January

Accomplishments in 1934-35 Secured in cash gifts \$450,000 for a new library building, additional land, and endowment This is the concluding part of a fund of \$1,600,000 raised during 1929-35

Administrative Officers. *President*, James Ross McCain, *Dean*, Nannette Hopkins, *Registrar*, Samuel Guerry Stukes Officer in charge of foreign students, Carrie Scandrett, assistant dean

AGRICULTURAL AND MECHANICAL COLLEGE OF TEXAS

See Texas, Agricultural and Mechanical College of

AKRON, UNIVERSITY OF AKRON, OHIO

Campus in central section of Akron, a few blocks from the geographic center of the city

A municipal university for men and women, supported by taxation, non-sectarian

The nucleus of the University of Akron was Buchtel College, founded under auspices of the Ohio Universalist Convention in 1870 An ordinance of the Akron City

Council in 1913 accepted the offer of the trustees of Buchtel College to give to the city the entire plant and endowment of the College as the nucleus of a municipal university In October 1926, the name of the University was changed to the University of Akron

A municipal university, under the statutes of Ohio, managed by a board of 9 directors appointed by the mayor of the city, in groups of 3, each to serve for a term of 6 years

The University consists of Division of Graduate Study, the Upper College, including Buchtel College of Liberal Arts (3 divisions, Humanities, Social Sciences, Natural Sciences), the College of Engineering, and the College of Education, the General College (first two years), Division of Adult Education

Finances: Endowment, \$148,209, income from endowment, \$5,327 Income from other sources Taxation, \$142,740, student fees, \$157,259, other sources, \$17,054 Total annual expenditures year ending December 31, 1934, \$304,440 Budget, 1935-36, \$390,794

Grounds and Buildings: 10 acres valued at \$366,000 Present value of buildings, \$419,197

Library (1916) 41,157 volumes, 3,249 volumes of documents Resources of the Akron Public Library are open to students

Laboratories Knight Chemical Laboratory (1908) Present worth, \$33,712, value of equipment, \$14,226 Olin Hall (1901) Physics and Biology \$43,600, \$18,164 Engineering (1910), addition (1921) \$65,517, \$57,977 Home Economics (1905) \$11,496, \$5,360 Daniel Guggenheim Airship Institute, \$122,744

Requirements: For Admission Graduation from accredited 4-year high schools or accredited senior high schools Required average of work in high school is the passing grade of that school plus one-third the interval between the passing grade and 100. No specified subject requirements except in College of Engineering where $1\frac{1}{2}$ units of high school Algebra and 1 unit of Plane Geometry are required.

For Degree For B.A., B.S. and B.Ed. Last 32 hours in residence, 128 hours with quality point ratio of 1 and same quality point ratio in major field. Cooperative engineering students, 280 cooperative hours with quality point ratio of 1 In certain colleges and departments, especially in the Teachers College, opportunity is offered properly qualified persons to study for the master's degree, 26 to 30 hours, including a thesis

General 1 year Physical Education, 2 years Military Science and Tactics for men, attendance at Freshman Week program.

Departments and Staff: Art Professors, 0, *associate professors*, 0, *assistant professors*, 1, *instructors*, 1. Biology 1, 0, 2, 1. Chemistry 1, 1, 1, 2. Economics 0, 1, 1, 0. English 2, 1, 1, 5. ALABAMA COLLEGE MONTEVALLO, ALABAMA

State college for women Established as Alabama Girls Industrial School by act of Alabama Legislature, 1893, first session, 1896 Name changed to Alabama Girls' Technical Institute, 1911, to Alabama Technical Institute and College for Women, 1919, and to Alabama College, 1923

Board of 11 members (exclusive of governor and state superintendent of education), appointed for term of 12 years by governor with consent of senate 1 member from each congressional district, 2 members from state at large

College established for purpose of giving instruction in liberal arts and science and technical subjects suited to training of young women Schools of Music, Education and Home Economics

Finances Endowment, \$582,722 10, income from endowment, \$34,963 32, state appropriation, \$185,000, tuition and fees, \$83,138 Total expenditure for 1934-35, \$303,101

Grounds and Buildings Campus of 105 acres and adjacent farm of 208 acres 3 residence halls (805) Total present worth of buildings, \$1,359,750 Total value of grounds, buildings, equipment, and live stock, \$1,718,500

Library (1935) Volumes, 32,000, periodicals, 180

Laboratories Building (1915-16) valued at \$100,000 Value of equipment Chemistry, \$8,000, Home Economics, \$12,000, Physics, \$2,000, Biology, \$16,000

Requirements For Admission 15 units, including English, 3, Mathematics, 2, History, 1

For Degree For bachelor's degree, 128 semester hours and 8 semester hours in

Physical Education Passing grade D, but average of C required for graduation 24 semester hours must be completed in a major course and 18 in a related minor course 2 years of English required Chapel attendance once a week

Departments and Staff: Art Professors, 1, associate professors, 1, assistant professors, 0, instructors, 0 Biology 1, 1, 2, 0 Chemistry and Physics 1, 1, 0, 1 Education 4, 1, 0, 0 (excluding 23 members of training school staff) English 1, 2, 3, 2 History 1, 0, 2, 2 Home Economics 1, 2, 4, 0 Mathematics 1, 0, 1, 0 Modern Language 0, 2, 0, 1 Music 2, 2, 3, 0 Physical Education 1, 1, 1, 1 Psychology 2, 1, 0, 0 Religious Education 0, 1, 0, 0 Secretarial Science 0, 2, 1, 0 Sociology 1, 1, 1, 0 Speech 1, 1, 1, 0 This list does not include 3 itinerant teacher trainers in Home Economics and 1 field worker in Parent Education

Enrollment: For 1934-35, 836, for 1935 summer session, 496

Degrees: Conferred 1934-35, 102, excluding summer school of 1935 in which 29 were conferred Degrees conferred since foundation, 1,222 (Institution a junior college until 1922) Number of each type of degree conferred B A, 527, B S, 595, B Mus, 100

Fees: For semester Matriculation, \$3 75, room, board and laundry, \$99, tuition, \$25 for Alabama students and \$37 for out-of-state students, physician, nurse, hospital and medical, \$5, lecture, \$2 25, library, \$2 25, student activity, \$3 75, laboratory, \$1 to \$7 50 Annual expense estimate Low, \$325, liberal, \$500

Scholarships: 50 scholarships, \$50 to \$500

Employment During 1934-35 approximately 12% of students earned part of their way through college This does not include F E R A work-scholarships, giving employment to 85 students who earned \$11,475 during the session

Dates of beginning and ending of session September 10, 1934, May 27, 1935

Summer session. June 10 to August 24,

1935 All departments offered a total of 130 courses during 1935 summer session

College extension School of Education offers extension courses for teachers in service Enrollment 1934-35, 285 students in 12 groups in 9 counties, 82 additional students took courses by correspondence In 29 centers in Parent Education work, 772 students enrolled under direction of field worker Through club service 250 women's organizations (including women's clubs and parent-teacher associations) were served, thereby reaching approximately 7,500 women with club outlines and organized courses of reading

Annual catalog in May

Achievements of year ending May 27, 1935 Curricula reorganized following period of research by faculty committee The departments were grouped in the following divisions Fine and Practical Arts, Language and Literature, Science and Mathematics, and Social Science with the view to giving more emphasis to liberal education in the first 2 years and to specialization in the upper 2 years

The second annual Student Career Conference for young women graduating from Alabama high schools held during summer of 1935 Purpose To inform the selected representatives as to the fields of service open to women trained on the college level

Demonstration high and elementary schools in Progressive Education were conducted during 1935 summer session on the campus, where the Regional Conference of the Progressive Education Association was held in June, 1935.

A 5-weeks' program of instruction under federal relief plans was offered at Alabama College during the second term of the summer of 1935 for approximately 500 teachers of adult classes

Administrative Officers: *President*, A F Harman, *Dean*, T H Napier, *Registrar*, E H Wills Officer in charge of foreign students, Lorraine Pierson, professor of Modern Languages

ALABAMA POLYTECHNIC INSTITUTE

AUBURN, ALABAMA

College for men and women, land-grant college of State of Alabama, the oldest in the South

Board of 12 trustees

Division of Agriculture School of Agriculture, Agricultural Experiment Station, Extension Work in Agriculture and Home Economics Division of Engineering School of Engineering, Engineering Experiment Station School of Architecture and Allied Arts School of Chemistry and Pharmacy School of Education School of Home Economics School of Science and Literature School of Veterinary Medicine School of Military Science and Tactics School of Graduate Studies

Finances: Income for instructional purposes for year ending June 30, 1935, \$460,461 13 Expenditures for same period, \$460,461 13 Budget 1935-36, \$558,155

Grounds and Buildings. Campus and adjoining lands aggregate 880 acres Substations controlled by the Agricultural Experiment Station of the College aggregate 2,536 acres Total value of grounds, \$409,000 Present worth of buildings, \$1,953,000 Total value of grounds, buildings, and equipment, \$2,984,000 Dormitory facilities for approximately 200

Library (1930) 48,000 volumes, government documents, 13,000, current periodicals, 225

Value of scientific equipment \$291,278 94

Requirements: For Admission 15 units No conditioned students Applicants for courses in Engineering and Architecture must present English, 3, History, 1, Mathematics, 2½ For admission to any other course the specified units are the same except that only 2 units are required in Mathematics

For Degree B S is awarded on completion of one of following 4-year courses Aeronautical Engineering, Civil Engineering, Highway Engineering, Electrical Engineering, Mechanical Engineering, Textile Engineering, Chemical Engineering,

Chemistry, Agriculture, Education, Agricultural Education, Industrial Engineering, Home Economics Education, Home Economics, Pharmacy, Business Administration, Pre-Medicine, Pre-Law, and the General Courses

For D V M , a 5-year course B of Arch requires 5 years, B of Applied Art, 4 years, Ph C , 3 years The College confers the master's degree and professional engineering degrees upon graduates

General R.O.T.C required of freshmen and sophomores Physical Training required of freshmen

Scholarships. The sum of \$3,000 annually is awarded in scholarships

Employment bureau Appointment committee Since 1929 a large proportion of students have found employment on the campus

Dates of beginning and ending sessions The second full week in September, the second full week in June

Catalog in March

Achievements of year 1934-35 Development of honors majors courses, opening of library stacks to all students, student-faculty revision chapel and attendance regulations

Administrative Officers. *President*, Harry Means Crooks, *Dean*, James E Mitchell, *Dean of Women*, Florence M Steward, *Registrar*, Robert W Clack Officer in charge of foreign students, Harry Means Crooks, president

AMERICAN INTERNATIONAL COLLEGE

SPRINGFIELD, MASSACHUSETTS

College, coeducational

Founded, 1885 Chartered in Lowell, Massachusetts, under name of French Protestant College Three years later moved to Springfield, Massachusetts In 1894 became French American College, and in 1905, American International College

Controlled by a board of 24 trustees

Finances: Endowments, \$261,801, net income, \$2,664 Total annual expenditures for 1934-35, \$130,739 Budget for 1935-36, \$133,650

Grounds and Buildings. Five acres of centrally located grounds Total present worth of buildings including land, \$191,685 Capacity of residence halls for men and women, 140

Library (1923) Volumes, 8,276, periodicals, 25 Library is for research purposes

Laboratories One building devoted to laboratory purposes and the basement of Lee Hall used for a Physics laboratory

Requirements. For Admission A certificate of graduation from secondary school and a record of the work covered Approval by the Committee on Admissions A total of 15 units as follows B A course English, 3 units, Modern Language, 2, Latin, 2, Science, 1, Algebra, 2, Geometry, 1, History, 1, electives, 3 B S course English, 3 units, Modern Language, 2, Science, 1, Algebra, 2, Geometry, 1, History, 1, electives, 5

For Degree 120 semester hours of work and prescribed courses as follows B A degree English, 12 *semester hours*, Foreign Language, 18, Science, 12, Mathematics, 6, History, 6, Economics, 6, Psychology, 6, Bible, 6, Public Speaking, 3, electives, 45 B S. degree English, 6 *semester hours*, Modern Language, 18, Science, 18, Mathematics, 12, History, 6, Economics, 6, Psychology, 6, Bible, 6, Public Speaking, 3, electives, 39

Departments and Staff: Bible *Professors*, 1, *associate professors*, 0, *assistant professors*, 0. Biology 1, 1, 1. Chemistry 1, 2,

Enrollment: For year 1935-36, total, 465. Men, 255, women, 210. Total number of matriculants since foundation, 5,648.

Degrees: Conferred year ending June 15, 1935, 35. B A, 5, B S, 6, B S in Education, 1, B S in Business Administration, 10, others, 13. Total number of degrees conferred since foundation estimated at 465. Complete records for the early period of the College are not available.

Fees: Matriculation fee, \$10, graduation, \$5, laboratory, \$5, lodging, \$36 to \$47, board, \$180, tuition, \$200. Annual expenses High, \$525, low, \$389.

Scholarships: 11 are awarded. Applications should be in by May 1.

Employment bureau. About 20% earned part of their expenses during the year 1934-35.

Dates of beginning and ending sessions: Monday, September 9, 1935, June 9, 1936. Catalog in September.

Administrative Officers: *President*, C S McGown. Officer in charge of foreign students, Grace Riddle.

AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA

Main campus in northwestern section of the city of Washington, on Nebraska and Massachusetts Avenues, one mile from Washington Cathedral. Down-town center at 19th and F Streets, Washington, near important government buildings and offices.

Coeducational university, privately con-

trolled, historically related to the Methodist Church.

Incorporated 1891. Chartered by Act of Congress 1893. Instruction offered 1914, organized course of study inaugurated 1920.

Self-perpetuating board of trustees, minimum of 40 members, maximum of 50. Graduate School, College of Liberal Arts, School of Public Affairs.

Finances: Endowment, \$918,795, income from endowment, \$39,327. Income from other sources: Students fees, \$89,751, gifts, \$105,390, dormitories and dining room, \$20,910 net, rents, \$19,468, miscellaneous, \$1,891. Total annual expenditure ending July 31, 1935, \$220,880. Budget, 1935-36, \$219,093.

Grounds and Buildings: Campus of 80 acres valued at \$900,000, $\frac{1}{3}$ of city block at 19th and F Streets valued at \$85,000. Total value of grounds and real estate \$985,000. Total value of buildings \$2,064,721. 2 residence halls, 1 accommodating 200 women, 1 accommodating 42 men. Hurst Hall, built of Vermont marble, the first building of the University, is notable for its architectural design.

Library (1926) 40,000 cataloged volumes (not including government documents), 130 current publications. Mathematical library of 10,000 volumes and manuscripts of the late Artemus Martin, reported by the Dictionary of American Biography as "one of the finest private mathematical collections in America." Library collection at down-town center 8,000 cataloged volumes, 20 current publications. Special International Law Library. The many libraries of the city of Washington are open to University students. Library of Congress, Folger Shakespeare Library, open to advanced research students, libraries of government departments and bureaus, and libraries of learned societies.

Laboratories: Part of one building (1898) devoted to the college laboratories. Value of equipment purchased since 1925: Biology, \$10,000, Chemistry, \$8,570, Mathematics, \$1,000, Physics, \$5,150, Psychology, \$1,000. Total value of all laboratory equipment, \$25,750.

Requirements: For Admission Graduation from accredited high schools upon presentation of 15 acceptable units with recommendation of principal Normal requirements include 3 units of English (4 years), 2 of Mathematics, 2 of Foreign Language, 1 of Social Science, 1 of Natural Science. No students are admitted with entrance conditions

For Degree: For B A Last 30 hours in residence, 130 with a minimum of C average, major of 24 to 40 hours, 40 hours of junior-senior work Courses prescribed include 12 hours of English, 4 hours of Bible, 6 hours of Physical Education (3 years), and 12 hours from each of 2 of the following 3 groups Social Science, Foreign Language, and Natural Science and Mathematics In addition to a major, the student must complete at least 12 hours in closely related subjects Graduation honors are offered in Social Science, degrees conferred with special honors of *cum laude*, *magna cum laude*, and *summa cum laude* Master's and doctor's degrees granted by Graduate School upon completion of 1 year and 3 years of residence respectively, and the passing of satisfactory oral and written examinations, and the submission of a satisfactory thesis

General Physical Education and weekly chapel

Fees: Yearly basis Tuition, \$400, health tax, \$10, degree fee, \$7, laboratory fees, \$5-\$20, dormitories, \$115 to \$280 Average total expense Low, \$1,000, high, \$1,500

Scholarships During year 1934-35, 19 fellowships awarded ranging from \$300 to \$1,400 and 233 scholarships ranging from \$100 to \$400, 25 student loans amounting to \$3,690 45

Employment bureau Dean has charge of all jobs for students for work done for the College 40% of students earned all or part of expenses for year 1934-35

Dates of beginning and ending sessions third Wednesday in September, third Monday in June.

Catalog published annually in November
Achievements of year 1934-35 Curriculum modified so that no Latin or Mathematics are required in freshman year 2 years of Science no longer required

Administrative Officers *President*, Stanley King, *Dean*, C. Scott Porter, *Treasurer*, Charles A. Andrews, *Comptroller*, Herbert G. Johnson, *Director of Library*, Harry DeForest Smith

ANTIOCH COLLEGE

YELLOW SPRINGS, OHIO

Coeducational, privately controlled

Founded as a liberal arts, coeducational college in 1853, with Horace Mann as president. Reorganized in 1921 under Arthur E. Morgan, with the aim of more effectually preparing the student for life. At this time was instituted the well-known Antioch Cooperative Plan of alternating work and study, 3 years of which is a minimum requirement toward the Antioch degree. Under the Plan students alternate 5- or 10-week periods of college study with 5- or 10-week periods of actual work in various fields of business and industry. During the year 1934-35, a total of 379 cooperative jobs was secured, 216 of the 335 employers involved were in states other than Ohio. The great majority of these jobs employ 2 students in rotation, one studying while the other works. Over 90% of the Antioch students are enrolled annually on the cooperative plan.

Board of 19 trustees, two-thirds self-perpetuating, one-third elected by the Administrative Council of the Faculty.

Finances: Total annual expenditures for year ending 1934-35, \$334,619.54. Budget for 1935-36, \$389,190.03. Income (1934-35) Gifts, \$74,076.26, gifts to research, \$45,789.85, tuition, fees, etc., \$205,396.81, miscellaneous, \$22,969.53. Endowment, June 30, 1935, \$321,619.39 (includes \$52,311.61 endowment for research).

Grounds and Buildings: 950 acres of

land, valued at \$225,865.58, value of buildings, \$1,096,563.46. Total value of land, buildings, and equipment, \$1,474,807.09. Dormitories: 2 main dormitories for men, housing 218, 1 main dormitory for women, housing 100.

Library (1924) Volumes, 46,628, current periodicals, 375.

Laboratories Science Building (1930) houses Chemistry, Physics, Engineering, Biology, Physiology, Psychology, and Geology laboratories, it is the headquarters for photosynthesis and industrial research. Antioch School and the Nursery School provide laboratories in educational methods with young children. The Fels Fund, associated research project, houses laboratories for observation of pre-natal and post-natal environmental influence on children.

Requirements. For Admission Graduation from high school or the equivalent. The applicant should stand above the average of his class in both intelligence and character. Preparatory school records are supplemented by scholastic aptitude tests, physical examination, graduated recommendation forms, and questionnaire answered by applicant. Character, maturity, intelligence, academic ability, and achievements are the factors determining acceptability.

Applicants who do not have the required number of units but who give evidence of exceptional ability and more than average maturity may be admitted and enrolled for 1 year as conditioned students. The condition is removed on the satisfactory completion of a year's work. Total number of conditioned students is less than 5% of the entering class.

For Degree The cooperative curriculum is usually completed in 5 years, with the student spending 1 full year on the campus. If more than 4 years of cooperative work is undertaken, a sixth year will be required. Approximately 225 credit-hours, of a minimum grade of 2.1 (slightly above C average), are required for the bachelor's degree. Under the cooperative plan, a specified number of industrial credits is also required for the degree. The major portion

of the cooperative work, especially the final year, must be of satisfactory quality

A credit hour normally consists of 1 hour of classroom work a week or the equivalent, for a semester of 10 weeks 2 or 3 laboratory hours, depending on the nature of the work, equal 1 classroom hour

Graduation is also dependent upon the successful completion of a broad program of required courses, and work in a field of concentration of the student's choice Attainment both in the required courses and in the field of concentration is tested by comprehensive examinations administered at the close of the senior year, which must be successfully passed before the student may become a candidate for a degree

A student must complete at least 2 years in residence

Antioch College and Ohio State University in cooperation offer a 6-years' course leading to the degree of B S in Agriculture 4 years are spent at Antioch and 2 at the University At the end of 5 years the degree of B S is conferred by Antioch College, at the end of the sixth year, the degree of B S in Agriculture by Ohio State University There are other such combination courses, in Art, Library Science, Law, Medicine, etc

Departments and Staff: Art and Aesthetics *Professors*, 1, *associate professors*, 1, *assistant professors*, 0, *instructors*, 3 Biology 1, 2, 1, 0 Business Administration 3, 1, 0, 0 Chemistry 2, 1, 1, 0 Economics 1, 2, 0, 0 Education 3, 1, 2, 1 (Director of Antioch School, 1*) Engineering 1, 2, 0, 0 English 3, 0, 0, 2 Foreign Languages 1, 1, 1, 0 Geology 1, 0, 0, 1 Health and Physical Education 0, 0, 3, 1 (College physician, 1 Superintendent of Infirmary, 1) Household Economics 1, 0, 0, 1 Journalism and Public Speaking 0, 0, 0, 1* Mathematics 1, 0, 1, 1 Philosophy 0, 2, 0, 0 (College pastor, 1*) Physics 1, 2, 0, 0 Social Science 1, 1, 1, 0 Research 3*, 2*, 3*, 1* Research Associates, 5. Research Engineers, 1 Manager Art Foundry, 1 Director Shoe Project, 1 Library Staff Librarian, 1, associate librarian, 1, Science

librarian, 1, cataloger, 1. Personnel Staff Director, 1, associate directors, 5, secretary, 1 (Numbers marked with an asterisk are duplicates)

Enrollment: For 1934-35, 624 Men, 404, women, 220 Total number of matriculants since reorganization (1921-22), 3,475 (approximately)

Degrees. Conferred during year ending June 30, 1935, 46 A B, 33, B S, 12, honorary, 1 Total number of degrees conferred since foundation (1853), 1,104 Total since reorganization (1921-22), 614

Fees: Tuition, \$300 for cooperative year, \$425 for full-time study program, matriculation, \$10, medical, \$15, community government, \$10, laboratory fees range from \$1 to \$25 a semester, graduation fee, \$10 Rooms, \$2 50 and \$3 50 a week, board, minimum \$4 a week

Individual students vary greatly both in expenditures and earnings The average total cost of a full year at Antioch is about \$900, for cooperatives, about \$850 The average student on the cooperative plan earns from \$350 to \$400 yearly, leaving \$450 to \$500 net expense to be met (Very few students at Antioch "work their way" except through help afforded by the cooperative plan)

Dates of beginning and ending sessions Division A, September 9, Division B, October 14, 1935, Commencement, June 25, 1936 In addition to the scholastic session, students normally work half the summer vacation on the cooperative jobs

Research or industrial projects associated with the college Antioch Industrial Research Institute—scientific commercial research, Kettering Foundation—10-year study of chlorophyll and photosynthesis, Samuel S Fels Fund—15-year study of prenatal and post-natal environmental influence, Antioch Shoe Project—investigation, development and distribution of correct health shoes for women, Antioch Press—commercial printing and fine book publishing; Antioch Art Foundry—casting of bronze art objects by the "lost wax" process, Antioch Heat and Power Plant—

heat to College buildings and electric current to College and to Yellow Springs

The following grants from foundations were made to Antioch in the year 1934-35 General Education Board, \$15,000, Keith Foundation, \$15,000, Carnegie Corporation, \$5,000, C F. Kettering Foundation, \$36,992 06

Annual catalog, 12 other College bulletins, Antioch Notes (15 issues)

ARIZONA STATE TEACHERS COLLEGE

FLAGSTAFF, ARIZONA

Teacher training institution, coeducational, supported by state

Seventeenth Territorial Legislature built industrial school in Flagstaff in 1893 In 1899 the Twentieth Territorial Legislature changed name to the Northern Arizona Normal School For first 2 years of school's existence the board of education was a joint board of the normal schools at both Flagstaff and Tempe In 1901 the legislature gave separate boards to each with the state superintendent of public instruction as a member of both In 1901 the first class of 4 young women graduated from a 5-year curriculum with the elementary diploma, which warranted a life certificate to teach in the schools of Arizona On March 7, 1925, the professional status was changed from Normal School to College

Controlled by 3 members of board of education, 1 the state superintendent of public instruction, and 2 appointed by the governor

Finances: Total expenditures for year ending June 30, 1935, \$306,646 13 Total proposed budget for 1935-36, \$302,108 22.

Grounds and Buildings: Campus consists of 130 acres, with its buildings and equipment the college plant is valued at about \$1,000,000 4 residence halls, 2 for women, accommodating 158, 2 for men, accommodating 130

Library (1930) 20,000 volumes, 156 current periodicals Special collection of Arizonaiana

Museums and Observatory Museum of Northern Arizona located at Flagstaff, Lowell Observatory located at Flagstaff.

Requirements: For Admission Official transcript containing at least 15 units, including 3 of English, 1 of Algebra, 1 of Laboratory Science, $\frac{1}{2}$ of American History, and $\frac{1}{2}$ of Civics, from an accredited high school From a non-approved school, presentation of an official transcript containing at least 15 acceptable units including those specified above, and written examinations. Persons 21 years of age or over who cannot meet the formal entrance requirements will be admitted to the College though not as a candidate for a diploma or degree, may become a candidate for A B by satisfying regular admission requirements Special regulations surround transfer from junior colleges Entering freshmen must take English placement examination

For Degree 3 terms of approximately 12 weeks each and at least 45 credits earned in residence study 192 quarter hours required for the B A in Education degree Grade points must be equal to at least twice the number of hours required for graduation (4 points given for grade of "1," 3 for grade of "2," 2 for grade of "3," 1 for grade of "4," 0 for grade of "5") 48 quarter hours in major and 24 quarter hours in minor

General 1 year of Physical Education, medical and physical examinations given

Fees: Activity fee, \$7 per quarter, plus \$8 out-of-state, summer registration fee full session of 10 weeks, \$25, for half a quarter or less, \$15, library fee, \$1, private music lessons, per lesson, \$1 50, board and room in dormitories, \$62 50 to \$72 50, steam heated cabins without board at dining hall, \$15 to \$20, steam heated cabins with board at dining hall, \$62 50 to \$72 50, college camp cottages for two, \$15 to \$25 Annual expenses High, \$300, low, \$275

Scholarships: 2 loan funds, 3 scholarships

During year ending June 30, 1935, approximately 60% of students earned all or part of their expenses

Dates of beginning and ending sessions September 10, 1934, May 29, 1935

Summer session June 3 to July 5, 1935, July 8 to August 9, 1935 Attendance, 475

Extension work. Extension enrollment, 25; correspondence enrollment, 185

Catalog in February and catalog in May

Achievements Work has been started on \$360,000 building program The new buildings to be erected include an additional women's dormitory unit, a men's dormitory, a new dining hall, remodeling of the elementary training school, remodeling of present dining hall into science building, new power plant, president's residence

Administrative Officers: *President*, T J Torney, *Dean of College*, Tom O Bellwood, *Dean of Women*, Minnie Lintz, *Dean of Men*, W W Tinsley, *Registrar*, R R Powers, *Librarian*, Ida G Wilson.

ARIZONA STATE TEACHERS COLLEGE

TEMPE, ARIZONA

Teacher training institution, coeducational, supported by state

Established by state legislative assembly, 1885, degree-granting privilege given in 1925.

Controlled by a board of education made up of the state superintendent of public instruction, ex-officio, and 2 other members appointed by the governor of the state

Finances: Total annual expenditures year ending June 30, 1935, \$330,858. Budget, 1935-36, \$340,800

Grounds and Buildings: 85 acres valued at \$121,750, present worth of buildings, \$1,169,040, including \$162,077 for buildings now under construction Dormitories 2 for men accommodating 211, 3 for women accommodating 203

Library (1930) 18,254 volumes, 171 current periodicals A small, but growing collection of books and documents on Arizona history Additions to library now under construction will double the reading room floor space Separate training school library of 4,000 volumes

Laboratories Science Building (1908) houses Physics, Chemistry, Biology, Geography, and Geology laboratories, lecture rooms and classrooms Industrial Arts Building (1915) houses laboratories and shops for Manual Arts, Home Economics, and Commerce

Requirements: For Admission Graduation from approved high school with at least 15 units including English, 3, History-Civics-Economics, 2, Algebra, 1, Laboratory Science, 1, elective, 8

For Degree 1 year residence, final semester in residence, 130 semester hours Scholarship index equivalent to grade of C At least 1 major and 1 minor in fields other than Education Honors With High Distinction, With Distinction Prescribed courses English, Education (specified courses and directed teaching), Science, Social Studies, cultural courses, Federal

and State Constitutions, Physical and Health Education

General 1 year of Physical Education activity, attendance at weekly assembly, off-campus students must live in approved quarters

Departments and Staff: Commerce *Professors*, 1, *associate professors*, 1, *assistant professors*, 0, *instructors*, 1 Education 1, 1, 3, 5 English 2, 0, 2, 1 Fine Arts 0, 0, 0, 2 Foreign Languages 1, 0, 1, 0 History 1, 1, 0, 1 Home Economics 0, 0, 1, 1 Industrial Arts 0, 1, 0, 1 Mathematics 1, 0, 0, 0 Music 0, 0, 2, 3 Science 1, 0, 3, 2 Physical Education 0, 1, 0, 5 Psychology 1, 0, 0, 0 Training School 0, 0, 0, 10

Enrollment: For year ending June 30, 1935, 1,044 Men, 513, women, 531 Total number of matriculants since foundation (1885), 8,868

Degrees Conferred year ending June 30, 1935, 152 Degrees conferred since 1925, when degree-granting privilege was gained, 602

Fees: Tuition and student activities, \$20 a year, graduation, \$5, lodging and board, \$23 50 a month Annual expenses High, \$450, low, \$300

Scholarships: The College offers no scholarships Alumni scholarships, \$200 annually Alumni loans to worthy students

During year ending June 30, 1935, 34% of students earned all or part of expenses

Dates of beginning and ending sessions September 6, 1934, May 31, 1935

Summer session June 3 to August 10, 1935 Enrollment, 491

Extension class enrollment, 50, correspondence courses first offered in September, 1935

Catalog in June

ARIZONA, UNIVERSITY OF

TUCSON, ARIZONA

State university, coeducational

Dry, mild, and equable climate insures a wide range of outdoor recreation throughout the college year

Act of Arizona legislative assembly authorizing formation of the University of Arizona passed in 1885, opened in 1891

Board of 8 regents appointed by the governor and confirmed by the senate, and the governor and the superintendent of public instruction of the state, ex-officio Term of office is 8 years Continuing board, 2 members being appointed every 2 years

College of Mines and Engineering, College of Law, College of Education, College of Liberal Arts, College of Agriculture, Agricultural Experiment Station, College of Fine Arts, Graduate College, School of Music, School of Business and Public Administration, School of Home Economics, School of Military Science and Tactics

Finances. Endowment, 1934-35, \$47,716 24, income from endowment, \$1,698 66 Income from other sources Federal government, \$213,764 77, land grants, \$24,149 59, state appropriation, \$627,680, University collections, \$221,122 87 Total expenditures, 1934-35, \$1,083,382 82 Budget, 1935-36, \$1,133,500

Grounds and Buildings Campus (85 acres) and 36 buildings valued at \$3,094,697 38 (6 additional buildings, involving an expenditure of \$815,000, are now under construction) The University owns also 7 experiment stations in different parts of Arizona, containing approximately 700 acres of land The United States and the State of Arizona have allotted in addition 600,000 acres of public lands Total value of grounds, buildings, and equipment, exclusive of present building program, \$3,494,477 20

Library (1935) 100,000 volumes, in addition to 15,000 government documents and 900 current periodicals

Laboratories Science Hall (1909), \$125,000 (now being replaced by a modern building at a cost of \$300,000), Agriculture Building (1915), \$220,000, Mechanic Arts

Building (1917), \$35,000, Mines and Engineering Building (part) (1919), \$225,000, Steward Observatory (1921), \$75,000.

Museums Arizona State Museum Building (1935) containing archaeological and ethnological collections, mineralogical collection housed in the Mines and Engineering Building

Observatory Gift of \$60,000 made to the University by the late Mrs Lavinia Steward, for a 36-inch reflecting (Warner and Swasey) telescope together with photographic equipment, astronomical clocks and other accessories, 4½-inch equatorial telescope, etc

Requirements: For Admission 15 units, including English, 3, Language, 2, 1 unit each of Algebra, Plane Geometry, Science and U. S History and Civics College of Mines and Engineering requires additional Mathematics and Physics

For Degree 125 units required for bachelor degree in the College of Liberal Arts and School of Business and Public Administration, 138 (60 Pre-Legal and 78 Law units) in College of Law, 130 for B S in Agriculture or Home Economics, 125 for bachelor degree in the College of Education, 125 for Bachelor of Fine Arts, Music, or Speech, 145 for B S degrees in the College of Mines and Engineering The courses are largely prescribed except in the College of Liberal Arts, where for the bachelor degree 2 years of Foreign Language and 1 year each of Science, English, Humanities, and Social Science are required 80% of the work for a degree must be above the barely passing grade Major of 24 units and minor of 20 units required in Colleges of Education and Liberal Arts.

General Last 30 semester hours must be earned in residence in this institution Men students are required to carry Military Science 2 years and Physical Education 1 year, and 2 years of Physical Education are required of all women students. Women students must live in the campus dormitories or in homes approved by the University

ARKANSAS STATE COLLEGE

JONESBORO, ARKANSAS

College of arts and sciences, coeducational, state controlled

Founded in 1909 Opened in 1910

Board of 5 trustees, appointed by the Governor of the State of Arkansas

Finances: 1935-36 budget, \$200,800

Grounds and Buildings: 604 acres, campus and farm, 6 college buildings, 2 dormitories for men, 2 dormitories for women, 10 one-family residences, 1 apartment for eight families of faculty

Library 10,000 volumes, 115 current periodicals

Laboratories Physics, Biology, Chemistry, Art, Music, Agriculture, Home Economics and Engineering

Requirements: For Admission 15 units of acceptable high school credit, or equivalent

For Degree 124 semester hours, 40 hours senior college work with a 24-hour major Honor students are elected by the faculty

General All students who do not live in their own homes must reside in college residence halls unless residence halls are filled

Departments: Agriculture, Biology, Chemistry, Commerce, Education and Psychology, Engineering, English, Fine Arts and Music, Physical Education, French, History and Government, Home Economics, Mathematics, Physics, Social Science, Spanish, and Speech.

Enrollment: 1,049 Men, 475, women, 574

Fees: Tuition free Total annual expense ranges from \$300 to \$400

Degrees. A B, B S, and B S E

Employment The college uses students for all work about the buildings and grounds, including dining hall services, and takes advantage of federal funds for student aid

Regular session opens first week in September Summer sessions open about May 20 and July 6

Publications Catalog, State College Herald, State College News, and State College Announcements The College maintains a printing plant

Administrative Officers: *President*, V C Kays, *Dean*, E L Whitsitt, *Registrar*, H E Eldridge, *Bursar*, C V Warr

ARKANSAS STATE TEACHERS COLLEGE, ARKADELPHIA

See · Henderson State Teachers College

ARKANSAS STATE TEACHERS COLLEGE

CONWAY, ARKANSAS

Teacher training institution, coeducational, supported by the state

Established as the Arkansas State Normal School by Act of the Legislature in 1907, changed to the Arkansas State Teachers College in 1921 and course of study raised to 4 years

Controlled by a board of trustees of 7 members, 3 ex-officio (state commissioner of education, chairman, state auditor, and state treasurer) and 4 members appointed by the governor, each to serve for a term of 4 years Appointed members must be confirmed by state senate

Finances: Supported by the income from $\frac{1}{2}$ of a mill tax on all real and personal property in the state Total income for the operation of the institution during 1934-35 was \$156,113. This is exclusive of

the operation of dining halls and cafeterias and does not include \$136,000 capital outlay Budget for 1935-36, \$150,000

Grounds and Buildings. Campus and farm of 120 acres owned by the College, 80 acres additional rented Value of buildings, \$662,082, of lands, \$11,000, of campus improvements, \$68,500, of equipment, \$133,234 38, and of live stock, \$2,180 Dormitory for men, accommodating 104, dormitory for women, accommodating 130, apartment dormitory for students who desire to do light housekeeping, accommodating 86

Library 15,316 volumes, 198 periodicals

Laboratories Science Hall houses laboratories for Chemistry, Physics, Biology, Home Economics, and Agriculture Laboratory for Industrial Arts housed in separate building

Requirements: For Admission 15 units, including English, 3, Mathematics, 1, History, 1, Science, 1 Mature students over 21 may be admitted on examination 2 departmental deficiencies allowed, must be removed within 1 year

For Degree Degrees issued upon completion of 120 semester hours, 40 of which must be in senior college and also proper adjustment of major and minor courses with the proper amount of work in the field of Education

General Physical Education required of all junior college students

Departments and Staff: Agriculture *Professors*, 1, *associate professors*, 0, *assistant professors*, 0, *instructors*, 2 Art and Drawing 1, 0, 0, 0 Education 2, 1, 0, 4 English 2, 0, 4, 0 Geography 1, 0, 0, 0 Foreign Language 1, 0, 1, 0 Biology 1, 0, 1, 0 History 1, 0, 2, 0 Social Science 1, 0, 0, 1 Home Economics 1, 0, 0, 2 Industrial Arts 1, 0, 0, 0 Mathematics 1, 0, 1, 0 Chemistry 1, 0, 0, 0 Physics 1, 0, 0, 0 Physical Education 0, 0, 3, 0 Music 0, 0, 3, 0

Enrollment: Year ending June 30, 1935, 703 Men, 316, women, 387 Summer school enrollment, 793 Men, 182, women, 611 Extension department enrollment for year ending June 30, 1935, 1,216.

Degrees: Conferred year ending June 30, 1935, 102 Degrees conferred since 1921, when degree-granting privilege was extended, 931

Fees: Matriculation fees, \$30 for year and \$20 for summer session, graduation, \$5; room and board, \$5 a week, annual expenses approximately \$300 During the year ending June 30, 1935, 25% of students earned part of their expenses

Regular session began September 9, 1935, and closes May 27, 1936 The summer session begins June 1, and closes August 14, 1936

Catalog in June

ARKANSAS, UNIVERSITY OF FAYETTEVILLE, ARKANSAS

Main campus in Fayetteville School of Medicine in Little Rock

State university for men and women

Founded in 1871 by act of Arkansas Legislature accepting congressional land-grant, and providing for the Arkansas Industrial University Name later changed to University of Arkansas Opened in 1872

Board of 7 trustees appointed by the governor The state commissioner of education is an ex-officio member of the board, and the governor of the state is chairman of the board.

Organization Graduate School, College of Arts and Sciences, College of Agriculture, College of Engineering, College of Education, School of Law; School of Business Administration, School of Medicine (at Little Rock), General Extension Service

Finances: Endowment, \$136,666, income from endowment, \$6,633, income from state appropriations, \$361,037, from student

fees, \$121,263, from other sources (chiefly federal appropriations), \$150,546 Total annual expenditures for the year ending June 30, 1935, \$580,321 Budget for 1935-36, \$596,446.

Grounds and Buildings: Campus of 160 acres valued at \$140,000, farm of 523 acres at Fayetteville and 3 branch experiment farms of 500 acres, present value of buildings at Fayetteville, not including 2 now under construction, \$1,390,000

Library 116,300 volumes, 5,500 volumes of government documents, 661 current magazines New library now under construction

Laboratories Chemistry Building, Physics Building, Engineering Building, Commerce Building, Agriculture Building, Home Economics Building, Gray Hall, University Hall, Engineering shops New Science Building now under construction

Museum Archaeological museum in new library.

Requirements For Admission 15 units, only 4 of which may be in vocational work

For Degree In the Colleges of Arts and Sciences, Agriculture, Engineering, and Education, from 124 to 143 semester hours, School of Law requires 2 years of college work for entrance, and 3 years of Law for graduation, School of Medicine requires 2 years of college work for entrance and 4 years of Medicine for graduation, School of Business Administration requires 2 years of college work for admission and 2 additional years of work in the School of Business Administration for graduation Properly qualified students having the bachelor's degree are permitted to take the master's degree in 1 year of graduate study

General Women must take 2 years of Physical Education, men, 2 years of Military Science

Departments and Staff. ARMOUR INSTITUTE OF TECHNOLOGY

CHICAGO, ILLINOIS

Armour Institute of Technology is located near the heart of Chicago, and has very easy access to all the large industrial plants and cultural centers of the city. It is the only institution in the Middle West concentrating exclusively on instruction in technology and architecture. The Institute was founded in 1892 by Philip Danforth Armour, one of the pioneers of Chicago industry, it is a privately controlled and non-sectarian institution under the supervision of a board of 37 trustees, representative of many phases of business, industrial, and cultural life in Chicago

Finances: Endowment, \$400,000, income from endowment, \$4,972 44, income from other sources, \$22,510 46. Student fees, \$284,881 05. Total annual expenditures year ending August 31, 1935, \$324,594 88. Budget, 1935-36, \$342,940

Grounds and Buildings: 9 acres valued at

\$249,365 87; present value of buildings, \$664,234 49

Library (1934) 38,000 volumes, 300 current periodicals Burnham Architectural Library at the Art Institute of Chicago is used by students in Architecture Other excellent library facilities

Laboratories Main Building (1892) houses Chemistry, Chemical Engineering, Electrical Engineering, and Steam Laboratory, Machinery Hall (1902) houses all engineering shops and some Mechanical Engineering, Automotive Laboratory (1917), Refrigeration Laboratory (1913), Chapin Hall houses Physics Laboratories and Civil Engineering Laboratories, Fire Protection Engineering Laboratory at Underwriters Laboratories, 207 East Ohio Street, Chicago

Requirements. For Admission Graduation from accredited high schools 15 units including English, 3, Algebra, $1\frac{1}{2}$, Geometry, $1\frac{1}{2}$, Physics, 1, Chemistry, 1, History, 1, Mechanical Drawing, 1, electives, 5

For Degree B S degree conferred after completion of 4 years' study, 140 hours with a minimum of C average (1 grade point or better) The M S degree is awarded to students who have satisfactorily pursued a complete graduate course of resident study of 1 year and have submitted a thesis The professional degree is conferred upon graduates as a post-scholastic degree in recognition of professional ability and achievement and after at least 4 years in the practice of Engineering

Departments and Staff: Architecture *Professors*, 2, *associate professors*, 1, *assistant professors*, 4, *instructors*, 1. Chemical Engineering 4, 1, 0, 2 Civil Engineering 3, 2, 2, 0 Economics and Languages 2, 0, 0, 3 Electrical Engineering 3, 2, 1, 0 English 1, 0, 0, 2 Fire Protection Engineering 1, 1, 1, 0 Mathematics 1, 0, 3, 2 Mechanical Engineering 6, 3, 1, 1 Mechanics 1, 1, 0, 1 Physical Training 1, 0, 0, 1. Physics 1, 1, 1, 1

Enrollment: Limited to 850 May 1935, 837, evening classes, 840, summer, 212 Total, 1,889 Duplicates, 179, net total, 1,710.

Degrees: Conferred year ending June 1935, 154 B S, 132, M S, 15, professional, 7 Degrees conferred since foundation, 3,541.

Fees: Tuition, \$300, matriculation, \$5, general, \$25 to \$75 annually Diploma fees, B S, \$10, M S and professional degree, \$15 Expenses Low, \$750, liberal, \$1,200

Scholarships. 15 awarded annually to freshmen in the amount of \$300, based upon results in competitive examinations given in January and May of each year, also 30 scholarships for students in Fire Protection Engineering, and 10 scholarships for juniors and seniors Loan funds are maintained at the Institute for needy students

Personnel and employment bureau Maintained and every assistance given to graduates and alumni in obtaining employment

Session beginning September 25, 1935, ends June 13, 1936

Summer session June 22 to August 14, 1935 Enrollment, 212

University extension Evening classes only

Bulletin issued quarterly, Armour Engineer issued quarterly

Administrative Officers *President*, Willard E Hotchkiss, *Dean*, Henry T Heald, *Registrar*, W Ernest Kelly Officer in charge of foreign students, W Ernest Kelly

ASHEVILLE NORMAL AND TEACHERS COLLEGE

See North Carolina Normal and Teachers College

ATLANTA UNIVERSITY

ATLANTA, GEORGIA

Graduate school of arts and sciences, coeducational, privately controlled

Work began in 1865. Chartered in 1867 Opened as college in 1869 Became graduate school in 1929 upon affiliation with Morehouse College and Spelman College

Self-perpetuating board of 21 trustees.

Finances: Endowment, \$3,234,913 96, income from endowment, \$149,860 47 Income from other sources, not including dormitories and dining hall, \$35,217 97. Total annual expenditures, not including dormitories and dining hall, \$182,459 62

Grounds and Buildings: 60 acres valued at \$562,658 33, present worth of buildings, \$1,009,618 58. Dormitories 1 for men accommodating 100, 1 for women accommodating 100

Library (1932) 50,000 volumes, 189 current periodicals

Laboratories Science Hall (1921) on campus of Morehouse College, an affiliated institution, houses laboratories of Physics, Chemistry, Biology, and Geology Tapley Hall (1925) on campus of Spelman College, an affiliated institution, houses laboratories of Physics, Chemistry, and Biology

Requirements: For Admission (1) Graduation from college of approved standing together with satisfactory evidence of character and other qualifications (2) Promise of ability to do graduate work and to concentrate satisfactorily in chosen field

For Degree (1) 24 semester hours of graduate work with grade of A or B, a year's residence at the University, reading knowledge of French or German, satisfactory thesis on subject approved by chairman of major department

Departments and Staff. (No system of rank) Biology 4 Chemistry 2 Economics 4 Education 6 English. 5 French 2 History 4 Mathematics 1 Sociology. 2

Enrollment. For 1934-35, 94 Men, 44, women, 50. Total number of matriculants since foundation, 6,500 (approximately).

Degrees: Conferred year ending June 30, 1935, 22 M A , 20, M S , 2 Total number of degrees conferred since foundation, 1,644

Fees: Tuition, \$100, room and board, \$324, matriculation and health fees, \$10, graduation fee, \$10 Annual expenses \$500

Scholarships: Limited number of scholarships for students who show promise of success Application should be made in advance of registration.

Opportunity offered for limited number of students to find part-time employment on campus which will yield not more than \$100 a year

Dates of beginning and ending 1934-35 sessions September 18, 1934, June 3, 1935 (Commencement Day)

Summer session June 12 to July 24, 1935 Conducted in affiliation with 6 other institutions of higher learning in Atlanta Enrollment, 610

BARNARD COLLEGE NEW YORK, NEW YORK

Undergraduate college for women of Columbia University It duplicates for women, in separate classes, with such changes and adaptations as may seem desirable, the curriculum offered to men in Columbia College Graduates receive the degree of B A from Columbia University

In 1889 a group of men and women who wished to provide for women in New York City a college education fully equal to that offered to men, obtained the sanction of the trustees of Columbia for the establishment of an affiliated woman's college A charter was granted by the State of New York, and promises of subscriptions for the support of the college during the first 4 years of its existence were secured Named for President Frederick A P Barnard of Columbia College, who for many years had been an ardent advocate of the admission of women to Columbia Opened in 1889 in a rented house at 343 Madison Avenue Since 1897 Barnard has occupied the land on Broadway between 119th and 120th Streets, and since 1903 that between 116th and 119th Streets in addition In 1900, when the growth of the college had made inappropriate the original informal arrangement for instruction, an agreement was made between the trustees of Columbia College and of Barnard College by which Barnard was incorporated in the educational system of the university, but it remained on a separate financial foundation

Governed by a self-perpetuating board of 25 trustees

Finances: Endowment, \$4,465,330, income from endowment, \$209,454, income from other sources, not including dormitories and dining halls, \$413,667 Total annual expenditures, not including dormitories and dining halls, \$685,508 Budget, 1935-36, \$892,161

Grounds and Buildings: Value of grounds (4 acres) and buildings, \$5,059,716, present worth of buildings, \$1,275,000. 2 residence halls, accommodating 350

Library 47,300 volumes, 172 current periodicals For advanced and research work, students use the Columbia University Library

Laboratories Botany, Chemistry, Geology, Physics, Zoology, and Experimental Psychology

Requirements For Admission 15 units, including English, 3, Mathematics, 2, Foreign Languages, 5 (3 must be in one language), character and promise, good health and general fitness (these latter to be judged by a scholastic aptitude test) The Committee on Admissions selects from among the candidates those best fitted for a college course

For Degree BA (except those in the Special Honors Course) 120 points, of which at least 84 must be acquired in actual college residence and at least 30 of these while the student is registered at Barnard The 120 points are exclusive of the prescribed work in Physical Education The term point usually signifies the satisfactory completion of work requiring attendance at class 1 hour, or in the laboratory 2 hours a week during a winter or spring session English A, 6 points, English D, 1 point, Hygiene A, 2 points, Physical Education, A, B, C, D Ability to read at sight, with ease, 1 of the following languages French, or German, or Greek, or Latin By special permission Italian or Spanish may be substituted for 1 of these languages All other work is elective, but must include a major subject of 28 points and courses amounting to not less than 14 points from each of the following groups other than the one in which the major lies Group I, Languages, Literatures and other Fine Arts,

Group II, Mathematics and Natural Sciences, Group III, Social Sciences

Candidates for BA who desire to specialize in Natural Sciences or in Mathematics, may elect the foregoing program of studies with modifications A major subject of at least 28 points of not less than grade C in one of the Natural Sciences Astronomy, Botany, Chemistry, Geography, Geology, Mineralogy, Physics, Experimental Psychology, and Zoology or in Mathematics, and 2 minor subjects of at least 12 points each, 1 of which must be allied to the major, both to be chosen from the foregoing list, (Anthropology may also be taken as a minor subject) and additional grouped work in Science, or in Mathematics, or in Science and Mathematics, so as to make a total of at least 60 points in Science, or in Science and Mathematics

BA with honors in special subjects Exceptionally well-equipped students with pronounced interest in any subject may be allowed to substitute for the prescribed curriculum a special course of study in that and closely related subjects Students may be admitted to this course, usually as a result of conspicuous ability in college work, at the beginning of the junior year, provided they meet in September such tests as the Committee on Instruction may determine The appropriate department then takes charge of the student's work, and, subject to the approval of the Faculty, arranges the course to be pursued for a degree with honors Honor students are required to pass by the end of the junior year the regular foreign language test in French or German or Greek or Latin They are also required to pass a reading test in another foreign language to be set by the department in charge of their work before the mid-year examination period of their senior year

During the junior year the students are held on probation They are required to take the regular examinations in the courses for which they are registered In the senior year all regular examinations are omitted, and at the end of the year every honor student must pass a comprehensive examination in her subject as a whole Honor

students are exempt from the technical requirement of 120 points, from regular class attendance, and in the senior year from the usual system of grading, but not from completion of the group requirement, including a laboratory science, or from the customary supervision of the Department of Physical Education

General All students not residing with their parents are required to live in Brooks Hall or Hewitt Hall

BAYLOR COLLEGE FOR WOMEN

See. Mary Hardin-Baylor College

BAYLOR UNIVERSITY

WACO AND DALLAS, TEXAS

Coeducational, privately controlled, property of the Baptist General Convention of Texas

Chartered 1845, under the Republic of Texas by Texas Baptist Educational Society. Located at Independence, Texas, 1845 to 1886, when it was consolidated with Waco University at Waco and came under control of Baptist General Convention of Texas. In 1903 Baylor University took over the School of Medicine of the University of Dallas. In 1904 College of Pharmacy was organized. In 1918 Texas Dental College was taken over as part of the medical schools. In 1920 the Texas Baptist Memorial Sanitarium was combined with Baylor University College of Medicine. In 1919 the Department of Education of the College of Arts and Sciences at Waco was given separate organization as the School of Education, School of Law established in 1920, School of Business in 1923, and the School of Music in 1925. The School of Pharmacy was discontinued in 1931.

The board of trustees composed of 26 members is elected by the Baptist General Convention of Texas. The College of Arts and Sciences, the School of Business, the School of Education, the School of Law, and the School of Music are at Waco. The College of Medicine and the Hospital, the School of Nursing, and the College of Dentistry are in Dallas. The office of the president is at Waco.

Finances Endowment of the University at Waco, \$1,471,149 28, of which \$665,000 is on annuity basis, of the University at Dallas, \$294,513 41, of which \$205,513 41 is in the Hardin Trust Fund. Income (1934-35) for College of Liberal Arts and Sciences and other schools at Waco, from sources other than endowment, \$357,422 71, at Dallas, \$200,469 74.

Grounds and Buildings: At Waco, campus of 30 acres, value of grounds, buildings, and equipment, \$1,740,580, residence dormitories. For women, 3, accommodating 498, for men, 1, accommodating 250. Hospital for women. Value of grounds, buildings, and equipment at Dallas, \$2,351,059.

Library 68,015 volumes, 9,000 public documents, 178 periodicals. Housed in modern, fireproof building, reconstructed in 1923. The Browning Library contains the

largest collection in existence of books of Browning and concerning Browning. Value, approximately \$200,000. Other libraries at Waco include Law, the Aynesworth Texas History Room, and the J. B. Tidwell Bible Library.

Laboratories George W. Carroll Science Hall (1901), present value, \$190,000.

Museum Accession list totals more than 75,000 specimens and articles. Collections of reptiles, fresh-water and marine shells, and snails, especially complete for research in Texas fauna.

Requirements: For Admission 15 units, of which 8 are required. English, 3, Algebra, 1, Plane Geometry, 1, Science, 1, History and Civics, 2. No conditioned freshmen are admitted. Students over 21 years of age who cannot satisfy the entrance examinations but have done "substantially the amount of work required," are occasionally admitted as "specials." Such students are required to satisfy all entrance requirements within 1 year from the date of admission. For admission to the School of Law, 2 years of college work are required. For admission to the College of Medicine, high school graduation and 2 years of college work as minimum, with decided preference for 3 and 4 years of college preparation. The College of Dentistry requires high school graduation and 1 year of college work. Beginning with 1937, 2 years will be required. The School of Nursing requires high school graduation, but preference is given those who present 2 or more years of college work.

For Degree 36 majors (a major is the equivalent of $3\frac{1}{2}$ semester hours). In the College of Arts and Sciences, 16 majors are prescribed as follows: English, 3 majors, Natural Science, 3, Social Science, 3, Foreign Language, 4, Mathematics, 1, Bible, 1, Psychology, 1. An average of C (76-80) in all courses is required. 12 of the 36 majors must be junior and senior courses. At least 8 majors must be taken in 1 department, or by the consent of both heads of departments, in 2 allied departments, and at least 5 in another department as the minor subject. For graduation "with honor"

an average of B (86-90) is required, "with high honor" requires an average of A (91-95) and "with highest honor" requires the same average but with the scholarship of the last 2 years showing a definite improvement over that of the first 2 years. For the B B A degree the School of Business prescribes 4 years (36 majors). The School of Law requires for the LL B. degree 3 years (27 majors). The School of Music requires 4 years (36 majors) for the B Mus degree. The College of Medicine requires 4 full years for the M D. degree. The College of Dentistry requires 4 full years for the degree of D D S. The course in Nursing covers 2 years and 4 months.

General At Waco, Physical Education, 2 years, physical examination required of all entering freshmen, chapel attendance compulsory. Dormitory residence required of all women students.

Departments and Staff: Art Professors, 0, associate professors, 0, assistant professors, 1, instructors, 2. Bible 1, 1, 0, 0. Biology 2, 0, 1, 2. Chemistry 2, 0, 0, 0. Economics 1, 0, 1, 0. Scholarships 105, varying in amounts from \$150 to \$5, loan funds

Employment bureau Labor office In 1934-35, 100% of students earned all or part of expenses Labor is provided for each student, and the labor earnings of college students averaged approximately 58% of the total school fees, not including personal expenses

Dates of beginning and ending sessions First Tuesday after Labor Day, first Monday in June

Summer session June 6 to August 14, 1935 Enrollment, 231

Catalog in November

Achievements of year ending June 30, 1935 Completion of Art Building for the housing of Art materials, large lecture room, library, studios and exhibit rooms

enabling the College to develop its Department of Fine Arts, adoption of a new schedule providing 1 running course through the semester and 2 concentration courses each 9 weeks giving 3 hours credit per course. This makes a normal student load of 3 courses totaling 15 semester hours.

Administrative Officers: *President*, William J. Hutchins, *Dean*, Thomas A. Hendricks, *Registrar*, Adelaide Gundlach, *Dean of Women*, Katharine S. Bowersox, *Assistant Dean of Women*, Julia F. Allen, *Dean of Labor*, Albert G. Weidler. Officer in charge of foreign students, Adelaide Gundlach, registrar.

BETHANY COLLEGE

BETHANY, WEST VIRGINIA

College of arts and sciences, coeducational, privately controlled, affiliated with Disciples of Christ.

Chartered by Legislature of Virginia in 1840, instruction began in 1841.

Self-perpetuating board of 30 trustees.

Finances: Endowment, \$1,749,558.59, income from endowment, \$72,437.24, income from other sources, not including dormitories and dining hall, \$103,641. Total annual expenditures, not including dormitories and dining hall, \$174,911. Budget, 1935-36, \$255,000.

Grounds and Buildings: 560 acres valued at \$120,000, present worth of buildings, \$812,000. Dormitories 1 for men, accommodating 80, 1 for women, accommodating 112.

Library (1906) 24,000 volumes, 105 current periodicals.

Laboratories Oglebay Hall (1911) for Biology and Chemistry, equipment valued at \$56,000. Physics, \$18,000.

Requirements. For Admission 15 units for entrance to be distributed in the following manner: (1) 3 or 4 units, English, (2) 3 units of (a) a Foreign Language, or (b) Social Studies, or (c) Science, or (d) Mathematics, (3) 2 or more units from a second selected group under (2), (4) 5 other units from subjects accepted by approved second-

ary schools. For a language group 2 units in 1 language must be offered. Not less than $\frac{1}{2}$ unit will be accepted in any field. Credit will not be given for less than 1 unit in Algebra, Plane Geometry, Chemistry, or Physics. 7 units must be offered from subjects listed under group (2).

For Degree 126 semester hours with 120 quality points. For A. B.: English, 6, Bible, 6, Foreign Language, 2 units for entrance and 6 in the same language in college, or 1 unit for entrance and 9 in the same language in college, or no entrance and 12 hours in the same language in college, or a reading knowledge of French or German, Social Studies, 6, Science and Mathematics, 6, Physical Education, 6.

For B. S.: English, 6, Foreign Language, same as for A. B. degree, Science and Mathematics, 40, Social Studies, 6, Bible, 6, Physical Education, 6.

Work is so planned that freshmen will take courses in 4 groups and by the close of the sophomore year all students will be urged to pursue courses in each of the 5 groups offered.

At least 40 hours of total required for graduation must be taken from courses listed in upper division.

General Chapel attendance required.

Departments and Staff. Group I, Languages and Literature (English, Journalism, Speech and Dramatics, Greek, Latin, French, German) *Professors*, 7, *associate professors*, 0, *assistant professors*, 0, *instructors*, 1. Group II, Education, Philosophy, Psychology (Physical Education) 4, 0, 0, 1. Group III, Social Sciences (Economics, Secretarial Science, History, Political Science, Sociology, Library Science) 3, 0, 1, 3. Group IV, Science and Mathematics (Biology, Chemistry, Mathematics, and Physics) 3, 0, 2, 2. Group V, Religion and Fine Arts (Art, Biblical Literature, Old Testament, New Testament, Music) 3, 0, 1, 2.

Enrollment. For 1934-35, 306 Men, 203, women, 103.

Degrees: Conferred year ending June 30, 1935, 46 B. A., 40, B. S., 6.

Fees. Tuition, \$250, rent, \$108, board,

\$187, student activity fee, \$25; graduation fee, \$10 Annual expenses Liberal, \$950, low, \$575

Scholarships: 194, varying in amounts from \$250 to \$25, loan fund Applications for scholarship aid close on September 1.

In 1934-35, 63% of students earned part of way through college

Dates of beginning and ending sessions September 15, 1935, June 9, 1936

Catalog in March

Administrative Officers: *President*, W H Cramblet, *Dean*, W K Woolery, *Dean of Women*, Christine Burleson, *Dean of Personnel*, F H. Kirkpatrick Officer in charge of foreign students, F H Kirkpatrick

Founded by Brigham Young in 1875. Board of 12 trustees elected triennially by vote of members of Church of Jesus Christ of Latter-day Saints acting through the First Presidency of the Church

University consists of Graduate School, College of Arts and Sciences, College of Applied Science, College of Commerce, College of Education, College of Fine Arts, Extension Division, Research Division

Finances: Main source of income an annual Church appropriation, 1934-35, \$208,000, student fees, \$124,000 Total expenditures for 1934-35, \$356,970 Budget, 1935-36, \$324,000

Grounds and Buildings: 125 acres, valued at \$58,000, present value of buildings, \$722,000.

Library(1925) Cost of building, \$165,000, 93,000 volumes, 50,000 bulletins.

Laboratories Agronomy, Bacteriology, Botany, Chemistry, Geology, Home Economics, Mechanic Arts, Physics, Psychology, Zoology, and Entomology Equipment valued at \$350,000.

Museum Botanical, Entomological, Geological, Archaeological, and Fine Arts collections.

Requirements: For Admission Graduation from accredited high school, among the 16 units of University requirements, English, 3, a principal group of 3 or more units, a secondary group of 2 or more units

For Degree For A B and B S, 186 hours, at least 45 hours in residence, 60 hours must be upper division Group requirements Mathematics and Physical Science, 12 hours, Biology and Psychology, 12, Social Science, 12, English and Foreign Languages, 18. Major requirement, 30 hours, minor, 20 For M A, 1 year's graduate work of 48 hours, the submission of a satisfactory thesis, and passing of satisfactory oral examination

Departments and Staff Agronomy *Professors*, 4, *associate professors*, 1, *assistant professors*, 1, *instructors*, 0 Animal Husbandry 2, 0, 1, 0 Art 2, 0, 2, 0 Bacteriology 2, 0, 0, 0 Botany 2, 0, 1, 0 Chemistry 1, 0, 2, 2. BROOKLYN COLLEGE

BROOKLYN, NEW YORK

College of arts and sciences, coeducational, municipally controlled

Established in 1930 by combining Brooklyn Centers of City College and Hunter College, established in 1926.

Board of higher education, 21 members, each appointed by the Mayor of the City of New York for 9 years

Finances: Budgetary allowances made by the City of New York, 1934, \$1,584,846 80, 1935, \$1,612,127 06 Receipts from tuition fees, 1934, \$66,045 50, 1935 (January 1-June 30), \$37,517 50 Receipts from laboratory fees, 1934, \$40,761 82, 1935 (January 1-June 30), \$21,702 02 Expenditures, 1934, \$1,540,579 17, 1935 (January 1-June 30), \$858,054 36

Grounds and Buildings: Brooklyn College occupies 5 rented buildings which provide 174,572 square feet Brooklyn College has received a federal grant for the erection of buildings on the Wood-Harmon site

Library 35,308 volumes, 296 periodicals
Laboratories 47 laboratories in Art, Biology, Chemistry, Geology, Music, Physics, Physiology, Psychology, and Speech
Present value, \$400,000

Observatory equipment Telescope, spectroscope, sidereal chronometer, camera

Requirements For Admission (1) Graduation from a New York City high school, (2) 15 units including 3 of English, 1 of American History, 5 of Foreign Languages, 2½ of Mathematics, and 1 of Science, (3) attainment in class ratings (in prepared subjects acceptable for admission) of average of at least 75% and sufficiently high to give the candidate a relative rank within the number to be admitted as fixed by the Board of Higher Education, (4) all students must be residents of New York City, (5) candidates who meet requirement (2) but not requirements (1) and (3) may be admitted to the evening session as limited matriculated students upon the payment of fees, (6) conditions allowed in not more than 2 units of prescribed subjects, all candidates must present at least 14 of the 15 units, (7) conditions must be removed within the first year

For Degree 128 credits for graduation, 73 credits in prescribed courses taken in the first 2 years, 24 credits in electives in 1 group, including 12 credits in advanced courses in 1 department

General Physical Education included in prescribed courses, physical examination required of all students every semester, monthly chapel for freshmen

Departments and Staff: Art Professors, 1, associate professors, 0, assistant professors, 0, instructors and tutors, 4. Biology 1, 2, 1, 11 Chemistry 1, 1, 4, 15 Classical Languages 2, 1, 1, 7 Economics 1, 0, 0, 9 Education 1, 0, 2, 18. English 3, 0, 4, 24 Geology 0, 1, 1, 2 German 2, 0, 0, 10. Government and Sociology 0, 0, 2, 6 History 1, 0, 2, 12 Hygiene 1, 0, 0, 12 Mathematics 1, 1, 4, 13 Music 0, 0, 1, 5 Philosophy 1, 0, 0, 11 Physics 1, 1, 0, 11 Physiology and Hygiene 0, 1, 0, 11 Romance Languages 2, 0, 3, 16 Speech 0, 0, 3, 17

Enrollment: For 1934-35 (average of fall, 1934 and spring, 1935 semesters), 10,122 Men, 5,554, women, 4,568 Total number of matriculants since foundation, 53,125

Degrees: Conferred year ending June 30, 1935, 1,196 B A, 738, B S S, 44, B S, 253, B S in Education, 161 Total number of degrees conferred since foundation, 3,270

Fees: Fully matriculated students pay no tuition fees, limited matriculated students pay tuition fees of \$2 50 per credit, graduate students and non-matriculated students pay tuition fees of \$5 per credit, laboratory fees and cost of books average about \$30 a year, diploma fee is \$2

Scholarships: 3 scholarships provided by the annual income of a fund of \$3,000, to be awarded to the 3 members of the graduating class who have shown the greatest proficiency in their several fields, and intend to pursue graduate study

Employment bureau Placement director
In 1934-35, 41% of the students who attended the day session earned all or part of expenses

Dates of beginning and ending sessions
Third Tuesday in September, third Thursday in June

Summer session July 5 to August 20, 1935
Enrollment, 2,687. Men, 1,360, women, 1,327

Catalog in April

Administrative Officers: President, William A. Boylan, Dean of Men, Mario E. Cosenza, Dean of Women, Adele Bildersee,

Director, Evening Session, James W. Park, *Director*, Summer Session, Oscar W. Irvin, *Director*, Division of Graduate Studies, Joseph George Cohen, *Registrar*, Samuel N. Kagen, *Curator* and *Bursar*, Robert J. Fee, *Librarian*, Asa Don Dickinson, *Secretary to the President*, Margaret Effrige

BROOKLYN, POLYTECHNIC INSTITUTE OF

BROOKLYN, NEW YORK

The buildings of the Institute are located in the center of the business district immediately adjoining the Borough Hall and at the point of convergence of many surface, elevated, and subway lines of transportation. The great museums and libraries of the City of New York can be reached within half an hour by subway.

An endowed college of science and engineering for men.

Original charter granted in 1854, final charter granted in 1889 by the Board of Regents of the State of New York. Directed by a corporation of not more than 21 trustees which is self-perpetuating. Presents programs of study leading to bachelor's and master's degrees in Civil, Electrical, Mechanical, and Chemical Engineering and in Chemistry and Physics, and the doctor's degree in Chemistry.

Finances. Endowment, \$1,600,000, income from endowment, \$71,600, income from student fees, \$350,000, income from other sources, \$18,000, total annual expenditures for the year ending June 30, 1935, \$425,866. Gift from Estate of Charles E. Perkins, \$43,900. Total budget for 1935-36, \$439,730.

Grounds and Buildings. 1½ acres valued at \$525,000 (1899 valuation) almost entirely occupied by buildings valued at \$712,655.

Library. Main library is located in the Institute building. Divisional libraries are located adjacent to major departments. Volumes, 20,667, periodicals, 93. Brooklyn

Public Library branch available to students.

Laboratories. All laboratories are housed in the North and South Buildings. Present equipment valued at \$426,081.

Requirements: For Admission. Graduation from accredited high schools with 15 units distributed as follows: 9½ prescribed of which 5 are in English, History, and Languages, 4½ in Mathematics and Physical Science, and 5½ restricted electives. Entrance conditions must be removed before the beginning of the sophomore year.

For Degree Requirements for the baccalaureate degree: 1 year of residence and completion of a 4-year prescribed curriculum. For the master's degree: 1 year of residence and a high quality of scholarly achievement. For the doctor's degree: Normally 3 years of study beyond the baccalaureate degree but the principal criterion for the award of the Ph.D. degree is the ability to do independent, original work of a high order of excellence.

General 2 years of Physical Education are required. Medical and physical examinations are required of all freshmen and juniors.

Departments and Staff: Chemistry: Professors, 3, associate professors, 0, assistant professors, 2, instructors, 2, part-time staff, 3. Chemical Engineering: 2, 0, 1, 0, 1. Civil Engineering: 3, 0, 2, 1, 11. Electrical Engineering: 2, 1, 1, 1, 5. Mechanical Engineering: 2, 0, 4, 4, 25. Physics: 1, 0, 2, 2, 10. Mathematics: 1, 1, 1, 2, 6. English: 1, 1, 0, 2, 2. History and Economics: 1, 0, 0, 0, 8. Languages: 1, 0, 0, 1, 1. Physical Education: 0, 0, 1, 1, 2.

Enrollment: For the year ending June 30, 1935, day, 552, evening undergraduate, 1,346, graduate, 295.

Degrees: Conferred year ending June 30, 1935, B.S. in Chem., 21, B.Ch.E., 11, Ch.E., 1, B.C.E., 16, C.E., 13, B.E.E., 27, E.E., 17, B.M.E., 25, M.E., 3, M.S. in Chem., 7, M.Ch.E., 1, M.C.E., 7, M.E.E., 6, M.M.E., 4, M.S. in Physics, 1, Ph.D., 1. Total number of degrees conferred since founding, approximately 3,000.

Fees: Tuition fee, \$360 a year, diploma

fee, \$10, student activity blanket fee, \$15, laboratory fees only in Chemistry and Chemical Engineering, \$10 each

Scholarships: 4 at \$275 each, 8 at \$180 each Graduate fellowships, 12 at \$380 each

Research Annual income of \$16,500 for cooperative research with the U S Shellac Importers' Association on the composition, properties and uses of shellac

Appointment office operated for placing graduates

Session begins September 25, 1935, and ends June 17, 1936

Summer session Two 6-week summer terms with a 2-week vacation period Enrollment in 1935, 263

Catalog in April

Principal academic and scientific developments of the year were the presentation of the first Ph D degree, and the establishment of a research laboratory for internationally cooperative work upon the properties and uses of shellac

Administrative Officers. *President*, Harry S Rogers, *Dean*, Ernest J Stieubel, *Dean*, Graduate Study, Erich Hausmann

BROTHERS COLLEGE

See Drew University

BROWN UNIVERSITY

PROVIDENCE, RHODE ISLAND

See also Pembroke College

University, including the College (for undergraduate men), Pembroke College (for undergraduate women), and a Graduate School The College includes a Division of Engineering Privately controlled

Charter granted to Rhode Island College by colonial assembly, 1764 Seventh college in colonies Project started by Baptists Distinctive provisions of charter "Into this Liberal and Catholic Institution shall never be admitted any religious Tests but on the Contrary all the Members hereof shall forever enjoy full free Absolute and

uninterrupted Liberty of Conscience", and "The Sectarian differences of opinions, shall not make any part of the Public and Classical Instruction", and "That the Public teaching shall in general respect the Sciences"

College established in 1765 in Warren, Rhode Island 1770, moved to Providence and University Hall built 1775, building of First Baptist Meeting House "for the Public Worship of Almighty God, and also for holding Commencement in" 1776-82, College closed and "The College Edifice" used as barracks and hospital by American and French troops 1804, name changed to Brown University in recognition of gift from Nicholas Brown 1823, Hope College built 1811-27, Medical School 1850, introduction of elective principle by Francis Wayland—a remarkable pre-vision of the future of American collegiate education, development of courses in applied science 1892, the Women's College in Brown University established and in 1928 name changed to Pembroke College in Brown University 1914, Sesquicentennial celebrated 1920, study for honors introduced

Self-perpetuating board of 42 trustees (22 Baptists, 5 Quakers, 5 Episcopalians, 4 Congregationalists, 6 without denominational specifications), and 12 fellows including the President (8 Baptists and the others without denominational specifications) 14 trustees are nominated by alumni

Finances. (Including Pembroke College) Endowment, June 30, 1935, \$10,304,992 68 Income from investments, 1934-35, \$470,-957 34, income from students, \$955,672 73, income from other sources, \$83,293 62, total operating income, \$1,500,720 52, receipts for non-operating purposes, \$9,203 17, total receipts, \$1,509,923 69, total operating expenditures, \$1,531,353 81, total non-operating expenditures, \$9,203 17 Total expenditures, \$1,540,556 98 Budget for 1935-36, estimated income, \$1,484,850

Grounds and Buildings: Approximately 40 acres 45 buildings 9 residence halls for men (525) 5 residence halls for women (175) (Pembroke College) Land, buildings, and other structures, \$6,273,236 50

Library University Library (1767), housed in the John Hay Library building (1910) and in 14 department libraries, 481,000 volumes, 2,800 current periodicals (including government serials) Special collections (1) Harris collection of American poetry and plays, 102,034 items (volumes, pamphlets, sheet music, etc.). (2) Rider collection of Rhode Island history, 2,000 volumes, 8,000 pamphlets, also manuscript material (3) Church collection of South Americana, 3,500 volumes (4) Chambers Dante collection, 2,000 volumes (5) McLellan Lincoln collection, 16,820 items (volumes, pamphlets, manuscripts, museum material, etc.) (6) Wheaton collection of international law (7) Hoffman Napoleon collection (8) Penniman Library of Education Department and Seminary libraries Conant Germanic Library, Corthell Engineering Library, Lamont collection (English), Mathematics Library, Olney botanical collection

Pembroke College reference library in Pembroke College, 10,000 volumes

John Carter Brown Library of Americana, 30,000 items, housed in separate building and administered by Board of Management appointed by Corporation of the University

Laboratories Arnold Laboratory (1914), Biology, Metcalf Laboratory (1923), Chemistry, Wilson Hall (1891), Physics, Rhode Island Hall (1842), Geology, Maxcy Hall (1894), Botany, Engineering Building (1903) and Engineering Laboratory (1928), Rogers Hall (1864), Chemical Research

Herbarium in Maxcy Hall, 80,000 specimens Genus *Carex* particularly well represented Herbarium established in 1881. Geological Museum in Rhode Island Hall Collection of portraits in Sayles Memorial Hall

Ladd Observatory situated about a mile from campus 12-inch refractor Two 4-inch refractors and other equipment

Requirements: For Admission A candidate for admission must possess good character, acceptable personality, intelligent interest and ambition and adequate scholastic preparation for college work as indi-

cated by his secondary school record Evidence as to scholastic qualifications may be presented by entrance examinations, by certificate from an approved secondary school, or by both methods Specific requirements

For A B degree (Program I), 15 units English, 3, Algebra, 2, Plane Geometry, 1, History, 1, Foreign Language, 5 (including either 3 in Latin or 2 in Greek), and 3 units in approved elective subjects For A B degree (Program II), 15 units English, 3, Algebra, 2, Plane Geometry, 1, History, 1, Foreign Language, 2, and 6 units in approved elective subjects For Sc B in Engineering, 15 units English, 3, Algebra, 2, Plane Geometry, 1, Solid Geometry, $\frac{1}{2}$, History, 1, 3 units from the following, Chemistry, Physics, Languages other than English, and $4\frac{1}{2}$ units in approved elective subjects For Sc B in Chemistry, 15 units English, 3, Algebra, 2, Plane Geometry, 1, History, 1, Foreign Language, 2, and 6 units in approved elective subjects

For Degree For A B 120 semester hours, including 84 semester hours above lowest passing grade In addition to certain required courses designed to broaden the student's intellectual interests and objectives, each student must arrange a coordinated and progressive program of courses in a field of concentration Program of concentration may be arranged in any field represented in the curriculum of the University

For Sc B in Engineering A program of courses, 120 semester hours or more, including 72 semester hours above lowest passing grade In addition to certain required courses, the program provides for electives within the field of Engineering and related fields and for certain other electives in any field represented in the curriculum of the University

For Sc B in Chemistry A program of courses, 120 semester hours or more, including 84 semester hours above lowest passing grade. In addition to certain required courses, the program provides for electives within the field of Chemistry and related fields and for certain other electives in any

field represented in the curriculum of the University

Brown University recognizes and encourages distinguished work by students of exceptional ability by offering programs of study for honors. Study for honors is now permitted in practically all fields represented in the curriculum. Preliminary honors are awarded at the close of the sophomore year to students whose work for the two years has been of exceptional character. Candidacy for final honors, on the basis of special work in field of concentration, begins in the junior year and awards are made at graduation.

Minimum requirement for master's degree is 1 full year of study including, ordinarily, 30 semester hours of course work, an approved thesis and a reading knowledge of French or German. Comprehensive examinations are given in many cases.

A candidate for the Ph D degree must complete at least 3 years of graduate work, must pass examinations in at least 2 foreign languages (ordinarily French and German) in addition to any language which may constitute his major subject, must pass a preliminary examination in the field of his study, must present a thesis which shall embody the results of original research, and must pass a public examination mainly in the field of his thesis.

Departments and Staff: Art Professors, 0, associate professors, 1, assistant professors, 1, instructors, 0. Biblical Literature 2, 0, 0, 1. Biology 4, 2, 7, 2. Botany 0, 1, 1, 1. Chemistry 4, 2, 4, 2. Economics 3, 2, 4, 1. Education 0, 2, 0, 1. Engineering 3, 5, 1, 1. English 5, 5, 2, 7. Geology 0, 1, 0, 2. German 1, 1, 3, 1. Greek and Latin Classics 1, 2, 2, 2. History 3, 2, 4, 0. Mathematics 4, 3, 1, 11. Music 0, 0, 2, 0. Philosophy 3, 0, 1, 0. Physical Education 1, 1, 0, 2. Physics 0, 3, 0, 1. Political Science and Sociology 0, 3, 0, 3. Psychology 1, 0, 2, 2. Romance Languages, 2, 2, 3, 3. Library 1, 0, 0, 0.

Enrollment: For year ending June 30, 1935, 2,006 Graduate students, 285, undergraduate men, 1,252, Pembroke College, 469

Degrees: Conferred year ending June 1935, 413 A B, 300, Ph B, 4, Sc B in Engineering, 24, Sc B in Chemistry, 10, Ed B, 9, A M, 41, Ph D, 25. Total number of graduates since foundation approximately 10,374 men, 2,308 women.

Fees: Annual fee, \$400 (The College), \$300 (Graduate School). Graduation fee Bachelor, \$10, master, \$15, doctor, \$25. Room, \$3 to \$10 per week, board, \$7.50 to \$15 per week. Estimated annual expense in the College Low, \$800, liberal, \$1,250.

Scholarships: In the College, over 300 scholarships with total annual value of \$87,000, and 200 loans amounting to \$35,000 (See Pembroke College). In the Graduate School, 29 fellowships with total annual value of \$22,000, and 19 scholarships with total annual value of \$6,000. In addition, 175 undergraduates were employed by the University as monitors, clerical assistants, etc with a total compensation of \$18,000. Graduate students holding assistantships in the departments of instruction received a total compensation of \$24,350 and remission of tuition amounting to more than \$7,500. An employment bureau operated by the Brown Christian Association secured about 120 jobs off campus, which enabled students to earn approximately \$13,000.

College year opens fourth Wednesday in September. Commencement is on third Monday in June.

University extension October 1934 series 53 courses, total registration, 1,474. February 1935 series 44 courses, total registration, 906.

Publications. Bulletin of Brown University (issued monthly) includes Catalog of University, Catalog of Pembroke College, Catalog of Graduate School, Bulletin of General Information, Bulletin on Dormitory Accommodations, Student Life at Brown, Announcement of Courses, Academic Group List, Report of the President, Report of the Treasurer. Colver lectures, Brown University papers, Brown Alumni Monthly (published by Associated Alumni of Brown University), Brown University Weekly Bulletin, Calendar of Art Events.

Achievements of year ending June 30,

1935 Receipt of several special grants from educational foundations for support of research in Astronomy, Biology, Chemistry, Mathematics, Psychology Establishment of Graduate Dormitory Additional cooperative arrangements with Rhode Island School of Design, Rhode Island Hospital, Butler Hospital, and Bradley Memorial Hospital, enlarging opportunities for instruction and research in the departments of Biology and Psychology Third annual Institute of Art Comprehensive study of the educational process looking toward a revision of the curriculum

BRYN MAWR COLLEGE

BRYN MAWR, PENNSYLVANIA

College for women in the country 5 miles west of Philadelphia, privately controlled, originally affiliated with the Society of Friends, at present non-sectarian

Founded by Dr Joseph W Taylor of Burlington, New Jersey, chartered by State of Pennsylvania, 1880, opened, 1885

Self-perpetuating board of 13 trustees and board of 25 directors, 13 of whom are members of board of trustees, 5 nominated by the alumnae association, the president of the college, the remaining 6, any persons whose membership the board of trustees may deem appropriate

Finances: Endowment, July 1, 1935, \$6,400,000, income from endowment, \$264,125 88, income from students' tuition fees, \$215,330, income from other sources, board, room rent, rent, etc., \$349,468 57 Gifts for current expenses, 1934-35, \$62,951 82 The alumnae are raising \$1,000,000 to commemorate the Fiftieth Anniversary of the Founding of Bryn Mawr College to be used for the erection of a new Science building and for other needs of the College Total annual expenditures year ending June 30, 1935, \$883,742 25 Budget for 1935-36, \$896,730

Grounds and Buildings: 58 acres, 16 buildings, not including the president's house, the Deanery (the alumnae house), and 9 houses occupied by members of the faculty 7 halls of residence (419)

Library (1907) Approximately 150,000 bound volumes, 10,000 dissertations and pamphlets, over 600 current periodicals Special collections Classical library of the late Professor Sauppe of Gottingen, Semitic library of the late Professor Amiaud of Paris, the Mathematical library of the late Professor Charlotte Angas Scott, Germanic library of the late Professor Karl Detlev Jensen, and the Geology library of former Professor Florence Bascom Students may enjoy also the privileges of Haverford College Library, the Library Company of Philadelphia, the Mercantile Library, the Library of the Academy of Natural Sciences, the Library of the University of Pennsylvania, the Free Library of Philadelphia, the American Philosophical Society Library, and the Historical Society of Pennsylvania Library

Laboratories Dalton Hall (1892), cost \$81,986 95, Physics, Biology, Chemistry, Geology Laboratories of Experimental Psychology and an experimental laboratory for Department of Education Equipment Physics, \$36,000, Chemistry, \$10,000, other departments, \$42,000

Requirements: For Admission. English, 3 units, Foreign Languages, 6 (Latin, 3 or 4, French, German or Greek, 3 or 2), Mathematics, 3, Science, 1, History, 1, elective, 1, total, 15 units College Board Examinations may be offered under Plans A, B, C or D

The Committee on Entrance Examination will consider the applications of exceptionally able candidates who are highly recommended by their schools but whose preparation is somewhat irregular when judged by the standard of the 15 units listed above

For Degree For A B Attendance at Bryn Mawr College for a period of 4 years (by permission of Curriculum Committee obtained in advance, work done at some other college may, in special cases, be substituted for 1 of the 4 years), examinations in work amounting to 15 units, in which an examination grade of 70 or over must be obtained in one-half of these 15 units, a reading knowledge of French and German and the fulfilling of the requirements of the Department of Physical Education Required subjects (4 units) Ancient Language or English Literature, English Composition, Philosophy, and Science Major subject and allied subjects, 6½ units, and electives, 4½ units

For M A Candidate must be a graduate of some recognized college, and must satisfy Committee on Graduate Students that work done has been equivalent to that for which the degree of A B is given at Bryn Mawr College and must have a reading knowledge of French and German and be able to give a report and carry on discussion in satisfactory English She must present credits in English Literature or literature of other languages, have a knowledge of Latin enabling her to read prose of moderate difficulty and an undergraduate credit of 16 semester hours in two or more of the subjects of Philosophy, Psychology, Laboratory Science or Mathematics Every candidate must attend 3 unit graduate courses but 1½ units of advanced undergraduate work may be substituted for one of them

For Ph D Work amounting to 3 years (a minimum), 2 years of which must be at Bryn Mawr College, knowledge of French and German and an acquaintance with Latin, candidates are strongly advised to complete at least 7 units of graduate work, including 5 graduate courses, the supervising committee will advise candidates as to the distribution of their time between

graduate seminars or courses, units of independent work and the dissertation, every candidate is urged to take part in the work of the journal clubs of her major and allied subjects, dissertation must be result of independent investigation

General All undergraduate students must live in dormitories on the campus or with their families in the neighborhood

Departments and Staff. Biblical Literature Professors, 0, associate professors, 0, assistant professors, 0, lecturers, 1, instructors, 0 Biology 1, 2, 0, 0, 1 Chemistry 1, 0, 1, 0, 1 Classical Archaeology 2, 1, 0, 0, 0 Economics and Politics 3, 0, 1, 0, 0 Education 1, 1, 0, 1, 0 English 2, 2, 2, 2, 3 (2 nonresident lecturers) French 2, 2, 1, 1, 1 (1 nonresident professor and 1 nonresident lecturer) Geology 0, 2, 1, 0, 0 German 0, 2, 1, 0, 2 Greek 2, 0, 0, 0, 1 History 3, 0, 1, 0, 1 History of Art 1, 1, 0, 2, 0 Italian 0, 1, 0, 0, 0 Latin 1, 1, 0, 1, 2 Mathematics 2, 1, 2, 0, 0 (1 visiting professor) Music 1, 0, 1, 0, 0 Philosophy 1, 2, 0, 0, 1 Physics 0, 2, 0, 0, 0 Psychology 2, 0, 1, 1, 1 Spanish 1, 0, 0, 0, 0 Carolina Woerishoffer Graduate Department of Social Economy and Social Research 1, 1, 0, 2, 0 and 2 special lecturers This does not include demonstrators and readers

Enrollment: 1934-35, 492 Graduate students, 77, resident fellows, 22, undergraduates, 389, hearers, 4

Degrees. Conferred year ending June 30, 1935, 97 A B, 74, M A, 9, Ph D, 14 Total number of degrees conferred since foundation, 3,555

Fees: Tuition (payable October 1), \$500, room rent minimum, \$200 (special rate, \$100), other rooms up to \$550 a year (payable October 1), infirmary fee, \$25 (payable October 1); board, payable in equal instalments (October 1 and February 1), \$400 For tuition, residence and infirmary fee for the academic year, with special room rent, \$1,025, laboratory fees, \$15 and \$30 a year. Athletic fee, \$10 Annual undergraduate fees Liberal, \$1,450, low, \$1,100

Scholarships: 3 graduate European fellowships (\$1,000 to \$1,500) and 1 under-

graduate European scholarship awarded to a member of the senior class with the highest record (\$500), 1 resident fellowship (\$1,200), 20 (\$860 each), 20 graduate scholarships (\$400 each), 2 scholarships in Social Economy and Social Research (\$400) For a foreign woman 1 graduate scholarship (\$1,000) Many undergraduate scholarships, 1 in every 5 students having a full or partial scholarship or receiving assistance from loan fund Some scholarships are renewable for the 4 years but the majority of scholarships are held during sophomore, junior or senior year The undergraduate scholarships vary in amount, the maximum is \$500. Applications should be made before March 1 of the year preceding the academic year for which the scholarship is desired

First semester begins the Tuesday between September 28 and October 4 and continues for 17½ weeks, the second semester begins the first Tuesday of February and continues for 17 weeks, ending the first Wednesday between May 31 and June 7.

Bryn Mawr College Calendar published in 4 parts (1) Undergraduate Courses (May), (2) Graduate Courses (May), (3) Announcement of Carola Woerishoffer Department (November), (4) The Library and Halls of Residence, plans and descriptions (November).

Administrative Officers: *President*, Marion Edwards Park, *Dean*, Helen Taft Manning, *Dean*, Graduate School, Eunice Morgan Schenck, *Registrar*, Barbara Gavliler

BUCKNELL UNIVERSITY

LEWISBURG, PENNSYLVANIA

Located in Central Pennsylvania at junction of Buffalo Valley and West Branch of Susquehanna River The Bucknell University Junior College, Wilkes-Barre, Pennsylvania, is an integral part of the University

Privately controlled college for men and women, separate grounds and buildings for women; affiliated with Baptist denomination.

Founded as "The University at Lewisburg" in 1846. In 1886 name changed to Bucknell University in honor of William Bucknell of Philadelphia

Self-perpetuating board of 40 trustees of whom three-fifths are members of Baptist churches Trustees elected for 5-year terms 1 alumni trustee elected each year

Finances: Endowment, \$1,303,863; income from endowment, \$50,900, income from students, 1934-35, \$560,854 Total annual expenditures, year ending June 30, 1935, \$658,272

Grounds and Buildings: 260 acres in campus, golf course, and farm, including 75 acres in campus, valued at \$99,000 Total present worth of buildings, \$1,731,102, total value of grounds, buildings, and equipment, \$2,236,835 Total budget for 1935-36, \$699,000. Literature Building (1934), first unit of new building program completed, cost \$146,000 Dormitories 2 for men, accommodating 230, 3 for women, accommodating 325

Library: Carnegie Library (1905), 70,000 volumes, including 20,000 government documents, 450 current periodicals Houses David Jayne Hill collection of books on International Law and Diplomacy

Laboratories Engineering (1920), present value, \$138,345, equipment, \$47,956, Chemistry (rebuilt 1920), \$64,600, \$39,280 Biology (remodeled 1926), \$36,890, \$32,230 Botany (1929), \$29,875, \$5,625 Total scientific equipment, \$126,320

Observatory (1887, enlarged in 1905) 10-inch Clark refractor

Requirements: For Admission Graduation from accredited secondary school, 15 units, scholastic standing in upper three-fifths of graduating class Applicants will be admitted to the College on the basis of individual qualifications to do college work as indicated by such criteria as high school grades, rank in their graduating class, principal's rating, intelligence as measured by a good intelligence test, character, maturity, and other pertinent factors

For Degree In Biology course, 136 semester hours, Engineering (including a summer course), 142 semester hours, other curricula,

120 semester hours 120 quality credits required in all degree courses

Lower Division concentrates on giving students the foundation for broad cultural education In Upper Division the student is free to do intensive work under guidance of an adviser in the field of his major interest

1 year of graduate work leading to the degrees of M A and M S in Biology, Commerce and Finance, Education, and Engineering

General Physical Education required of all students during freshman and sophomore years Chapel attendance required of all students except seniors

Departments and Staff: Art Professors, 0, associate professors, 0, assistant professors, 1, instructors, 0 Biology 4, 0, 2, 0 Chemistry 0, 0, 3, 0 Chemical Engineering 1, 0, 1, 0 Civil Engineering 2, 0, 0, 1 Economics 2, 0, 3, 1 Education 1, 1, 1, 0 Electrical Engineering 1, 1, 1, 0 English 5, 0, 3, 2 Geology 1, 0, 0, 0 German 1, 1, 0, 1 History 0, 1, 3, 1 Latin 1, 0, 0, 0 Mathematics 3, 1, 1, 0 Mechanical Engineering 1, 0, 3, 0 Music 1, 1, 1, 6 Philosophy 1, 0, 0, 1 Physics 1, 1, 0, 0 Political Science 0, 1, 1, 0 Psychology 1, 0, 0, 0 Religion 1, 0, 0, 0 Romance Languages 2, 1, 0, 2 Sociology 1, 1, 1, 0

Enrollment: For 1934-35, 869 Men, 531, women, 338 (Enrollment, October 1, 1935, 1,085) Total number of matriculants since foundation, approximately 12,000

Degrees. Conferred year ending August 12, 1935, A B, 111, B S in Biology, 12, Commerce and Finance, 27, Education, 18, Engineering, 14, M A, 31, M S, 8, professional, 3 Total number of degrees conferred since foundation, 5,403

Fees: Tuition, \$10 per semester hour, totaling \$300 to \$340 annually, board, \$200 to \$250, room, \$120 to \$250, student budget, \$25, infirmary fee, \$14 No laboratory fees in courses leading to science degrees Annual expense Men, average, \$775, women, \$825

Scholarships: 15 fellowships varying in

amount from \$300 to \$500, 200 scholarships of \$100 and \$150 value Loan funds

College opens middle of September and closes second week in June Second semester begins February first

Summer school Last week of June to early August Enrollment (1935), 427

University extension Saturday and extension courses

Catalog published in January

Architectural plans have been made and model constructed for building program to be completed for Centennial year, 1946 Sponsored Pennsylvania Folk Festival for 1936

Administrative Officers: *Acting President*, Arnaud C Marts, *Dean*, Romeyn H Rivenburg, *Dean of Women*, Amelia E Clark, *Registrar*, H Walter Holter

BUFFALO, UNIVERSITY OF

BUFFALO, NEW YORK

University, coeducational, non-sectarian, privately controlled

Chartered in 1846 School of Medicine constituted the University from 1846 to 1886

Council (board of trustees) consists of 36 elected and 7 ex-officio members 12 members elected by the alumni and 24 by the council, all for terms of 4 years The ex-officio members are the 7 deans of divisions and the Mayor of Buffalo The University consists of the College of Arts and Sciences (1913), the School of Medicine (1846), School of Pharmacy (1886), School of Law (1891), School of Dentistry (1892), the Summer Session (1915), the Evening Session (1923), the School of Business Administration (1927), the School of Education (1931), the Library Science Course and the School of Social Work (1935).

Finances. Endowment (June 30, 1934), \$5,415,483 54, income from endowment \$162,762 92, income from student fees, \$734,616 70, income from all sources, \$917,796 49 Estimated amount of budget, 1935-36, \$1,094,733 56.

Grounds and Buildings: Total value of buildings, \$3,072,460 43, total value of land, \$1,749,087 50 Total plant assets, \$5,902,266 60 Present worth of building of the School of Medicine, \$337,647 39, School of Dentistry, \$157,620 61, School of Pharmacy, \$744,909 67, School of Law, \$36,416, Edmund Hayes Hall, \$613,058 63, Foster Hall, \$744,909 67, Crosby Hall, \$426,826 05, Science Hall, \$175,648 79, Biology, \$41,982 56, Norton Hall, \$210,959 66, Townsend Hall, \$94,642 34, Lockwood Library, \$400,000 Value of scientific equipment, \$207,829 06

Library (1935) 75,757 volumes, 499 current periodicals In addition, the Lockwood collection of rare books (2,500 volumes) mainly in English literature Special collections (books and manuscripts) of American authors, Robert Louis Stevenson, and private press printing Library of the School of Medicine 24,744 volumes, 54,000 pamphlets, 211 current periodicals, Dental School 1,157 volumes, 9 current periodicals, School of Law 8,399 volumes, 11 periodicals Law Library of the 8th Judicial District 70,000 volumes, 28 periodicals (available to students of the Law School) The Grosvenor Library (293,000 volumes) by a working arrangement, purchases and reserves books for University of Buffalo classes Buffalo Public Library (635,107 volumes) issues cards to students Buffalo Historical Society 50,000 volumes

Museums Museum in School of Medicine contains a large number of normal and pathological specimens Museum in School of Dentistry contains Bodecker Museum of Comparative Anatomy In Foster Hall, a special collection for students of Industrial Chemistry

Requirements. For Admission Admission by graduation certificate from accredited secondary school or by Regents examination, 15 units including English, 3, Algebra, 1, Plane Geometry, 1, Foreign Language, 3-4, and 1 of the following History, 1, Physics or Chemistry, 1 Students who show special ability in intelligence tests and in accomplishments in high school, having more than the usual 15 units

of entrance credits, may take special examinations in chosen subjects, and if successful, may receive full college credit One condition allowed if mark in intelligence test is above average and if statement from school principal fully explains lack of preparation All conditions must be removed before beginning of sophomore year

School of Medicine Completion of a 2-years' curriculum in a college of liberal arts including subjects prescribed by American Medical Association School of Dentistry Completion of a 2-years' curriculum in a college of liberal arts School of Law 2 years of Pre-Legal work in a college of liberal arts School of Pharmacy Regents diploma from a secondary school or its equivalent Library Science 3½ years in a college of liberal arts School of Social Work 3 years' credit from an accredited college, normal school, or school of nursing

For Degree For the B A degree, equivalent of 128 semester hours and as many quality points Proficiency in English, to be demonstrated by examination, is required, all other courses elective To be admitted to the senior college a student must ordinarily have completed two full college years with creditable standing All students entering the senior college are given tutorial instruction with little emphasis upon class attendance Results are tested at the end of the senior year by comprehensive examinations, both oral and written In addition a thesis, demonstrating ability to do independent investigation, may be required by some departments The M A or M S degree is awarded on completion of a year's work, as a minimum, and a thesis acceptable to the Committee on Graduate Study and Degrees

M D is awarded for completion of a 4-years' curriculum in Medicine, D D S is awarded for the completion of a 12-quarter curriculum, the first 6 quarters of which are nearly identical with the medical curriculum for those quarters LL B degree requires completion of regular 3-years' curriculum in Law Ph G requires completion of 3-years' course in Pharmacy Those students entering after September 1936 will be required

to complete a 4-years' course leading to the degree of B S in Pharmacy Diploma in Business Administration may be obtained in the Evening Session by students who secure 48 semester hours of credit chiefly in business subjects B S in the field of Business Administration requires 128 semester hours of credit Certificate in Library Science is awarded to those who complete 1 year (34 to 42 semester hours) of bibliography courses, either coincidentally or after the attainment of the B A A certificate in Social Work is awarded upon the completion of a year of study in addition to that required for the bachelor's degree, about half of the student's time being spent in the practice of social work

General Students must live in houses approved by the University

Enrollment: 4,123 College of Arts and Sciences Men, 426, women, 355 School of Business Administration Men, 166, women, 43 School of Dentistry Men, 133, women, 0 School of Medicine Men, 266, women,

15 School of Pharmacy Men, 82, women, 12 School of Law Men, 193, women, 9 School of Education Men, 16, women, 33 Summer Session 1934 Men, 275, women, 249 Postgraduates Men, 42, women, 1 Evening Session Men, 1,086, women, 1,285

Degrees Conferred year ending June 30, 1935, M D , 66, Ph G , 21, LL B , 59, D D S , 35, Certificate in Public School Music, 5, Diploma in Business Administration, 7, B S in Business Administration, 29, B S in Pharmacy, 2, Certificate in Library Science, 15, B S in Education, 31, Certificate in Social Work, 7, Certificate in Engineering, 1, B A , 75, B S in Nursing, 7, M A , 6, Ed M , 21, M B A , 1, Ph D , 4 Degrees conferred since foundation, 11,650.

Fees: Matriculation fee, \$5, graduation, \$10, student activities, \$12, laboratory fees and deposits, \$5 to \$15 Tuition College of Arts and Sciences, \$375, School of Medicine, \$500, School of Dentistry, \$133 33 per quarter, School of Law, \$250, School of Business Administration, \$375, School of Pharmacy, \$300, Evening Session, \$10 per semester hour, Summer Session, \$10 per semester hour Expenses for room and board run from \$9 to \$12 a week

Scholarships Scholarship assistance offered to 112 men and 85 women to the extent of \$25,497 25 Loans offered to 51 men and 18 women to the extent of \$7,438

Bureau of personnel research investigates internal educational problems and functions as a placement bureau Approximately 50% of the students enrolled in 1934 35 were partially self-supporting

Dates of beginning and ending of sessions September 24, 1934, Commencement, June 12, 1935

Summer session July 2 to August 10, 1935 21 departments offered 164 courses in 1935 Allegany School of Natural History (affiliated with the University of Buffalo) 5 departments offered 12 courses in 1935

Evening session Faculty of 124 offers 268 courses in 29 departments in Arts and Sciences, Business Administration, and Education

Publications University of Buffalo Bulletin includes annual catalog, and Chancellor's Report The University of Buffalo Studies present results of investigations made by members of faculty and by graduate students

Recent achievements Erection of Norton Hall, recreational center for students, approximate cost, \$250,000 Erection of Thomas B Lockwood Memorial Library, approximate cost, \$400,000 School of Social Work established 1935 College of Arts and Sciences divided into junior and senior college with simultaneous abolition of all requirements except a proficiency in English, all students in the senior college to pursue work under tutorial guidance

General Education Board awarded the University of Buffalo \$60,000 for a project in which the University and the secondary school systems of Buffalo cooperate A special study will be made of superior students with the hope that their educational progress may be facilitated, a reduction of overlapping in courses, an understanding of their vocational interests and proclivities with appropriate guidance, and by a segregation of such students when practically advisable and possible

Administrative Officers: *Chancellor*, Samuel P Capen, *Dean of Women*, Lillias M Macdonald, *Registrar*, Emma E Deters, *Dean*, School of Medicine, Edward W. Koch, *Dean*, School of Dentistry, vacant, *Dean*, School of Law, Carlos C Alden, *Dean*, School of Pharmacy, Willis G Gregory, *Dean*, College of Arts and Sciences, Julian Park, *Acting Dean*, Evening Session, Lewis A Froman, *Dean*, School of Business Administration, Ralph C Epstein, *Dean*, School of Education, L O Cummings, *Director*, School of Social Work, Niles Carpenter, *Director*, Library Science Course, Augustus H Shearer

BUTLER UNIVERSITY

INDIANAPOLIS, INDIANA

Coeducational, privately controlled university comprising College of Liberal Arts

and Sciences, College of Education, College of Religion, Graduate Division, and affiliated institutions

Chartered by Indiana Legislature in 1849 as North Western Christian University, a joint stock company Opened in 1855 in Indianapolis Moved to Irvington in 1875 Moved to Fairview Park, Indianapolis, in 1928 In 1877 name changed to Butler University in honor of Ovid Butler, a benefactor In 1909 the stockholders created a self-perpetuating board of 21 trustees This board controls, directs, and manages the institution College of Religion established in 1924 College of Education established in 1930

Finances. Endowment, \$1,634,291, income from endowment, \$80,400, income from other sources, \$319,115 Total annual expenditures year ending June 30, 1935, \$388,739 Budget, 1935-36, \$370,889

Grounds and Buildings: Total value of grounds, \$490,000 Total present worth of buildings, \$1,643,460 Total value of grounds, buildings, and equipment, \$2,364,015

Library 73,500 volumes, including 6,000 government documents, 563 periodicals, W F Charters South Sea Island Library

Requirements For Admission 15 units, including English, 3, Mathematics, 2, Foreign Language, 2, History, 1, Science, 1

For Degree 124 hours, including 4 in Physical Training 124 credit points Prescribed courses English, 10 hours, Foreign Language, 25, Mathematics or Science, 10, Social Science, 16, major subject, 30

CALIFORNIA INSTITUTE OF TECHNOLOGY

PASADENA, CALIFORNIA

The campus of the Institute is located in the southeastern part of Pasadena For work in Plant Genetics there is a farm, with greenhouses, located at Arcadia, about 5 miles from the main campus There is also a marine station at Corona del Mar, 60 miles from Pasadena The Seismological Research Laboratory (operated in cooperation with the Carnegie Institution of Washington) is located about 4 miles west of the Institute A site on Palomar Mountain (95 miles from Pasadena) has recently been acquired for the site of the observatory for the 200-inch telescope The Institute is closely associated with the Mount Wilson Observatory of the Carnegie Institution and the Henry E Huntington Library and Art Gallery

Privately endowed college, graduate school, and institute of research in science, engineering, and the humanities, non-sectarian

The predecessor of the California Institute of Technology, Throop Polytechnic Institute, founded in 1891 by Amos G Throop, was chiefly a preparatory school In 1910 the Institute was moved to the present campus and reorganized into a strictly scientific and engineering college The following year it discontinued its academy, and in 1920 the name was changed to the California Institute of Technology

Self-perpetuating board of trustees made up of 19 members, elected for a period of 5 years The Institute operates under an executive council of 8 members, 4 members from the board of trustees, or officers of the Institute, and 4 from the faculty The Institute is divided into the following divisions, each headed by a chairman Physics, Mathematics, and Electrical Engineering, Chemistry and Chemical Engineering, Civil and Mechanical Engineering, The Geological Sciences, Biology, Astrophysics, Humanities, Physical Education

Finances: The Institute has an endowment of approximately \$8,000,000, income from tuition and fees, \$221,390 Annual budget approximately \$735,000 Income for special projects, \$300,000 Total budget for 1935-36 is \$731,000, not including special funds

Grounds and Buildings Main campus is composed of 32 acres, the farm operated by the Division of Biology is composed of 10 acres, the marine station contains about 2 acres, the Seismological Laboratory grounds contain about 5 acres, and the observatory site at Palomar Mountain is 640 acres in extent The total value of buildings and grounds is approximately \$4,459,700 4 student houses on the campus accommodate 295 men, the "Old Dorm" provides living quarters for 33 men, the Athenaeum, also on the campus, accommodates 46 persons from the staff of the Institute, the Huntington Library, and the Mount Wilson Observatory

Library Main library temporarily housed

in the Norman Bridge Laboratory of Physics Division libraries in the Gates Chemical Laboratory, the Kerckhoff Biological Laboratories, the Dabney Hall of the Humanities, the Division of the Geological Sciences, and the Guggenheim Aeronautics Laboratory. Number of volumes, 40,630, number of periodicals currently received, 395, number of newspapers, 6.

Laboratories Throop Hall (1910), *value of building*, \$205,000, *value of equipment*, \$95,000. Gates Chemical Laboratory (2 units) (1918 and 1927), \$175,000, \$98,800. Norman Bridge Laboratory of Physics (3 units) (1922, 1924 and 1925), \$370,000, \$152,150. High Potential Research Laboratory (1923), \$67,000, \$50,000. Engineering Research Laboratory and Heating Plant (1926), \$56,000, \$94,000. Marine Biological Station at Corona del Mar (1927), \$40,000, \$3,000. Daniel Guggenheim Aeronautical Laboratory (1928), \$142,000, \$91,000. Seismological Research Laboratory (1928), \$46,000, \$15,000. William G. Kerckhoff Laboratories of the Biological Sciences (1929), \$183,000, \$70,000. Astrophysics Instrument Shop (1930), \$104,000, \$100,300. Plant Physiology Laboratory (1930), \$8,000, \$3,200. W. K. Kellogg Radiation Laboratory (1931), \$76,000, \$4,460. Astrophysics Laboratory (1932), \$222,000, \$56,500. Astrophysics Optical Shop (1933), \$186,000, \$107,450. Miscellaneous group of temporary buildings used for specific experimental purposes, \$21,000, \$24,940.

Museums Geological and paleontological collection, as well as a large collection of vertebrate and zoological specimens.

Observatory The General Education Board has provided for the construction by the Institute of an Astrophysical Observatory. The Observatory will consist of 2 main features. One of these is the 200-inch telescope, with its building, dome, and auxiliary equipment, to be erected on Palomar Mountain. The other is the Astrophysical Laboratory located on the Institute campus, which will serve as the headquarters in Pasadena of the Observatory staff and of the Graduate School of Astrophysics. Its equipment will include instruments and

apparatus for the measurement of photographs, the reduction and discussion of observations, and for such astrophysical investigations as can be made there to the best advantage. Its instruments for the interpretation of astrophysical phenomena will be designed to supplement those of the laboratories of the Institute and the Pasadena laboratory of the Mount Wilson Observatory. Well equipped shops for the development of new instruments have been erected on the campus, and the Astrophysical Laboratory has been completed, though some of its chief instruments are still in process of construction.

Requirements. For Admission. Each applicant must be thoroughly prepared in at least 15 units of preparatory work, each unit representing 1 year's work in a given subject in an approved high school. The required subjects are English, 3 units, Mathematics, 4, Physics, 1, Chemistry, 1, U. S. History and Government, 1. The other 5 subjects may be selected from Foreign Languages, Shop, additional English, Mathematics, Laboratory Science, History, Drawing, or commercial subjects.

For Degree. For graduation (with the B. S. degree) a student must complete the prescribed work of some option of the course in Engineering or of the course in Science, with an average grade of at least 1.9. 640 units are required. A student will be graduated with honor who has received on the average throughout his course 145 credits per term, 130 of which result from grades 3 and 4 in subjects other than Physical Education and Assembly, provided also that he maintains such an average through the 3 terms of the senior year.

To receive the degree of M. S., the student must complete in a satisfactory way the work indicated in the schedule of 1 of the fifth-year courses (approximately 135 units) as well as in the schedule of the 4-year course in Science or in Engineering, (270 units required for M. S. degree in Aeronautics) except that in the case of students transferring from other institutions, equivalents will be accepted in subjects in which the student shows by examination or

otherwise that he is proficient, and except in so far as substitutions may be approved by special vote of the committee in charge. Theses are required in the Division of the Geological Sciences.

The degree of Ph D is conferred by the Institute in recognition of breadth of scientific attainment and of power to investigate scientific problems independently and efficiently, rather than for the completion of definite courses of study through a stated term of residence. However, the completion of approximately 405 units is required. Oral examinations are required, as well as the completion of a satisfactory thesis. (The number of units assigned in any term to any subject is the total number of hours per week devoted to that subject, including class work, laboratory work, and the estimated time for outside preparation.)

General. All students during all 4 undergraduate years are required to participate either in the intramural or intercollegiate sports on which the Physical Education program is based. Attendance at the one-hour weekly assembly is required.

Departments and Staff. Division of Physics, Mathematics, and Electrical Engineering: *Professors*, 10, *associate professors*, 9, *assistant professors*, 5, *instructors*, 1, *research associates*, 3, *research fellows (instructor rank)*, 12. Division of Chemistry and Chemical Engineering: 6, 2, 4, 0, 1, 13. Division of Civil and Mechanical Engineering: 7, 3, 3, 5, 1, 4. Division of Geology and Paleontology: 4, 1, 0, 1, 3, 4, 5. *curators*. Division of Biology: 2, 1, 8, 2, 4, 0. Division of the Humanities: 5, 2, 5, 1, 3, 0. Division of Physical Education: Physical director, 1, assistant physical director, 1.

Enrollment. For year ending June 30, 1935, 788. Graduate students, 214, Physics, 53, Chemistry, 24, Chemical Engineering, 3, Mathematics, 10, Geology, 19, Biology, 11, Astrophysics, 1, Meteorology, 12, Electrical Engineering, 28, Mechanical Engineering, 8, Civil Engineering, 15, Aeronautical Engineering, 29, special graduate student, 1, undergraduate students, 574. Physics, 48, Chemistry, 45, Applied Chemistry, 51, Mathematics, 3, Geology, 16,

Biology, 16, Electrical Engineering, 54, Civil Engineering, 32, Mechanical Engineering, 44, Aeronautical Engineering, 20, Engineering (unclassified), 75, irregular, 1, freshmen (not designated), 162, unclassified, 7. Total number of matriculants since reorganization, 3,451, transfers, 1923-35, 341, freshmen, 1910-35, 3,110.

Degrees: Conferred year ending June 30, 1935, 207. Ph D, 30, M S, 65, B S, 112. Total number of degrees conferred since reorganization, 2,006. B S, 1,392, M S, 373, Ph D, 241.

Fees. Tuition, per year, \$300, associated student body fee, \$14 per year. Emergency hospitalization fee, \$3 per year. The cost of books and supplies for the first year is about \$65. In the upper classes the cost is generally less than this, but varies in different courses. Room and meals at student houses, \$382.50 per year, plus \$3 for telephone service, \$6.50 for laundry, \$6 for house dues, \$10 deposit to cover breakage and loss.

Scholarships. Graduate fellowships and scholarships in 1935, 117, paying from \$300 to \$950, undergraduate scholarships, 1935, 38, paying tuition and half tuition.

Research. Grants and research funds received in 1934-35 for various specific research projects, \$77,642.99. American Petroleum Institute, \$4,142.99, Earhart Foundation Fund, \$6,000, Dr. Frederick Frei, \$2,400; W. E. Hale Fund—Chemistry, \$1,000, Los Angeles County Flood Control District Ballona Creek Model, \$2,500, Flood Wave Experiment, \$2,500, X-Ray Research, \$12,500, Rockefeller Foundation Biological Research, \$30,000, Chemical Research, \$10,000, Meteorological Research, \$5,000, Watters' Fund for X-Ray Research Equipment, \$1,600.

Employment bureau. Under joint management of officers of the Institute and of the alumni. Percentage of students who earned all or part of expenses during 1934-35, about 40% during college year, 75%, if summer is included.

Dates of beginning and ending sessions. First term, September 23, December 14, 1935. Second term, January 2, March 21. Third term, March 30, June 13, 1936.

Publications The Bulletin, including the Catalog, is published 4 times each year. The student body publishes a weekly paper called California Tech, and the annual, The Big T. The results of the researches of the staff are published in the various scientific journals, from October 1, 1934 to August 31, 1935 (11 months), 241 papers, 3 books

Administrative Officers: *Chairman of the Executive Council*, Robert A. Millikan, *Comptroller*, Edward C. Barrett, *Dean*, Upper Classmen, Frederic W. Hinrichs, Jr., *Dean*, Freshmen, John R. Macarthur, *Registrar*, Philip S. Fogg, *Assistant Registrar*, William N. Birchby

CALIFORNIA STATE COLLEGE

FRESNO, CALIFORNIA

Teacher training institution, coeducational, supported by state

Established in 1910 as first junior college in California and combined in 1911 with the newly-established state normal school. Privileged to grant A.B. degree in 1921 at which time the state normal schools were discontinued

Organization 13 members on board of trustees recommended by president and approved by state superintendent of public instruction

Finances: Total annual expenditures for year ending June 30, 1935, \$362,811.32. Total budget for 1935-36, \$371,565

Grounds and Buildings. 46 acres valued at \$165,419.40, present worth of buildings, \$961,739.26

Library (1933) 33,882 volumes, 370 current periodicals

Laboratories Science Hall (1929) houses Biology, Agriculture, Physics, and Chemistry laboratories and museum

Museums Special collections important for research. Construction of a series of habitat studies of cross-section of Central California through the Fresno area. Federal project. Local exhibits of birds, mammals, rocks and minerals, insects, and Indian relics

Observatory Housed on roof of main building. Tinsley telescope

Requirements: For Admission. High school graduation with 10 units of recommending grade provides clear admission. Persons over 21 years of age may enroll as special students and matriculation deficiencies are established and made up under the direction of the Committee on Admissions

For Degree. Minimum of 24 semester units earned in residence with a total of 124 required for graduation. C average required. Physical Education and certain subject and group requirements to be completed for upper division standing and a maximum of 40 semester hours allowed in any 1 field

General. 4 semesters of Physical Education, annual medical examination, college aptitude test, Subject A test

Departments and Staff. Agriculture and Biology. *Professors*, 1, *associate professors*, 3, *assistant professors*, 4, *instructors*, 0. Art 1, 0, 3, 0. Commerce 0, 2, 1, 1. Education (including Philosophy and Psychology) 2, 4, 5, 0. English 1, 1, 3, 7. Foreign Language 1, 0, 2, 1. Geography and Geology 1, 1, 1, 0. Home Making 0, 1, 0, 2. Industrial Education 0, 1, 2, 1. Mathematics and Engineering 1, 1, 1, 0. Music 0, 1, 2, 5. Physical Education for Men 1, 2, 1, 1. Physical Education for Women 1, 0, 1, 2. Physical Science 1, 1, 4, 0. Social Science 2, 3, 2, 0

Enrollment: For year ending June 1935, 1,945 Men, 956, women, 989. (Includes the following part-time students: Men, 151, women, 414.) Total number of matriculants including those of present semester, 14,500

Degrees: Conferred year ending June 30, 1935, 206. Total degrees granted, 1,379

Fees: Tuition and student activities, \$13.25 per semester, diploma, \$2.25, materials fees average about \$8 per semester. Annual expenses: High, \$500, low, \$350

During year ending June 30, 1935, 60% of men and 29% of women earned all or part of expenses

Dates of beginning and ending sessions. September 15, 1934, June 14, 1935

Summer session June 22 to August 9, 1935 Enrollment, 220.

Circular of Information published in March of each year.

Administrative Officers: *President*, F W Thomas, *Dean*, Upper Division, A R Lang, *Dean*, Lower Division, Hubert Phillips, *Dean of Women*, Mary C Baker, *Dean of Men*, Mitchell P Briggs Officer in charge of foreign students, Hubert Phillips, *Dean*, Lower Division

CALIFORNIA STATE COLLEGE

SAN DIEGO, CALIFORNIA

Liberal arts college with emphasis on teacher training, coeducational, supported by state

Established by legislative enactment in 1898 as a state normal school Transformed into a state teachers college by legislative enactment in 1921 Degree-granting privilege given in 1923

Controlled by state superintendent of public education (ex-officio director of education) and the state board of education made up of 10 members appointed by the governor

Finances: Total annual expenditures year ending June 30, 1935, \$272,658 Budget, 1935-36, \$301,797

Grounds and Buildings 125 acres valued at \$100,000, present worth of buildings, \$979,435

Library 46,637 volumes, 314 current periodicals

Laboratories Science Hall (1930) houses Astronomy, Biology, Geography, Geology, Physics, and Chemistry laboratories

Requirements: For Admission Regular freshman standing Graduates of 4-year senior high schools who present 10 recommended units and principal's certificates of recommendation Graduates of 3-year senior high schools must present 8 recommended units earned in grades 10, 11, and 12

For Degree 1 year of senior residence (24 units) 124 semester hours Average of C. Major and minor subjects. Prescribed

courses English, Education, Social Science, Natural Science, Health Education, Psychology

General 2 years of Physical Education

Departments and Staff: Anthropology *Professors*, 0, *associate professors*, 0, *assistant professors*, 0, *instructors*, 1 Art 1, 1, 1, 2 Astronomy 1, 0, 0, 0 Biology 1, 1, 1, 1 Chemistry 0, 1, 0, 1. CALIFORNIA STATE COLLEGE

SAN FRANCISCO, CALIFORNIA

State college, teacher training and liberal arts, supported by the state, coeducational

Established by an act of the legislature in 1899 as the San Francisco State Normal School In 1921 by legislative action the normal schools of California were organized as state teachers colleges In 1923, the college was organized to grant the A B degree In 1935 the legislature changed the teachers colleges into state colleges

The state director of education administers the state colleges in conformity with state law and with rules and regulations laid down by the state board of education

Finances: Total annual expenditures for year ending June 30, 1935, \$355,978 76 (includes \$77,200 for major construction) Budget, 1935-36, \$341,695 85

Grounds and Buildings. Area, 6 acres Total value of grounds, \$371,227 15, and valuation of buildings, \$689,843 10

Library Present rooms adapted for library use in 1929 38,000 volumes (including 1,000 documents and 2,000 bound periodicals) and 5,000 volumes, juvenile 207 current periodicals for adults, 10 for children

Laboratories Laboratories for Natural Science are housed in Anderson Hall (1928) and Annex A (1935) Laboratory for Home Economics is housed in Frederic Burk School (1930)

Requirements: For Admission Regular freshman standing Graduates of 4-year senior high schools who present 10 recommended units and principal's certificate of recommendation Graduates of 3-year senior high schools must present 8 recommended units earned in grades 10, 11, and 12

For Degree A minimum of 124 units in college courses, of an average of C grade or better, must be offered for the B A degree Each candidate for a degree must complete 1 major and 2 minors or 2 majors and 1 minor Major, 24 units in a special field, a minor, 12 units in a special field. A single teaching credential may be taken with the degree, without exceeding 124 units, but

each additional credential will require a minimum of 12 additional units No student shall graduate from this college on less than 24 semester hours of work done in residence 10 of the final 16 units offered in completion of requirements for the A B degree must be taken in enrollment at this institution Prescribed courses English, Natural Science, Physical Education, Social Science, Psychology All candidates for teaching credentials are required to take other prescribed courses such as Education, Art, Music, Hygiene

General Enrollment in 1 Physical Education activity required each semester of the freshman and sophomore years A thorough health examination is required of each student at time of admission and graduation An additional health examination is required of each candidate for professional training at time of making application at close of sophomore year All students living away from home must have boarding places approved by the Dean of Men or Dean of Women

Departments and Staff. Art *Professors*, 0, *associate professors*, 1, *assistant professors*, 2, *instructors*, 1, *assistants*, 0 Education 4, 1, 9, 0, 2 English 1, 2, 5, 1, 0 Home Economics 0, 1, 0, 0, 0 Manual Arts 0, 0, 1, 0, 0 Mathematics 0, 2, 0, 0, 0 Music 0, 1, 4, 1, 2 Natural Science 3, 2, 2, 2, 1 Physical Education 0, 1, 5, 2, 1 Philosophy-Psychology 0, 1, 1, 0, 0 Romance Language 0, 0, 2, 0, 0 Social Science 3, 3, 1, 0

Enrollment For year ending June 30, 1935, 1,885 Men, 532, women, 1,353 Total number of matriculants since foundation, 10,744

Degrees. Conferred year ending June 30, 1935, 339 Total number conferred since 1924, 1,536 Diplomas on 2-, 2½-, 3- or 3½-years' work from 1901 to 1931, 4,703

Fees: Regular students per semester State fees, \$6 50, library, \$1, student body, \$4 Limited students per semester, \$2 50 per unit (those carrying less than 6 units) Extension students, \$5 per unit Materials and service fees \$ 50 to \$10 per course Graduation fees Diploma, \$2 15, credential, \$3,

placement service fee, \$3 Board and room Approximately \$30 to \$40 per month Books and supplies, \$20 to \$25

During the year ending June 30, 1935, 25% of the women students and 75% of the men students earned all or part of expenses

Dates of beginning and ending sessions September 13, 1935 to January 24, 1936, January 27 to May 29, 1936

Summer session June 24 to August 2, 1935 Enrollment, 1,086

Extension classes enrollment Fall 1934, 75, spring 1935, 173

College catalog published in May Summer session catalog published in April

Achievements Completion of Music, Speech, and Manual Arts Center in Annex buildings, beginning construction of Physics and Chemistry addition to Science Hall, adult education program through afternoon, evening, and Saturday classes and extension classes, Social Science Symposium, special summer school curricula, increased financial support in budget for 1935-37, change of name to State College with limited liberal arts curricula in fields of training suitable for teacher training, revision of counseling, expansion of curricula offerings, particularly in Health, Hygiene and Physical Education, Modern Languages, Philosophy, Debating, revision of internal administrative machinery, housing correspondence courses for men in C C C transient camps with enrollment of 30,000 in 11 correspondence courses, nursery school and center for training nursery school teachers

Administrative Officers: *President*, Alexander C Roberts, *Vice-President and Dean of the College*, Clarence J DuFour, *Dean*, Upper Division, P F Valentine, *Dean*, Lower Division, John H Butler, *Dean of Women* and *Director*, Summer Session, Mary A Ward, *Dean of Men*, D J Cox, *Director*, Practice Teaching, Sherman L Brown, *Director*, Extension Division, Alexander S Boulware, *Principal*, Training School, Grace Carter, *Registrar*, Florence Vance, *Assistant Registrar*, Emily C Ray, *Financial Secretary*, Leo C Nee, *Assistant Financial Secretary*, Marie Davitt, *Place-*

ment Secretary, Pearl Neilson, *Librarian*, Ruth Fleming

CALIFORNIA STATE COLLEGE

SANTA BARBARA, CALIFORNIA

Teacher training and liberal arts institution, coeducational, supported by state

Founded in 1909 as Santa Barbara State Normal School of Manual Arts and Home Economics General professional course added in 1919 and name changed to Santa Barbara State Normal School In 1921, by legislative enactment, privilege of granting A B degree was secured and name changed to State Teachers College of Santa Barbara Scope of work liberalized in 1935 and name changed to Santa Barbara State College

Controlled by state superintendent of public education and state department of education

Finances Financed by legislative appropriation Total annual expenditures year ending June 30, 1935, \$259,959 04 Budget for 1935-36, \$204,412

Grounds and Buildings. 30 acres (present site), valued at \$150,000, present worth of buildings, \$700,000 46 acres (new site), valued at \$200,000

Library 30,000 volumes, 166 current periodicals

Laboratories For Physiology, Bacteriology, Botany, Zoology, Biology, Chemistry, Physics, and Home Economics Industrial Education shops

Requirements. For Admission High school graduation with 10 recommended units from a 4-year high school or 8 recommended units from a 3-year high school High school graduate with fewer than prescribed number of recommended units admitted as provisional student Must remove scholarship deficiencies within one year Teachers holding valid credentials to teach in the state may be admitted for further work May become candidates for degrees only when entrance deficiencies have been duly satisfied Persons over 21 years

of age may be admitted as special students upon presentation of satisfactory evidence of character, education, and general intelligence. May become candidate for degree when deficiencies have been duly removed

For Degree 124 semester hours, at least 30 of which must be in residence Major and minor courses Average of C must be maintained. Required courses Social Science, Natural Science, English, Psychology, Physical Education, for those seeking teaching credentials, not less than 6 and not more than 40 units in Education and a minimum of 4 units of directed teaching

Departments and Staff: Art. *Professors*, 0, *associate professors*, 2, *assistant professors*, 0, *instructors*, 3 Education 2, 1, 3, 3 English 2, 0, 0, 2. Foreign Language 0, 1, 0, 1 Home Economics 1, 1, 2, 1 Industrial Education 1, 0, 3, 4 Mathematics 0, 0, 1, 0. Music 0, 1, 0, 2 Physical Education 0, 2, 2, 1. Science 1, 0, 3, 2 Social Science 2, 1, 1, 0.

Enrollment: For year ending June 30, 1935, 849 Men, 365, women, 484.

Degrees: Granted year ending June 30, 1935, 178 bachelors.

Fees: State registration, \$6 50 per semester, student body, \$10 per semester, library, \$3 per semester, laboratory, \$1 per unit, nonresident fee, \$75 first semester, \$37 50 each succeeding semester

Scholarships: 12 freshman scholarships, \$50 per year, offered by alumni associations, service clubs, and faculty association

Approximately 11% of student body employed under N Y A Considerable other employment in homes, stores, and offices, handled through offices of deans

Dates of beginning and ending sessions September 17, 1934, June 14, 1935

Summer session June 24 to August 2, 1935. Enrollment, 325

Annual catalog in March or April

Administrative Officers: *President*, Clarence L Phelps, *Dean of Men*, William Ashworth, *Dean of Women*, Lois M Benink, *Registrar*, Jane C Abraham

CALIFORNIA, UNIVERSITY OF BERKELEY, CALIFORNIA

State university, coeducational

Founded in 1868, by act of legislature, as an outgrowth of the College of California which was incorporated in 1855

The governing board consists of 24 regents, 8 of whom are ex-officio members and 16 are appointed by the governor for terms of 16 years, so arranged that the terms of 2 appointees expire every 2 years

The schools, colleges, divisions, and other units of instruction and research in the 8 major locations are as follows

At Berkeley Graduate Division, College of Letters and Science, College of Agriculture, College of Chemistry, College of Commerce, College of Engineering (Civil, Electrical, and Mechanical), College of Mining, School of Architecture, School of Education, School of Jurisprudence, first year of Medical School, first 2 years of the College of Pharmacy, various curricula in other fields such as Public Health, Nursing Education, Social Service, and Optometry, Agricultural Experiment Station, Agricultural Extension Service (state-wide), Giannini Foundation of Agricultural Economics, Bureau of International Relations, Bureau of Public Administration, Institute of Child Welfare, Institute of Experimental Biology, Institute of Social Sciences, University Extension Division, California Museum of Vertebrate Zoology, the Anthropological Museum and Museum of Palaeontology, Summer Session

At Los Angeles Graduate Study, College of Letters and Science, Teachers College, Branch of the College of Agriculture, various curricula for the first 2 or 3 years of the schools and colleges in Berkeley and San Francisco, Los Angeles Medical Department (graduate), Branch of University Extension Division, and the Senator William Clark Memorial Library, Summer Session

At San Francisco Medical School, College of Dentistry, College of Pharmacy, School of Nursing, University Hospital, George Williams Hooper Foundation for Medical Research, Branch of University

Extension Division, Wilmerding School of Industrial Arts, Hastings College of Law and California School of Fine Arts both of which have academic affiliation only

At Davis Branch of the College of Agriculture, University Farm, non-degree courses (2 years) in Agriculture and related subjects, Branch of the Agricultural Experiment Station

At Riverside Graduate School of Tropical Agriculture, Citrus Experiment Station

At Mount Hamilton The Lick Observatory

At La Jolla The Scripps Institution of Oceanography

At Pomona The W K Kellogg Institute of Animal Husbandry

Finances: Total of endowment and trust funds, \$20,585,105 38, including approximately \$2,400,000 of unproductive funds. Income from endowment investments, \$750,172 50, including \$102,265 14 added to funds and reserves. Total income for 1934-35 was \$13,061,447 97, including \$409,612 33 from U. S., \$6,588,142 68 from State of California, \$1,572,608 99 from gifts (\$355,348 69 for current use, \$129,113 77 for land, buildings, etc., and \$1,088,146 54 for endowments and loan funds), \$1,725,972 10 from students' fees, \$537,706 34 from hospitals and infirmaries, and \$1,477,233 03 from departmental sales and miscellaneous, including \$218,695 90 for E. R. A. projects, \$250,000 from sale of property and \$437,371 98 for student activities at Los Angeles and Davis. Total expenditures for 1934-35 were \$12,736,018 76, including \$1,492,398 71 for additions to endowments, loan funds, and reserves, \$666,757 40 for land, buildings, and improvements, \$313,972 11 for student aid, \$413,233 28 for student activities at Los Angeles and Davis, and \$93,992 75 for other non-operating expenditures.

Grounds and Buildings: The acreage and book values (cost or equivalent) of campus lands and buildings on June 30, 1935, were as follows: Berkeley (592 acres), land, \$4,635,715 92, buildings and improvements, \$15,245,209 58. Los Angeles (372), \$2,886,999 99, \$7,474,815 31. San Francisco (22), \$435,399 88, \$2,227,787 89.

Davis (1,065), \$207,807 24, \$1,789,669 46. Riverside (766), \$210,037 29, \$653,466 45. Mount Hamilton (3,243), \$15,936 55; \$574,933 55. La Jolla (163), \$90,000, \$254,865 82. Pomona (692), \$82,136, \$35,960. Elsewhere (3,425), \$589,937 76, \$28,539 55.

Libraries The University Library at Berkeley (1918), 927,970 volumes. At Los Angeles (1929), 187,071 volumes. Other libraries, approximately 102,000 volumes. Senator William Andrews Clark Memorial Library in Los Angeles, 15,000 volumes of old and rare books.

Laboratories At Berkeley Agriculture, buildings, \$1,263,230 82, equipment, \$159,135 94. Chemistry, \$355,076 69, \$179,476 04. Engineering, \$1,434,329 39, \$260,787 90. Physics, \$469,272 92, \$207,815 89. Life Sciences, \$1,925,468 87, \$240,941 91. Geological Sciences, \$60,729 72, \$31,992 67. At Los Angeles Chemistry building, \$774,721 02, Physics-Biology building, \$763,042 40, Engineering building, \$69,482 60, laboratory equipment, \$269,229 59. At San Francisco Medical School building, \$698,274 51, Medical Research building, \$40,491 06, Dentistry and Pharmacy building, \$141,512 17, laboratory equipment, \$347,273 77. At Davis Agriculture buildings, \$1,397,893 92, equipment, \$155,101 22. At Riverside Agriculture buildings, \$434,825 11, equipment, \$73,468 07. At La Jolla Oceanography buildings, \$130,637 60, equipment, \$22,487 30.

Museums Anthropology, Ethnography and Archaeology of California and other American Indians, Oceania, Egyptian, Mediterranean, and Peruvian antiquities, Physical Anthropology.

Botany Herbarium collection of about 534,000 mounted specimens in Phaenogamic and Cryptogamic Botany, Flora of Western America better represented than in any other collection, West Coast Algae collection most complete in existence.

Geological Sciences Systematic rock, mineral, and ore collections, including several thousand thin sections, a considerable number of polished surface preparations, unconsolidated sediments and specimens.

illustrating various geological phenomena, a collection of models, mostly physiographic, some of which are colored to show areal geology, also models to illustrate geologic structure, many collections illustrating special localities and particular scientific publications

Palaeontology Extensive collections of North American invertebrates, vertebrates, and plants have been assembled. The principal groups represented are the marine and continental Triassic vertebrates, the Tertiary land vertebrates, the Tertiary and Recent Mollusca and the Tertiary plant record

The California Museum of Vertebrate Zoology Founded (1908) and endowed by Miss Annie M. Alexander, contains 160,000 specimens of the mammals, birds, reptiles, and amphibians of the Pacific Coast from Lower California to Alaska. These, with accompanying field notes, photographs, and maps, furnish basis for extensive systematic, faunistic, ecologic, and economic studies

Zoology Invertebrates and fishes representative of the marine fauna of the Pacific Coast from San Diego to Alaska. Extensive collections of plankton of the tropical Pacific Ocean, and from the coast of California. Collections of zoological, embryological, and histological material. Extensive collections of parasites and of the parasitic Protozoa of man

Observatories The Lick Observatory on Mount Hamilton was established through a gift of \$700,000 by James Lick in 1875. The main building contains offices, computing rooms, library, and the domes of the 36-inch and 12-inch equatorial telescopes. Total value (cost) of the scientific equipment and apparatus on June 30, 1935, \$274,146.60 representing the 36-inch and 12-inch equatorial refractors, 36-inch reflecting telescope, 6½-inch meridian circle instrument, 6½-inch comet seeker, 6-inch photographic telescope, 5-inch telescope with interchangeable photographic and visual objective, spectographs, seismographs, clocks, chronographs, photometers, and general plant equipment. In 1934 private funds provided for a powerful stellar camera or photo-

graphic refractor of 20-inch aperture. This telescope is in process of construction and when completed will give perfect star image as faint as 19.0 magnitude over a field about 140 times the area of the moon

Berkeley Astronomical Department (Students Observatory, Berkeley) The principal equipment of the Observatory consists of the following instruments: An 8-inch reflector, a 6-inch refractor and a 5-inch refractor, with position micrometers, a 6-inch photographic telescope and a 5-inch photographic telescope with a 3-inch guiding telescope, a Bamberg prismatic transit, three other transit instruments, a Littrow spectrograph, 4½-inch aperture, 30 feet focal length, and clocks, chronographs, spectroscopes, and other small equipment

Admission Requirements: *Undergraduate* Freshman Standing. On basis of certificate of graduation from an approved high school showing completion of at least 15 matriculation units, or on basis of College Entrance Board examinations covering required high school program. Matriculation units must include the following: History, 1 unit, English, 3, Mathematics (Elementary Algebra and Plane Geometry), 2, Laboratory Science, 1, Foreign Language, 2, and 1 or 2 units additional in advanced Mathematics (second-year Algebra, Solid Geometry, or Trigonometry), Physics, Chemistry, or Foreign Language. A scholarship average of B grade (based on a marking system of 4 passing grades: A, B, C, D) must have been maintained in such of these required subjects as may be taken in the last 3 years of high school. Semester grades, rather than year grades, are used in computing the scholarship average. Courses in which a grade D has been received will not be counted either in reckoning the average grade for admission or in satisfaction of the subject requirements. A semester grade A may be used to offset a semester grade C in any of the prescribed courses. However, for any required subject taken in the first year of high school, subject credit is given irrespective of the scholarship grade, providing it is a passing grade. Entrance deficiencies must be removed before registration

in a regular session will be permitted

Advanced Standing An applicant must present evidence that he has satisfied in full the subject and scholarship requirements prescribed for admission of high school graduates in freshman standing (described above), and that his advanced work has been completed with a thoroughly satisfactory scholarship record, as distinguished from one that is poor or barely passing. A certificate of honorable dismissal from the last institution attended must also be presented.

Admission from Schools and Colleges in Foreign Countries Credentials from schools and colleges in foreign countries are evaluated in accordance with the above regulations governing admission. An applicant whose education has been conducted in a language other than English must satisfy the University authorities, by means of an oral and written examination, that his command of English is sufficient to permit him to profit by instruction in this University. An applicant who fails to pass this examination will not be admitted to a degree curriculum until such time as he has acquired the necessary proficiency in the use of English.

Graduate At Berkeley, graduates of institutions constituting the Accepted List of the Association of American Universities may register as graduate students upon presentation of official credentials. Graduates of other institutions must present credentials for evaluation to determine whether they have satisfied the requirements for admission in graduate status. Graduates from universities or colleges in foreign countries must, in addition, pass an examination designed to test their proficiency in English. Advanced instruction is offered leading to the degrees of Master of Science, Master of Arts, Doctor of Education, Graduate in Architecture, Civil Engineer, Electrical Engineer, Mechanical Engineer, Metallurgical Engineer, Mining Engineer, Petroleum Engineer, Bachelor of Laws, Juris Scientiae Doctor, Doctor of Medicine, Doctor of Public Health, and Doctor of Philosophy.

At Los Angeles, graduate study leading to degrees of M A and M S is offered. Here

the number of applicants that can be admitted to graduate standing is limited, selection being based on previous scholarship record.

Degree Requirements: Bachelors' Degrees In all colleges, the final or senior year, including a program of at least 24 units must be completed in residence. Total number of grade (quality) points attained must equal total number of units undertaken in the University of California. Unit requirements are as follows: For A B, 120 units, of which 36 units must be in upper division subjects, including a 24-unit major subject, for B S, 120-136 units, depending upon specific requirements of respective colleges of applied sciences, for Ed B, in Teachers College at Los Angeles, 120 units, including 24-30-unit major subjects and 2 minor subjects.

Advanced Degrees Degree of LL B requires bachelor's degree in arts or sciences from approved university, and the subsequent completion of 3-year professional curriculum in jurisprudence. At least 1 year, after the receipt of the bachelor's degree in arts or science, must be completed in residence at the University of California School of Jurisprudence. M D degree granted upon completion of 5-year professional curriculum. By combined 8-year course (3 years as an undergraduate in academic departments, and 5 years in Medical School), the 2 degrees of A B and M D may be earned. For degrees of M A and M S, at least 1 year, after obtaining the bachelor's degree, must be spent in residence at the University of California. Further requirements include high scholarship average, passing of satisfactory oral and/or written examination, and/or submission of acceptable thesis. For Ph D degree, minimum residence is 2 years of graduate study; one, and ordinarily both, of which must be spent in continuous residence at the University of California. Distinguished scholarship, preliminary qualifying examinations, tests in Foreign Languages, and an acceptable, original thesis are other prerequisites. Requirements for Ed D degree are substantially the same as

for Ph D, except that Foreign Language requirement is not always prescribed Other higher degrees in Engineering, Mining, Architecture, and Public Health require at least 2 years' residence in graduate standing, both of which are ordinarily spent at the University of California, and the satisfaction of other specific departmental requirements

Degrees and Certificates of Completion Granted, in professional curricula of Law (in Hastings College of the Law, San Francisco), in Dentistry, Pharmacy, Social Service, Nursing Education, Public Health Nursing, and Optometry, upon the satisfaction of specific requirements

General Requirements. Common to all undergraduate students are the general University requirements in Subject A (test in English composition), American Institutions (a knowledge of the US Constitution and government), and, for men students under 24 years of age, 2 years of training in Military Science or Naval Science At Berkeley, Physical Education is no longer required for the bachelor's degree, at Los Angeles, Physical Education is prescribed for all first-year and second-year students, who are under 24 years of age

Enrollment: Total resident students, 1934-35, 23,498 Men, 13,018, women,

10,480 At Berkeley Undergraduates, 10,573, graduates, 2,763, summer session (1934), 2,571, total, duplicates deducted, 14,773 At San Francisco Medical School (second, third, fourth, and fifth years), Hooper Foundation for Medical Research, Hastings College of the Law, College of Dentistry, College of Pharmacy, and degree curriculum for nurses, total, 909 At Los Angeles University of California at Los Angeles, undergraduates, 6,452, graduates, 444, total, 6,863 Summer session (1934), 1,167, total, duplicates deducted, 7,709 At Davis Branch of the College of Agriculture, undergraduates, 155, graduates, 20, total, 175 At Mt Hamilton Lick Astronomical Department (Lick Observatory), graduates, 6 At La Jolla Scripps Institution of Oceanography, graduates, 3 At Riverside Graduate School of Tropical Agriculture, graduates, 9

Students in curricula not normally leading to degrees nor based on regular matriculation—At Davis Branch of the College of Agriculture, non-degree curriculum, 430 At San Francisco College of Dentistry, curriculum for the training of Dental Hygienists, 9, Training School for Nurses, non-degree curriculum, 198 At Los Angeles Los Angeles Medical Department, 4

The total number of undergraduate students in the regular sessions at Berkeley and Los Angeles is distributed as follows At Berkeley, total, 10,573 College of Letters and Science, 7,357 (General, 6,632, Pre-Architecture, 127, Pre-Dental, 47, Pre-Medical, 498, Medical School, 53), College of Agriculture, 343, College of Chemistry, 380, College of Commerce, 1,166, College of Engineering, 1,030, College of Mining, 154, College of Pharmacy, 32 At Los Angeles, total, 6,452 College of Letters and Science, 5,046 (General, 4,382, Pre-Medical, 340, Pre-Dental, 16, Pre-Chemistry, 30, Pre-Commerce, 49, Pre-Engineering, 221, Pre-Mining, 8), Branch of the College of Agriculture, 96, Teachers College, 1,287, special students, 23

Degrees: Conferred during the year 1934-35 for departments at Berkeley and

San Francisco Graduate in Pharmacy, 57, D D S, 36; B S and A B, 2,089, M S, 63, M A., 191, Ed.D, 7, Electrical Engineer, 3, Mechanical Engineer, 2, Civil Engineer, 1, Graduate in Architecture, 2, L.L B., 137, M D., 51, Ph D., 105, total, 2,744 At Los Angeles Ed B., 352, B S and A B., 843, M A., 67, total, 1,262 In addition, 9 honorary degrees (L.L D.) were conferred during 1934-35 Degrees conferred since foundation, 61,710.

Fees: Annual incidental fees are Berkeley, graduates and undergraduates, \$52, Los Angeles, graduates, \$46, and undergraduates, \$54 (including \$8 for student body membership), San Francisco, graduates and undergraduates, \$25, Davis, graduates, \$27, and undergraduates, \$34 50 (including \$7 50 for student body membership), student body membership fees collected direct by students' organizations at Berkeley and San Francisco No annual tuition fees for students who are residents of California, except Medicine—Berkeley and San Francisco—\$200, Jurisprudence—Berkeley—graduates (special incidental fee) \$50, Dentistry—San Francisco—graduates, \$300, undergraduates, \$200, Dental Hygiene—San Francisco—undergraduates, \$140, Pharmacy—San Francisco—undergraduates, \$250 Tuition fees for all non-residents of California, \$150 a year except Medicine—Berkeley and San Francisco, \$500, Jurisprudence—Berkeley—graduates, \$175 (including \$50 special incidental fee), Dentistry—San Francisco—graduates, \$320, undergraduates, \$202, Dental Hygiene—San Francisco—undergraduates, \$160, Pharmacy—San Francisco—undergraduates, \$270 Laboratory and miscellaneous fees, \$5 to \$125 a year Board and lodging, \$30 to \$75 a month Annual necessary living expenses, \$500 to \$800 a year, exclusive of fees

Scholarships: Approximately 280 undergraduate scholarships from \$100 to \$500, applications close February 15. Approximately 70 graduate scholarships and fellowships from \$100 to \$1,600, applications close February 20 Total loan funds, June 30, 1935, \$242,445 60 Scholarships, fellowships, and loan funds are available in various

branches and departments according to the conditions of the respective funds

Research During the year 1934-35, approximately \$1,617,000 was expended for research, of which over \$933,000 was for the agricultural experiment station. Practically all of the remainder of \$684,000 represents special research funds, gifts, and grants. It includes \$72,616 provided from general funds of the University to cover the cost of expenses, supplies, equipment, and additional assistance in connection with 102 grants for projects conducted by members of the regular staff whose salaries are likewise paid from general funds. These projects are carefully supervised by the Research Board of the University to avoid duplication of effort and unwise use of funds.

Employment bureau The appointment secretary, representing the president of the University, recommends graduates, students, and former students for positions in universities and colleges, junior colleges, high schools, and elementary schools, and for educational research. A fee of \$5 is charged for clerical service.

The Bureau of Occupations places graduates and former students of the University in all types of permanent positions other than teaching, and self-supporting students in part-time positions on and off the campus. This bureau makes recommendations concerning appointments to the clerical staff of the University. No charge is made for these services. No arrangement can be made by correspondence, since a personal interview is always necessary.

Dates of sessions during 1935-36 Fall semester at Berkeley, San Francisco, and Davis, August 22 to December 22, at Los Angeles, September 13 to December 12, and January 6 to February 5. Spring semester at Berkeley, San Francisco, and Davis, January 20 to May 23, at Los Angeles, February 14 to June 19. Intersession at Berkeley, May 18 to June 25. Summer session at Berkeley, June 29 to August 7, at Los Angeles, June 27 to August 15. Applications for admission must be filed well in advance of the opening dates of the various sessions when registration begins.

Summer sessions At Berkeley. Intersession, May 13 to June 21, 1935, enrollment, 926, summer session, June 24 to August 2, 1935, enrollment, 1,912. At Los Angeles, summer session, June 22 to August 2, 1935, enrollment, 1,542. Summer courses in field work in Civil Engineering are given at Berkeley and Los Angeles, and in Geology at Berkeley.

University extension During the year 1934-35, there were 1,821 classes with 33,553 enrollments, representing 10,788 individuals, 2,881 persons enrolled in correspondence courses, 378 lectures were attended by 124,550 persons, 1,003,710 persons saw visual aids (stereopticon and motion pictures) at a cost of about 4 cents a person. The service extends to all parts of the state, including 303 cities and towns, as well as to 27 other states and 11 foreign countries.

Publications The University Press is organized to publish in series the results of research by members of faculties and serious books of a more or less general appeal. The Press maintains its own manufacturing department where these books and papers are printed and bound and where all the official printing for the University is done, including the general catalogs, directories, and other administrative publications, announcements of schools, colleges, and other divisions, and bulletins of the College of Agriculture.

Achievements of year ending June 30, 1935 Graduate work was established at the University of California at Los Angeles leading to the master's degree and the general secondary certificate; it was also enacted that a College of Commerce be established in the same division of the University, actual instruction to begin in the academic year 1936-37. In the College of Letters and Science (Berkeley), in addition to certain special curricula which had already been in existence, there were established curricula in Criminology, in International Relations, and in Social Theory.

On July 1, 1934, the College of Pharmacy which had been an affiliated college of the University since 1875, became an integral

part of the institution, a 4-year curriculum leading to the degree of B S was instituted

Provision was also made that students with minor deficiencies as to admission to the University might enroll in the non-degree curriculum at the Branch of the College of Agriculture at Davis and thus qualify themselves for full admission

Research is being vigorously prosecuted in all departments and divisions of the University

Administrative Officers: *President*, Robert G Sproul, *Vice-President and Provost*, (Berkeley), Monroe E Deutsch, *Vice-President and Provost*, (Los Angeles), Ernest C Moore, *Secretary and Treasurer of the Regents*, Robert M Underhill, *Comptroller*, Luther A Nichols

CALIFORNIA, UNIVERSITY OF,
AT LOS ANGELES

In 1919, the Southern Branch of the University of California was established by legislative enactment transferring the Los Angeles State Normal School to the University The educational facilities were expanded to include the freshman and sophomore years in Letters and Science beginning with September 1919, the third and fourth years with September 1923 and 1924, respectively The degree of B A was conferred in the College of Letters and Science for the first time in June 1925 In 1922 the teacher training courses were organized as a Teachers College, and the degree of B Ed was conferred for the first time in June 1923 On February 1, 1927, the present name of the institution was adopted

A new site was donated in 1926 by the cities of Santa Monica, Beverly Hills, the city and county of Los Angeles, and certain private individuals and in September 1929, instruction began in the new buildings In 1930 a branch of the College of Agriculture was added, graduate study was established in 1933, and in 1936-37 a full 4-year curriculum will be in operation in the College of Commerce leading to the B S

degree Research work in various fields is being gradually developed

Other details concerning this institution have been incorporated in the general description of the University of California at Berkeley of which it is an integral part except as to geographical location

University of

CALVIN COLLEGE

GRAND RAPIDS, MICHIGAN

College, coeducational, privately controlled by board of trustees of the Christian Reformed Church in America

Originated as a school for the training of men for the Gospel Ministry In 1900 expanded, adding a literary 4-year college course Gradually teaching staff was enlarged and curriculum extended to include such courses as Teachers', Pre-Medical, Pre-Dental, Pre-Law, Pre-Forestry, Pre-Engineering, in addition to General College and Pre-Theological

Board of 30 trustees, 2 from each of 15 classes of Christian Reformed Church

Finances. Endowment, \$145,000, income from endowment, \$3,600, income from student fees, \$34,740 80, income from churches, \$52,719 90 Total annual expenditures for year ending August 31, 1935, \$88,425 98 Budget, 1935-36, \$90,882

Grounds and Buildings Campus of 10 acres valued at \$100,000 Present worth of buildings, \$520,000, total value of grounds, buildings, and equipment, \$686,000 Dormitory 1 for men, accommodating 80

Library (1927) 21,500 volumes, 108 current periodicals

Laboratories Housed in main building,

Physics and Chemistry equipment valued at \$25,000

Requirements: For Admission 15 units of high school work, no less than 9 of which are prescribed, number depending upon college course to which applicant is seeking admission, 13 of the units must consist of subjects of a strictly academic nature Provisional admission to students failing to meet requirements by not more than 1 unit Deficiency must be made good during the first year of residence

For Degree For A B 125 semester hours with an average grade of C, 52 hours of prescribed work distributed as follows 21 hours in 1 department and 12 hours in related departments, besides an additional 3 hours in either In minor group, 12 hours is required in 1 department other than that of major, besides 6 hours in related group At least half of the work taken in residence beyond the sophomore year must be in courses not open to freshmen For A B in Pre-Seminary course or A B in Education Same as above except for prescribed work

General Physical Education required of freshmen, daily chapel attendance, senior year of residence required for graduation from all courses

Departments and Staff: Art Professors, 2, instructors, 0, assistants, 0 Bible 1, 0, 0 Chemistry 1, 0, 3 Dutch 1, 0, 0 Economics and Sociology 1, 0, 0 Education 2, 1, 1 English 2, 1, 1 French 1, 0, 0 German 1, 2, 0 Greek 1, 1, 0 History 2, 1, 0 Latin 1, 0, 0 Mathematics and Physics 1, 1, 0 Music 1, 0, 0 Organic Science 1, 1, 0 Philosophy 1, 0, 0 Political Science 1, 0, 0. CANISIUS COLLEGE

BUFFALO, NEW YORK

College of arts and sciences, privately controlled by the Society of Jesus

Opened in 1870 In 1911 erection of present college building on Main Street and Jefferson Avenue was begun The College classes were transferred to the new building in 1913, leaving the old structure entirely for high school purposes

Board of 10 trustees, members of the Society of Jesus

Finances. Only source of income is tuition Total annual expenditures for the year ending June 30, 1935, \$177,378 87 Total expenditures for new building and equipment, \$25,000.

Grounds and Buildings 11 acres, valued at \$250,000, buildings valued at \$650,000 Total value of grounds, buildings, equipment, \$1,225,000

Library 30,000 volumes, exclusive of government publications

Laboratories Physics, Chemistry, Biology Value of equipment, \$125,000

Museum Early printed Bibles and patristic works

Seismological Observatory with 2 seismographs

Requirements. For Admission (1) Graduation from an accredited secondary school and 15 units in specified subjects (2) Rank among the first two-fifths of graduating class

For Degree 4 years of prescribed work totaling not less than 130 semester hours of credit plus 128 quality points, which supposes an average of not less than 75 in each

subject throughout the 4 years For the master's degree, 30 semester hours, 18 of which shall be in major field and 6 in each of 2 minors or 12 in 1 minor Dissertation required No candidate will be granted a master's degree until 2 years or at the very least, 1 year and 2 summer sessions after the date of receiving the bachelor's degree

General All Catholic students are required to attend religious exercises

Departments and Staff. Ancient Languages *Professors*, 6, *associate professors*, 0, *assistant professors*, 1, *instructors*, 1 Astronomy and Geology 1, 0, 0, 0 Biology 2, 0, 2, 6 Business Administration 2, 0, 0, 3 Chemistry 2, 0, 2, 6 Education 2, 0, 0, 0 English 3, 0, 4, 2 Mathematics 1, 0, 1, 2 Philosophy 5, 4, 0, 0 Physics 2, 0, 0, 6 Romance Languages 2, 0, 0, 2 Social Sciences 3, 0, 3, 1

Enrollment. For year ending June 30, 1935, regular day course, 599, afternoon and evening sessions, 578, summer session, 359

Fees Annual tuition, \$200 in all courses excepting Pre-Medical Tuition in Pre-Medical course, \$250 Matriculation, \$5, graduation, \$15, laboratory fees, \$10 to \$15, student activity fee, \$20

Scholarships. 4 perpetual, valued at \$600 each, 7 competitive scholarships, 7 student loan scholarships, 4 scholarships for boys studying for priesthood, 4 appointive scholarships

Dates of beginning and ending sessions September 16, 1935, June 7, 1936

Summer session July 5 to August 10, 1935, 13 departments offered 79 courses, attendance, 359 students

Extension Afternoon and evening sessions for men and women, attendance, 578

Catalog in January

Achievements of year ending June 30, 1935. Completion of new library, additional classrooms

CARLETON COLLEGE

NORTHFIELD, MINNESOTA

College of liberal arts, coeducational, privately controlled

Founded as Northfield College in 1866 by a board of trustees nominated by the Minnesota Conference of Congregational Churches No denominational restrictions after the first year Preparatory school opened in 1867 Present name adopted in 1872, in honor of William Carleton of Charleston, Massachusetts, an early benefactor

Self-perpetuating board of 28 trustees Cooperative relations with the Congregational Churches of Minnesota maintained since the founding of the College Similar relations were established with the Baptist denomination in 1916, and with the Episcopal Church in 1923 Academy discontinued in 1903 A separately organized Conservatory of Music was reorganized in 1924 as a department of the College A sharp line of distinction is drawn between the educational work of the College and all "service activities" All service properties including dormitories, dining halls, college tea-room, bookstore, heating plant, college farm, etc (valued at \$2,450,346 02 on June 30, 1935), are owned and operated by the Carleton Corporation, which is a separate corporation affiliated with the College All service properties are conducted on a "self-supporting, non-profit-making" basis

Finances: Endowment, June 30, 1935, \$2,894,151 40 Expenditures for educational purposes, year ending June 30, 1935, \$377,246 41 Additional expenditures for scholarships, retiring allowances, dormitories, dining halls, etc, increase the current budget to \$935,589 70

Grounds and Buildings: Main campus of 90 acres includes the George Huntington

Lyman Memorial Lakes constructed in 1916-17, Laird Athletic Field (men), 17 acres, Bell Field (women), 11 acres, arboretum, 360 acres, College farm, 300 acres. The physical plant, including 21 main buildings, is valued at about \$4,000,000.

Library (1896) 112,337 volumes, 31,414 pamphlets, 441 current periodicals. Special collections: John H. Gray Collection in Economics, Fred B. Hill Collection in the History of Religion, Ambrose W. Vernon Collection in Biography, Robert Huntington Fletcher Collection in English Literature, James E. Parker Collection relating to International Peace, Cordenio A. Severance Library of Political and Social Science, and Warren Upham Collection in Geology and Geography.

Laboratories: Laird Science Hall (1905) houses laboratories of Physics, Botany, and Zoology; Leighton Hall of Chemistry (1920) includes departments of Chemistry and Geology.

Goodsell Observatory (1887) 16-inch telescope, 8-inch telescope, 14 smaller telescopes, a collection of meteorites representing 25 falls. Library of Observatory 2,900 bound volumes, 4,000 pamphlets. Popular Astronomy published monthly, originally called the Sidereal Messenger, later Astronomy and Astrophysics, since 1893 known by the present name.

Requirements: For Admission 15 units, including English, 3, Mathematics, 2, and Foreign Language, 2. Students in lower half of high school graduating class accepted only on specific recommendation of principal and after passing college aptitude test.

For Degree 124 semester hours plus 6 hours in Physical Education. An equal number of grade credits required. Each student to have freshman English, 6 hours, Foreign Language, 12-14, Literature, 6, Laboratory Science, 8, additional Science, 6-8, Philosophy, 6, a major field of concentration of 24-30 hours with 12 supporting hours. Honors courses offered in various fields of concentration. Candidates for honors may be excused from part of required work and must present a satisfactory

thesis. Faculty committee passes on requests of students for individualized programs of study which depart from requirements of regular curriculum.

Only degree of B.A. offered for undergraduate work. Limited opportunities provided for work leading to degree of M.A.

General. All students are required to room and board in college dormitories, exceptions permitted only in case of those whose parents live in Northfield. No student is permitted to have or use an automobile while college is in session. Attendance required at chapel services twice each week and at vespers on Sunday.

Departments and Staff. I. Division of Language and Literature includes Departments of English: Professors, 1, associate professors, 2, assistant professors, 2, instructors, 0. Latin 1, 0, 0, 0. Greek 1, 0, 0, 0. German 2, 0, 1, 0. Romance Languages (French, Spanish, Italian) 1, 1, 0, 1. II. Division of Philosophy, Psychology and Education includes Departments of Philosophy 1, 0, 1, 2. Psychology and Education 1, 1, 0, 1. Biography 1, 0, 0, 0. III. Division of Political and Social Science includes Departments of Economics and Business Administration 2, 1, 0, 0. Sociology and Anthropology 1, 0, 0, 1. History and Political Science 1, 1, 0, 1. IV. Division of Science includes Departments of Mathematics 1, 1, 0, 0. Astronomy 1, 0, 0, 1. Physics 1, 0, 1, 0. Chemistry 2, 0, 0, 1. Geology and Geography 1, 0, 0, 2. Botany 1, 0, 0, 1. Zoology 1, 0, 0, 1. V. Division of Fine Arts includes Departments of Art 1, 1, 0, 1. Music 3, 0, 5, 1. Speech 1, 0, 0, 1. Dramatic Arts 0, 1, 0, 1. VI. Division of Health and Physical Education includes Departments of Hygiene and Public Health 1, 0, 0, 0. Health, and Physical Education for Men and Athletics 0, 0, 1, 2. Health and Physical Education for Women 0, 0, 1, 2.

Enrollment: Year ending June 30, 1935, 728 Men, 368, women, 360. A total of 12,005 have been matriculated since the founding of the College.

Degrees. Conferred year ending June 30, 1935, B.A., 145, M.A., 1. Degrees

conferred since founding of College, 3,649

Fees: Annual tuition fee, \$280 which includes all charges for instruction except special fees for individual instruction in Music, matriculation fee, \$10, student privilege fee, \$23, student health fee (including privileges of college health service, dental service, hospital, etc.), \$25 Charge for board is \$250 a year, rooms average \$170 a year Estimated total student expense from \$800 to \$1,000 a year

Scholarships: During the year ending June 30, 1935, scholarships amounting to \$53,028 39 were awarded Loans (including open accounts totaling \$8,225 18) amounting to \$40,529 28 were arranged It is part of the permanent policy of the College to include in the student body, to the extent of about one-third of the entire enrollment, students who require financial assistance

College maintains bureau of appointments and personnel service Vocational conference with visiting speakers held annually

First semester begins on Tuesday nearest September 15, second semester on Monday nearest February 1 Commencement on second Monday in June

Bulletin including announcements, annual catalog (in March), annual reports, news bulletins, etc published 8 times a year

Achievement of the year ending June 30, 1935 In December 1934, the Carnegie Corporation of New York made a gift of \$100,000 to the permanent endowment funds of the College

Carleton Mission supported by students and faculty members, contributes \$2,500 annually for educational work at Fenchow, in Shansi, China

Administrative Officers: *President*, Donald J. Cowling, *Assistant to the President*, Carter Davidson, *Dean*, Lindsey Blayney, *Dean of Women*, Adella M. Catton, *Registrar*, Peter Olesen, *Treasurer*, Frederick J. Fairbank, *Editor of College Publications*, Ralph L. Henry, *Librarian*, Bessie G. Frost Officer in charge of foreign students, Sara Crandall, secretary to the president.

CARNEGIE INSTITUTE OF TECHNOLOGY

PITTSBURGH, PENNSYLVANIA

Institute of technology, for men and women, privately controlled, non-sectarian

Carnegie Institute of Technology, formerly the Carnegie Technical Schools, founded by Andrew Carnegie in 1900, when he tendered to the city of Pittsburgh funds to establish a technical institution The gift was accepted by the city in 1901 Opened in 1905 In 1912, name changed to the Carnegie Institute of Technology, chartered in the State of Pennsylvania.

Carnegie Institute is the parent organization of the Carnegie Library of Pittsburgh, the Museum, the Department of Fine Arts, the Carnegie Music Hall, and the Carnegie Institute of Technology Carnegie Institute is governed by a self-perpetuating board of trustees of 36 members, directed by a committee of 16 members of the Board of Trustees of the Carnegie Institute and the President of the Carnegie Institute of Technology

Carnegie Institute of Technology includes 4 colleges Margaret Morrison Carnegie College for Women, College of Fine Arts (open to men and women), College of Engineering (open to men), and the Carnegie Library School (open to men and women) In the Division of General Studies, the faculty gives instruction in subjects common to all colleges

Finances: Endowment, \$16,369,382, budget, \$1,445,548

Grounds and Buildings: 54 acres valued at \$1,000,000, 24 dormitories and 6 other buildings valued at \$5,500,000.

Library Carnegie Library of Pittsburgh (450,000 volumes) adjoins campus Branch library for students' use.

Laboratories College of Engineering, 53 shops and laboratories, Margaret Morrison Carnegie College, 20 studios, shops and laboratories, College of Fine Arts, 63 shops and studios, Machinery Hall, 8 Approximate value of equipment of laboratories, studios, and shops, \$1,000,000

Carnegie Museum adjoins campus.

Requirements: For Admission *General*—Secondary school record better than average. A minimum of 15 units, vocational subjects granted only $\frac{1}{2}$ credit with a maximum allowance of 2 units. A limited amount of entrance condition permitted. Conditions must be removed before beginning of the sophomore year. *Specific Requirements* for the 3 colleges, (1) College of Fine Arts, English, 4, European History, 1, Foreign Language, 2 (in addition to these, for Architecture, Algebra, $1\frac{1}{2}$, Plane Geometry, 1), (2) College of Engineering, English, 4, Algebra, $1\frac{1}{2}$, Plane Geometry, 1, Solid Geometry, $\frac{1}{2}$, Physics, 1, Foreign Language, 2, (3) Margaret Morrison Carnegie College, English, 4, Algebra, $1\frac{1}{2}$, Plane Geometry, 1, Foreign Language, 2.

For Degree For B S or B A, the average requirement in the various courses is 432 units (144 credits), and the quality of the student's work must not fall below a certain minimum.

Departments and Staff. College of Engineering *Professors*, 21, *associate professors*, 12, *assistant professors*, 19, *instructors*, 27, *other teachers*, 15. College of Fine Arts 10, 14, 12, 25, 30. Margaret Morrison Carnegie College 5, 4, 4, 17, 5. Carnegie Library School 2, 3, 3, 0, 0. General Studies 9, 13, 18, 18, 6. R O I C 1, 0, 2, 3, 0. Metals Research Laboratory 8 research associates. Coal Research Laboratory 16 research assistants. Research Laboratory for Molecular Physics 4 research assistants.

Enrollment. Year ending June 30, 1935, day students, Engineering Men, 1,137. Fine Arts Men, 243, women, 314, total, 557. Margaret Morrison Carnegie College Women, 505. Carnegie Library School Women, 10. Total, excluding duplicates, 2,209. Evening students Engineering Men, 1,797. Fine Arts Men, 284, women, 391, total, 675. Margaret Morrison Carnegie College Men, 3, women, 33, total, 36. Total evening students, 2,508. Total number of matriculants since foundation, 131,234.

Degrees: Conferred year ending June 30, 1935, 452. College of Engineering, 200, College of Fine Arts, 105, Margaret Morrison

Carnegie College, 97, Carnegie Library School, 9, graduate degrees, 41. Total number of graduates since foundation, 8,932. Day school, 7,544, evening school, 1,388.

Fees: General fee for regular students, \$300, student activities fee, \$15. Annual expenses for men (fees, room, board, books, instruments, supplies, infirmary fee), \$775, for women, \$700 to \$800.

Scholarships: 57 competitive scholarships for freshmen. 200 upper class scholarships awarded on basis of scholastic record of preceding year. 15 teaching fellowships and 4 mining fellowships offered annually (stipend \$500 for 10 months with remission of tuition fees).

Student placement bureau. For year ending June 30, 1935, 37% of the students earned all or part of expenses.

First semester begins on the Wednesday nearest September 15, year ends on the Friday which completes 35 weeks.

Summer session. Two terms of 6 and 8 weeks respectively. The 8-weeks' term begins 1 week after close of school year. The 6-weeks' term for teachers begins 3 weeks after close of year. Courses in various technical subjects and in special courses for teachers.

University extension. All of the colleges offer evening courses. These vary in length from 1 to 9 years, and are given at a nominal tuition fee. A program of part-time courses for teachers is offered in the late afternoons and on Saturday mornings.

Annual catalog published in March in form of bulletins for the several colleges.

Administrative Officers: *President*, Robert E. Doherty, *Assistant to the President*, Charles Watkins, *Director*, Margaret Morrison Carnegie College, Charles Watkins, *Director*, College of Engineering, Webster N. Jones, *Chairman of the Faculty*, College of Fine Arts, Glendinning Keeble, *Director*, Carnegie Library School, Ralph Munn, *Director*, Division of General Studies, and *Director*, Evening Courses and Part-Time Classes, Roscoe Myrl Ihrig, *Registrar*, Alan Bright, *Dean of Women*, Mary Watson Green, *Dean of Men*, Arthur Wilson Tarbell.

CAROLINA TEACHERS COLLEGE, EAST

GREENVILLE, NORTH CAROLINA

State teachers college, coeducational

Founded 1907

Controlled by board of trustees, 12 members, state superintendent of public instruction, chairman ex-officio of the board

Finances: Expenditures for the college year 1934-35, \$266,000 Expenditures budget 1935-36, \$307,000

CARTHAGE COLLEGE

CARTHAGE, ILLINOIS

College of liberal arts, coeducational, privately controlled, affiliated with Lutheran Church

Founded in 1846 at Hillsboro, Illinois, and known as Hillsboro College In 1852 moved to Springfield, Illinois, and operated as Illinois State University for 18 years In 1870 rechartered as Carthage College, and moved to Carthage, Illinois

Governed by a board of 21 trustees, nominated in part by the Lutheran Synods of Illinois, Iowa, Wartburg, and elected by the board itself.

Finances: Endowment, \$880,000.

Grounds and Buildings: 92 acres with 11 buildings valued at \$485,000 Dormitories 1 for men, accommodating 44, 1 for women, accommodating 136

Library 35,000 volumes and pamphlets

Laboratories Science Hall (1926) houses Biology, Chemistry, Physics, and Agriculture

Requirements: For Admission (1) 15 units of secondary school work (2) A testimonial of good moral character, or a certificate of honorable dismissal from another college

For Degree 130 semester credits Major of 24 semester credits and 2 minors of 16 semester credits each Residence of 1 year.

General Daily chapel attendance. Prescribed Physical Education Physical examination may be required Students must reside in college dormitories or in approved student houses

Departments and Staff: Bible and Religion *Professors*, 1, *associate professors*, 0, *assistant professors*, 0, *instructors*, 0 Biology 1, 0, 1, 0 Chemistry 1, 0, 0, 1 Economics 1, 0, 0, 0 Education 1, 1, 0, 0 English 1, 0, 1, 2 French 1, 0, 0, 1 German 1, 0, 0, 0 Greek 1, 0, 0, 0 History and Social Science 1, 1, 1, 0 Home Economics 0, 1, 0, 0. CASE SCHOOL OF APPLIED SCIENCE

CLEVELAND, OHIO

Endowed college of engineering for men, privately controlled

In 1877 Leonard Case, Jr, executed a deed of trust and directed that, after his death, an institution to be called The Case School of Applied Science be organized in Cleveland, Ohio After his death in 1880 the

corporation was formed In 1881 the institution opened

Self-perpetuating corporation of 28 members, which elects from its number 9 trustees

Finances: Endowment, \$4,600,000, income from endowment (1934-35, 10 months), \$98,393 34, total income for 10 months ending June 30, 1935, \$314,935 Budget, 1935-36, \$415,000

Grounds and Buildings: Campus of 15 acres valued at \$1,200,000, total present worth of buildings, \$1,435,000, of equipment, \$450,000, total value of plant, \$3,085,000

Library 25,828 volumes, 17,190 pamphlets, 264 periodicals

Laboratories Chemical (1892), Electrical Engineering (1895), Physics (1905), Metallurgical (1905), Bingham Laboratory of Mechanical Engineering (1926), Warner Laboratory of Mechanics and Hydraulics (1928)

Observatory Warner and Swasey Observatory (1920), 10-inch equatorial telescope, 4-inch zenith telescope, 4-inch, 3-inch and 2½-inch astronomical transits, 3-inch astrographic telescope

Requirements For Admission 15 units, including Algebra, 1½, Geometry, 1½, English, 3, Foreign Language, 2, Physics, 1, Chemistry, 1 Preferential treatment to candidates presenting 4 units of Mathematics Students admitted with conditions in language and second science which must be removed within 1 year Graduates ranking in lowest third of secondary school classes admitted by examination only Freshmen admitted in September and in February, limited to 250

For the B S. degree 8 semesters and one 3-week practice term In each semester 48 clock-hour credits are required Except for group options in major curricula nearly all work is required and must be passed in full Thesis on an engineering project or scientific problem About half of each day is given to lectures and recitations and half to practical work in the field, laboratory or drafting room

For the M S degree 30 units, 20 of which

including a thesis must be in work offered exclusively to graduates. Majors for M S degree offered in Astronomy, Mathematics, Physics, Applied Mechanics, Chemical, Civil, Electrical, and Mechanical Engineering, Metallurgy

Departments and Staff: Astronomy *Professors*, 1, *associate professors*, 0, *assistant professors*, 0, *instructors*, 0. Chemical Engineering 2, 1, 2, 4. Civil Engineering 1, 1, 2, 1. Engineering Administration 1, 0, 1, 0. Engineering Drawing 0, 1, 2, 0. Electrical Engineering 1, 1, 4, 0. Geology and Mineralogy 0, 0, 0, 1. Language and Literature 1, 1, 1, 2. Graduate assistants, 20. Total faculty, 88

Enrollment: For year ending June 30, 1935, 837. Total number of matriculants since foundation, 8,796

Degrees: Conferred June 4, 1935, 142 M S, 19, M E, 1, E E, 1, B S, 121. Degrees conferred since foundation, 3,741

Fees: Tuition and laboratory fees, \$320, gymnasium and club, \$30, breakage, \$5 to \$20, student activity tax, \$14, registration fee at admission, \$5, board and room, 36 weeks, \$360 to \$450, books, stationery, instruments, etc., \$40 to \$100, departmental excursions, \$75 to \$125 (1 or 2 years), incidentals, \$100 to \$200

Scholarships: For undergraduates, 68 scholarships of \$100 to \$250 per year. For postgraduates, 20 teaching assistantships at \$500 per year. Assistance to upper-class and graduate students from loan funds

Placement service for graduates conducted under assistant to president. Welfare service for undergraduates under assistant to the dean. 75% of students earn part of expenses

First semester begins September 17, 1935, ends January 31, 1936, second semester begins February 3, 1936, ends June 6, 1936

Summer session Begins June 22, ends August 1, 1936

Evening Division Duplicates courses of

first 2 years for credit, offers courses in scientific and technological subjects for technical men, and provides advanced courses for engineers. The observatory conducts a series of 16 public nights

Catalog in November and April

Achievement during 1934-35. A business option introduced in senior year of each major curriculum

Administrative Officers: *President*, William E Wickenden, *Dean*, Theodore M Focke, *Assistant to the President*, Walter B McClelland, *Assistant to Dean*, Lawrence W Mills, *Registrar*, Elsie M Wallace.

CATAWBA COLLEGE SALISBURY, NORTH CAROLINA

Liberal arts college for men and women, offering degrees of A B, and B S in Business Administration, Home Economics, and Music. Under control of Evangelical and Reformed Church

Founded at Newton, North Carolina, in 1851 and chartered by Legislature of North Carolina in 1852. Relocated on new campus at Salisbury in 1924

24 trustees, 18 elected by Church judiciatories and 6 by the board

Finances: Endowment, \$376,594.36, income from endowment, \$21,657.34, from church contributions, \$4,466.80. Total annual expenditures, \$167,948.06. Budget for 1935-36, \$160,930

Grounds and Buildings. Campus, 82 acres, valued at \$53,000. 10 buildings, including 3 dormitories, administration, music, and home economics buildings, gymnasium, faculty apartments and residences. Dormitory capacity: Men, 120, women, 120. Total value of grounds, buildings, and equipment, \$600,000

Library 22,000 volumes, including 8,000 government documents, 103 current periodicals

Laboratories. Value of equipment, Biology, \$7,200, Chemistry, \$8,000, Physics, \$4,300, Home Economics, \$2,873, Music, \$15,000.

Requirements: For Admission Completion of 4-year accredited high school course, with minimum of 15 units, 12 units, including 4 in English and 2 in Mathematics, must be selected from English, Foreign Language, History and Social Studies, Mathematics and Science. No entrance conditions allowed.

For Degree 128 semester hours, including 6 in Physical Training, final year at least must be in residence. Minimum of 90 semester hours must be of C grade or better. For A B degree, requirements include a major of 24 and a related minor of 18 semester hours, also English, 12 hours, Foreign Language, 12 (6 if 2 units offered for entrance), Religion or Philosophy, 6, History or Social Science, 6, Mathematics or Science, 6, Fine Arts, 6.

For B S degree, English, 12 hours, Foreign Language, 12 hours (6 if 2 units offered for entrance), particular requirements of the curriculum in which the degree is taken.

General Daily attendance at College assembly, boarding students required to attend Sunday vespers.

Departments and Staff: Art Professors, 1, associate professors, 0, assistant professors, 0, instructors, 1. Biology 1, 0, 0, 1. Business Administration 1, 0, 0, 2. Chemistry 1, 0, 0, 1. Sociology 1, 0, 0, 0.

Enrollment: 1934-35, 360

Degrees: Conferred in 1935, 66 A B, 51, B S, 15.

Fees: Tuition, \$170, board, \$170, room, \$60, registration, library, Physical Education, student activities, \$30, total, \$430. Annual expenses Liberal, \$550, low, \$500.

Scholarships: Income from investments totaling \$20,500. 25% of students earn part of expenses.

1934-35 session began September 12 ended May 28.

Summer sessions June 10 to July 19, 1935, July 22 to August 30, 1935. Enrollment, first session, 191, second session, 108.

Extension work conducted in the field of adult education.

Catalog number of the bulletin in March.
Administrative Officers: *President*, Howard R. Omwake, *Dean of Men*, Allen K. Faust, *Dean of Women*, W. Augusta Lantz, *Registrar*, William G. Cleaver.

CATHOLIC UNIVERSITY OF AMERICA

WASHINGTON, DISTRICT OF COLUMBIA

University for men and women, controlled by the Hierarchy of the Catholic Church in the U S.

Incorporated under laws of District of Columbia, 1887. Chartered by Pope Leo XIII, 1889. School of Theology opened in 1889, School of Law, 1889, School of Canon Law, 1923, School of Scholastic Philosophy, School of Engineering and Architecture, Graduate School of Arts and Sciences, Division of Nursing Education, School of Social Work.

Board of trustees composed of the cardinals, the archbishops of the U S, 10 bishops, 10 priests, and 10 laymen.

Finances: Endowment, \$3,000,000. Budget, 1935, about \$1,100,000. Gifts for all purposes, \$412,000.

Grounds and Buildings: 48 buildings belong to the University and affiliated colleges. Eighteen of these occupied by University, valued at \$2,700,000. Residence halls for men, 5 buildings, 475 occupants.

Library John K. Mullen Library (1935), 340,000 volumes, current periodicals, 312, Connolly Collection of Americana, Ibero-American Library.

Laboratories Martin Maloney Chemical Laboratory for Chemistry and Geology, Engineering Building and Laboratory for Mechanical Engineering, laboratories for

Biology, Psychology, Physics, and Electrical Engineering housed in other buildings Equipment, \$600,000

Museum Collections of Orientalia, Indian relics, numismatics, stone implements, and miscellaneous specimens from foreign fields

Requirements: For Admission For admission to the Schools of Theology and Canon Law, applicant must have completed a 2-year course in Philosophy and a 3-year course in Theology For admission to the School of Law, 2 years of college work required. School of Law open to men and women Undergraduate courses in the College of Arts and Sciences, School of Engineering and Architecture are open to students (men only) who have completed a 4-year high school course and have completed 15 units, including English, 3, History, 1, Science, 1, Mathematics, 2, Foreign Language, 2, and 6 additional units selected by the applicant from the above fields or from Religion, but not more than 1 unit in Religion will be accepted

For Degree Bachelor's degree, 125 semester hours, including prescribed subjects and electives, minimum monthly grade of 70, semi-annual and final examinations

Master's degree, 24 semester hours of graduate work, reading knowledge of French or German, dissertation

Doctor's degree, 3 years of graduate study, fulfillment of requirement in a major subject and two minor subjects, dissertation, reading knowledge of French and German, oral and written examination

General All students required to live at the University unless given special permission to live elsewhere Catholic students must conform to the laws of the Church in reference to attendance at Mass and reception of the Sacraments

Catalog in May

Administrative Officers: *President*, Pierce Cline, *Dean*, John A Hardin, *Dean of Women*, Mrs A R Campbell, *Executive Secretary*, A M Shaw, Jr, *Secretary of the Faculty*, Robert R Ewert, *Registrar*, Avis Wilson Officer in charge of foreign students, John A Hardin, dean

granted a charter to the curators, and in 1857 the College opened During the period 1922-25, Central College absorbed all of the other colleges of the church in Missouri, namely Howard-Payne College, Central College for Women, Scarritt-Morrisville College, and Marvin College

Board of 24 curators, one-third appointed by each of the 3 conferences of the Methodist Episcopal Church, South, in Mis-
 souri 8 of the curators are appointed from graduates of the College nominated by the alumni association

Finances: Endowment, \$1,321,000, income from endowment, \$43,407, income from other sources, \$249,056 Total annual expenditures year ending September 1, 1935, \$283,642 Budget, 1935-36, \$290,000.

Grounds and Buildings: 49 acres, value \$210,000, present worth of 15 buildings, \$1,350,000 Value of grounds, buildings, and equipment, \$1,800,000 Capacity of residence halls for men, 216, for women, 200.

Library Building erected in 1899, re-modelled in 1927-28 35,725 volumes, 181 periodicals Special collection of books, periodicals, and pamphlets on Methodism

Laboratories Science Hall (1895), Biology, Chemistry, and Physics Equipment value Biology, \$17,000, Chemistry, \$17,000, Physics, \$10,000 Museum of Natural History in Science Hall convenient to laboratories Excellent collections in Geology and Biology, noteworthy collection in Ornithology

Observatory The Morrison Astronomical Observatory, formerly located at Glasgow, Missouri, has been moved into the new observatory building in Fayette The new building was completed in 1935 at a cost of \$25,000 Equipment Equatorial refracting telescope of 12 inches aperture and 17 feet focal length, 6-inch meridian circle with two 4-inch collimators, sidereal clock with chronograph and chronometer, 2 direct vision spectroscopes, two 4-inch telescopes, and a 2½-inch telescope Equipment valued at \$35,000

Requirements: For Admission 15 acceptable units offered by graduates of accredited high schools distributed as follows

CENTRAL COLLEGE

FAYETTE, MISSOURI

Coeducational college of liberal arts, owned by the 3 conferences of the Methodist Episcopal Church, South, in Missouri

In 1852 the conferences of the church in Missouri agreed to establish an institution of higher learning in the state, in 1853 Fayette was selected as the site for the College because it was centrally located in the state, in 1855 the Legislature of Missouri

English, 3, Mathematics, 2, one Foreign Language, 2, elected from academic subjects (English, Mathematics, Foreign Languages, Natural Sciences, Social Sciences), 4, elected from any subjects accepted for graduation in accredited high schools, 4 No conditions allowed

For Degree. 124 semester hours and 124 honor points A candidate must complete a major of 24 hours and a minor of 18 hours In addition a candidate must complete general requirements English, 12 hours, 1 Foreign Language, 12, Mathematics or Philosophy, 6, Religion, 6, Biological or Physical Science, 8, Social Science, 6, Physical Training, 4 Minimum residence requirement, 1 year

General Chapel twice each week, attendance required

CHICAGO NORMAL COLLEGE

CHICAGO, ILLINOIS

Teacher training institution, coeducational, municipal.

Established as a public institution in 1869.

CHICAGO, UNIVERSITY OF

CHICAGO, ILLINOIS

Privately controlled non-sectarian university for men and women

The first president of the University,

William Rainey Harper, entered upon his duties July 1, 1891, and the University opened for instruction October 1, 1892. The schools and colleges organized at that time included the Colleges of Arts, Literature, and Science, and the Graduate Schools of Arts, Literature, and Science, and the Divinity Schools. School of Education, 1901 School of Commerce and Administration, 1902 Law School, 1902 School of Social Service Administration, 1920 Schools of Medicine, including (1) Graduate Medical School of Ogden Graduate School of Science, 1925, (2) Rush Medical College (affiliated, 1898), 1925, (3) Rush Postgraduate School of Medicine, 1925. Graduate Library School, 1926 Nursing School, 1925

Board of 30 trustees, three-fifths of whom shall be members of a Christian church, and of this three-fifths, a majority, or 10, shall be Baptists

Under the educational reorganization approved in November 1930, and becoming effective for entering students in October 1931, the University consists of the professional schools and 5 divisions in the Arts, the College, and 4 upper divisions Physical Sciences, Natural Sciences, Biological Sciences, and Humanities The College administers a general education, the upper divisions provide for advanced study All degrees are awarded by the upper divisions and the professional schools Completion of work in any of the divisions is determined on the basis of general examinations designed to test the student's ability to organize, to create, and to think Under the plan a student may progress as rapidly or as slowly as his abilities determine The professional schools are Divinity, Law, Medicine (also Rush Medical College on the west side of Chicago), Education, School of Business, Social Service Administration, and Library Science In addition, there are the laboratories, libraries, clinics, museums, hospitals, and the University Press.

Finances: Assets held by the University on June 30, 1935, \$110,500,000, amount of endowment, \$59,478,904, income from endowment for the year 1934-35, \$2,502,747.45, from other sources, \$4,861,288.56

Total budget expenditures, \$7,345,537 02 Budget for 1935-36, \$7,544,326.

Grounds and Buildings: The University campus of 110 acres is located on the south side of Chicago between Washington and Jackson Parks, on the boulevard known as the Midway Plaisance The buildings on the Midway quadrangles number 87 and contain 46,890,000 cubic feet Since 1934, the University has spent approximately \$35,000,000 on new construction Dormitories 5 for men, 6 for women

Libraries Harper Memorial Library (1912). About 1,100,000 volumes in the University libraries, 80,000 governmental documents, 5,000 current periodicals. Special collections The American Bible Union Collection (Bibles and Commentaries), Atkinson Collection of American Drama, Nicholas Bacon Collection of Bacon family manuscripts, Baist Collection of Romance Philology, Balzac Collection, Boeckh Collection of Statistics, Burnham Collection of Astronomy, Charles R. Frank Collection of Anatomy and Physiology, Gunsaulus Collection of Early Printed Books, Hall Collection of Geology and Paleontology, Hengstenberg Library (Old Testament), Hirsch-Bernays Collection of German Literature, Emma B. Hodge Collection (The Reformation), George E. Hooker Collection (City Planning), Howard Collection (Matrimonial Institutions), Huber Collection of Music, Littlefield Collection of Early Textbooks, William Vaughn Moody Collection of American Literature, Spinoza Collection, Stensland Collection of Scandinavian Literature and History

The Walker Museum Mineralogical, Paleontological, and Geological collections Oriental Institute History and achievements of man in Egypt and Western Asia Yerkes Observatory Located at Williams Bay, Wisconsin, principal instrument a refracting telescope of 40 inches aperture

Requirements: For Admission Minimum of 12 senior high school units (10th, 11th,

and 12th grades) for admission to the College Admission on certificate granted only to graduates of fully accredited schools. Of the 12 units required, following sequences must be offered 1 major (3 units) and 2 minors (2 units each), or 4 minors (2 units each) selected from subjects which are ordinarily designated as academic. One of the 2 minors must be in English. The additional units may be selected from any secondary school subjects accepted by an approved school for its diploma. Only students whose academic work has been of good quality, and who present evidence of adequate mentality, seriousness of purpose, intellectual promise, and such personal characteristics as will make them desirable members of a college community, are admitted. For admission to graduate work in the divisions and the graduate professional schools, a degree from an approved college is required.

For Degree For a baccalaureate degree (A B, S B), a student must pass a comprehensive examination covering undergraduate work in the division (Senior College program). Through the graduate faculty, upon recommendation of the appropriate divisional or professional school faculty, the University confers the degrees of M A, M S, Ph D, and J S D, and through its professional schools, the degrees of B D, LL B, J D, and M D.

A Field Artillery Unit of the Reserve Officers Training Corps is supported and maintained by the joint efforts of the University and the U S government. Courses in the department are elective and are credited toward a bachelor's degree.

Men, 14, women, 30. University College, 3,207 Men, 956, women, 2,251. Total number of matriculants since foundation, 174,513.

Degrees: Conferred year ending June 30, 1935, 1,654. Total number of degrees conferred since foundation, 38,016. Total number of people receiving these degrees, 33,105. Bachelors', 22,629. Masters', 7,649. Doctor of Philosophy, 3,386. Professional D B, 492, LL B, 326, J D, 1,854, J S D, 8, M D., 1,672.

Fees: Registration fee, \$2, quarterly. Students who have already paid matriculation fee do not pay the registration fee. Graduation fee, \$20. College certificate, \$5.

Tuition fees, \$100 a quarter in all divisions and professional schools, except Law and Medicine (including Rush Medical College) in which the fee is \$125 a quarter. Fee in the University College, \$25 a major—a full credit course of one quarter. Students in laboratory courses are required to purchase adequate breakage and supply tickets, the cost varying with the type of course. Costs for room and meals vary from \$122 to \$351 per quarter. \$351 is cost of room and study in the new men's dormitories. Quarterly rentals for room alone range from \$40 to \$62. At International House, the new home for foreign students, room rates vary from \$50 to \$98 per quarter. Student expenses for year, exclusive of tuition, but including board and room. Low, \$465, high, \$1,140.

Scholarships. Honor entrance and prize scholarships are awarded to a limited number of students of high rank on the basis of recommendation from schools and competitive examinations. Honor scholarships also awarded to a limited number of students who have shown exceptional ability in the work of the first, second, and third years in the college. A number of privately endowed scholarships and fellowships are likewise maintained. The LaVerne Noyes Foundation, established 1918, provides tuition scholarships for veterans of the World War or their descendants. Application for Honor Entrance Scholarships should be made not later than April 15, for other scholarships not later than June 1. Applications for fellowships should be submitted not later than March 1.

Research funds allocated in varying amounts annually.

Employment bureau. About 70% of the students earn all or part of their expenses.

Dates of beginning and ending sessions. October 2, 1935, June 17, 1936.

Summer session. June 19 to August 30. Enrollment, 1935, 4,567.

University extension. Enrollment, 3,645 (correspondence).

Publications. Catalog and divisional catalogs annually. University press publishes *Astrophysical Journal*, *Botanical Gazette*, *Journal of Business*, *Classical Philology*,

International Journal of Ethics, *Journal of Geology*, *University of Chicago Law Review*, *Library Quarterly*, *Journal of Modern History*, *Modern Philology*, *Physiological Zoology*, *Journal of Political Economy*, *Journal of Religion*, *American Journal of Semitic Languages and Literatures*, *Social Service Review*, *American Journal of Sociology*, *Elementary School Journal*, *School Review*, and *English Journal*.

CINCINNATI, UNIVERSITY OF CINCINNATI, OHIO

Municipal university, coeducational, non-denominational.

Founded in 1870. In 1872 additional legislation enabled the city to issue bonds to provide a suitable building. In the meantime there was established the Academic Department, now the College of Liberal Arts. The city voted in 1893 to aid in the support of the University through public taxation, allowing three-tenths of a mill, and later fifty-five hundredths of a mill.

The College of Engineering, organized in 1900, became a distinct department in 1904. When the Clinical and Pathological School of the Cincinnati City Hospital was organized in 1887, it was affiliated with the University, being designated the Medical

Department In 1896 the Medical College of Ohio became the College of Medicine of the University, since then the Clinical and Pathological School has been known as the Department of Clinical Medicine. The Teachers College, 1905, Graduate School, 1906. In 1909 the Miami Medical College became an integral part of the University and the new College of Medicine of the University of Cincinnati was established. In 1917, under the new city charter, the medical work, teaching, and nursing in the Cincinnati General Hospital were placed under the direction of the board of directors of the University. In 1912, evening classes were established in the College of Liberal Arts. In 1912 the College of Commerce was organized, including evening classes, and in 1919 it was made a part of the College of Engineering. The title now is the College of Engineering and Commerce. In 1912, also, the Bureau of City Tests was established in the Engineering College in connection with the Department of Public Service of the city. In 1916 the Department of Hygiene and Physical Education was organized. In 1917 the Cincinnati Hospital Training School for Nurses was changed to the School of Nursing and Health, a department in the College of Medicine. In 1918 the Cincinnati Law School became the College of Law of the University. In 1922-23, the School of Applied Arts was organized. In 1924, the School of Household Administration was established.

Board of 9 directors appointed by the mayor, 1 each year, for a term of 9 years.

Finances. Endowment, \$9,260,259, income from endowment, \$366,560, income from other sources as follows: City tax, \$548,191, state and federal subsidies, \$48,091, gifts for current and capital purposes, \$225,856, tuitions and fees, \$835,830, auxiliary enterprises, \$271,733, sundry, \$10,403. Total annual expenditures, \$2,225,261. Total budget for 1935-36, \$2,172,355.

Grounds and Buildings. Value of grounds, (81 acres), \$150,780, present worth of buildings, \$6,115,483. Value of educational plant, \$8,519,850. Dormitory for 250 men

Library (1935) General library and branches, 312,078 volumes, College of Law library, 29,365, College of Medicine library, 15,870, School of Nursing and Health library, 2,295, observatory library, 5,701 volumes and 4,814 reprints and star charts, total, 370,123. Important libraries not a part of the University library are housed in the General Library Building and open for use by students and faculty. Historical and Philosophical Society of Ohio and the Municipal Reference Bureau, 97,989 volumes and pamphlets. Special collections: Architecture and Applied Arts (including Oriental art), 5,536 volumes, Chemistry (especially periodicals), 9,828 volumes, Classics, including Classic and Romance Philology and Modern Greek literature, 41,053 volumes, Incunabula, 28 volumes, Indians of North America, 1,000 volumes, Spanish-American Philology, 1,000 volumes, Shakespeare, 2,000 volumes.

Laboratories: Applied Physiology (1930), cost, \$131,055, equipment, \$48,417. Botany and Zoology (1932), \$358,460, \$49,071. Chemistry (1916), \$212,354, \$83,830. Engineering (1911), \$229,861, \$66,362. Old Tech (1902-09-16), \$66,676, \$20,074. Physics (1932), \$347,353, \$60,696. Swift Hall (1925), \$378,675, \$69,283. Tanners (1924), \$97,960, \$28,304. Medicine (1917), \$451,936, \$98,826.

Observatory (1873-1904-1922) Cost, \$40,726, equipment, \$34,644.

Admission Requirements: In the *College of Liberal Arts*. Each candidate for entrance must be at least 16 years of age and must present 15 units, including English, 3, Mathematics, 2, History, 1, Foreign Language, 2 units in 1 of these languages: Latin, Greek, French, Italian, German, Spanish, 4 or more units selected from English, Mathematics, Foreign Language, History, Physics, Chemistry, Zoology, Physiology, Botany, Physical Geography, Economics, and Astronomy. A grade of 80% or above in 8 of the 15 units, of which at least 5 grades must have been obtained in the last 2 years of high school work.

College of Engineering and Commerce

and School of Applied Arts Candidates for entrance must be at least 17 years of age, 15 units, including English, 3, Algebra, 1, Plane Geometry, 1, Solid Geometry, $\frac{1}{2}$ (not required for Business Administration or Applied Arts, except Architecture), History, 1, $5\frac{1}{2}$ units from English, Mathematics, Language, History, Physics, Chemistry, Zoology, Botany, Physical Geography, Commercial Geography, Astronomy, or Physiology A grade of 70% or above is required

Teachers College Candidates must have completed 2 years of acceptable college work (i.e., a minimum of 60 credit hours and 60 quality points, including 6 semester hours in General and Education Psychology) in a college of liberal arts

College of Medicine A formal application accompanied by an official transcript of the high school and college records 3 years of college work of not less than 90 semester hours (completed in a college of satisfactory standing) 2 recommendations of character and ability A recent photograph, a certificate of successful vaccination, a certificate issued by the Ohio State Medical Board of Examiners

Candidates for the degree of LL.B. in the *College of Law* must have taken at least 2 years' work (60 credits exclusive of Military Science, Physical Education, or Hygiene) in a college of liberal arts or sciences at some approved university Before registering, they must forward their credentials showing the above credits

School of Household Administration Candidates must be at least 16 and offer 15 units, distributed as follows English, 3, Algebra, 1, Plane Geometry, 1, History, 1, 6 or more additional from English, Mathematics, Foreign Language, History, Physics, Chemistry, Zoology, Physiology, Botany, Physical Geography, Economics, or Astronomy The remaining 3 units constitute a "free margin"

To become a candidate for the diploma of Graduate Nurse in the *School of Nursing and Health*, a student must be between the ages of 18 and 30, satisfy the school physician as to physical fitness, present a certi-

ficate of high school graduation meeting all college entrance requirements, and an entrance certificate required and issued by the State Medical Board, Nurse Registration Committee, Columbus, Ohio

Admission to the *Graduate School of Arts and Sciences* is granted to holders of a bachelor's degree from an accredited institution

Degree Requirements. *Degrees of M.A. and M.S.* A year of graduate study, thesis, oral or written comprehensive examination. The graduate faculty may, upon recommendation of the departments, accept work done in residence in other qualified universities, but the last half year must be in residence at this University For the doctor's degree, 3 years of graduate study The final third of the total work required must be done at the University of Cincinnati Each candidate must show a reading knowledge of 2 modern languages other than English, 1 of which shall be either French or German as determined by his major department, at least 1 year before receiving the degree Printed thesis, oral examination

For B.A. 20 courses and the prescribed work in Physical Education Of the 10 courses normally taken in the freshman-sophomore years, from 6 to 9 must be selected from prescribed groups, the exact number depending upon the student's preparation and the extent to which he continues high school subjects in college, and from 4 to 1 must be selected from a group designated as fundamental to his future major Of the 10 courses normally taken in the junior-senior years, 6 must be chosen under the direction of the student's adviser in the major group of studies, and 4 are electives An average of at least C, which will be computed in terms of quality points 1 year of gymnasium work, or, if the student prefers, 1 year of training in the National Guard The passing of a comprehensive examination in the student's field of concentration (unless such an examination is not given) At least the last year of work required for the degree must be spent in residence at the University of Cincinnati If, however, the student has already spent

3 years in residence at the University, and if he has completed his quality point requirement and lacks not more than 1 course (or 2 half-courses) towards his degree, he may secure this course (or these half-courses) elsewhere, provided the courses and the institution attended be approved beforehand by the Committee on Advanced Standing and by the heads of the departments in which he plans to pursue work.

College of Engineering and Commerce

The curriculum for the first year of the cooperative course in all branches of engineering is uniform, including Mathematics, Mechanics, General Inorganic Chemistry, and Engineering Drawing. The second year is nearly uniform, including Mathematics, Mechanics, Engineering Drawing, Physics, and Metallurgy, with some introduction to technical subjects in the departments. In the third, fourth, and fifth years, the curriculum comprises the technical studies appropriate to each major department. All cooperative courses require 5 years of 11 months each for completion. During half of this time, at regularly alternating periods, the student attends the University for instruction, while the other half of his time is spent in selected factories where he obtains the necessary practical experience under actual industrial conditions. The following engineering courses are offered: Aeronautical Engineering, 343 credit hours, including 80 hours of summer work, required for the Degree of Aeronautical Engineer, Chemical Engineering (Industrial Chemistry and Metallurgy options), 370 credit hours, including 102 hours of summer work, required for the Degree of Chemical Engineer, Civil Engineering (Municipal Option), 347 credit hours, including 84 hours of summer work, required for the Degree of Civil Engineer, Commercial Engineering, 363 credit hours, including 92 hours of summer work, required for the Degree of Commercial Engineer, Electrical Engineering, 351 credit hours, including 85 hours of summer work, required for the Degree of Electrical Engineer, Geological Engineering, 355 credit hours, including 64 hours of summer work, required for the

Degree of Geological Engineer, Mechanical Engineering, 339 credit hours, including 80 hours of summer work, required for the Degree of Mechanical Engineer. Students desiring to take graduate work leading to the master's degree in engineering may make special arrangement of their work during the fifth and sixth years deferring certain of their senior subjects to the sixth year and devoting additional time to thesis work. The course in Business Administration is on the 5-year cooperative basis and is open to both men and women. 326 credit hours, including 91 hours of summer work, required of men for the degree of Bachelor of Business Administration, 342 credit hours, including 87 hours of summer work, required of women for the degree of Bachelor of Business Administration.

School of Applied Arts The work of the first 2 years is composed largely of fundamental courses: Principles of Architecture, Ancient Mediaeval and Renaissance History, Ancient Mediaeval and Renaissance Arts, Ancient Mediaeval and Renaissance Literature, French, Principles of Design, Freehand Drawing, Water-Color Sketching, Modeling, and Ceramics. The latter years are devoted chiefly to professional courses in the various fields. The courses are open to both men and women. The courses for men are on the cooperative basis throughout the 5 years. Women students may elect to take courses on the 4-year full-time or the 5-year cooperative basis. The following courses are offered: (1) Architecture, 302 credit hours, including 69 hours of summer work, required for the degree of Bachelor of Science in Architecture. (2) Landscape Architecture, 5-year cooperative plan, 272 credit hours, including 63 hours of summer work, 4-year full-time plan, 191 credit hours, including 28 hours of summer work, both courses leading to the degree of Bachelor of Science in Landscape Architecture. (3) Art in Industry (majors in Ceramics, Interior Decoration, Costume Design, Teaching of Art, General Art, and courses for students with special interests), 5-year cooperative plan, 240 credit hours, including 52 hours of summer work, 4-year full-time

plan, 162 hours, required for the degree of Bachelor of Science in Applied Arts

Teachers College 2 years of Liberal Arts work The professional programs are arranged around a core of educational courses, and, in general, no special program is permitted to vary from the educational constant herein set up With the completion of any 1 of the 3-year professional courses in a satisfactory manner, the student is awarded the degree of Bachelor of Education in his chosen teaching field If the student desires, he may receive according to his program of study the degree of B A , or the degree of B S in Education in a special field upon completing the first 2 years of his professional curriculum

College of Medicine The student must possess a medical student's entrance certificate issued by the Ohio State Medical Board He must be in residence in this college during the last 2 years of the course, and in this or other medical college recognized by the University of Cincinnati for a total of at least 4 years He must have attended at least 80% of the scheduled assignments in each required course, and have attained a grade of at least C (75-79) in each of the required courses He must have attained an average grade of at least 30% B's (80-90) in terms of credit hours in the combined courses of the junior and senior years On successful completion of the first 4 years of work in this college, the student will be recommended to the board of directors of the University for the degree of Bachelor of Medicine On successful completion of the fifth year, consisting of a year's service in a hospital, scientific laboratory, or in a field of public health, the student will be recommended to the board of directors of the University for the degree of Doctor of Medicine Additional requirements are specified in the bulletin of announcement of courses

School of Nursing and Health For the degree of B S and the diploma of Graduate Nurse Completion of Pre-Nursing or Post-Nursing course of 2 years in the College of Liberal Arts Completion of diploma course of study, 72 hours including clinical

experience A diploma of Graduate Nurse is given to those approved candidates who have fulfilled the entrance requirements and have completed the 72 credit hours described in the plan which includes clinical experience, together with the theoretical work

School of Household Administration B S conferred at the end of the fourth year upon those students who have completed satisfactorily the work scheduled under the respective curricula

The *degree of LL B* is conferred upon students who, having satisfied the entrance requirements of candidates for the degree, have studied Law for a period of at least 3 academic years, and passed examinations with an average of C in the required subjects and in enough elective subjects to make an aggregate of 82 semester hours credit

THE CITADEL

THE MILITARY COLLEGE OF
SOUTH CAROLINA

CHARLESTON, SOUTH CAROLINA

College of arts and sciences for men, state supported

Founded in 1842 in conjunction with the Arsenal Academy in Columbia, South Carolina, as a military training school for young men Discontinued in 1865 at the close of the War Between the States, the barracks in Charleston being occupied by federal troops The property was recovered by the state in 1881 and The Citadel reopened the

following year In 1910 the name of the institution was officially changed from The South Carolina Military Academy to The Citadel, The Military College of South Carolina Moved to its present location in 1922.

Organization Board of 7 visitors elected by the legislature for terms of 6 years and 5 members ex-officio, the governor, adjutant-general, superintendent of education, the chairmen of the military committees of house and senate The elective members are limited to graduates of the College The president, under the board of visitors, is in control of the immediate government of the College There is an administrative staff consisting of the commandant of cadets, the assistant commandant of cadets, the surgeon, the quartermaster, the adjutant, the registrar, and the director of cadet affairs The student body is designated as The South Carolina Corps of Cadets

Finances. Financial statement for year ending June 30, 1935, shows receipts of \$368,703 15 and disbursements of \$368,303 06 The state appropriation for the same fiscal period was \$121,175

Grounds and Buildings. The present site of The Citadel is a tract of 173 acres valued at \$900,000 The inventory of buildings and equipment shows a value of \$1,809,429 The 2 barracks afford accommodation for 750 cadets Other buildings are Bond Hall (academic building, 1931), Alumni Hall (gymnasium, 1923), Mary Bennett Murray Hospital (1923), Mess Hall, Laundry, and Officers' Quarters

Library The library, located in Bond Hall, contains 14,000 volumes 108 current periodicals are received The Charleston Library, containing early newspaper files and Americana, is accessible to students, as is also the Public Library of the city

Laboratories Civil Engineering, Electrical Engineering, Physics, Chemistry, and Biology

Requirements: For Admission. (1) Completion of 4-year high school course; (2) 15 units including 3 in English, 2½ or 3 in Mathematics, and 1 in History For admission to the freshman class applicants

must be not less than 16 nor more than 21 years of age

For Degree Minimum residence of 2 years Quantitative requirements for the bachelor's degree vary somewhat according to the major elective—the minimum is 140 semester hour credits including 20 semester hours in Military Science and Tactics The course of study for the freshman year is largely prescribed

General All students are required to live in barracks and are subject to military regulations Physical Training and drill required of all Daily chapel services and religious services on Sunday morning attended by the corps Definite restrictions as to leaves of absence

Departments and Staff Military Department *Professors*, 1, *associate professors*, 2, *assistant professors*, 4, *instructors*, 0 English 1, 1, 4, 0 Chemistry 1, 1, 3, 0 Physics 1, 1, 1, 0 Civil Engineering 2, 0, 1, 1 Mathematics 1, 1, 3, 0 History 1, 1, 2, 0 Modern Languages 1, 1, 1, 0 Business Administration 1, 1, 3, 0 Education 1, 1, 0, 0

Enrollment For 1934-35, 560 Total number of matriculants since foundation, 7,456

Degrees. Conferred year ending June 30, 1935, 94 B A, 18, B S, 75, C E, 1 Total number of degrees conferred since foundation, 2,317

Fees. Expenses for the 9-months' session are Board, \$162, room, heat, light, laundry, etc., \$72, uniforms (first year), \$140, books, and fees, \$50, tuition, \$60 to residents of the State of South Carolina, \$150 to nonresidents Total for South Carolina cadets, \$484, for out-of-state cadets, \$574

Scholarships. The City of Charleston gives 6 scholarships of a value of \$250 a year each 8 other scholarships cover all expenses There are 2 endowed scholarships paying about half of the expenses

There is very little opportunity for students to earn any part of their expenses

Session begins the second week in September and ends the first week in June A furlough of about 12 days is granted at

Christmas, and at Easter a furlough of 6 days

Annual catalog in June

A revision of the curriculum was effected during the year ending June 30, 1935, resulting in a marked improvement in the offerings of the various departments and in the adequacy of preparation for graduate work

Administrative Officers: *President*, General C P Summerall, *Commandant*, Lieut Colonel Jesse Gaston, *Quartermaster*, Colonel E M Tiller, *Adjutant*, Lieut Colonel John Anderson, *Registrar*, Lieut Colonel L A Prouty

CITY OF NEW YORK, COLLEGE OF THE NEW YORK CITY, NEW YORK

The College of the City of New York is the corporate name or designation of all public collegiate education maintained by the City of New York. This educational corporation is administered by the Board of Higher Education of the City of New York (created by legislation in 1926), made up of 22 residents of the city, appointed to office by the mayor. The board is non-political and has by law independent and full authority over all academic, technical, and professional education leading to degrees and maintained by public funds in the City of New York. The college bears to the city a relationship similar to that which a state university bears to a state. Tax support is guaranteed by law and the institution also derives income from student fees for certain special and professional courses of study. The institution includes 3 collegiate units, each with its own president, namely, (a) The City College, (b) Hunter College, and (c) Brooklyn College.

Founded in 1847 by the act of the legislature, which referred to the people of the City of New York the question as to whether or not the public school system should be extended by the addition of an institution of academic or collegiate grade. The people approved the idea of extending

the common schools upward, and the board of education of the city thereupon established what was called The Free Academy. Students admitted in 1849. Powers to grant degrees conferred in 1853. Subsequently called The College of the City of New York. In 1926 legislation drafted by President Robinson created a Board of Higher Education which absorbed the trustees of Hunter College and representatives from the Borough of Brooklyn. Pursuant to this legislation Hunter College was included in the general organization of The College of the City of New York. A Brooklyn Collegiate Center was established under President Robinson's supervision, but was later given its own president and faculty and the title of Brooklyn College. (For details concerning Hunter College and Brooklyn College see statements under those names in this work.) In 1929 the Board of Higher Education took over completely the powers of the former independent governing boards of the old College of the City of New York and the old Hunter College of the City of New York. The rest of this description refers only to The City College.

Academic organization. The City College, presided over by its president, includes (a) the College of Liberal Arts and Science, with its own dean and faculty and with 4-year courses leading to the degrees B A, B S, and B S in Social Science, (b) the School of Business and Civic Administration, with its own dean and faculty and with a 4-year course leading to the degree Bachelor of Business Administration, and a 5-year course leading to the degree Master of Business Administration. There are also short courses leading to diplomas and certificates in special fields of business endeavor, (c) the School of Technology, with its own dean and faculty and with a 4-year course leading to the degree B S in Engineering and 5-year courses leading to the degrees Civil Engineer, Electrical Engineer, Mechanical Engineer, and Chemical Engineer, (d) the School of Education, with its own dean and faculty and with a 4-year course leading to the degree B S in Education, a graduate course leading to the

degree M S in Education, and numerous special courses leading to special teacher diplomas and certificates

The College has a day session, an afternoon division, and an evening session, the first being for full-time students, the other 2 for part-time students. In addition it has an 8-week summer session. Men only are admitted to the College of Liberal Arts and Science, both men and women to the other schools.

The College also conducts a preparatory high school for boys known as Townsend Harris High School, with a curriculum especially prepared for selected students who, upon entrance, have determined definitely to prepare for college entrance.

Finances: The total appropriation from public taxation for 1936 for The City College was \$3,799,006.15. The total income from fees was approximately \$300,000. The sum of these represents approximately the total budget for the year.

Grounds and Buildings: On Washington Heights, a group in scholastic Gothic style, consisting of the Main Building, Townsend Harris Hall, Compton Hall, the Technology Building, the Chemistry Building, the Gymnasium, Library, Stadium and Field. The features of the Main Building are the tall tower, and the Great Hall with its mural decoration by Blashfield and its organ by Skinner. The Gymnasium is modern and thoroughly equipped, as are also the laboratories of the various science departments and the School of Technology. The first unit of the Library is completed and it is expected that the whole library will soon be finished. The new Technology Building was finished in 1931.

Besides this main group of buildings, there is a 16-story building on the original home of the College at the corner of twenty-third Street and Lexington Avenue. This building covers a quarter of a city block and is equipped with a theatre auditorium, a library, gymnasium, swimming pool, science laboratories, and lecture and classrooms. The first half was completed in 1928 and the second half in 1930.

Library 178,769 volumes and 715 cur-

rent periodicals. Special collections, such as the Simon Newcomb Library for Physics, the Simon Newcomb Library for Mathematics, the Wolcott Gibbs Library for Chemistry, the Germanic Library, the Romance Languages Library, and the Classical Library.

Museums: The Historical Museum of the College is rich in the field of the American Revolution and in local history. The College also has a Natural History Museum and an Observatory.

Requirements: For Admission Liberal Arts 15 units, including English, 3, American History, 1, Foreign Languages, 5, Mathematics, 2½. Persons offering a full quantity of admission units but not having the prescribed distribution are required immediately to pursue courses which will fulfill the full requirements. For the degrees A B, B S, and B S S 128 credits. In lecture and recitation subjects, normally 1 credit means a recitation a week and 1½ or 2 hours of outside preparation. Prescribed credits for B A, 79, for B S, 84, for B S S, 84. Attendance at assemblies is required for freshmen.

Departments and Staff: Art *Professors*, 1, *associate professors*, 2, *assistant professors*, 0, *instructors and others*, 3. Biology 3, 1, 4, 28. Chemistry 5, 4, 4, 42. Classical Languages 4, 2, 3, 0. Drafting 2, 0, 1, 12. Economics 2, 1, 6, 22. Education 2, 5, 3, 17. Engineering 2, 4, 4, 24. English 4, 4, 5, 28. Geology 0, 1, 0, 3. German 1, 0, 4, 9. Government and Sociology 1, 1, 1, 10. History 3, 2, 3, 17. Hygiene 2, 2, 2, 59. Mathematics 4, 4, 5, 20. Military Science and Tactics 1, 0, 2, 3. Philosophy and Psychology 2, 1, 0, 9. Physics 1, 1, 4, 31. Public Speaking 0, 1, 1, 23. Romance Languages 3, 4, 5, 24. Special courses 0, 0, 0, 5.

Enrollment: For the year ending June 1935 Day session, 9,142, afternoon session, 3,961, evening session, 15,670, summer session, 5,310, preparatory high school, 1,490.

Degrees. Conferred at Commencement, June 1935, 1,782. Men, 1,652, women, 130. B A, 208, B S, 487, B S S, 265, B S in Eng, 119, B S in Ed, 110, B.B A,

347, M S in Ed, 157, M B A, 13, Ch E, 25, C E, 30, E E, 15, M E, 6 There were also conferred 199 diplomas (not degrees) and special certificates, chiefly in the School of Business Total number of degrees conferred since foundation, 19,496

Fees: Matriculated undergraduate students in all branches of the College receive instruction free of charge except in certain courses of advanced and special or technical character Tuition fees for such courses are charged in general at the rate of \$5 per credit Graduate students are required to pay a fee of \$5 per credit for regular courses and stated fees for special courses Non-matriculated students over the age of 21, admitted primarily in the evening session, may pursue courses for which they are qualified, without college credit, upon payment of fees charged at the same rate as graduate students Government employees who do not qualify as matriculated students are admitted as non-matriculated students upon payment of half the normal fees unless they take special courses, in which case they pay the special, stated fees

The College has a Bureau of Personnel, which makes studies in intelligence, special aptitude, and emotional reactions and seeks to make a sociological survey This department undertakes to get a mental picture as thorough as the physical picture obtained by the Department of Hygiene The findings of these 2 departments are used in dealing with students as they proceed with their college courses

There is a Bureau of Vocational Guidance and of Placement designed to adjust students to their life work

University extension Evening session offers courses in School of Liberal Arts and Science, in School of Business, in School of Technology, and in School of Education. Both matriculated and non-matriculated students are offered instruction, and all courses are open to both men and women As part of a program of adult education, there is an arrangement whereby graduates of both day and evening high school may go on with general or special studies in the

evening college The curriculum includes not only regular degree courses, but also special and short courses to meet special needs The School of Education offers courses in the afternoon to teachers and to students of Education

Register published in January Bulletin published in April, a reprint from the Register, giving the history of the College, the requirements for admission, and the announcement of courses.

CLAREMONT COLLEGES

See also Pomona College and Scripps College

CLAREMONT, CALIFORNIA

The name Claremont College is used with 2 connotations It refers to a legal corporation which serves a group of colleges in such a manner as may be mutually arranged This corporation has its own educational powers, which includes the administration of graduate work for the group, but its particular function is to coordinate, supplement, and serve the cooperative life of a group of small colleges which includes besides the legal corporation just mentioned, Pomona College (q v), Scripps College (q v), and by working agreement, LaVerne College

Organized in 1925

Self-perpetuating board of 11 fellows

Finances: (*See also* Pomona and Scripps Colleges) Endowment, \$741,915 16, income from endowment, 1934-35, \$30,687.30, other income, 1934-35, \$56,792 35 Total budget expenditures, 1934-35, \$95,000 33. Budget, 1935-36, \$72,260

Grounds and Buildings: Grounds

approximately 90 acres, valued at \$231,681 33, buildings, \$839,197 54

Library (*See also* Pomona College and Scripps College)

In Harper Hall (1932), joint administration and library building Volumes, 19,707

Collections Book-arts and book-history, Education, industries and resources of Southern California (especially water, citrus fruits, and petroleum), Oriental library, Philosophy (including the library of the late Professor Paul Hensel, Erlangen) Library publications Claremont Library Series (3 numbers issued 1932-35) This library is the purchasing and cataloging office for the Claremont group of college libraries (Pomona, Scripps and Claremont), in addition to being the graduate library for the group Laboratories (*See* Pomona College)

Museum The colleges have united in a common museum The exhibits particularly emphasize pioneer and Indian material of the Southwest

Observatory (*See* Pomona College)

Requirements: For Admission B A degree.

For Degree For M A Collegiate residence, and at least 6 graduate seminars of work For Ph D Requirements are individual in each case

General Ability to pursue graduate work successfully

Departments and Staff: Department of Education (Graduate School), also full professors and associate professors of Pomona and Scripps Colleges (q v)

Enrollment: For the year ending June 30, 1935, 138 Men, 70, women, 68

Degrees: 46 M A degrees conferred year ending June 30, 1935 209 M A degrees conferred since foundation

Fees: Tuition in Graduate School, \$150 per semester, \$50 per seminar or \$15 per hour where work is taken on course basis Master's examination fee, \$25

Scholarships: For 1935-36, 8 scholarships of \$250 each (closed May 10, 1935)

Employment bureau Teacher placement bureau for graduates of Claremont, Pomona, and Scripps Colleges

Dates of opening and closing September 20, 1935, June 6, 1936

Summer session June 24 to August 2, 1935 Enrollment, 339 students

Bulletin issued 4 times each year

Administrative Officers: *Acting President*, William S Ament, *Secretary of the Faculty and Recorder*, Peter L Spencer, *Chairman*, Graduate Study Committee, W Henry Cooke

CLARK UNIVERSITY WORCESTER, MASSACHUSETTS

University for men and women, privately controlled

Founded by Jonas Gilman Clark, chartered in 1887, graduate division established 1889

Board of 8 trustees University consists of Undergraduate Division, Graduate Division, School of Geography

Grounds and Buildings. Campus of 8 acres Dormitory primarily for freshmen (50)

Library (1903) 151,887 volumes, 500 current periodicals

Science Hall (1889)

Requirements: For Admission For college, 15 units, including Mathematics, 2, more than 1 in Foreign Language Commercial subjects must not exceed 3 units 2 units of conditions allowed, must be removed during freshman year For Graduate Division Graduates of colleges on approved list of Secretary of Graduate Board

For Degree For bachelor's degree All college regulations involving a statement of credit are expressed in terms of courses instead of semester hours Minimum residence of 3 academic years Completion of 20 courses (in addition to required work in Physical Training), which must include (a) Major of not less than 4 courses, (b) minor of not less than 3 courses, (c) requirement, depending on major, 1 course, (d) English, 2 courses, (e) Foreign Language, not more than 5 courses nor less than 1 course, (f) Division A, 2

courses, (g) Division B, 2 courses. In Divisions A and B, for students whose admission record included 2 or 3 units of History, Natural Sciences or related subjects, 2 courses. For students admitted with less than 2 units in this field, requirement is 3 courses. For students admitted with 4 or more units in this field, requirement reduced to 1 course, (h) Appreciation of the Fine Arts, required before end of second year. Physical Training, 3 hours a week throughout 3 years.

For master's degree (1) 1 year full-time work or its equivalent (2) Minimum of 18 semester hours in addition to research. Half of the courses should be devoted to major subject and one-third to minor (3) Examination in courses presented for credit. Final oral examination (4) Thesis.

For Ph D (1) 2 years' full-time work in residence beyond requirements for master's degree (2) Curriculum endorsed by major department (3) Preliminary examination in major and minor subject 1 year before receiving degree. Examinations in at least 2 Foreign Languages, generally French and German. Final oral examination in major and minors (4) Dissertation.

College requirements. Physical Training required of all students. Freshmen not living in own homes required to room in Estabrook Hall. Undergraduates not living in their own homes required to board at dining hall.

Departments and Staff. Ancient Languages. *Professors*, 1, *associate professors*, 0, *assistant professors*, 0, *instructors*, 0. Biology 1, 1, 1, 1. Chemistry 2, 1, 0, 0. Economics and Sociology 1, 2, 1, 0. English 2, 1, 0, 1. Geography 4, 1, 1, 0. Geology 1, 0, 0, 0. German 0, 1, 1, 0. History and International Relations 1, 2, 1, 0. Mathematics 1, 2, 0, 0. Physics 1, 1, 1, 0. Psychology 2, 1, 1, 0. Romance Languages 1, 0, 1, 0.

Enrollment: For year ending June 30, 1935, 571 Undergraduates, 304, graduates, 85, special students, 27, extension, 155.

Degrees: Conferred year ending June 30, 1935, 75. Total number of degrees conferred since foundation, 2,593, honorary, 44,

Ph D, 393, A M, 806, A B., 1,216, B Ed., 134.

Fees: Tuition, \$200 a year, matriculation, \$5, graduation, bachelor, \$5, master, \$10, doctor, \$25, laboratory, \$5 a semester, board, \$7.50 a week in dining hall, dormitory rent, \$115 to \$150, breakage deposit in Chemistry, \$10 for undergraduates, \$25 for graduates.

Scholarships: 53 undergraduate scholarships. Several loan funds. Scholarships and fellowships for graduate students.

Dates of beginning and ending sessions. September 24, 1935, June 8, 1936.

Summer session. July 1 to August 9, 1935. 5 departments offered courses. Attendance, 1935, 169.

University extension. Home study courses in Geography.

Catalog in February.

Administrative Officers. *President*, W. W. Atwood, *Dean*, H. P. Little, *Director*, Summer School, R. S. Illingworth, *Director*, Home Study Department, absent on leave, *Recorder*, Mrs. L. P. Colby.

CLARKE COLLEGE

DUBUQUE, IOWA

A standard college of arts and sciences for women, conducted by the Sisters of Charity, B. V. M.

Founded in 1843 as an academy, college opened in 1901. Since 1927 only college students received.

Finances. Endowment, \$228,850, income from endowment, \$8,987.40, income from other sources, \$22,000, contributed services, \$60,000.

Grounds and Buildings. Total value of grounds (63 acres), \$75,000, total present worth of buildings, \$1,500,000, total present worth of grounds, buildings, and equipment, \$1,875,000.

Library 17,000 volumes, 1,000 pamphlets.

Laboratories. Science Hall, Home Economics laboratories.

Requirements: For Admission. 15 units, including English, 3, Mathematics, 2, History, 1, Science, 1 Conditions allowed

For Degree For B A degree 120 semester hours, 180 grade points First 2 years prescribed Major, 30 to 40 hours of progressive work Minor, 18 hours

Departments and Staff: American History *Professors*, 1, *assistant professors*, 0 Biology 2, 1 Chemistry 1, 0 Commerce 2, 1 Dramatic Art 1, 0 Education 2, 2 English 3, 2 French 1, 1 Geography and Geology 1, 0 German 1, 0 Greek 1, 0 History 3, 1 Home Economics 2, 0 Journalism 1, 0 Latin 1, 0 Library Science 1, 1 Mathematics 1, 1 Music 3, 2 Philosophy 2, 0 Physics 1, 0 Physical Education 2, 2 Plastic Arts 2, 0 Political Science 1, 0 Social Science 1, 0 Spanish 1, 0

Enrollment: For year ending June 6, 1935, 376

Fees: Tuition, \$75 a semester, matriculation, \$10, other general fees, \$50 a year Annual expenses, \$600 to \$700

Dates of beginning and ending sessions September 17, 1934, June 6, 1935

Administrative Officers: *President*, Sister Mary Antonia Durkin, *Dean of Studies*, Sister Mary Richard Bordeaux, *Dean of Women*, Sister Mary Josephine Malone, *Registrar*, Sister Mary Christella Dee, *Treasurer*, Sister Mary Rosalita Gerwe

CLARKSON COLLEGE OF TECHNOLOGY

POTSDAM, NEW YORK

College for Engineering and Business Administration, men only, privately controlled

Founded in 1896, opened in 1896 Founded by the Misses Frederica, Lavinia, and Elizabeth Clarkson, in memory of their brother, Thomas S Clarkson

Board of trustees Original number, 7, present number, 14 Membership is for life New members chosen by present members

Finances: Endowment, \$1,525,200 78, as of June 30, 1935, income from endowment, 1934-35, \$36,403 66, income from other sources, 1934-35, \$86,803 45 Total expenditures, 1934-35, \$129,915 53 Budget for 1935-36, \$128,500

Grounds and Buildings: Total value of grounds (625 acres), \$41,700, total present worth of buildings, \$365,807

Dormitory Woodstock Club, for 25 men Library Part of main college building (1896), volumes, 9,750, periodicals, 46

Laboratories Main college buildings houses laboratories of Chemistry, Electrical, Mechanical, and Chemical Engineering, Physics, Hydraulics

Requirements. For Admission For Engineering 15 units including 3 units of Mathematics, 3 of English For Business Administration 15 units, including 2½ units of Mathematics, 3 of English Conditions Intermediate Algebra and Solid Geometry, for Engineers, Intermediate Algebra for Business Administration To be removed during freshman year

For Degree 1 year in residence 144 semester hours for Engineers 140 semester hours for Business Administration 144 honor points for both Engineering and B A At least 50% of the prescribed work is concentrated in 1 department

General Students live in private homes or fraternity houses All students are required to take 2 years of Physical Training, 3 hours a week, or participate in glee club or band

Departments and Staff. Business Administration *Professors*, 1, *associate professors*, 0, *assistant professors*, 0, *instructors*, 1 Chemical Engineering 1, 0, 1, 0 Civil Engineering 1, 1, 2, 1 Electrical Engineering 1, 1, 1, 1 Industrial Engineering 1, 0, 0, 1 Mechanical Engineering 1, 1, 2, 0 Chemistry 1, 1, 0, 1 Physics 2, 0, 0, 1 Mathematics 1, 0, 1, 1 English and Social Science 1, 0, 0, 0

Enrollment: For year 1934-35, 346 Total matriculants since foundation, 4,643

Degrees: Conferred June, 1935, 73 Bachelor of Business Administration, 6, Bachelor of Chemical Engineering, 8,

Bachelor of Science in Chemistry, 1, Bachelor of Civil Engineering, 15, Bachelor of Electrical Engineering, 16, Bachelor of Industrial Engineering, 1, Bachelor of Mechanical Engineering, 22, Electrical Engineer, 1, Mechanical Engineer, 1, M S, 2 Total number of degrees conferred since foundation, 1,206

Fees: Tuition, \$250 a year, matriculation fee, \$5, graduation fee, \$10, athletic fee, \$20, engineering assembly tax, \$10, gymnasium and laboratory fees, \$10 Board and room, \$250 to \$400 Total annual expense High, \$800, low, \$550

Scholarships: Arranged individually by the president

College Office acts as employment bureau for students requesting part-time work 1934-35, probably about 50% of students earned all or part of their expenses

Dates of sessions September 17 to February 2, February 6 to June 8, 1935

Catalog in April

Administrative Officers *President*, James Shelby Thomas, *Dean*, Administration, John A. Ross, Jr., *Dean*, Engineering, Frederick Charles Wilson, *Registrar*, F. A. Ramsdell

CLEMSON AGRICULTURAL COLLEGE OF SOUTH CAROLINA

CLEMSON COLLEGE, SOUTH CAROLINA

State college for men, non-denominational

Founded in 1889, when General Assembly of South Carolina accepted the terms of the will of Thomas G. Clemson who left his estate to found an agricultural college. College opened in 1893

Board of trustees of 7 life members and 6 elected by the general assembly

Finances: Endowment, \$58,539, income from endowment, \$3,512.36 Income from other sources Interest on land script, \$5,754, appropriation from South Carolina legislature, \$85,000, privilege, fertilizer tag tax, \$153,000, Morrill Nelson Fund, \$25,000,

tuition, rents, \$133,902.01 Total annual expenditures year ending June 30, 1935, \$406,207.75 Budget, 1935-36, \$406,000

Grounds and Buildings: Value of grounds, \$313,420, present worth of buildings, \$2,043,797, total value of grounds, buildings, and equipment, \$3,239,458

Library Volumes in library, 42,903 (includes bound periodicals, government and state publications)

Requirements: For Admission 15 units of which 3 must be in English, 2½ in Mathematics, and 2 in History

For Degree Semester hours Agriculture, 136, Agricultural Engineering, 135, Chemistry, 137, Civil Engineering, 151½, Electrical Engineering, 146½, Mechanical Engineering, 147, Architecture, 161, General Science, 145½, Textile Engineering, 145½, Textile Chemistry, 145, Weaving and Designing, 145½, Vocational Agricultural Education, 136, Industrial Education, 140 Semester hours listed include prescribed courses and 14 semester hours of free electives 50% of credits must be above grade D Minimum residence of 1 year required for degree

Departments and Staff School of Agriculture Professors, 12, associate professors, 7, assistant professors, 6, instructors, 3, graduate assistants, 0 Chemistry 5, 2, 1, 0, 2 Engineering 7, 6, 8, 0, 1 General Science 10, 4, 7, 1, 0 Textiles 3, 2, 1, 4, 1 Vocational Education 2, 3, 2, 1, 0 Military Science 1, 0, 5, 1, 0

Enrollment: For the regular session, 1934-35, 1,262 Matriculants since foundation, 14,340

Degrees. Conferred year ending June 30, 1935, 170 Degrees conferred since foundation, 4,097

Fees. Fees for the 1934-35 session \$48.25 including matriculation, student medical service, laboratory work, dormitory upkeep, institutional incidentals, and student activities, \$175.40 for living expenses, including board, laundry, heat, light, and water, \$60 tuition for state students (\$150 out-of-state)

Dates of beginning and ending sessions September 11, 1935, June 2, 1936

Summer session, 1935 Regular enrollment in courses, 479, total enrollment in various phases of summer instruction, 1,345

Catalog in January, President's Report in December

Administrative Officers: *President*, Enoch W Sikes, *Registrar*, G E Metz, *Business Manager*, J C Littlejohn, *Commandant*, R John West, *Treasurer*, S W Evans, *Surgeon*, L W Milford, *Acting Dean*, School of Agriculture and *Acting Director*, Experiment Station, R A McGinty, *Dean*, School of Chemistry, F H H Calhoun, *Dean*, School of General Science, D W Daniel, *Dean*, School of Engineering, S B Earle, *Dean*, School of Vocational Education, W H Washington, *Dean*, School of Textiles, H H Willis, *Professor*, Military Science and Tactics, T S Moorman, *Director*, Extension, D W Watkins, *Secretary*, Board of Fertilizer Control, J H Woodward, *Director*, Livestock Sanitary Work, W K Lewis, *Librarian*, Cornelia A Graham

COE COLLEGE

CEDAR RAPIDS, IOWA

Coeducational, liberal arts college, privately controlled, affiliated with the Presbyterian Church

Chartered in 1881 From 1851 to 1881 known successively as Cedar Rapids Collegiate Institute, Parsons Seminary, and Coe Collegiate Institute Named in honor of Daniel Coe of Durham, New York, who donated \$1,500 for the purchase of a site In 1919 Leander Clark College of Toledo, Iowa, was consolidated with Coe College

Self-perpetuating board of 30 trustees, 10 elected each year for a 3-year period

Finances: Endowment, \$1,700,000, income from endowment, \$66,479, income from other sources, \$236,451 Expenditures for 1934-35, \$302,629 41 Budget for 1935-36, \$296,710

Grounds and Buildings: Campus, 22 acres with 10 buildings Present worth of buildings and grounds, \$1,193,730 57 Residence hall for women, capacity, 156.

Library (1931) 49,000 volumes, 205 current periodicals

Laboratories Carnegie Science Hall (1910) contains all lecture halls and classrooms for scientific purposes, as well as demonstration rooms and laboratories Museum housed on third floor of Science Hall An especially good collection of birds, some extinct

Requirements: For Admission (1) 15 units including English, 3, Social Science, 1½, Algebra, 1, Plane Geometry, 1 (2) Condition not to exceed 1 unit to be removed during the first year of residence

For Degree 4 years of work required for a degree, the last year of which must be in residence A total of 124 college credits required for graduation, including 4 credits in Physical Education, 4 additional credits in Military Training are required of all men For each credit recorded, grade-points are assessed as follows 3 for a grade of A, 2 for a grade of B, 1 for a grade of C, and none for a grade of D To receive a degree a student must have as many grade-points as credit hours Prescribed courses 2 years of Bible, 1 of English, 2 of Physical Education for men, and 2 of Military Training for men At least 6 credit hours of work required in each of the 5 or 7 fields of concentration as follows Field (1) Art and Music, (2) English, Journalism, and Speech, (3) French, German, Greek, and Latin, (4) Botany, Geology, Home Economics, Zoology, (5) Astronomy, Chemistry, Mathematics, Physics, (6) Commerce, Economics, History, Political Science, Sociology, and Geography, (7) Bible, Education, Philosophy, Psychology Each candidate for a degree shall complete not less than 18 credit hours in his subject of major interest with a minimum of 36 credit hours in the field of concentration Honors work is permitted during the senior year by such students as are recommended by the department concerned This work is carried on with the approval of an honors committee and is made up largely of seminar work and research leading to a thesis The candidate must pass a written examination on the honors work and an oral examination conducted by a committee selected by his adviser.

General Women required to live in residence halls unless excused 2 years of Physical Education required of all men and women and 2 years of Military Training required of men in addition to Physical Education Chapel attendance required 3 days each week

Departments and Staff: Art Professors, 1, associate professors, 0, assistant professors, 0, instructors, 1 Bible 2, 0, 0, 1 Biology 1, 0, 0, 1 Chemistry 1, 0, 0, 2 Education 2, 0, 0, 0 English 3, 1, 0, 2 French 1, 0, 0, 1 Geology 0, 0, 0, 1 German 1, 0, 0, 0 History 1, 1, 0, 0 Home Economics 1, 0, 0, 2 Journalism 1, 0, 0, 0 Latin 1, 0, 0, 0 Mathematics 3, 0, 1, 0 Military Science and Tactics 1, 1, 0, 3 Music 5, 1, 0, 7 Philosophy 2, 0, 0, 0 Physical Education for Men 1, 0, 1, 1 Psychology 2, 0, 0, 0 Physics 1, 0, 2, 0 Social Science 4, 0, 0, 1 Speech 1, 0, 0, 1

Enrollment: For 1934-35, 940 Men, 431, women, 509 Total number of matriculants since foundation, 3,162

Degrees: Conferred year ending June 30, 1935, 122 B A, 121, B M, 1

Fees: Tuition, \$160, fees, \$40, room rent, \$70, board, \$190, graduation fee, \$10 Annual expenses Low, \$475, liberal, \$750

Scholarships Approximately 100 scholarships from \$50 to \$150 per year Application for scholarship should be made prior to June 1 Several loan funds also available

Employment bureau and appointment office on the campus Approximately 40% of the students earn part of their expenses

Session begins second Monday in September and ends first week in June

Summer session begins first week in June Sessions last 12 weeks

Late afternoon and evening classes for adult part-time students

Catalog in March Other publications throughout the year

COLGATE UNIVERSITY

HAMILTON, NEW YORK

Liberal arts college for men, traditionally Baptist but now undenominational

September 24, 1817, 13 men met near the village of Hamilton, offered 13 prayers, and donated \$13 to organize the Baptist Education Society of the State of New York, from this meeting has grown Colgate University First charter granted in 1819, institution formally opened in 1820 In 1846, a university charter was granted to a corporate body named Madison University In 1891 the name was changed to Colgate University.

Self-perpetuating board of 27 trustees

Finances: Endowment, \$5,500,000, income from endowment, \$171,000, income from tuition fees, \$291,000, from room rent, \$53,522, from board, \$19,431, from other

student expenses, \$17,000 Total annual expenditures year ending June 30, 1935, \$472,609 Budget, 1935-36, \$615,915

Grounds and Buildings: Grounds, 900 acres, valued at \$171,517, total present worth of buildings, \$2,879,686, total value of grounds, buildings, and equipment, \$3,640,094 5 residence halls (333)

Library (1890) 106,000 volumes, 320 current periodicals Samuel Colgate Baptist Historical Collection numbers 14,000 bound volumes, and about 80,000 pamphlets illustrating Baptist history

Laboratories Biological Laboratory (1884), valued at \$50,947, Lathrop Hall (1906), \$108,522, McGregory Hall of Chemistry, \$385,287 Equipment Chemistry, \$58,458, Physics, \$20,000, Zoology and Botany, \$36,250, Biology, \$9,760, Geology, \$54,760

Museum of Geology and Natural History in Lathrop Hall

Requirements. For Admission 15 units, including English, 3, Mathematics, 2½-4, Foreign Language, 3-7, elective History, 1-4, Science, 1-4

For Degree 120 semester hours, 132 quality points, instruction divided into 6 schools, Physical Sciences, Biological Sciences, Social Sciences, Philosophy and Religion, Fine Arts, and Languages Survey courses required in first 5 schools, concentration work required in 1 school

General Physical Education required each semester of freshman and sophomore years, daily chapel attendance required

Departments and Staff: Astronomy *Professors*, 0, *associate professors*, 0, *assistant professors*, 0, *instructors*, 1 Biology 1, 0, 1, 4 Chemistry 2, 1, 2, 1 Classics 1, 1, 0, 0 Economics 1, 1, 2, 5 Education 0, 0, 0, 2 English 2, 1, 2, 5 Fine Arts 0, 0, 1, 2. Enrollment: For year ending June 30,

1935, 995 Matriculants since foundation, College, 7,618, Seminary, 1,584

Degrees: Conferred year ending June 30, 1935, 207 A B, 198, A M, 2, honorary, 7 Total number of degrees conferred since foundation, 4,320, honorary, 552

Fees: Matriculation, \$10, graduation, \$20, other general fees, \$400 a year, dormitory rooms, \$90 to \$150 a year, board, \$7 a week Annual expenses, including living expenses Liberal, \$1,200, low, \$850

Scholarships: Up to total of \$30,000

Employment bureau 82% of students earned way through college in whole or in part during year ending June 30, 1935

Dates of beginning and ending sessions College opens fourth Wednesday in September, Commencement not earlier than June 9 nor later than June 15

Catalog in August

Administrative Officers: *President*, George Barton Cutten, *Dean of Students*, Carl A Kallgren, *Director*, Admissions, James D Howlett

COLLEGE MISERICORDIA

DALLAS, PENNSYLVANIA

College of arts and sciences, for women, privately controlled

Founded in 1923, opened in 1924 In charge of Sisters of Mercy of the Union in the United States of America, Province of Scranton

Finances: Endowment, \$1,100,000, income from endowment, \$55,000, income from other sources, \$68,679 29 Total annual expenditures, \$105,916 29.

Grounds and Buildings: 100 acres valued at \$68,950, present worth of buildings, \$849,300 Capacity of residence halls, 175

Library 11,601 volumes, 111 current periodicals

Requirements: For Admission Graduation from an accredited high school with recommendation of school principal, testimonial of character from other than a rela-

tive, and a health certificate 16 units including English, (4 years) 3 units, Foreign Language, 6 units, Mathematics, 3 units, History, 1 unit, Science, 1 unit, electives, 2 units Scholastic standing in highest third of graduating class

For Degree 136 semester hours, 95 above grade C, 136 honor points The degrees of A B and B S are awarded *cum laude*, *magna cum laude*, and *summa cum laude*

Departments and Staff. Religion *Professors*, 1, *associate professors*, 3, *assistant professors*, 0, *instructors*, 0 Biology 1, 1, 0, 1. Chemistry 1, 1, 1, 0 Classics 1, 1, 1, 0 Economics 1, 1, 0, 0 Education 1, 2, 1, 0 English 1, 2, 0, 0 French 1, 1, 0, 1 German 1, 0, 0, 0 History 1, 1, 0, 0 Italian 1, 0, 0, 0 Mathematics 1, 1, 0, 0 Philosophy 1, 1, 1, 0 Physics 1, 0, 0, 0 Sociology 1, 1, 0, 1 Spanish 1, 1, 0, 0 Physical Education 1, 0, 0, 0 Music 1, 1, 0, 2 Secretarial Science 1, 1, 0, 1 Music 1, 1, 0, 2

Enrollment: For 1934-35, 229

Degrees. Conferred year ending June 30, 1935, 51 A B, 37, B S, 1, H E, 12, Music, 1 Number of degrees conferred since foundation, 339

Fees: Tuition, \$150, board, \$350, rooms, \$100 to \$200, fees, \$25, Chemistry, \$20, Physics, \$15, Biology, \$15, graduation, \$20 Annual expenses Liberal, \$900, low, \$500

Scholarships: 21 tuition scholarships Employment bureau 15% of students earned part of expenses in 1934-35

Dates of beginning and ending sessions Middle of September, first Tuesday in June

Summer session June 24 to August 3, 1935 Enrollment, 178

Enrollment of adult part-time students, 1934-35, residence, 93, extension, 111

Catalog in summer

Administrative Officers *President*, Sister Mary Loretta, *Dean*, Sister Mary Catharine, *Registrar*, Sister Mary Rosaire

COLORADO COLLEGE

COLORADO SPRINGS, COLORADO

Liberal arts college, coeducational, privately controlled, early Congregational affiliations, but no denominational control

Founded, 1874 Oldest institution of higher education in Colorado

Board of 18 trustees, including president, ex-officio

Finances: Endowment, \$2,568,000, income from endowment, \$78,029, income from other sources, \$141,000 Total annual expenditures, 1934-35, \$253,000 Budget, 1935-36, \$251,900

Grounds and Buildings: 50 acres plus 6,600 acres forestry lands valued at \$367,700, present worth of buildings and furnishings, \$1,724,000 Dormitories 1 for men, accommodating 40, 4 for women, accommodating 150

Library (1894) 102,475 volumes, 491 current periodicals Special collection of books on western history, 300

Laboratories Cutler Hall (1880) houses laboratories of Engineering and Geology Palmer Hall (1903) houses laboratories of Chemistry, Biology, Physics, and Psychology

Museum Located in Palmer Hall Natural history specimens native to all parts of the world, also material in the fields of Zoology, Paleontology, Mineralogy, Ethnology, Archaeology, and Anthropology

Meteorological Station Located on upper floor of men's dormitory, it is the U S Weather Bureau observation station for this region Equipped with many recording instruments, including a quadruple register and Draper barograph

Requirements: For Admission 15 units, 10 of which must be from the following group of subjects English, Foreign Language (ancient or modern), Mathematics, Science, History, and Social Science The remaining 5 units may be offered from the above subjects or from any other subjects accepted for graduation from the high school Students are admitted only from the upper two-thirds of their high or preparatory school class

For Degree For A A degree (Associate in Arts), 8 courses (each course is the equivalent of 8 semester hours) For A B 16 courses, including the 8 courses for A A and a general comprehensive examination in the student's major subject The work of the College is divided into 3 main subject groups Letters and Fine Arts, Social Sciences, and Natural Sciences During the first 2 years each student is required to pursue 1 subject from 1 of the 3 groups through the 2 years, and to elect 1 course from each of the other 2 groups of subjects The remainder of his work throughout his course is elected under faculty guidance

The degree with honors may be conferred upon those whose scholarship places them in the second general group or better, and who receive the recommendation of the department in which the major part of their work has been done and of the committee in charge of the general comprehensive examination The degree *summa cum laude* shall be conferred only by a special vote of the faculty after individual consideration of each case

General All out-of-town women required to live in residence halls Physical Education Freshmen, 2 afternoons each week and course in Mental and Physical Hygiene once each week, all other students, corrective gymnastics and individual therapy as prescribed by examining physician at beginning of each year Weekly chapel attendance, attendance at occasional special assemblies

Departments and Staff Art Professors, 1, associate professors, 0, assistant professors, 0, instructors, 0 Biblical Literature 1, 0, 0, 0 Biology 2, 0, 0, 1 Business Administration and Banking 1, 0, 0, 1 Chemistry 1, 1, 0, 1 Economics 2, 0, 0, 0 Education 1, 0, 0, 0 Engineering and Graphics 1, 0, 0, 0 English 1, 0, 3, 3 Geology 0, 1, 0, 1 Greek and Latin 2, 0, 0, 0 History 1, 0, 0, 1 Journalism 0, 0, 0, 1 Mathematics (includes Astronomy) 3, 0, 0, 1 Modern Foreign Languages (French, German, Italian, Spanish) 1, 1, 2, 2 Music 1, 0, 0, 2 Philosophy 0, 0, 1, 0 Physical Education Total, 4.

Physics 1, 0, 0, 1. Political Science 1, 0, 0, 0 Psychology. 0, 1, 0, 0 Sociology and Anthropology 3, 0, 0, 1

Enrollment. For 1934-35, 693 Men, 372, women, 321

Degrees: Conferred year ending June 30, 1935, 119 B A, 97, B A in Bus and Bank, 13, B S, 1, M A, 8

Fees: Tuition, \$225 a year, matriculation, \$5, athletic and associated students fee, \$17, gymnasium (men), \$3, health fee (women in dormitories), \$10, (all other students), \$5, room and board (women), \$330-\$365, room (men), \$15-\$60, graduation, \$7 50, laboratory fees, \$5 to \$20 Annual expenses Liberal (men), \$565, (women), \$668, low (men), \$476, (women), \$608

Scholarships: 110 scholarships, varying in amounts from \$25 to \$250 a year, 20 graduate teaching fellowships, \$200 a year, loan fund

Employment bureau In 1934-35, 28% of students earned all or part of expenses

Dates of beginning and ending sessions September 15, 1934, June 10, 1935

Summer session June 17 to August 9, 1935. Enrollment, 120 Men, 41, women, 79

Catalog in February Colorado College publication, 6 issues each year

Administrative Officers: *President*, Thurston J Davies, *Treasurer*, W. W. Postlethwaite, *Dean of the College*, Charlie Brown Hershey, *Dean of Women*, Louise W Fauteaux, *Dean of Men*, William V Lovitt, *Dean*, Shove Memorial Chapel, James G McMurtry; *Director*, Summer School, Ralph J Gilmore, *Registrar*, Josephine R Morrow

Founded in 1874, becoming at that time the official mining school of the Territory of Colorado The origin of the school dates back to 1870 when Bishop Randall erected a mining building as a part of his Episcopal University near Golden 4 years later he transferred this building with 5 acres of ground to the territorial authorities, and so the date of founding has ever since been given as 1874

Control is by a board of 5 trustees, appointed by the Governor of Colorado

Finances: Supported by state mill levy, royalty from mineral production, fees from students, no private endowment Range of income, \$300,000 to \$400,000 per year

Grounds and Buildings: 30 acres valued at \$148,690 10 buildings worth \$476,673, value of buildings, grounds, and equipment, \$1,792,000 Wild Horse Park Field Laboratory, Experimental Mine, and Geological Camp, 1,800 acres

Library (1905) 35,000 volumes, practically all dealing with some phase of the mineral industries, science, and engineering 638 current periodicals, including many in German, French, Spanish, and other foreign languages Excellent collection of material needed in geological research, including all available state documents, and complete collection of documents of foreign countries Brunton collection on mine tunneling, and other special collections pertaining to mining, metallurgy, and petroleum engineering Small collection of rare volumes, including one of the first editions of De Re Metallica in Latin, and a volume of Hoover's translation of this work. Collections of bound volumes of old periodicals, many of foreign countries Depository of U.S. Geological Survey, U.S Bureau of Mines, U.S Coast and Geodetic Survey, and U.S Bureau of Standards

Laboratories Experimental Plant, mineral testing, ore dressing, and other metallurgical laboratories

Experimental Mine (at Idaho Springs), a real mine controlled by the school, for practical experiments and research. May be used by the industry or by other schools for experimental purposes in summer months.

COLORADO SCHOOL OF MINES

GOLDEN, COLORADO

School of the mineral industries, offering courses leading only to professional degrees in mining, metallurgical, petroleum, and geological engineering, and advanced courses leading to the degrees of Master of Engineering and Doctor of Engineering, in the same For men

Field Laboratory (at Wild Horse Park, Colorado) used for practical problems in geological and petroleum engineering May be used by other schools in summer months

Armstrong Building, exclusively for geophysical laboratories Stratton Hall, petroleum engineering, mining, machine design, metallurgy Assay Building, exclusively for assaying Power plant, electrical, and testing laboratories Chemistry Building, physics, undergraduate chemistry laboratories Engineering Hall, advanced chemistry laboratories Guggenheim Hall, geology and geophysics

Requirements: For Admission 15 units as follows Algebra, $1\frac{1}{2}$, Plane Geometry, 1, Solid Geometry, $\frac{1}{2}$, English, 3, History, 2, Chemistry, 1, Physics, 1, and 5 electives from any of the following, English, History, Modern Language, Trigonometry, Mechanical Drawing, commercial subjects, Latin, shop work, Biology

For Degree Completion of all required work in chosen option, plus enough work to make total of 480 credits The quality of the work done must meet with the requirements set forth in the school catalog Residence is required of all undergraduates Candidates for all professional engineer degrees are required to pass certain prescribed field courses conducted in the summer months on the campus, at the experimental mine, and in the field laboratory

General 2 years of Military Science 2 years of Physical Education At least 1 year of residence for all graduate students

Departments and Staff: Chemistry *Professors*, 1, *associate professors*, 3, *assistant professors*, 1, *instructors*, 2 Ceramics 0, 1, 0, 0 Civil Engineering 1, 0, 1, 0 Descriptive Geometry and Engineering Drawing 1, 0, 1, 0 Economics 1, 0, 0, 0 Electrical Engineering 1, 0, 0, 0 English and Modern Languages 1, 0, 2, 1 Fuel Engineering 1, 0, 0, 0 Geology 1, 3, 2, 0 Geophysics 1, 0, 0, 1 Mathematics 1, 1, 2, 1 Mechanical Engineering 1, 0, 1, 0 Mechanics 1, 0, 1, 0 Metallurgy 1, 3, 0, 1 Military Science and Tactics 1, 0, 1, 2 Mining Engineering 1, 1, 1, 0 Petroleum

Engineering 1, 1, 0, 1 Physical Training 1, 1, 0, 2 Physics 1, 0, 2, 0

Enrollment: For 1934-35, 548

Degrees: Conferred year ending June 1935, 89 Engineer of Mines, 35, Metallurgical Engineer, 27, Petroleum Engineer, 15, Geological Engineer, 9, Master of Science, 3 Total number of degrees conferred since foundation, 2,025

Fees: Tuition, \$200 to all students not residents of Colorado, \$20 for Colorado students Matriculation fee, \$5, graduation, \$5, student fee, \$12 50, laboratory fees ranging from \$5 to \$50 The school has no dormitory or dining hall Board and room ranges from \$27 to \$45 per month Expenses incidental to field trips, \$75 to \$125

Scholarships: Funds for research and for scholarships available

Percentage of students earning part of way, 30%

Session begins third week of September, ends first of June Field courses begin first of June and continue for 6 weeks Regular term divided into 2 semesters

Catalog in January Quarterly in January, April, July, and October Mines Magazine published by the Alumni Association.

Achievements Extensive research on crushing and grinding of ores

Administrative Officers *President*, M F Coolbaugh, *Dean*, Jesse R Morgan, *Registrar*, T C Doolittle

COLORADO STATE COLLEGE OF AGRICULTURE AND MECHANICAL ARTS

FORT COLLINS, COLORADO

Land-grant institution, technological, co-educational, supported in part by the federal government and in part by the State of Colorado

Founded in 1870, opened in 1879

The state board of agriculture (the governing board) consists of 8 appointed members with the governor of the state and the president of the College as ex-officio members

Finances: State mill levy, \$384,111 Total income for resident instruction, administration, operation and maintenance, \$539,615 Budget, 1935-36, \$497,703

Grounds and Buildings: Main campus, 40 acres, adjacent, 480 acres, 1,300 acres of pasture land, 40 miles away, a forest reserve of 1,600. For research, the institution owns lands at Akron, Cheyenne Wells, Rocky Ford, Greeley, Austin, Avon, and Hesperus 20 buildings valued at \$1,750,00 used for instruction and research purposes

Library 80,894 volumes

Laboratories Chemistry (1922), Chemistry research and Botany (1922), Physics (1919), Zoology (1903), Home Economics (1910), Electrical (1925), Mechanical (1892), Veterinary Surgery (1920), Civil and Irrigation Engineering (1908), Soils (1913), Horticulture (1896), Dairying and Meats (1929), Military (1918, 1927, 1929), U S Equipment for Instruction in Field Artillery

Requirements: For Admission 15 units, including English, 3, Mathematics, 2

For Degree For bachelor's degree, 140 credits Students must earn 10 credits each semester in order to register for the next semester, except first semester freshman students

General All students must reside in approved houses, monthly non-compulsory assemblies, for male citizens compulsory Military Science during first 2 years

Departments and Staff: Agronomy *Professors*, 1, *associate professors*, 1, *assistant professors*, 1, *instructors*, 0 Animal Husbandry 1, 3, 1, 0 Botany 1, 1, 3, 1 Chemistry 1, 3, 3, 5 Civil and Irrigation Engineering 1, 1, 1, 1 Electrical Engineering 1, 1, 0, 0 Economics and Sociology 1, 3, 1, 0 English and History 1, 3, 6, 2 Entomology and Zoology 1, 2, 2, 2 Forestry 1, 3, 0, 0. COLORADO STATE COLLEGE OF EDUCATION

GREELEY, COLORADO

Teacher education institution, coeducational, supported by state.

Established by legislative enactment

1889, degree-granting privilege given in 1891

Controlled by board of trustees made up of state superintendent of public instruction ex-officio, and 6 other members appointed by the governor

Finances: Total annual expenditure year ending September 30, 1935, \$422,247 79 Budget, 1935-36, \$428,000

Grounds and Buildings: Present worth of grounds (58 acres) and buildings, \$1,831,-097 11 Dormitories 2 for men, accommodating 61, 3 for women, accommodating 106, 3 under construction to accommodate 160 women

Library 80,000 volumes, 219 current periodicals

Laboratories Biology, Botany, Zoology, Home Economics, Industrial Arts, Physics, and Chemistry

Requirements For Admission Admission to the General College (first 2 years) is open to all graduates of accredited high schools on recommendation of the high school principal The principal will base his recommendation on health, good character, and ability to do college work Only selected students are admitted to the Professional College

For Degree For the A B, 1 year's minimum required residence, 198 quarter hours 5 step below C on 5 point scale A M, 1 year beyond the baccalaureate degree, Ph D, equivalent of 2 years beyond master's degree Major and minor subjects Prescribed courses In 7 Divisions—Art, Education, Health and Physical Education, Literature and Languages, Music, Sciences, Social Studies

General 2 years of Physical Education

Departments and Staff: Division of the Arts *Professors*, 5, *associate professors*, 4, *assistant professors*, 1, *instructors*, 3 Education 14, 8, 2, 0 Health and Physical Education 4, 1, 2, 2 Literature and Languages 3, 3, 4, 2 Music 1, 1, 1, 3 Science 5, 3, 2, 0 Social Studies 7, 3, 1, 0

Enrollment: For year ending June 8, 1935, 5,677 Men, 1,871, women, 3,806 Total number of matriculants since 1890, 79,644.

Degrees: Conferred year ending June 8, 1935, 357 Degrees conferred since 1891, when degree-granting privilege was gained, 4,290

Fees: Tuition and student activities, \$66 a year, lodging and board, \$7 a week Annual expenses High, \$450, low, \$300

Scholarships 195 scholarships of \$45 each Applications for scholarship aid close on October 1

During year ending June 8, 1935, 22% of students earned all or part of expenses

Dates of beginning and ending sessions September 24, 1934, June 8, 1935

Summer session June 15 to August 24, 1935 Enrollment, 2,377

Extension classes enrollment, 984, correspondence courses enrollment, 501

Catalog in April

Administrative Officers: *President*, George Willard Fraser, *Vice-President*, Winfield Dockery Armentrout

COLORADO, UNIVERSITY OF BOULDER, COLORADO

The University at Boulder, the School of Medicine at Denver

State university for men and women

Founded 1876 Incorporated by an act of the first territorial legislature of Colorado, in 1861, and located at Boulder A second act in 1870 revived the project of a university at Boulder and reconstituted the board of trustees In 1872, 3 citizens of Boulder gave the University 52 acres adjoining the city In 1874, the territorial legislature appropriated \$15,000, conditioned on the raising by the trustees of an equal amount The trustees having met this condition, the first instalment of the appropriation was paid on June 7, 1875 In 1875, Congress "set apart and reserved for the use and support of a State University" 72 sections of public lands The Constitution of Colorado, adopted in 1876, made the "University at Boulder" an institution of the state, thus entitling it to the lands appropriated by Congress

Board of 6 regents elected by public vote, 2 elected each biennium for a term of 6 years. College of Arts and Sciences, College of Engineering, Graduate School, School of Medicine, School of Nursing, School of Law, College of Pharmacy, College of Music, School of Business

Finances: The University is supported by proceeds of a fractional mill tax and by special appropriations Tax levy, \$578,000 a year and \$110,000 for School of Medicine Receipts from tuition and miscellaneous, \$785,000 \$410,000 from special appropriations for hospitals. Budget, 1935-36, \$1,-695,500.

Grounds and Buildings: 160 acres in Boulder and 25 acres in Denver valued at \$510,215 Present value of buildings, \$5,-344,556 (not including furniture and equipment) Residence halls 1, accommodating 300 women

Library (1902) 271,681 volumes, including 10,000 government documents, 512 current periodicals, and 3,500 maps Departmental libraries are maintained for Biology, Chemistry, Engineering, Geology, Law, Physics, Museum, Pharmacy, Teachers' Training School, and School of Medicine (Denver)

Laboratories Biology and Physics, Hale Science Building, Chemistry, Chemistry Building, Geology, Geological Building and Denison Memorial Building, Psychology, Arts Building, Engineering Laboratories, Engineering Building, Medical Laboratories, Medical School Building in Denver

Museums In Hale Science Building Over 1,000,000 specimens in Biology, Anthropology, Geology, Mineralogy, and Paleontology Collections Especially complete in Conchology, Fauna of Colorado, Paleontology of Rocky Mountain region, Mineralogy, Archeology of the Southwest Also coins, stamps, historical material.

Admission Requirements: Graduation from a standard 4-year high school and 15 units, including. *College of Arts and Sciences* English, 3, Foreign Language, 2, History, 2 (1 unit of which may be Social Science), Mathematics, 2 (Algebra, 1, Plane Geometry, 1); Science, 2 (one of which

must be Physics or Chemistry), and 4 electives in any subjects accepted by the high school for graduation, provided they are not of an extra-curricular nature Electives may not be substituted even temporarily for any of the 11 specified units Not more than 4 units from junior high school may be accepted, half units will not be accepted in Physics or Chemistry Fractions of a unit other than $\frac{1}{2}$ not accepted

Engineering. Same as above, excepting that but 1 unit is required in History and an additional unit in Mathematics (Higher Algebra, $\frac{1}{2}$ unit, Solid Geometry, $\frac{1}{2}$ unit), 1 unit in Science to be Physics, and the 2 units in Foreign Language not necessarily in one language Students not presenting all of the 11 specified units may be admitted provided additional units in the specified group are presented sufficient in number to make up the 11 units required in this group Deficiencies in Mathematics must be made up during the first quarter 2 years may be allowed for removing deficiencies in Foreign Languages All other deficiencies must be removed before the beginning of the second year

College of Pharmacy Same as Arts and Sciences, excepting that 1 unit in Latin may be accepted for the Foreign Language requirement

College of Music 15 units distributed as follows English, 3, Mathematics, 1 (Algebra, 1, or Plane Geometry, 1), Science, 1, History, 1, electives from Mathematics, Science, History, Foreign Language or Music (Theoretical), 5, free electives, 4 To major in Piano, the student should be grounded in correct touch and technique To major in Voice, the student should be able to sing on pitch with correct phrasing and musical intelligence standard songs in good English He should be able to read simple songs at sight and possess a knowledge of the rudiments of music To major in Organ, the student should have completed sufficient piano study to enable him to play Bach Inventions, Sonatas of Mozart or easier Sonatas of Beethoven, or compositions of similar difficulty by Mendelssohn, Grieg, Schubert, or Schumann To major in Violin,

the student should have elementary knowledge of piano, and have the ability to play études of the difficulty of the Kreutzer Études Nos 1 to 32, or Viotti Concerto No 23, the Tartini G minor Sonata, or the de Beriot Concertos, Nos 7 and 9. To major in Violoncello, woodwind and brass instruments, the student should have the same degree of knowledge of the piano as in the Violin course. He should also have acquired the elementary technique of his instrument.

School of Nursing 15 acceptable high school units and 90 quarter hours of college credit (exclusive of Physical Education) from a college approved by a recognized accrediting agency. The college credits must include 9 quarter hours of general Biology or Zoology, 12 quarter hours of Inorganic Chemistry (including 6 quarter hours of laboratory), 9 quarter hours of English Composition and Rhetoric, and 6 quarter hours of general Psychology.

School of Medicine Admission is on a selective basis. Candidates must satisfy the entrance requirements of the College of Arts and Sciences and must present 135 quarter hours of college credit (exclusive of Physical Training) from a college approved by a recognized accrediting agency. The college credits must include the following: Biology (General Zoology, 9 hours and Comparative or Mammalian Anatomy, 5 hours), Chemistry (General Inorganic Chemistry, 12 hours, including 6 hours laboratory, Organic Chemistry, 9 hours, including 2 hours laboratory, Quantitative Analysis, 5 hours), English, 15 quarter hours, including at least 9 hours of English Composition and Rhetoric, Modern Language, German (preferred), French or Spanish, to include at least 15 quarter hours of first year language or 9 quarter hours of second year language, Physics, a complete course of at least 12 quarter hours, including 3 quarter hours of laboratory.

School of Law Graduation from a standard high school course and not less than three-fourths of the work acceptable for a bachelor's degree, granted on the basis of a 4-year period of study by the State University or its equivalent. Graduates of pro-

fessional schools or students who have done the equivalent of 3 years of liberal arts work, although unable to make formal compliance with requirements, may present proof of their education by certificate or examination and will be considered on the basis of its merits.

School of Business Graduation from a standard high school course and 2 years of college work (90 quarter hours plus Physical Training) from an approved college or university. The 2 years of college work must include the following: Beginning English Language (1 full year), Algebra, Trigonometry, Advanced English Composition (1 full year), and Principles of Economics.

Degree Requirements: *College of Arts and Sciences* 186 quarter hours (including 6 hours of Physical Training) and 186 credit points required for all degrees. B A English Composition, 9 hours, History of Economics, 9, and 2 of the following three, Mathematics, Laboratory Science, and Classics, 18, Psychology, or Botany, or Zoology, 9, Philosophy, 4, Appreciation of Art and Literature, 2, and group requirements with 75 hours distributed among a major and 2 minors selected from a list of 22 groups, of which the following is a type: Group H—major, Chemistry, minors, Physics and Mathematics. The 75 hours in the major group must include at least 18 in the two minors, with not less than 6 in the one in which there is the least. B S in Home Economics. Course of study definitely prescribed. B S in Physical Education. Course of study definitely prescribed. Bachelor of Fine Arts. Includes major in Teachers' Course, Illustration, and Interior Decoration. Course of study prescribed for each major.

College of Engineering 208 quarter hours (including 3 hours of Physical Training) and 208 credit points. B S in Civil, Electrical, Mechanical, Chemical, and Architectural Engineering. Course of study prescribed for each major.

Graduate School Master's and doctor's degrees granted upon completion of high quality of 1 year and 3 years of residence, respectively, and the passing of satisfactory

oral and written examinations, and the submission of a satisfactory thesis

School of Medicine For Doctor of Medicine, 135 quarter hours of acceptable Pre-Medical work and 4 years of prescribed training in the School of Medicine. It is required that the fifth year be spent as an intern and the degree may be withheld upon failure of the student to present evidence before the close of the fourth year, showing that he has accepted a satisfactory internship

School of Nursing B S in Nursing, 90 quarter hours of acceptable Pre-Nursing work, and 32 months of professional training in nursing, 2 months of which are assigned for vacation

School of Law Bachelor of Laws 135 quarter hours of Pre-Legal training and 120 credit points and 120 quarter hours of credit in the professional curriculum of the School of Law

College of Pharmacy B S in Pharmacy, 183 quarter hours (including 3 hours of Physical Training) and 183 credit points 4-year prescribed course of study

College of Music 183 quarter hours (including 3 hours of Physical Training) and 183 credit points Bachelor of Music, including majors in Voice, Piano, Organ, Violin, Public School Music (General Supervisor's Course and Instrumental Supervisor's Course) and Musical Composition

School of Business B S in Business, 90 quarter hours of Pre-Business college credit (plus Physical Training) In addition to the 2 years of Pre-Business training the student must have 90 quarter hours and 90 credit points in the School of Business and must have completed the prescribed curriculum for his chosen major field

General Requirements Residence requirement in the College of Arts and Sciences is 84 quarter hours, in the other Schools and Colleges of the University, 1 year, the senior year in residence 2 years of Physical Education in the College of Arts and Sciences, 1 year in the Colleges of Engineering, Music, and Pharmacy

Fees: Matriculation, \$10 (Graduate School, Schools of Medicine and Nursing, \$5) Annual tuition for the College of Arts and Sciences, College of Engineering, College of Pharmacy, College of Music, School of Business, and Graduate School, \$66 for Colorado residents, \$132 for nonresidents, for the School of Law, \$96, \$144, for the School of Medicine, \$168, \$300, for the School of Nursing for Colorado residents first year \$74, second year \$60, third year \$45, for nonresidents, \$88, \$72, \$54 Graduate work in Ophthalmology, \$100

Annual fees Incidental fee, \$10 50 (Schools of Medicine and Nursing, \$5), library, \$3, gymnasium, \$4 50, Union Building fee, \$3 for all schools except the Schools of Medicine and Nursing, School of Business Students' Association fee, \$1 50, School of Law Student Bar Association fee, \$2, special music fees for private lessons, from \$30 to \$75 for one lesson a week depending upon the instructor, College of Engineering, Colorado Engineer fee \$1 50, laboratory deposits for equipment, \$3 to \$15 50 per laboratory course depending upon the course taken, laboratory fees, \$1 to \$30 per laboratory course, diploma fee, \$5 Board and room, women's dormitory, \$315 to \$390 annually, boarding houses, \$1 per day, average Annual expense Liberal, \$600, low, \$400

Scholarships: Research Fellowships 10 research fellowships to be awarded only to graduate students of outstanding ability and promise Each of these fellowships carries a stipend of \$400 a year and tuition The duties attached are of such a nature as to interfere but slightly with the pursuit of research and advanced study Whenever possible research problems of particular interest to the people and the State of Colorado will be given special consideration A fellowship may be held for more than 1 year, but in general, for not more than 2 years

University Fellowships 10 university fellowships, each carrying a stipend of \$200

including tuition and fees in the major departments, are each year open to graduate students of promise who are lacking somewhat in the qualifications demanded of Research Fellows

Scholarships 20 graduate scholarships providing for tuition and fees in the major department are each year available for graduate students

Applications for any of these awards are required by March 1

Loan Funds A sum is set aside annually by the board of regents to assist worthy students who would otherwise find it impossible to pay the tuition charges Loans from this fund will be limited to \$100 a year for any student

Research \$5,000 granted annually Allocated by research committee of Graduate School

Appointments office Graduates assisted through their major departments In 1934-35, 40% of students earned all or part of expenses

Dates of beginning and ending sessions September 21, 1934, June 10, 1935

Summer session June 15 to August 24, 1935 Enrollment, 3,245

University extension Enrollment in classes, 1,068, enrollment in correspondence courses, 1,108

Catalog in July, bulletins of the several schools and colleges, biennial report of the regents, the University of Colorado Studies, general information bulletin, radio bulletin, University Extension bulletins

COLORADO, WESTERN STATE COLLEGE OF

GUNNISON, COLORADO

Liberal arts college, pre-vocational and teacher training, coeducational, supported by state

Established by legislative act in 1901 as the State Normal School at Gunnison, opened in 1911. In 1920, the board of trustees extended the course of study to 4 years leading to the B. A. degree, and in December 1921, approved a 5-year course leading to the M. A. degree and Life Certificate. On March 30, 1923, the Colorado General Assembly passed an act changing the name of the school to Western State College of Colorado.

Controlled by board of trustees of 7 members, 6 of whom are appointed by the governor, the seventh being the state superintendent of public instruction who serves as an ex-officio member. Board members hold office for 6-year terms, with 2 appointed annually.

Finances. Total annual expenditures year ending June 30, 1935, capital outlay, \$59,892.25, operating budget, \$143,516.08. Budget, 1935-36, \$150,000.

Grounds and Buildings. 1,260 acres located as follows: 40 acres on campus, 120 acres Biology station, 1,100 acres "W" Mountain, a recreation park near campus, value of land, \$10,951, present worth of buildings, \$510,000. Dormitories: 1 for men, accommodating 107, 1 for women, accommodating 137.

Library: 18,000 volumes, 216 periodicals, 70 volumes particularly valuable for research.

Laboratories: North Hall (1911) houses Chemistry, Physics, and Home Economics laboratories, South Hall houses Biology and Manual Arts laboratories.

Museum: Central Hall (1929) houses the Southwestern Colorado Archaeological Society Museum of Archaeology.

Requirements: For Admission: An Eng-

lish major of 3 units and 2 academic minors of 2 units each. A maximum of 2 units of extracurricular activities, including Physical Education, may be accepted. Graduates of high schools accredited by a standard association or by a state university, or students who have earned 15 units in an accredited high school. Persons unable to furnish credentials covering these requirements may be admitted by passing entrance examinations. Graduates of unaccredited high schools may be admitted on probation.

For Degree: 180 quarter hours for the A. B. degree, with an additional 45 quarter hours and a thesis on an approved subject for the M. A. degree. For the A. B. course, about one-half of work is prescribed, major courses, minimum 43 quarter hours, minor courses, minimum 20 quarter hours. Must have 90 quarter hours in upper division subjects. 3 quarter hours in education courses necessary to receive life certificate to teach. Graduate students must make a grade above D to receive credit. For the M. A. degree, 3 quarters of residence required. Not more than $\frac{1}{4}$ of the credit required for graduation may be earned in group extension and correspondence courses.

General Physical Education required of all freshmen, freshman and sophomore girls required to live in dormitory.

Departments and Staff: Art: Professors, 0, associate professors, 1, assistant professors, 0, instructors, 0. Biology: 1, 0, 0, 0. Zoology: 1, 0, 0, 0. Chemistry: 1, 0, 0, 0. Enrollment: For the year ending June 30, 1935, 735. Men, 339, women, 396. Total number of matriculants since 1911, 6,237.

Degrees: Conferred year ending June 30, 1935, 60. Degrees conferred since foundation, 532.

Fees: Tuition, matriculation and student fees, \$80 per year, board at the cafeteria, \$24 per month, girls dormitory rooms, \$22 50 per quarter up to \$30 per quarter, boys dormitory rooms, \$4 and \$5 per month Annual expenses High, \$415, low, \$200

Scholarships. 27 of \$45 each

Employment bureau 50% of students earned all or part of expenses during year ending June 30, 1935

Dates of beginning and ending of sessions
September 20, 1935, June 6, 1936

Summer session June 15 to August 17, 1935 Enrollment, 334 regular, 508, including special students

Extension work Extension enrollment, 22, correspondence enrollment, 84

Catalog in April

Administrative Officers: *President*, Charles Clinton Casey, *Vice-President and Dean of Men*, H L Dotson, *Dean of Women*, Patsy Shobe, *Registrar*, Lucy E Spicer, *Dean of Graduate School*, C T Hurst, *Director*, Teacher Training, John J Dynes, *Director*, Placement Bureau and Extension, Grant Ruland, *Treasurer*, Ralph E Porter, *Librarian*, Ruth M Stewart

COLUMBIA COLLEGE

DUBUQUE, IOWA

A Catholic college of arts and sciences, coeducational, privately controlled

Founded in 1839, closed in 1855, reopened in 1873, chartered by State of Iowa, 1894, approved by the State of Iowa in 1916

Self-perpetuating board of 14 trustees

Finances: Endowment, \$1,507,198 77, income from endowment, \$48,400, income from other sources, not including dormitories and dining hall, \$40,855, total annual expenditures, not including dormitories and dining hall, \$57,957 92

Grounds and Buildings: 45 acres valued at \$45,000, present worth of buildings (8), \$675,000 Dormitories for men, 2, accommodating 275

Library (1914) 51,864 volumes, exclusive of 8,393 government documents and 4,556 bound pamphlets, 135 current periodicals

Laboratories (1916) Physics, Chemistry (2), Biology, Geology, Drawing

Museum (1916) A large collection of historical relics, art paintings, period furniture, etc

Requirements. For Admission (1) Graduation from an accredited preparatory or high school with recommendation of school principal, (2) 15 units including 3 of English, 1 of Natural Sciences, 1 of Social Sciences, 2 of Mathematics, and not more than 4 of commercial, industrial, or miscellaneous subjects

For Degree 120 semester hours, a major subject of concentration in third and fourth years, a thesis acceptable to the major department At least 40 semester hours taken in the third and fourth years must include subjects limited to junior and senior students

General All students must reside in the college dormitories or at home

COLUMBIA UNIVERSITY IN THE CITY OF NEW YORK

NEW YORK, NEW YORK

See also Barnard College

University, undergraduate, non-professional graduate, professional, technological, for both men and women, except in certain schools, privately controlled, non-sectarian

In 1754, Letters Patent were issued incorporating The Governors of The College of the Province of New York in the City of New York in America and providing for the establishment of King's College. The conclusion of the announcement issued in the same year reads "A serious, virtuous, and industrious Course of Life being first provided for, it is further the Design of this College to instruct and perfect the Youth in the Learned Languages, and in the Arts of Reasoning exactly, of Writing correctly, and Speaking eloquently, and in the Arts of Numbering and Measuring, of Surveying and Navigation, of Geography and History, of Husbandry, Commerce, and Government, and in the Knowledge of all Nature in the Heavens above us, and in the Air, Water, and Earth around us, and the various Kinds of Meteors, Stones, Mines, and Minerals, Plants and Animals, and of every Thing useful for the Comfort, the Convenience, and Elegance of Life, in the chief Manufactures relating to any of these things. And finally, to lead them from the Study of Nature to the Knowledge of themselves, and of the God of Nature, and their Duty to Him, themselves, and one another,

and every Thing that can contribute to their true Happiness, both here and hereafter "

The first college building, erected on a portion of the "King's Farm," at what is now the corner of Park Place and Church Street, was completed in 1760. The Revolutionary War, during which this building was taken for military purposes, compelled a suspension of activities. King's College numbers among its students and graduates Alexander Hamilton, John Jay, Robert D. Livingstone, Gouverneur Morris, and John Stevens.

In 1784, the Legislature of the State of New York passed an act incorporating the "Regents of the University of the State of New York," vesting the property of King's College in the Regents, and changing the name of the College to Columbia College. In 1787, this act was repealed and an act passed, confirming the Royal Charter of 1754, and vesting the property and franchises of King's College in "The Trustees of Columbia College in the City of New York."

In 1810, the charter was again amended in certain particulars at the request of the trustees, and reenacted, but the corporate title remained the same until 1912 when by order of the Supreme Court of the State of New York it was changed to "The Trustees of Columbia University in the City of New York." In 1897, the University removed from Forty-ninth Street and Madison Avenue, where it had been situated since 1857, to its present location on Morningside Heights.

Self-perpetuating board of 24 trustees whose term of office is for life. In 1909, provision was made for nomination by the alumni of 6 of the 24 trustees.

The schools and colleges composing the University are as follows: Columbia College, Barnard College, the Graduate Faculties of Political Science, Philosophy, and Pure Science, the School of Engineering, the Schools of Law, Medicine, Architecture, Journalism, Business, Dental and Oral Surgery, Nursing, Library Service, the College of Pharmacy, Teachers College, University Extension and Home Study, Summer Session, Seth Low Junior College,

Bard College, and the New York Post-Graduate Medical School

Finances: Amount of resources June 30, 1934, \$152,594,964 Income from all sources, 1933-34, \$10,488,830 04 Total appropriations year ending June 30, 1934, \$14,528,227 50 Budget, 1934-35, \$14,224,348 Gifts, \$2,640,118 (All figures for resources, income, appropriation, budget, and gifts include Barnard College, Teachers College, College of Pharmacy, Bard College, and New York Post-Graduate Medical School)

Grounds and Buildings: Area in acres, 790 (including affiliated institutions) Number and capacity of residence halls Columbia University 5 halls for men (1,574), Barnard College 2 for women (350), Teachers College 5 for men and women (900)

Libraries Low Memorial Library (1897, gift of Seth Low), South Hall, the new Library, gift of Edward S Harkness (1933), 1,476,456 volumes, 8,500 current periodicals Special collections The Phoenix Library (7,000 volumes), the gift of Stephen Whitney Phoenix of the Class of 1859, the Avery Architectural Library (33,800 volumes), the Montgomery Library of Accountancy, the Marvyn Scudder Financial Library, the Seligman Library of Economics, the David Eugene Smith Library on the history of Mathematics, the Dale Library of weights and measures, the Paterno Library at the Casa Italiana, Townsend Library of National, State, and Individual War Records, Temple Emanuel Library of Biblical and Rabbinical Literature, Holland Society Library (including a Grotius collection), Goethe collection, Kant collection, Mary Queen of Scots collection, Chinese collection, Japanese collection, special collections on French Revolution, Jeanne d'Arc, anarchism, the drama (including a dramatic museum of stage models), Rumanian literature, music, contemporary French literature and contemporary German literature, and the Avery, Sachs, and Baldwin collections in the Teachers College Library

The Law Library, the Libraries of Teachers College, Barnard College, the College of Physicians and Surgeons, and the

College of Pharmacy, are all available to officers and students of the University Nearly all of the private or restricted libraries of the city, such as those of the learned societies, are open to officers and to advanced students introduced by the librarian of the University In 101 South Hall the New York Public Library maintains a branch of its circulation department By courtesy of the trustees of Union Theological Seminary, the reading room of that institution is open to students of the University

Laboratories Crocker Laboratory Building (1914) Chandler Laboratories (1925) Laboratories in Mines Building, Engineering Building, Schermerhorn Hall, Havemeyer Hall, Pupin Physics Laboratories, Fayerweather Hall, Accounting Laboratories in School of Business

Museums Mines Building, Havemeyer Hall, Engineering Building, Schermerhorn Hall

Rutherford Observatory 12-inch refractor

Admission Requirements Satisfaction of the minimum requirements does not insure admission, particularly if the school be crowded 2 methods of admission to the Colleges of Liberal Arts are employed, (1) psychological examinations accompanied by consideration of school record, character and promise, and health record, (2) entrance examinations in all subjects or comprehensive examinations in 4 subjects or examinations by Education Department of State of New York (Regents Examinations)

Columbia College and University Undergraduates (A B or B S degree) English, 3 units, Mathematics, 3, Language, 3, Physics or Chemistry, 1, History, 1, electives, 4, or Latin, 4, or Greek, 3 and electives to make up 15 units

School of Business (B S degree) 2 years of study in an approved college in courses aggregating 64 points, including 2 years of English, 2 of French or German or Spanish, and 1 of Economics Economic Geography and Elements of Business Administration are also recommended

School of Architecture (B Arch degree) 2 years of study in a recognized college including elementary French. The study of Mathematics through the Calculus is advised.

School of Medicine (College of Physicians and Surgeons) (M D degree) Collegiate course of at least 3 years including 1 year of Physics, 1 of Biology, 1 of Inorganic Chemistry based on College Entrance Chemistry, including Qualitative Analysis, $\frac{1}{2}$ year of Quantitative Analysis, $\frac{1}{2}$ of Organic Chemistry, 2 years of college English, and a reading knowledge of French or German (Med Sc D degree) Graduation from an approved medical school.

School of Dental and Oral Surgery (D D S degree) Same as for School of Medicine.

School of Engineering (C E, M E, E M., Met E, Chem E, E E, B S degrees) 2 years of study in an approved college or scientific school in a course including the usual cultural subjects, thorough training in Mathematics, General Physics, General Chemistry, Qualitative Analysis, and first courses in Drawing.

School of Journalism (M S degree) A baccalaureate degree in arts, letters, philosophy, or science from an approved institution. An entrance examination is required and the student's proficiency in the use of a typewriter will be tested.

Faculties of Political Science, Philosophy, and Pure Science (A M, Ph D. degrees) Baccalaureate degree in arts, letters, philosophy, or science, or an engineering degree from an approved institution, or an education equivalent to that represented by one of these degrees.

School of Law (LL B degree) (1) Graduation from an approved college or scientific school of collegiate rank, or (2) successful completion of 3 years of undergraduate study in an approved college or scientific school, including courses in Economics, English, and American History (Jur Sc D degree) Graduation from an approved law school.

Teachers College (B S degree) Completion of a minimum of 2 years of work of college level, supplemented by a minimum of

2 years of successful teaching or other approved professional experience (A M and M S degrees) An acceptable baccalaureate degree from an approved institution, or an equivalent education.

New College in Teachers College (B S degree) Enrollment is limited, only students who possess in high degree qualities necessary for teaching are admitted, on completion of high school or 1 or more years of college work.

The Advanced School of Education of Teachers College fixes the requirements for matriculation for the Ed D degree, and under the Faculty of Philosophy and the Joint Committee on Graduate Instruction, for the Ph D degree.

College of Pharmacy (B S, Ph G, and Phar D degrees) 15 entrance units.

Optometry 2 years of college work including specified subjects.

Seth Low Junior College The same as Columbia College.

Degree Requirements. *Columbia College* For A B 4 years or 124 points including maturity credits and stated prescribed courses. In the exercise of a professional option the first year's work in certain professional schools may be taken in lieu of the senior year in Columbia College. *Barnard College* (for women) For A B 4 years or 120 academic points including stated prescribed subjects. In the exercise of a professional option the first year's work in certain professional schools may be taken in lieu of the senior year in Barnard College. *School of Architecture* For B Arch 4 years following a 2-year college course. *School of Business* For B S 2 years following a 2-year college course.

Teachers College For B S Completion of 120 points of college work, including work credited on admission as well as the program in Teachers College. A minimum of 30 points is required in Teachers College courses. For details see the Announcement of Teachers College. For A M and M S Completion of 30 tuition points of graduate work distributed over 1 academic year or its equivalent, supplemented by a thesis or approved substitute. For details see the

Announcement of Teachers College For Ed D and Ph D The Advanced School of Education fixes the requirements for matriculation, the program of studies, and the conditions of graduation of candidates for the Ed D degree, and in cooperation with the Graduate Faculties of the University, administers in Teachers College the requirements for the Ph D degree The Advanced School of Education also provides facilities and guidance for students interested in pursuing professional work beyond the doctor's degree *New College* For B S Qualitative standards are substituted for quantitative standards Time varies with ability and effort of the student, who must prove capacity for superior teaching before the degree will be conferred *College of Physicians and Surgeons* For M D 4 years, prescribed courses *School of Dental and Oral Surgery* For D D S 4 years, prescribed courses *School of Journalism* For M S 1 year of graduate work *School of Law* For LL B 3 years All courses of the first year are prescribed *School of Engineering* (1) For B S 2 years following a 2-year college course, (2) For the various engineering degrees, 1 additional year *Library Service* For B S 1 year following a 4-year college course *Optometry* For B S 2 years following a 2-year college course

University Undergraduates For B S in general studies 4 years or 124 points, including stated prescribed courses, an approved field of study ending with comprehensive examination In the exercise of a professional option the first year's work in certain professional schools may be taken in lieu of the senior year For regulations regarding Med Sc D, Jur Sc D, LL M, and M S degrees in the several schools or faculties, and certificates of proficiency, see respective announcements For A M Not less than 30 tuition points (1 year) of graduate work, distributed over a period of not less than 1 academic year or its equivalent, and stated departmental requirements For Ph D Satisfactory completion of requirements as stated in announcement of respective faculties *College of Pharmacy* For Ph G 5 years For B S 4 years For

Phar.D 6 years *Baird College* For A B 4 years including 16 year courses or their equivalent in semester courses

General Requirements Physical Culture requirement 2 years in undergraduate schools Students in Columbia College required to live in dormitories unless they reside at home or are excused All women students who do not live in the dormitories or with their parents are required to live in approved lodgings if under the age of 23

CONCORD STATE TEACHERS COLLEGE

ATHENS, WEST VIRGINIA

Teacher training institution, coeducational, supported by state

Established by act of state legislature, 1872 and was opened for students 1875 Degree-granting privilege given in 1924

Controlled by state board of education made up of state superintendent of public education ex-officio, and 6 other members appointed by governor Financial affairs handled by West Virginia Board of Control, 3 members appointed by governor

Finances Total annual expenditures year ending June 30, 1935, \$125,000 Budget, 1935-36, \$125,000

Grounds and Buildings 52 acres valued at \$30,000, present worth of buildings, \$650,000 Dormitories 1 for men, accommodating 90, 1 for women, accommodating 120 New unit valued at \$103,000 for 1936, accommodating 85 New library by 1936, value \$100,000 New faculty homes by 1936, value \$45,000 New swimming pool by 1936, value \$60,000

Library 16,500 volumes, 200 current periodicals

Laboratories Main Building (1914) houses Biology, Home Economics, Physics, and Chemistry laboratories

Requirements: For Admission Graduates of classified high schools presenting 16 units as approved for graduation by the state board of education are admitted

For Degree 1 year residence 128 semester hours Average of C Major and minor

subjects Prescribed courses English, Education, History and Social Science, Health Education, Science, and Mathematics

General 1 year of Physical Education.

Departments and Staff. 51 teachers in the following departments Art, Biology, Education and Psychology, English, Foreign Languages, Geography, History, Home Economics, Mathematics, Music, Physics and Chemistry, Physical Education and Health, and Training Schools

Enrollment. For year ending June 30, 1935, 1,194 Summer school, 1935, 918

Degrees. Conferred year ending June 30, 1935, 98 Degrees conferred since 1924, when degree-granting privilege was gained, 470

Fees: Tuition and student activities, \$60 a year, lodging and board, \$20 to \$25 a month Annual expenses High, \$500, low, \$300

Scholarships. 67 N Y A, average \$15 a month, and approximately 35 state jobs

During year ending June 30, 1935, 25% of students earned all or part of expenses

Dates of beginning and ending sessions September 9, 1935, June 3, 1936

Summer session June 6 to August 7, 1936. Enrollment, 918 (in 1935)

Extension classes enrollment, 562

Catalog in February or March

Scholarships: 88 varying in amounts

from \$400 to \$50, loan fund Applications for scholarship aid close on June 1.

Vocational guidance secretary. In 1934-35, 25% of the students earned part of their expenses.

Approximate dates of beginning and ending sessions Monday nearest September 20, Monday on or following June 10 September 23, 1935 to June 15, 1936

Catalog in April

Achievements since 1932 2 dormitories, Windham, 71 students (1933), and Mary Harkness House, 75 students (1934) The Outdoor Theatre (1933) Greenhouse, for teaching in the Department of Botany, with laboratory for research in plant hormones (1935), built in part by a \$10,000 grant from the Rockefeller Foundation Psychological laboratory Phi Beta Kappa Charter granted February 13, 1935 Institute of Women's Professional Relations

Administrative Officers. *President*, Katharine Blunt, *Dean of the Faculty*, Irene Nye, *Dean of Students*, E Alverna Burdick, *Registrar and Director*, Admissions, David D Leib *Officer in charge of foreign students*, Irene Nye, dean

CONNECTICUT STATE COLLEGE

STORRS, CONNECTICUT

College for both men and women, publicly controlled, supported by state and federal funds

Storrs Agricultural School, established 1881, by an act of the general assembly, was founded through the generosity of Charles and Augustus Storrs of Mansfield, who gave land and money Additional funds were appropriated by the general assembly In 1893 the name was changed to Storrs Agricultural College and the institution was assigned the proceeds of Connecticut's share of the funds which had been created for the establishment of colleges of agriculture and mechanic arts by the Land-Grant Act of 1862 and the Morrill Act of 1890 The College was then officially

opened to women In 1899 the general assembly changed the name to Connecticut Agricultural College The general assembly of 1933 changed the name to the Connecticut State College Preparation of high school teachers in subjects related to agriculture and home economics has been extended in accordance with act of general assembly, 1917, designating this institution as the recipient of Connecticut's share of federal funds appropriated for this purpose During the past 2 years the training of teachers of general subjects, a major activity of the college since 1918, has been expanded into a 5-year program In making provision for granting the B A and M A degrees, the program in Arts and Sciences has been gradually expanded

Governed by a board of 13 trustees Governor of state, commissioner of education, and commissioner of agriculture are members, ex-officio 10 other members, 8 appointees of the governor and 2 the elected representatives of the alumni of the College, serve 4-year terms

Collegiate instruction is organized in 5 divisions, Agriculture, Arts and Sciences, Home Economics, Teacher Training, and Engineering, each supervised by a dean

Finances: Endowment, \$289,696 23, income from endowment, \$9,899 77 Income from other sources, \$1,087,296 32, federal appropriations, \$206,877 80, state appropriations (current expenses), \$375,948 25, state appropriations (capital outlays), \$34,735, revenue receipts, \$282,588 84 Total annual expenditures year ending June 30, 1935, \$1,097,628 37

Grounds and Buildings: Value of grounds, 1,959 acres, \$120,925 Buildings valued at \$2,150,959 27 Total value of grounds, buildings, and equipment, \$3,065,138 70 Residence halls 3 for men, capacity 320, 1 for women, capacity, 150

Library (1929) In the Charles Lewis Beach Building 38,200 volumes exclusive of government documents, 450 current periodicals

Laboratories Research laboratories in Atwater Laboratory (1929), present worth, \$33,500 Agronomy and Dairy in Dairy

Building (1898 remodeled 1911), \$41,200 Bacteriology, Botany and Genetics, Chemistry, Physics, and Zoology in Charles Lewis Beach (Science and Administration) Building (1929), \$364,450 Forestry in Gulley Hall (1907), \$39,350 Home Economics in Holcomb Hall (1921), \$227,000 Engineering in Mechanic Arts Building (1909), \$31,050 Poultry Building (1911), \$41,400 Value of equipment in principal departments, \$510,528 25

Museum Charles Lewis Beach Building contains specimens of the common birds and mammals found in Connecticut

Requirements: For Admission 15 acceptable units of secondary school work either in the form of credentials from an approved secondary school or by examinations of the College Entrance Board, or a combination of the 2, satisfactory health report, including a certificate of at least one successful vaccination against smallpox, 4 units of English, 2 of Mathematics To the Division of Agriculture, 1 unit of Chemistry or Physics, but only 9 must be in college preparatory subjects if 6 units of Vocational Agriculture are presented To the Division of Arts, 1 unit of History, 1 of Biological or Physical Science, and 3 of 1 language other than English or 4 units of 2 languages To the Division of Engineering, the requirements include a third unit of Mathematics, and 2 of the following Trigonometry, Chemistry, Physics To the Division of Teacher Training, completion of the freshman and sophomore work in college in any of the other divisions or equivalent

For Degree B A , B S For the Divisions of Agriculture, Arts and Sciences, and Home Economics, 125 credits For the Division of Engineering, 145 credits beginning with the year 1939 Must meet all requirements of 1 division of the College At least 18 times as many quality points as academic credits Comprehensive examination Last 2 semesters must be in residence Work in the upper 2 years In the Division of Agriculture, at least 30 credits, 15 of which must be in 1 department or 2 closely related departments In the Division of Arts, a major of

21 credits, 12 credits in related courses, and 14 in unrelated courses In the Division of Science, 21 credits in the major, 14 credits in related courses, and 11 in unrelated courses In the Division of Home Economics, a major of at least 21 credits, and a minor of 14 Most of the work in the Division of Engineering is prescribed The award of degrees with distinction (three grades with distinction, with high distinction, and with highest distinction) is based on the outcome of special written and oral examinations

M A and M S 1 year full-time study including at least 18 semester hours of work and a thesis or report, subject and scope of which is approved by the department concerned No credit allowed for work done in absentia, except for that connected with preparation for thesis Plan of study must be presented, prepared under direction of department in which candidate intends to work, approved by Committee on Graduate Study and filed with Registrar by end of fourth week of student's first semester Oral examination must be passed at close of period of study Upon satisfactory completion of requirements, candidate is recommended by Committee on Graduate Study to faculty for degree The degree conferred depends upon the candidate's baccalaureate work and upon the program pursued in his graduate study

Minimum number of credits per semester, 12 Divisions other than Engineering, maximum is 16 for normal students Those having quality point ratio of 26 or more, 18 Maxima are 1 higher than those for freshmen and sophomores in Engineering, and 2 higher for juniors and seniors

General Physical Education required 2 years for women, 1 year for men Military Science and Tactics required 2 years of all physically fit men students who are citizens of the U S

 Zoology 1, 1, 1, 1

Enrollment: For year ending June 30, 1935, 794 Men, 547, women, 247 Approximately 9,500 matriculants since foundation

Degrees: Conferred year ending June 30, 1935, 96 B A, 21, B S, 71, M A, 3, M S, 1 Total number of degrees conferred since foundation, 1,694 (no degrees conferred until 1904)

Fees. College fee is \$175 a year, one-half payable at the beginning of each semester This fee admits the student to all educational facilities of the College, to service at the dining hall at reduced rates, and in case of illness to the infirmary for 1 week a year without additional charge except for meals or a special nurse Fee also covers participation in athletic activities and admission to all home games Tuition, none for residents of Connecticut, \$100 each semester for others Late registration fee, \$5 Breakage deposit, \$10, payable by all entering students Military deposit, \$15 Student activities fee, \$4 75 each semester Dormitory rent varies from \$70 to \$110 a year Board at College dining hall amounts to about \$170 a year Part-time, special, and graduate students who register for less than 12 hours of credit are charged at the rate of \$4 50 a semester hour, plus a registration fee of \$5 each semester The minimum charge on this basis is \$18 50 Annual expenses, High, \$750, low, \$500 Fees are paid twice a year in advance of each semester

During year ending June 30, 1935, 57% of students earned part or all of way through college

Dates of beginning and ending sessions September 17, 1935 (preceded by 6 days of Freshman Week) to June 16, 1936

Catalog in February President's Report in alternate Novembers

Achievement of year ending June 30, 1935 Curriculum in Engineering re-organized, with degree of Bachelor of Science in Engineering to be awarded beginning 1939

Administrative Officers: *President*, Albert N Jorgensen, *Director*, Division of Instruction and *Dean*, Division of Teacher Training, Charles Burt Gentry, *Director*, Storrs Agricultural Experiment Station, William L Slate, *Director*, Extension Service, Benjamin Ward Ellis, *Comptroller*, Raymond Irving Longley, *Registrar* and *Secretary of the Faculty*, Marjorie Warren Smith, *Dean of Men*, Sumner Alvord Dole, *Dean*, Division of Agriculture, George Cleveland White, *Dean*, Division of Arts and Sciences, Howard Douglas Newton, *Dean*, Division of Home Economics and *Dean of Women*, Mildred Pearl French, *Dean*, Division of Engineering, Walter Lester Edel

CONVERSE COLLEGE

SPARTANBURG, SOUTH CAROLINA

College for women, independent of church, state, or corporation ownership, controlled by board of trustees

Chartered in 1890 as the property of stockholders, and rechartered in 1896 by the South Carolina Legislature when the owners surrendered their stock and made it an absolute gift for the higher education of women Named for D E Converse, originally from Vermont, leader in founding the College

Self-perpetuating board of trustees, not more than one-third may be affiliated with same church Connected with the college of liberal arts under the same administration is a professional school of music with separate dean, building, faculty, and finances For 33 years, a 3-day music festival has been held each year

Finances: Endowment, \$650,000 Total income from all sources, \$207,036 48

Grounds and Buildings: Value of grounds, 42 acres, \$200,721 71; value of buildings, \$731,253 73, value of equipment, \$190,236. Total value of grounds, buildings, and equipment, \$1,122,211 44 Residence halls (250)

Library 26,175 volumes, of which 850 are government publications 70 current periodicals

Laboratories Judd Science Hall valued at \$65,000 for Biology, Chemistry, Physics Equipment estimated at \$32,624 56

Observatory

Requirements: For Admission 15 units If, in 15 units there is a deficiency of not more than 2 units of subjects prescribed for admission (no deficiencies allowed in English and only 1 in Latin), the applicant may be admitted, but such deficiencies must be removed before the beginning of the sophomore year For B A English, 3, Mathematics, 3, Latin, 3, Modern Language, 2, History, 1 For B S English, 3, Mathematics, 3, Foreign Languages, 4 (2 of 2 each), Science, 1, History 1 No student is admitted to the freshman class unless she has made an average grade of at least 80% in the 4-year high school course, and no student is admitted to advanced standing beyond the beginning of the junior year

For Degree 124 semester hours (4 in Physical Education) Grade of 80% must have been attained in courses amounting to 30 semester hours during first 2 years and to 30 semester hours during junior and senior years, and not less than 70% in any course A major of at least 18 semester hours and a minor of at least 12 semester hours must be taken during junior and senior years

Honors courses offered during junior and senior years are administered by a special committee Written reports must be submitted from time to time During the senior year the student writes an essay on an approved subject connected with her special course of reading Must stand a written examination in the field of her major subject

General Chapel attendance 4 days a week, 1 service in some church on Sunday

Departments and Staff. (Parenthesis indicates member of staff gives instruction in another department also) Art *Professors*, 1, *associate professors*, 0, *assistant professors*, 0, *instructors*, 0 Biblical Literature 0, 0, 0, 1 Biology 1, 0, 0, 1 Chemistry 1, 0, (1), 0 Education 0, 1, 0, 0 English 1, 1, (1), 0 French 2, 1, 0, 0 German (1), 0, 0, 0 Greek (1), 0, 0, 0 History 1, 0, (2), 0 Italian 0, (1), 0, 0 Latin 2, 0, 0, 0 Mathematics 1, 0, 0, 1 Philosophy (1), 0, 0, 0 Physical Education 1, 0, 0, 1 Physics and Astronomy 1, 0, (1), 0 Psychology (1), 0, 0, 0 Sociology and Economics 1, 0, (1), 0 Spanish 0, (1), 0, 0

Enrollment: 1934-35, in College of Liberal Arts and Sciences, 258 Total number of matriculants since foundation, approximately 5,100

Degrees. Conferred year ending May 27, 1935, 45 B A, 26, B S, 19 Total number of degrees conferred since foundation, 1,836

Fees Tuition and maintenance fees, \$250 a year, each laboratory fee, \$10 a year, room and board, \$400 a year

Scholarships. A limited number of endowed scholarships and a certain number of scholarships offered through accredited high schools and preparatory schools to the outstanding graduates

Session of 1934-35 September 18, 1934, May 27, 1935

Annual catalog in spring

CORNELL COLLEGE

MOUNT VERNON, IOWA

Liberal arts college, coeducational, privately controlled

Founded in 1852, opened in 1853

Self-perpetuating body of 36 trustees

Finances: Endowment, \$2,150,466 22, income from endowment, \$73,319 11, income from other sources, not including dormitories and dining hall, \$109,767 29 Total annual expenditures, not including dormitories and dining hall, \$173,837 81 Budget, 1935-36, \$224,803 83

Grounds and Buildings: 60 acres valued at \$70,268 76, present worth of buildings, \$581,822 42 Dormitories 2 for men, accommodating 185, 5 for women, accommodating 254

Library (1904) 50,000 volumes, 189 current periodicals

Laboratories Old Seminary, known also as Science Hall (1853) houses Chemistry and Home Economics, Law Memorial Hall (1925), Geology and Biology, Physics Building, a wing of Law Memorial, Physics

Requirements: For Admission Plan A, Entrance by Certificate Requirements as follows (1) Presentation of certificate showing completion of at least 15 units of work in a properly accredited high school which must include as a minimum (a) 3 units in English, (b) 2 units in each of 2 of the following fields Mathematics, Foreign Language, Natural Science, Social Science (2) Acceptance by the committee on admissions Plan B, Admission by Examination Exceptional students, who show by examination that they are prepared to carry satisfactorily the work of the Cornell curricula to which they wish to be admitted, may be accepted without graduation from the secondary school. The specific conditions involved are Satisfactory attainment on a series of achievement, aptitude, and general intelligence examinations and other tests and scales, administered by the Dean of the College, evidence of social maturity, acceptance by the committee on admissions

For Degree 124 semester hours and 124 quality points Recommendation by faculty During junior and senior years, at least 40 semester hours in courses of the Upper College. Residence the last full year before graduation, full course during that time A major in a department, or a division If departmental major is chosen at least 10 additional hours must be completed within same

division but outside the major subject A minimum of 6 semester hours in each of the 5 divisions Fine Arts, Language, Literature and Composition, Natural Sciences and Mathematics, Social Sciences, Philosophy and Religion Specific requirements English, Freshman Composition, 6 hours, Physical Education, 4 hours, Vocational Orientation, 1 hour, reading knowledge of 1 Foreign Language

General All students must reside in college dormitories or at home, daily chapel attendance

Departments and Staff: Art Professors, 0, assistant professors, 1, instructors, 0, assistants, 1, Dramatic Art and Speech 0, 0, 1, 0 Music 2, 1, 4, 0 Classical Languages 1, 0, 0, 0 English Language and Literature 2, 0, 1, 1 French 0, 1, 0, 1 German Language and Literature 1, 0, 0, 0 Natural Sciences and Mathematics 7, 0, 1, 2, Social Sciences 3, 1, 0, 0 Education 2, 1, 2, 0 Philosophy and Religion 0, 1, 0, 0 Physical Education 0, 0, 3, 1 Secretarial Training 0, 0, 0, 1 Vocational Orientation 1, 1, 0, 0

Enrollment: For 1934-35 (without summer school), 512 Men, 236, women, 276 Total number of matriculants, 47,014 (approximate)

Degrees: Conferred year ending June 30, 1935, 82 B A, 73, B M, 2, B S M, 4, D D, 1, D Sc, 1, Mus D, 1 Total number of degrees conferred since foundation, 3,456

Fees: Tuition, \$180, rent, \$90-\$150, board, \$170, activity fees, \$28, graduation fee, \$7 Annual expense Liberal, \$650, low, \$505

Scholarships. Amounts varying from \$50 to \$100, loan fund In 1934-35, 48% of students earned all or part of expense

Dates of beginning and ending sessions Third Tuesday of September and first Monday in June.

Catalog, January to March

Administrative Officers: President, H. J. Burgstahler, Dean, T R McConnell, Dean of Men, Albion R. King, Dean of Women, Alice R Betts.

CORNELL UNIVERSITY

ITHACA, NEW YORK

University, under private control which is subject to annual state appropriation for the maintenance of Veterinary College, College of Agriculture, and College of Home Economics, and which, with respect to a fraction of 1% of the University's income, is subject to the Act of Congress governing the income of the College Land-Scrip fund, non-sectarian, coeducational

Incorporated in 1865, by Legislature of State of New York, which appropriated to it the income of New York's portion (990,000 acres) of the educational land grant of 1862. In 1866, Ezra Cornell, who had given the University 200 acres of land and \$500,000, bought from the state scrip representing 913,920 acres of the grant under a contract binding him to pay to Cornell University the whole net profits from the sale of the land, these profits and his other gifts to constitute the "Cornell Endowment Fund." That fund, he stipulated, was to be free from the restrictions which the Morrill Act placed upon the funds derived from the sale of land scrip, and was to be held as his donation to the university. In 1874, when about 400,000 acres, mostly timber land in Wisconsin, remained unsold of the land that Mr. Cornell had located, the University took his place in his contract with the state, committed the conservation and sale of the timber and lands to the management of Henry W. Sage of the board of trustees, and in due time fulfilled the terms of the contract. The net profits of that operation in land swelled the "Cornell Endowment Fund," which the University owes to Ezra Cornell, to \$5,381,925. The College Land-Scrip Fund, consisting of the receipts from the state's sale of the scrip, amounts to \$688,576, it is held in the state treasury and the University holds the state's certificate of indebtedness for an interest thereon of 5% per annum.

College of Architecture, 1871, Law School, 1887, Graduate School, 1909. Cornell University Medical College established in 1898 and endowed in 1913. State has maintained

Veterinary College since 1894 and College of Agriculture since 1904, and in 1925 it incorporated the College of Home Economics, which had been a unit in the College of Agriculture. The state in 1923 gave the University control of the Agricultural Experiment Station at Geneva.

Board of 30 trustees, 15 persons co-opted, 10 persons elected by the alumni, and 5 persons appointed by governor of New York, president of the University, governor and lieutenant-governor, speaker of the Assembly, commissioner of education, commissioner of agriculture, president of state agricultural society, and librarian of Cornell Library in the City of Ithaca, each ex-officio, the eldest male descendant of Ezra Cornell for life, and a representative of the state grange elected annually. The University faculty elects 3 representatives who sit with the board but do not vote.

Finances Productive funds on June 30, 1935, \$29,882,275. Income available for current expenses of the fiscal year, 1934-35, \$7,326,811.

Grounds and Buildings The campus, farms, field stations, forests, and demonstration tracts occupy 6,862 acres, valued at \$1,265,968, value of buildings, \$18,037,218, total value of grounds, buildings, and equipment, \$25,795,215.

Sage Library (1891) The University Libraries comprise the general library of the University, the Seminary libraries in the general library building, the Architectural Library, the Chemical Library, the Civil Engineering Library, the Sibley Engineering Library, the Law Library, the Flower Veterinary Library, the Barnes Hall Biblical Library, the Goldwin Smith Hall Library, the Van Cleef Memorial Medical Library, and the Library of the New York State College of Agriculture. Total number of classified volumes and pamphlets, 935,000. The number of periodicals, transactions, and other serials, currently received, is over 2,500, and of most of these complete sets are on the shelves.

The general library contains many special collections, notably 4 rich collections given by Willard Fiske. Dante Collection (10,000

volumes), Petrarch Collection (4,000 volumes), Rhaeto-Romanic Collection (1,300 volumes), and Icelandic Collection (20,000 volumes); and the President White Historical Library, 23,000 volumes and pamphlets, the gift of President White, especially rich in the primary sources of History and containing useful collections on the period of the Reformation, on the English and French revolutions, on the American Civil War, and on the history of superstition. 6 seminary rooms, each equipped with reference books, provided in library building, for study of English, Classical Languages, Germanic and Romance Languages, Philosophy, Politics and Economics, and American and European History. Similar collections have been formed in connection with the scientific and technical laboratories. Library has income of an endowment fund of \$300,000, given by Henry W. Sage, for purchase of books and periodicals, and income of an endowment fund of \$503,000 given by Willard Fiske, for general uses and for maintenance and increase of the Icelandic and Italian collections.

Observatory 12-inch equatorial telescope

Requirements: For Admission. Minimum requirement for admission to freshman class 15 units, without conditions. Special requirements by individual colleges. Medical College and Law School are graduate schools.

For Degree. See the announcement of any particular college or school, published by the secretary of the University.

General University faculty prescribes for freshmen and sophomores 3 hours a week of Physical Training (Military Training for the men), and for freshmen 1 hour a week of lectures on Hygiene and Preventive Medicine.

Enrollment: Total number of matriculated students (excluding duplicates), June 30, 1935, 5,910. Men, 4,565, women, 1,345. Graduate School, 753. Men, 606, women, 147. Medicine, 288. Men, 256, women, 32. Law, 179. Men, 174, women, 5. College of Arts and Sciences, 1,823. Men, 1,283, women, 540. Engineering, 827. Men, 824, women, 3.

Architecture, 161. Men, 141, women, 20. Veterinary, 157. Men, 155, women, 2. Agriculture, 1,172. Men, 1,033, women, 139. Home Economics (including Hotel Administration), 648. Men, 189, women, 459. Duplicates, 98.

Registered in the summer session of 1935, 1,652. Registered in the winter courses in Agriculture, 115.

Degrees: Conferred year ending June 30, 1935, 1,393. Total number since foundation, 40,330.

Fees. Tuition, yearly, in Medical College, \$500, in College of Arts and Sciences, Architecture, Engineering, Hotel Administration, and Law School, \$400, in Veterinary College and Colleges of Agriculture and Home Economics, \$200 to nonresidents of the state, in Graduate School, \$150 plus \$25 fee. Matriculation fee, \$10. Graduation fee, \$10 (\$20 for advanced degree). Other fees, each semester, all students. Infirmary, \$6, Willard Straight Hall membership, \$5, recreation fee (undergraduates), \$4. Laboratory fees are charged to cover cost of materials used by the student. Board and lodging from \$300 to \$550 a year. Total expenses. High, \$1,200, low, \$800.

Scholarships. The University has no way of remitting the regular tuition charges in any instance except to students of certain categories which are exempted by statute of New York State or of the board of trustees. In the Graduate School are 18 scholarships of \$200 each, 27 fellowships of \$400 to \$1,000 each, and 20 free-tuition scholarships. 5 Lefevre Scholarships, each having an annual value of \$400 and continuing while the holder is a student of the University, and 18 University Undergraduate Scholarships, each continuing for 2 years and having an annual value of \$200, are awarded each year to members of the incoming freshman class on the basis of a competitive examination. The State of New York annually awards the pupils of the state's common schools or academies 150 scholarships, each of which entitles the holder to a reduction of \$200 in the regular tuition fee for 4 years in any department of Cornell University.

Research The Heckscher Foundation for the Promotion of Research at Cornell University provides income for the trustees to use in setting professors and instructors partly or wholly free from teaching duties for productive research and scholarship, and for writing. In addition, special endowments and regular federal and state appropriations provide for investigation in many different fields. The University conducts Agricultural Experiment Stations at Ithaca and at Geneva, New York.

Session begins on fourth Monday of September, ends on the thirty-eighth following Monday.

Summer session begins on first Saturday after July 1, and continues 6 weeks. Attendance in 1935, 1,652.

University extension only in the Colleges of Agriculture and Home Economics.

Publications Annually, the Cornell University Official Publication, a series of pamphlets, including the general information number and the announcement of each school and college, and of the summer session (all these intended for prospective students), and the President's Report. The University publishes the bi-monthly *Philosophical Review*, and occasional *Cornell Studies in Philosophy*, *Classical Philology*, *English*, and *Romance Languages and Literatures*, also *Islandica*, an annual relating to Iceland and the Fiske Icelandic Collection in the University library. University Press, Comstock Publishing Company, incorporated and owned by the University.

Administrative Officers *President*, Livingston Farrand, *Provost*, A. R. Mann, *Registrar* and *Director of Admissions*, Eugene F. Bradford.

GRADUATE SCHOOL

Has jurisdiction over all graduate work and advanced degrees. Its faculty consists of all those members of the university staff who are actively engaged in supervising the work of graduate students.

Enrollment: 1934-35, 753

Administration: *Dean*, F. K. Richtmyer.

COLLEGE OF ARTS AND SCIENCES

Requirements: For Admission. Limited to 500 freshmen, 15 units, including English, 3, Foreign Languages, 5 (or 3 and 2 additional in History, Advanced Mathematics, or Science), Mathematics, 2, History, 1.

For Degree. See the announcement of the college, published annually by the Secretary of the University.

Laboratories Baker Laboratory of Chemistry (1923-24), cost, \$1,800,000, equipment valued at \$251,500. Laboratory of Geology in McGraw Hall, equipment, \$87,000. Laboratory of Physics in Rockefeller Hall (1903-04), cost, \$275,000, equipment, \$206,000. Laboratory of Psychology in Morrill Hall and Goldwin Smith Hall, equipment, \$35,000. Laboratory of Zoology in McGraw Hall, equipment, \$106,000.

Museums of Archaeology, Botany, Chemistry, Education, Geology, Paleontology, and Zoology.

Departments and Staff: Astronomy *Professors*, 1, *assistant professors*, 0, *instructors*, 0. Biology 17, 5, 17. Chemistry 10, 2, 6. Classics 4, 1, 2. Economics 3, 6, 6. Education 4, 1, 0. English Language and Literature 9, 2, 13. Geology and Physical Geography 3, 1, 7. German 4, 0, 4. Government 1, 2, 1. History 7, 0, 0. Mathematics 6, 4, 6. Music 2, 4, 1. Philosophy 3, 3, 1. Physics 5, 5, 9. Psychology 3, 1, 1. Public Speaking 2, 4, 3. Romance Languages and Literatures (French, Spanish, Italian) 4, 2, 4. Scandinavian Languages and Literatures 1, 0, 0.

Enrollment: For 1934-35, 1,823.

Administration: *Dean*, R. M. Ogden, *Assistant Dean* and *Secretary*, R. P. Sibley.

CORNELL LAW SCHOOL

Cornell Law School is a graduate school, giving instruction in the common law and equity jurisprudence of England and America, the attention of students being called to local peculiarities.

Building Myron Taylor Hall (1932), cost, \$1,500,000.

Library More than 75,000 volumes and

about 6,000 pamphlets. Includes a complete collection of the reports of the federal courts and of the several American state jurisdictions and the English, Scottish, Irish, Australian, and English colonial reports, also an unusually complete collection of statute law, and a complete collection of periodicals, digests, encyclopedias, texts, and other material.

Requirements: For Admission Bachelor's degree of an approved college or university. Seniors in College of Arts and Sciences of Cornell University may take entire first year in law to complete requirements for A B.

For Degree A 3-year course leading to LL B. All the fundamental courses of first year required, most of work of second and third years elective. Normally a student carries 12 to 14 hours of classroom work a week.

Departments and Staff: Law Professors, 10, assistant professors, 1.

Enrollment: For 1934-35, 175.

Scholarships. 11 Cornell Law Association Scholarships for 1934-35, \$200 to \$400 each, 2 Sackett Scholarships, \$400 each, 2 Van Nostrand Scholarships, \$250 each, the Boardman Scholarship, \$100 awarded annually for senior year, Fraser Scholarships, \$100 and \$50 respectively, awarded for senior year by the senior class from a list recommended by the faculty.

Publication Cornell Law Quarterly, published by students under faculty supervision.

COLLEGE OF AGRICULTURE

New York State College of Agriculture at Cornell University (see also State College of Home Economics and the New York State Experiment Station).

The organization is unique in that the State College of Agriculture is a unit in Cornell University which is a private institution. The State of New York supplies the funds for the support of the College, and asks the University to serve as agent in its administration.

Aside from tuition and other student fees the funds available to the College (1934-35)

amount to \$2,049,806, of which \$1,708,884 is supplied by the State of New York, \$299,403 by the federal government, and the remainder comes from special funds.

Grounds and Buildings: The College has in experimental use 1,624 acres of farm land owned by the University. Cost of buildings erected by state since 1904, \$3,800,000. The College operates the Arnot experimental forest, 1,800 acres.

Library About 110,000 volumes relating to Agriculture, housed partly at the College and partly in the University Library.

Laboratories Students of agriculture take their basic science work in courses in the College of Arts and Sciences. The College of Agriculture maintains in addition laboratories for work in Soils, Crops, Animal Husbandry, Poultry, Bacteriology, Entomology, Dairy Industry, Botany, Plant Physiology, Plant Pathology, Plant Breeding, Floriculture, Ornamental Horticulture, Vegetable Gardening, Pomology, Forestry, Meteorology, and Rural Engineering. The laboratories and classrooms are supplemented by greenhouses and other field equipment appropriate to teaching and research.

Requirements: For Admission 15 units without condition and including English, 3, History, 1, Algebra, 1, Plane Geometry, 1, Foreign Language, 3 (or 2 in each of two). The New York State academic diploma in Agriculture is accepted for entrance.

For Degree In addition to Military Drill or Physical Training and Hygiene, 120 hours, including English, 6, Biology, Botany, or Zoology, 6, Chemistry or Physics, 6, Physiology, 3, Economics, 5, additional basic science, 18, agricultural electives, 55. Farm experience required prior to admission or during summers, except for students specializing in certain subjects.

Staff: Professors, 103, assistant professors, 44, instructors, 51.

Enrollment: 4-year course, 1,172, 12-weeks winter course, 115.

Degree: Bachelor of Science.

Fees: Tuition free to those who have resided in New York State at least 1 year, \$200 for other undergraduates. Laboratory

fees average \$50 a year See also general station

Research Approximately one-fifth of total funds devoted to research 350 graduate students in agricultural departments Graduate study may also be prosecuted under staff of State Experiment Station at Geneva

Summer session July 8 to August 16

Extension The College maintains a staff of extension workers, and extension teaching is done by every department During the year approximately a million teaching contacts are made through lectures, demonstrations, short-time schools, tours, farm visits, and in other ways Each of 55 agricultural counties of the state employs an agricultural agent working under general supervision of the College and paid partly from college funds There are also 24 junior extension agents working with 4-H clubs A lantern slide and moving-picture film service is provided for agencies carrying on agricultural extension work Correspondence courses in Agriculture enroll more than 1,000 students

Publications Series of memoirs, experiment station bulletins, and extension bulletins embodying results of experimentation and making agricultural information available to farmers About a million and a quarter of these bulletins are distributed yearly, and are sent only on request

Administration. *Dean and Director*, Experiment Stations, 1934-35, C E Ladd, *Director*, Extension, I. R. Simons, *Director*, Resident Instruction, Cornelius Betten, *Secretary*, O W Smith

AGRICULTURAL EXPERIMENT STATION

New York State Agricultural Experiment Station, Geneva, New York

Established in 1882 Since 1923, Cornell University has served as agent of the state in administration of the station In order to correlate experimental work at Geneva and at Ithaca, the 2 stations are under the same director

Finances: Total income for 1934-35, \$328,094, of which all but \$8,724 of federal funds was appropriated by the State of New York.

Grounds and Buildings: Station farm comprises 246 acres Besides barns and tool-sheds, there is a chemical laboratory building, a biological laboratory building, an administration building, and a greenhouse range Residences provided for certain members of the staff

Library A highly specialized library is built around the several sciences in the field of the station's experimental work

Museums A museum contains a collection of models illustrating the contributions of the station to agriculture

The station is primarily and almost solely a research organization Departments are maintained in Agronomy, Botany, Bacteriology, Biochemistry, Dairy Industry, Dairy Chemistry, Plant Pathology, Entomology, and Horticulture

Staff The technical staff includes 67 persons Graduate students in the State College of Agriculture may elect to study under members of the staff

Publications Results of experimental work published in station bulletins, series of illustrated monographs of the fruits and vegetables of the state

Administrative Officers. *Director*, U P Hedrick, *Vice-Director*, P J Parrott

COLLEGE OF HOME ECONOMICS

New York State College of Home Economics at Cornell University

Finances: Aside from tuition and other student fees the College received during 1934-35, \$286,304 from state appropriations, \$109,425 from federal funds, and \$10,911 from other sources

Building: Martha Van Rensselaer Hall (1933-34), cost \$985,000 Laboratories for work in foods, textiles, clothing, household equipment, and household art A section of the building devoted to instruction in child care and training has provision for a nursery school A commercial shop conducted in connection with work in clothing There is also a small house and an apartment in which students live during a practice period A cafeteria serves as a training laboratory in food preparation and in institution management

Requirements: For Admission 15 units without condition, and including English, 3, History, 1, Plane Geometry, 1, Algebra, 1, Foreign Language, 3 (or 2 in each of two) The New York State academic diploma in home making is accepted

For Degree Besides Physical Training and Hygiene, 120 hours, differing according to the line of specialization Courses organized for the general student and for specialization such as is needed by teachers of food or clothing, clinical or laboratory dietitians, managerial dietitians, and extension workers in home economics There is a special 4-year course in Hotel Administration

Staff: Professors, 16, assistant professors, 14, instructors, 13

Enrollment 4-year course, 1934-35, 648, including 189 in Hotel Administration

Degree: Bachelor of Science

Fees: Tuition free to those who have resided in New York State at least 1 year, \$200 for other undergraduates Laboratory fees average \$50 a year Tuition in the course in Hotel Administration is \$400 for all students, resident and nonresident Other fees as in general statement

Research work in foods and nutrition, household economics, and child training

Summer session July 8 to August 16

The College of Home Economics has general supervision of home economics extension throughout the state A staff of extension workers at the College and 42 home demonstration agents in the various counties

Administrative Officers: *Dean*, 1934-35, C E Ladd, *Director*, Flora Rose, *Director*, Extension, L R Simons, *Secretary*, O W Smith

VETERINARY COLLEGE

New York State Veterinary College, Ithaca, N Y

Maintained by State of New York and administered by Cornell University, being similar to the State College of Agriculture in its organization and relationships

Established in 1894 on a foundation of courses in Veterinary Science which had been given in Cornell University since 1868

Finances: Appropriation for 1934-35, \$157,164

Grounds and Buildings. Group of 5 large and several smaller buildings near center of university campus, besides an outlying experiment station and farm

Library Roswell P Flower Veterinary Library, 10,500 volumes, endowment, \$18,000

Laboratories of Anatomy, Physiology, Pathology, Bacteriology, Materia Medica, and Surgery, supplemented by general scientific laboratories of the College of Arts and Sciences and Medical College

Requirements: Admission by presentation of a veterinary student qualifying certificate issued by state education department In order to obtain this certificate the student must have satisfactorily completed not only a college entrance course in an approved high school but also one year of work including 6 hours each of Inorganic Chemistry and English in a registered college of arts and sciences or its equivalent

Degree of Doctor of Veterinary Medicine (D V M) after prescribed 4-year course

Staff: Professors, 9, assistant professors, 8, instructors, 14

Enrollment 1934 35, 157

Degrees Conferred in 1934-35, 56, since foundation, 923

Fees. Tuition free to those who have resided in New York State at least 1 year, \$200 for other undergraduates Laboratory fees for the 4 years respectively will approximate \$52, \$40, \$43, and \$5 Other fees as in general statement

About one-eighth of the College's income is devoted to research

Publications An annual report

Administration: *Dean*, 1934-35, W A Hagan

COLLEGE OF ARCHITECTURE

A professional school, offering courses of study designed for training preparatory to the practice of Architecture, Landscape Architecture, or Painting and Sculpture Established in 1871 Offices and studios in White Hall and Franklin Hall Collection of 24,000 lantern slides

Requirements: Admission limited and obtained only through committee on admissions of the college after satisfying the minimum entrance requirements 15 units including English, 3, History, 1, Elementary Algebra, 1, Intermediate Algebra, 1, Plane Geometry, 1, Solid Geometry, $\frac{1}{2}$, Foreign Language (3 in one language or 2 in each of two languages), and at least 1 of the following Advanced Algebra, $\frac{1}{2}$ unit, Plane Trigonometry, $\frac{1}{2}$ unit, Physics, 1 unit, or Chemistry, 1 unit

Curriculum of 5 years leads to degree of Bachelor of Architecture, Bachelor of Landscape Architecture, or Bachelor of Fine Arts

Staff: Professors, 9, assistant professors, 8, instructors, 0

Enrollment In 1934-35, 161

For tuition and other fees, see general statement above, laboratory fee for all students, \$10 each semester

For graduate study, a \$400 university fellowship with free tuition

Administration: *Dean*, George Young, Jr

COLLEGE OF ENGINEERING

School of Civil Engineering, Sibley School of Mechanical Engineering, School of Electrical Engineering

Library In addition to collection of engineering literature in University Library, each of the schools has a branch library containing from 2,500 to 4,000 books each. These branches are intended to present to the student books and magazines as they issue from the press. Of special importance is the Kitchling Memorial Library of the School of Civil Engineering, a collection of 1,500 books and pamphlets on hydraulic and municipal engineering

Testing of materials of construction, of highway material, and of materials used in mechanical and electrical engineering, and for commercial testing of machines operated by steam, electricity, or water. Hydraulic laboratory in a gorge alongside a waterfall that provides a natural head of ample capacity of about 60 feet.

Requirements: For Admission 15 units, including English, 3, Foreign Language, 3

(or 2 in each of two), Plane Geometry, 1, Elementary Algebra, 1, Intermediate Algebra, 1, Solid Geometry, $\frac{1}{2}$, Plane Trigonometry, $\frac{1}{2}$

For Degree 4 baccalaureate degrees are conferred, Civil Engineer, Mechanical Engineer, Electrical Engineer, and Bachelor of Science in Administrative Engineering, each requiring primarily the completion of a prescribed 4-year course of approximately 145 hours. Provision is also made for a more extended course. The student may obtain both the degree of A B and that of C E, M E, E E, or B S in A E within 6 years—2 years of instruction in the College of Arts and Sciences and 4-year course in Engineering. There is also a 5-year course in conjunction with the Department of Chemistry leading serially to the degrees of Bachelor of Chemistry and Chemical Engineer

Staff: Professors, 35, assistant professors, 23, instructors, 25

Enrollment 1934-35, 827

Fees See general statement above, laboratory fee, \$25 a year for all students except those in Civil Engineering, who pay \$8 a year after the freshman year

Scholarships: For residents of New York State, \$200 state tuition scholarships, for nonresidents, fifteen \$200 McMullen regional scholarships

Publications *Bulletins of the Engineering Experiment Station*. The Cornell Engineer, published by students under faculty and alumni supervision

Administration: *Dean*, D S Kimball, *Directors*, Civil Engineering, S C Hollister, Mechanical Engineering, H Diederichs, Electrical Engineering, P M Lincoln

CORNELL UNIVERSITY MEDICAL COLLEGE IN NEW YORK CITY

The New York Hospital-Cornell Medical College Association, 1300 York Avenue, New York City, occupies a group of buildings between 68th and 71st Streets, along the East River. It is an organic association of the Hospital and the College for cooperation in their medical, educational, and scientific work. Separate buildings are

provided for each of the several laboratory departments, including approximately 1,000 hospital beds. Provision is made for Medicine, Surgery, Obstetrics and Gynecology, Pediatrics, and Psychiatry in 5 distinct clinical institutes. The faculty of the College and the staff of the Hospital form one body established on a university basis.

The College Founded in 1898, associated with New York Hospital in 1927. Productive funds, June 30, 1935, \$11,011,233. Income available for current expenses, 1934-35, \$579,162.

Requirements: For Admission Graduates of approved colleges or scientific schools, or seniors in good standing in such colleges or schools on condition that their faculty will permit them to substitute the first year in the Cornell University Medical College for the fourth year of their college course, and will confer upon them the bachelor's degree upon satisfactory completion of the year's work.

For Degree 4 years of medical study.

Staff: Professors, 37, associate professors, 17, assistant professors, 60, lecturers and associates, 16, instructors, 186, assistants, 78.

Degrees: Conferred year ending June 30, 1935, M.D., 64. Total number of degrees conferred since foundation, M.D., 1,875.

Fees: Tuition and fees, \$500 a year. Publications. Bulletins.

Administration: *Acting Dean*, W. S. Ladd.

MEDICAL COLLEGE IN ITHACA

Building: The Ithaca Division of the Medical College occupies Stimson Hall (1901) cost \$130,750, equipment valued at \$90,000.

Library: Van Cleef Memorial Library, housed in Stimson Hall, provides reference works and important periodicals in addition to facilities of University Library.

Staff: Professors, 4, instructors, 3.

Research: The Ithaca Division has income of endowment fund of \$50,000. Department of Physiology operates an experimental field station occupying 9 acres near Ithaca.

Administration: *Secretary*, A. T. Kerr.

CREIGHTON UNIVERSITY

OMAHA, NEBRASKA

University, with College of Liberal Arts and Preparatory School, owned and conducted by the Society of Jesus. Women's College, conducted by the Society of the Sacred Heart. Junior College of St. Mary, conducted by the Sisters of Mercy. No religious test applied to the teachers or students.

Creighton College of Arts and Sciences, and Creighton Preparatory School founded in 1877, Medical School, 1892, School of Law, 1904, College of Pharmacy, 1905, School of Dentistry, 1905, College of Commerce, 1920, School of Nursing, St. Catherine's Hospital Unit, 1929, St. Joseph's Hospital Unit, 1928, Duchesne College, 1926, College of St. Mary, 1929, University College, 1931, College of Journalism, 1933.

Self-perpetuating board of trustees, composed of 5 members, the president of the University being president of the board. The trustees all belong to the Jesuit Order.

Finances: Endowment, \$3,007,133.23, income from all sources, \$753,228.80. Total annual expenditures, \$739,026.58.

Grounds and Buildings: Value of grounds, \$235,900, of buildings, \$1,881,000, of equipment, \$528,000.

Library: 110,788 volumes. Distribution: Liberal Arts, Commerce, Journalism, 47,000; Dental, 1,487; Law, 33,604; Medical and Pharmacy, 7,611; Preparatory School, 8,630; Duchesne, 7,456; Saint Mary's, 5,000.

Laboratories: Physics, Chemistry in Arts College Building; Medicine, Pharmacy, Dentistry in respective buildings; Biological laboratory in Dental Building.

Observatory: 5-inch refracting telescope and 3-inch meridian.

Requirements: For Admission. For Arts and Sciences, Journalism, University College, Commerce, and Pharmacy 4 years (15 units) from an accredited high school. 1 condition allowed, to be removed by end of first year of residence.

Nursing: 4 years (15 units) from an accredited high school.

Dentistry 4 years (15 units) from an accredited high school, 1 year (30 semester hours) of college preparation, including Physics, Biology, Chemistry, and English No conditions allowed

Law 4 years (15 units) from an accredited high school, 2 years of college preparation

Medicine 4 years (15 units) from an accredited high school, 2 years (60 semester hours) of college preparation, including 8 semester hours in Physics, 8 in Biology, 12 in Chemistry, 6 in English The remaining 26 semester hours are elective No conditions allowed

Duchesne 4 years (15 units) from an accredited high school

St Mary's 4 years (15 units) from an accredited high school

For Degree Arts and Sciences, A B, B S, Ph B, 128 semester hours Prescribed English, 12, Modern Language, 16, Mathematics, 6, History, 6, Philosophy, 15, Military Training, 4, Evidences of Religion, 8, thesis For A B (in addition to foregoing) Latin, 15 Commerce and Journalism, 4 years, thesis required Dentistry 4 years Law, 78 hours of Law courses Medicine, 4 years, about 4,000 clock hours, passing grade 75% in every branch, with a general average of 77.5, thesis required B S in Medicine after 2 years of Medical courses, passing grade same as foregoing

General All male students in the undergraduate colleges (unless physically exempt) are required to take 2 years of Military Science Catholic students (College of Arts and Sciences, and College of Commerce and College of Journalism, University College) are required to attend chapel once a week.

Departments and Staff: Biology *Professors*, 0, *associate professors*, 0, *assistant professors*, 1, *instructors*, 2 Chemistry 1, 0, 0, 2 Classical Language 1, 0, 0, 2 Czech 0, 0, 0, 1 Education 1, 1, 1, 0 English 2, 1, 1, 2 Modern Language 1, 0, 1, 2 History 1, 1, 0, 0 Mathematics 0, 0, 1, 3 Military 1, 0, 2, 0 Philosophy 2, 1, 0, 1 Physical Education 0, 0, 3 Physics 1, 0, 0, 0 Public Speaking 0, 0, 1, 0 Religion 0, 0, 0, 5

CULVER-STOCKTON COLLEGE CANTON, MISSOURI

A liberal arts college, coeducational

Established as Christian University in 1853 Name changed to Culver-Stockton College in 1917

Controlled by a self-perpetuating board of trustees of 18 members, two-thirds must be members of the Disciples of Christ Church

Finances: Endowment, \$1,085,932 45, income from endowment, \$30,345 46, income from other sources, \$34,278 54 Total annual expenses, 1934-35, \$68,443 48 Budget, 1935-36, \$70,000

Grounds and Buildings: 100 acres valued at \$25,000, present worth of buildings, \$416,165 40 Dormitories 1 for men, accommodating 20, 1 for women, accommodating 90

Library 22,000 volumes, 145 current periodicals

Laboratories All housed in Henderson Hall

Requirements: For Admission 15 recommended units as follows English, 3, Foreign Language, 2, Algebra, 1, Plane Geometry, 1, History, 1, Laboratory Science, 1, electives, 6

For Degree 1 year's residence, 124 semester hours and 124 grade points, major and minor subjects

General Physical Education, 4 hours, Bible, 6, English, 9, Natural or Physical Science, 15, History, 6, General Psychology, 3 Other requirements determined by major

DAKOTA WESLEYAN UNIVERSITY

MITCHELL, SOUTH DAKOTA

College for men and women, privately controlled, affiliated with Methodist Episcopal Church

Founded in 1885 In 1883 a charter for Dakota University was secured at the instance of the Dakota Mission Conference of the Methodist Episcopal Church A stock company was formed, "University Addition" to the City of Mitchell was plotted

and lots sold, thus funds for college were raised. In 1885 new company chartered and institution opened. In 1886 Dakota Annual Conference accepted responsibility for control.

Board of 36 trustees, the resident bishop of the St. Paul area and the 5 district superintendents of the Dakota Conference of the Methodist Episcopal Church, ex-officio members.

Finances Endowment, \$570,142 76, income from endowment, \$9,324 73, income from other sources, \$105,301 97. Total annual expenditures year ending August 31, 1935, \$106,986 15.

Grounds and Buildings Total value of grounds, 20 acres, \$48,184 50. Total present worth of 6 buildings, \$422,614 46. Total value of grounds, buildings, and equipment, \$545,264 10. 2 residence halls for women (130), 1 for men (28).

Library 55,138 volumes, 210 current periodicals.

Laboratories Science Hall (1911), present worth, \$95,714. Value of equipment Biology, \$4,210 28, Chemistry, \$5,691 41, Physics, \$3,259 29, other departments, \$1,706 50.

Requirements For Admission Admission to the freshman class is based upon evidence of good moral character and the satisfactory completion of a recognized 4-year high school course or its equivalent.

For Degree 36 major credits for A B or B S. Certain group requirements. Courses amounting to 9 majors must be taken in 1 department.

General Chapel attendance required. Women required to live in dormitories unless they are working for their board and room.

Departments and Staff. Biology *Professors*, 1, *associate professors*, 0, *assistant professors*, 0, *instructors*, 0. Chemistry 1, 1, 0, 0. Classical Languages and Literature 1, 0, 0, 0. Enrollment. For year ending August 31, 1935, 473 Men, 216, women, 257.

Degrees: Conferred year ending June 4, 1935, 42.

Fees. Graduation, \$5, tuition, \$50 a quarter, room, \$16 50 to \$18 a quarter. Annual expenses Liberal, \$500, low, \$400.

Scholarships Freshman scholarships (\$25 each) and 10 special endowed (\$40 each).

More than 65% of student body annually take advantage of opportunities for employment.

Dates of beginning and ending sessions September 23, 1935, June 9, 1936.

Summer session June 10, 1936.

Catalog in March.

Administrative Officers *President*, Earl A. Roadman, *Dean*, College of Liberal Arts, Melvin W. Hyde, *Registrar*, Jesse J. Knox.

DARTMOUTH COLLEGE

HANOVER, NEW HAMPSHIRE

Privately controlled liberal arts college for men.

Dartmouth College is an outgrowth of a school founded at Lebanon, Connecticut, by Eleazar Wheelock, for the Christian education of Indian youth. Funds raised in England and contributed largely by Lord Dartmouth, enabled Wheelock to move 150 miles to the Hanover Plain, 5 miles north of the junction of the Connecticut and White Rivers, and so allowed him to enlarge the scope of his work. On the authority of George III, the Province of New Hampshire gave a charter to the new Dartmouth College in 1769. In 1819, the College was involved in a law suit with the State of New Hampshire. Daniel Webster, a Dartmouth graduate, as attorney for the College, was successful in receiving a decision from the Supreme Court of the United States, which denied the right of the State of New

Hampshire to break the charter and to take control of the College. Since that time the College has remained a private institution, controlled by its board of trustees.

Self-perpetuating board of 12 trustees. The president of the College and the governor of the State of New Hampshire are members of the board ex-officio, 5 members must be residents of the State of New Hampshire, 5 members are elected after nomination by the alumni, 5 members are elected for life by the board of trustees.

Finances: Endowment, as of June 30, 1935, \$17,209,301.97. Total annual income for the year 1934-35 was \$1,719,892.75, of which \$601,114.48 represented income from investments, \$855,346.15, income from tuition less scholarship payments, \$165,138.10, gifts for current use, and the balance, \$73,354.31, miscellaneous income. Total expense for the year ending June 30, 1935, \$1,719,892.75.

Grounds and Buildings: Approximately 175 acres in Hanover, valued at about \$657,000. Buildings valued at about \$8,000,000. Value of grounds, buildings, and equipment, about \$10,300,000.

Library: Baker Memorial Library (1928), approximately 400,000 volumes, 1,500 current periodicals. Special collections: Eleazar Wheelock, Daniel Webster, History of New Hampshire, New Hampshire and Vermont newspapers, Physiological Optics, Spanish Plays, Barrett Clark collection of English and French plays, Italian dialects, the Sturel collection on French Humanism, the library of Rupert Brooke, the Guizot pamphlet collection on French economic history, the Connor collection on early medicine, orchids, mountaineering and winter sports, the Libbie-Fowler collection of book-plates.

Laboratories: 4 buildings devoted to laboratory purposes, valued at about \$900,000, equipment valued at about \$300,000.

Observatory: 9 4-inch and 5 0-inch visual refractor (Clark) and 9 4-inch photographic refractor (Clark), with adequate auxiliary equipment and meteorological instruments.

Requirements: For Admission. Restriction on enrollment to 2,400 necessitates selection of freshman class of 650 annually from 2,000 applicants. Carnegie unit requirement dropped in 1932. Candidates for admission must satisfy requirements of a selective process presenting through school recommendations and other testimonials evidence of intellectual capacity, ability and desire to do justice to academic work of college. Positive qualities of character and personality, range of interests and capable performance in outside activities operate as factors in selection.

For Degree. For A B, the only degree conferred, 120 semester hours with an average rank of about C. Required courses: English, 1 year, Industrial Society, $\frac{1}{2}$, Evolution, $\frac{1}{2}$, Science, 2, Social Science, 2, Foreign Language. Major in some department and comprehensive examination in major course. Honors work during junior and senior years.

Departments and Staff: Administration. Professors, 1, assistant professors, 0, instructors, 0. Art and Archaeology 3, 1, 1. Biblical History and Literature 1, 0, 0. Biography 0, 1, 1. Biology 9, 2, 6. Chemistry 5, 1, 3. The Classics 4, 1, 0. Comparative Literature 2, 1, 0. Comparative Religion 1, 0, 0. Geology 3, 0, 4. German 3, 2, 3. Graphics and Engineering 2, 0, 0. History 6, 5, 0. Industrial Society 2, 1, 4. Mathematics 7, 3, 1. Music 2, 2, 1. Philosophy 5, 1, 1. Physical Education 1, 8, 7. Physics 6, 0, 4. Political Science 4, 2, 3. Psychology 2, 4, 1. Public Speaking 1, 2, 3. Romance Languages 8, 11, 1. Sociology 6, 2, 3. School of Business Administration 8, 5, 0. School of Civil Engineering 2, 2, 0. School of Medicine 9, 7, 11.

Enrollment: For year ending June 30, 1935, 2,480.

Degrees: Conferred year ending June 30, 1935, A B, 503. Since foundation in 1769, 16,284.

Fees: Tuition charge, \$400 a year. This covers all fees. Average charge for room, \$200, for board (freshmen only), \$250. A study of typical budgets shows that a

student who is obliged to economize and live on a minimum budget without sacrificing any essentials should have at his disposal approximately \$1,050 a year. No deductions have been made for earnings or for financial aid which may have been extended by the College. This budget is figured for those living within a radius of 150 miles of Hanover; students coming from a greater distance should make additional allowance for traveling expenses. A student who is not obliged to practice rigid economy should be able to indulge in reasonable expenditures, and not exceed a budget of \$1,500 a year.

Scholarships: Approximately 500 men assisted by scholarships and loans ranging from \$100 to \$700. 12 fellowships valued at about \$1,000 each awarded annually.

Dates of beginning and ending sessions: Next to last Thursday in September, Commencement, Tuesday of week in which June 20 falls, except that when the twentieth falls on a Sunday, Commencement shall be the preceding Tuesday.

Bulletins issued 9 times during the year. Announcement of courses in December.

Administrative Officers: *President*, Ernest Martin Hopkins, *Dean of the Faculty*, Earl Gordon Bill, *Dean of the College*, Lloyd Kellock Neidlinger, *Dean*, Freshmen and *Director*, Admissions, Robert Chamberlain Strong, *Registrar*, Robert Otheo Conant, *Dean*, Medical School, John Pollard Bowler, *Dean*, Thayer School of Civil Engineering, Frank Warren Garran, *Dean*, Tuck School of Business Administration and Finance, William Rensselaer Gray.

DAVIDSON COLLEGE

DAVIDSON, NORTH CAROLINA

College of arts and sciences, for men, Presbyterian, church-related.

Founded in 1837 by Presbyteries of Concord, Bethel, and Morgantown. Chartered in 1838.

49 trustees, elected by their respective Presbyteries of the Synods of North Caro-

lina and Florida. 12 elected by the alumni association.

Finances: Equity in the Duke Endowment, yielding an income equivalent to earnings on an investment of \$1,250,000, endowment, \$973,474, income from endowment and funds functioning as endowment, including the Duke Endowment, \$108,734. Income from other sources, not including dormitories and dining hall, \$105,782. Total annual expenditures, not including dormitories and dining hall, \$267,495. Budget, 1935-36, \$268,278. New money unsolicited, \$20,000. Churches contribute annually approximately \$3,000.

Grounds and Buildings: 100 acres valued at \$64,104, buildings and equipment, \$1,432,117. 7 dormitories, accommodating 527. College owns also 18 residences occupied by members of the faculty.

Library (1910) 37,894 volumes, 175 current periodicals.

Laboratories. Chambers Building (1925) houses laboratories of Physics, Biology, Geology, and Drawing. Martin Chemical Laboratory (1899).

Museum. Room in Chambers Building set aside for Museum.

Requirements For Admission (1) Graduation from accredited preparatory or high school with recommendation of school principal. (2) 15 units including 4 of English, 3 of Mathematics, 2 of Foreign Language, 1 of History, 5 of electives. Conditions allowed in Foreign Language, but must be removed by the beginning of the sophomore year.

For Degree 2 years of resident study, 1 of which must be the senior year, 130 semester hours, 140 quality points, in third and fourth years' work, concentration in 1 department amounting to 18 semester units. Same requirement for both degrees.

Honors work may be elected by superior students with approval of a department or group of departments. Honors students must have evidenced initiative, power of organization, and broad background in subject matter. Mastery of the collation of knowledge must be demonstrated in a comprehensive examination.

General Daily chapel attendance, one church service each Sunday Physical Education or Military Science, for freshmen and sophomores

DAYTON, UNIVERSITY OF

DAYTON, OHIO

For men and women, privately controlled

Conducted by the Society of Mary, a religious congregation founded by Reverend William Joseph Chaminade in Bordeaux, in the beginning of the 19th century In response to a call for religious teachers from Cincinnati, Ohio, a small group came to this country in 1849 In 1850, after having purchased the "Dewberry Farm," they opened St Mary's College This foundation marked the beginning of what is now known as the University of Dayton

Board of trustees of 7 members and an associate board of lay trustees of 21 members

Grounds and Buildings 50 acres, valued at \$287,000, buildings, \$1,360,000 Total value of buildings, grounds, and equipment, \$2,087,000

Library (1928) Volumes, 33,700, including 1,150 government volumes, number of current periodicals, 132

Laboratories Value of equipment Biology, \$45,000, Chemistry, \$48,000, Physics (including Engineering equipment), \$180,000

Requirements. For Admission An applicant for admission to a freshman class is asked to secure his high school record on the form supplied by the college Minimum entrance requirements, 15 units as follows English, 3 units, History, 2, Algebra, 1, Plane Geometry, 1, Science, 2, Foreign Language (Ancient or Modern) 2, electives, 4 Additional requirements of the College of Science, 1½ units in Algebra, the College of Engineering, an additional half unit in Algebra and a half unit in Solid Geometry and the 2 Sciences offered to be Physics and Chemistry.

For Degree For B A, B S, Bachelor of Science in Business, or Bachelor of Science in Education, 120 hours properly distributed among majors, minors, and electives

Upon the successful completion of 1 of the Engineering courses, the degree of B S in Chemical, Electrical, Mechanical, or Civil Engineering is awarded

These degrees will be conferred according to the candidate's scholarship with the mention *summa cum laude* for a scholarship of 95%, *magna cum laude* for a scholarship of from 85% to 95%, and *cum laude* for a scholarship of from 75% to 85% 1 year of residence or 30 semester hours required for any degree

General Physical Education is given chiefly through the R O T C unit Military Training is obligatory for freshmen and sophomores and optional for juniors and seniors Attendance at the weekly assembly is obligatory

Departments and Staff: There are 4 departments to the College of Arts and Sciences Arts and General Science, Business, Education, and Pre-Medic Course There are likewise 4 departments to the College of Engineering Chemical, Civil, Electrical, and Mechanical Engineering The professors total 48

Enrollment Exclusive of duplicates, 968 Men, 684, women, 284 By departments, Arts and Science, 523, Education, 220, Business, 152, Engineering, 130, Law School discontinued in June, 1935

Degrees Conferred during the year ending June 30, 1935, 119 B A, 22, B S, 15, B S in Education, 7, B S in Business, 14, B S in Engineering, 24, Bachelor of Laws, 29, Juris Doctor, 6, Master of Patent Law, 2 Total since foundation of school, 1,297

Fees: For boarding students living in St Joseph Hall, basic fee, \$600, for boarding students living in Alumni Hall, \$650 The basic fee includes tuition, board, lodging, laundry, and activities Extra charge of \$50 for private bath

For students not living on the campus, basic fee, \$225 (tuition, \$200, and activities, \$25)

Special fees vary according to the courses followed by the student.

The regular session began September 17, 1934, and ended June 10, 1935

The summer session extended from June 27 to August 3, 1934 (6 days per week) Enrollment, 176

boys, \$25 per semester Board for girls, \$108 per semester There is no college dining hall for boys Average annual expenses for a student run from \$600 to \$800

Scholarships A limited number of scholarships at \$100 each to students preparing for the Baptist ministry

Student employment All applications for student employment are handled by a committee of administrative officers through the office of the bursar 40% of the students enrolled earned a part of their expenses in 1934-35

Dates of beginning and ending sessions September 10, 1934, June 10, 1935

Summer session June 12 to August 9, 1935 Enrollment, 125.

University extension Enrollment in classes, 32, 1934-35

Publications Catalog in January, Journal of Scientific Laboratories, quarterly, Annual Report of the President, special pamphlets published occasionally

Achievements of year ending June 30, 1935 Final adoption of new policy concerning academic freedom and tenure, adoption of new statement of principles and character, restatement of aims and purposes of the institution

Administrative Officers President, Avery A Shaw, Dean of Men, Frederick C. Detweiler, Dean of Women, Helen L. Olney, Registrar, Donald R. Fitch, Bursar, Alfred J. Johnson

DENVER, UNIVERSITY OF

DENVER, COLORADO

The Graduate School, the College of Liberal Arts, the School of Science and Engineering, and their Summer Schools are located on the campus at University Park in the southeastern section of the city of Denver The School of Law, the School of Commerce, Accounts, and Finance, the School of Fine Arts, and the School of Librarianship are located in the business section near the State Capitol, the Public Library, and the Municipal Building

University, privately controlled, under auspices of Methodist Episcopal Church, for men and women

The charter of the Colorado Seminary was granted by the Council and House of Representatives of the Colorado Territory in 1864. The leader in this enterprise was Governor John Evans, appointed by President Abraham Lincoln as the second governor of the Colorado Territory. In 1880 the University of Denver was organized as the degree-conferring body of the Colorado Seminary.

Board of 28 trustees, 7 elected each year by the Colorado Conference of the Methodist Episcopal Church. The University of Denver consists of the following divisions, schools, and colleges: Graduate School, College of Liberal Arts, School of Science and Engineering, School of Commerce, Accounts, and Finance, School of Fine Arts, School of Librarianship, Summer School, City College, Extension Division, Department of Social Work, Bureau of Business and Social Research, Foundation for the Advancement of the Social Sciences, University Civic Theatre, and the Central City Play Festival.

Finances: Endowment, \$2,357,768, income from endowment, \$54,422, income from other sources, \$424,998. Total annual expenditures year ending August 31, 1935, \$492,090. Notable financial items for 1934-35: Carnegie Corporation, \$7,500, National Research Council, \$2,500, Squibb Corporation, \$1,000. Total budget for 1935-36, \$463,389.

Grounds and Buildings: 30 acres valued at \$197,181, present value of buildings, \$1,074,334. Residence halls 2, accommodating 73 women.

Library: Mary Reed Library on University Park Campus erected in 1932. Total volumes in all University libraries, 102,000. Mary Reed Library, 64,563 volumes, 10,000 (500 titles) government documents, 456 current periodicals. First editions, valuable papers, manuscripts, etc. presented to Treasure Room. Endowment trust fund for library support, \$180,000. Library facilities in community. Denver Public Library,

Bibliographical Reference Bureau for Rocky Mountain Region, located in the Public Library, Medical Library of City and County of Denver, Library at University of Colorado School of Medicine, Library of the State Historical Society in Colorado State Museum, all within 5 miles of campus and available for use of students. School of Fine Arts, School of Commerce, Accounts, and Finance, and School of Law each maintains own library, but the total number of books is included in the above 102,000.

Laboratories: Science Hall (1912), Chamberlin Observatory (1891), University Hall (1890). Present worth of buildings, \$197,299, value of equipment, \$124,176.

Chamberlin Observatory: 2 stone buildings, smaller sheltering 6-inch Grubb refractor and larger housing 20-inch refractor with lens by Alvan Clark and mounting by Saegmuller, largest refractor telescope between Chicago and the Pacific coast. Larger building contains also 4-inch meridian circle.

Museums: Museum of Anthropology containing valuable collection of artifacts.

Requirements: For Admission: Graduation from accredited high school. No specified distribution of subject matter is required for admission to the College of Liberal Arts. The School of Science and Engineering requires 3 units of Engineering, 2 of Social Science, 2 of Mathematics, 2 of Science and 2 of Foreign Language. The School of Commerce requires the same distribution except that only 1 unit of History and 1 unit of Science are required. Deficiencies in required units for the School of Science and Engineering and School of Commerce must be removed during the first 2 years of the college course.

For Degree For A B: At least 9 courses (45 quarter hours) in residence, total of 37 courses (185 quarter hours), with a minimum average of C, major of 8 courses and a minor of 4, not less than 15 courses in Senior College (upper division). For B S: 9 courses in residence, total of 37 courses with a minimum average of C, major of 9 courses in one Science, 2 minors, 3 courses each, in 2 other Sciences, 3 courses French or German. For

B S in Commerce 38 courses with a minimum average of C, 9 courses in residence, distribution of subjects in accordance with field of specialization elected by student. For B S in Chemical Engineering and B S in Electrical Engineering 37 5 courses with a minimum average of C, 9 courses in residence, subject matter distribution in accordance with a prescribed curriculum in each case B S in Medical Technology 3 years prescribed Pre-Clinical course, followed by 12 months supervised clinical study in hospital and private laboratories, at least 1 year of Pre-Clinical training in residence and individual clinical courses under supervision of clinician appointed by the University For LL B 135 quarter hours of Pre-Legal college work and 120 quarter hours in the School of Law, 97 in required subjects, and balance elective, not less than 1 year residence, minimum average grade for graduation, 75 B A and B S granted by arrangement between College and Law School or College and accredited Medical Schools For B S in Library Science Equivalent of B A degree and 1 year prescribed professional Library curriculum Library curriculum must be taken in residence For B F A 37 courses with a minimum average of C, at least 9 in residence, approximately one-half in academic subjects, balance in courses in Arts Master's degree granted by Graduate School upon completion with high quality of 1 year of residence, and the passing of satisfactory oral and written examinations, and the submission of a satisfactory thesis Ph D degree in the Division of Education and Philosophy granted by Graduate School upon completion with high quality of 3 years of residence, and the passing of satisfactory oral and written examinations, and the submission of a satisfactory thesis

General 1 year of Physical Education, and 2 courses (10 quarter hours) of English Composition

Enrollment: (Excluding 534 high school students and summer school), 4,793 Men,

1,771, women, 3,022 Graduate School, 326, College of Liberal Arts and Sciences (regular day), 337, College of Liberal Arts and Sciences (late afternoon and Saturday), 1,376, College of Commerce, 784, College of Law, 690, College of Music and Drama, 205, Secretarial School, 318, Nursing Schools, 505, Extension Department, 109, Home Study Department, 318

Degrees: Conferred year ending June 30, 1935, 475 Ph B, 75, B Sc, 8, Sc B Ed, 79, B S, 50, J D, 16, LL B, 167, M A, 28, M Sc, 3, B A, 32, Ph B Mus, 2, M M, 3, Mus B, 4, Mus Ed B, 5

Fees: Matriculation, \$10, student activity fee, \$10, Science, \$5 to \$14, general, \$5 to \$31 Annual expenses Liberal, \$270, low, \$220

Dates of beginning and ending sessions September 17, 1934, June 12, 1935

Summer session June 25 to August 3, 1935 Enrollment, 2,300

University extension Enrollment in classes, 109, enrollment in correspondence courses, 318

Publications Bulletins Law in May, Commerce in June, Secretarial in December, Liberal Arts and Sciences in March, Music in April, Summer School in January, Journal of Religious Instruction, student publications

Administrative Officers *President*, Very Rev Michael J O'Connell, C M, *Vice-President*, Rev Thomas C Powers, C M, *Treasurer*, Rev Daniel J McHugh, C M, *Dean*, College of Liberal Arts and Sciences, (regular day), Rev Joseph J Edwards, C M, (late afternoon and Saturday), Howard E Egan, *Dean*, College of Law, Williams F Clarke, *Dean*, College of Commerce, Henry L McCarthy, *Dean*, College of Music and Drama, Arthur C Becker, *University Examiner*, John C McHugh, *Dean of Women*, Mary Reilly, *Dean*, Instruction, William Murphy, *Dean*, Graduate School, Rev Alexander P Schorsch, C M

DE PAUW UNIVERSITY

GREENCASTLE, INDIANA

College of liberal arts and school of Music, coeducational, privately controlled Although DePauw was founded by the Methodist Episcopal Church of Indiana, and has received the support of that denomination, it is not considered sectarian.

The report of a committee to the Indiana Methodist Conference of 1832 called for the establishment of an institution of higher learning In 1837, the General Assembly of Indiana granted a charter for the establishment by the Methodist Episcopal Church of a university, which was "forever to be conducted on the most liberal principles, accessible to all religious denominations, and designated for the benefit of our citizens in general" To this charter provision the University has remained consistently loyal The new school was named Indiana Asbury University, to honor the pioneer bishop, Francis Asbury At one time there was a School of Medicine, School of Law, and a School of Theology in addition to the College of Liberal Arts Women were admitted in 1867. In 1883, Mr Washington C DePauw made a gift of several hundred thousand dollars, and the institution was renamed DePauw University. The original name survives in the Asbury College of Liberal Arts

The joint board of trustees and visitors of DePauw University is composed of 35 trustees and 9 visitors 10 trustees are elected by the board upon the nomination of the president of the University, 4 are elected by the alumni association, and 21 by the Indiana Conferences of the Methodist Episcopal Church There are now the College of Liberal Arts and the School of Music, with a faculty of 95 members Methodist Episcopal Hospital, Indianapolis, is a co-operating institution

Finances: Endowment, \$5,657,732 70, income from endowment, \$162,016 49, income from student fees, \$221,581 93, from other sources, \$47,542 78 Total annual expenditures year ending June 30, 1935, \$494,244.25 Budget, 1935-36, \$490,786.05.

Grounds and Buildings: 75 acres valued at \$164,946.71 Present value of buildings, \$1,895,225 93 Residence halls 5, accommodating 451 students

Library (1908) 86,982 volumes, 15,947 volumes of government documents, 385 current periodicals Special collections Simson Latin Library, Kappa Alpha Theta Alcove of vocational material for college women

Laboratories Minshall Laboratory (1909), *present worth*, \$153,000, *value of equipment*, \$67,500 (Chemistry, Physics, Geology) Science Annex, \$11,500, \$36,000 (Botany and Zoology) Home Economics House, \$4,000, \$1,000, and Home Management House, \$2,000, \$750 (Home Economics). Psychology Laboratory, \$16,000, \$4,000

Museums Social Museum occupies 3 rooms in the basement of East College, Modern Social, Archaeology, Ethnology collections, together with loan collections displayed from time to time

Observatory McKim Astronomical Observatory (1884), 9 53-inch refractor, 76-mm meridian circle, chronograph, 2 Howard clocks

Requirements: For Admission Graduate of commissioned high school of Indiana or from otherwise accredited or approved high school in or out of Indiana Scholarship standing must be in upper two-thirds of graduating class Require 16 units, carried through not less than 32 weeks with 5 recitations a week Must include English, 3, Mathematics, 2, History, 1, Foreign Language, 2, Laboratory Science, 1 Deficiency in Mathematics must be removed before second year in college Other deficiencies may be removed by taking work in college without credit toward graduation

For Degree For B A, B M, and B S M Last 30 hours of college work in residence, 120 hours of academic work with minimum of 90 hours of C grade or better For B A. Major of 30 hours, 2 minors of 12 hours each or 1 of 18 hours, English Composition, 6, Foreign Language, 12 to 16, Laboratory Science, 5, Social Sciences, 6, Philosophy-Religion, 6 For the B M. Applied subjects including a major, 40, Music Essentials, 6,

Harmony, 12, Counterpoint, 4, Composition, 8, History of Music, 6, Nature of Music, 4, Music Literature, 8, Conducting, 2, Orchestration, 3, English Composition, 6 For the B S M Applied Subjects, 24, Music Essentials, 6, Harmony, 12, History of Music, 6; School Music Education, 12, Music Literature, 8, Counterpoint, 4, Conducting, 2; Orchestration, 3, Psychology and Education, 12; Supervised Teaching, 5, English Composition, 6 Master's degree granted upon completion of 30 semester hours of residence work, including the thesis with grades of A or B, and satisfactorily passing an oral examination

General 4 credits in non-prepared Physical Education (4 semesters)

Departments and Staff: College of Liberal Arts Art *Professors*, 1, *associate professors*, 0, *assistant professors*, 0, *instructors*, 1 Botany 1, 1, 0, 1 Chemistry 1, 1, 1, 0 Comparative Literature 1, 0, 1, 0 Economics 1, 1, 1, 0 Education 3, 0, 0, 0 English 3, 3, 3, 1 English Bible 2, 0, 0, 0 Geology 1, 0, 0, 0 German 1, 0, 0, 2 Greek 1, 0, 0, 0 History 4, 1, 0, 0 Home Economics 1, 0, 1, 0 Latin 1, 0, 1, 0 Mathematics and Astronomy 2, 0, 1, 0 Philosophy 2, 0, 0, 0 Physical Education 1, 0, 2, 4 Physics 1, 1, 0, 0 Political Science, 3, 0, 1, 0 Psychology 1, 2, 0, 0 Religious Education 1, 0, 0, 0 Romance Languages 2, 1, 4, 0 Sociology 1, 1, 0, 0 Speech 1, 2, 1, 0 Zoology 2, 0, 0, 1 School of Music Applied Music 4, 0, 1, 2 Theoretical Music 4, 0, 2, 0 School Music 0, 0, 1, 0 Preparatory 0, 0, 0, 4

Enrollment: 1,276 Men, 781, women, 495 College of Liberal Arts, 1,180, School of Music, 96

Degrees: Conferred year ending June 30, 1935, 261 M A, 1, M M, 3, A B, 243, B M., 4, B S M, 10

Fees: All fees have been merged into one standard tuition charge which includes athletic events Liberal Arts, \$250 annually Music School, \$350 annually Room rent ranges from \$27 to \$48 per semester in the university halls of residence, board, \$90 for

each semester. Annual expenses Liberal, \$750, low, \$575.

Scholarships: 100 \$1,000 for 4 years Applications close May 1.

Research 2 years ago an experiment in the Department of Chemistry was initiated. Seniors majoring in Chemistry spend from one-fourth to one-third of their time on a piece of genuine research. Within the past 14 months 11 papers have been published from our laboratory in the Journal of the American Chemical Society and 7 students have taken up their work towards the doctor's degree in graduate institutions 6 seniors are engaged in research at the present time

Employment Bureau Approximately 25% of the students earned all or part of their expenses during 1934-35 Approximately 12% of the students earned part of their expenses through F E R A work during the school year 1934-35.

Dates of beginning and ending sessions September 10, 1934, June 17, 1935

DePauw University Bulletin, including catalog, Freshman Week Program, Alumni News Bulletins, Handbook of Information, The DePauw (college newspaper, tri-weekly), The Mirage (annual), The DePauw Magazine

Achievements of year ending June 30, 1935 The complete business reorganization of the University, vesting business management in a comptroller who is responsible to the president of the University. The closing of a large estate which added approximately \$750,000 to the funds of the University, \$250,000 of which is to be used for the erection of a science building to house the Departments of Botany, Geology, and Zoology The adoption by the board of trustees of a report of a joint committee of faculty and trustees on promotion, salary scale, academic freedom, tenure, and retirement.

Administrative Officers: *President*, G Bromley Oxnam, *Dean*, College of Liberal Arts, William Martin Blanchard, *Dean*, School of Music, Robert Guy McCutchan, *Dean of Men*, Louis Herman Dirks, *Dean*,

Enrollment: For the year ending June 30, 1935, 350 Men, 173, women, 177. College of Liberal Arts, 277. Theological Seminary, 30. Summer School, 43.

Degrees: Conferred year ending June 1935, 53. 2-year diploma, 2, A B. degree, 41, B D, 3, B Th, 7.

Fees: Board and room, \$315, tuition, \$150, registration fee, paid once only, \$3, incidental, \$16, activity, \$12 50, diploma, \$10.

During 1934-35, 25% of students earned an average of \$105 each.

1935-36 session. September 9 to June 2, 1936. Summer School. June 9 to August 15, 1936.

Administrative Officers: *Acting President*, W. B. Zuker, *Dean of College*, L. B. Mull, *Dean of Seminary*, Guido Bossard, *Dean of Women*, Blanche Bock. Adviser for foreign students, Alois Barta.

DUKE UNIVERSITY DURHAM, NORTH CAROLINA

University, privately endowed, consists of Trinity College for men, a coordinate college for women, and graduate and professional schools to which women are admitted. The executive committee of the University "controls the internal regulations of the University and fixes all salaries and emoluments" (as set out in the University's charter). It also appoints officers and teachers, subject to the approval of the University trustees. The 36 University trustees provided for in the charter nominate their successors. Of these nominees 12 are elected by the North Carolina, 12 by the Western North Carolina Conference of the Methodist Episcopal Church, South, and 12 by the Duke University Alumni Association. Members are elected for 6 years, the term of 12 expiring every other year. The 15 Endowment Trustees are provided for in the Indenture of Trust by which the University was created and they choose their own successors.

The University owes its existence to a charitable trust set up by an Indenture dated December 11, 1924, but it is built around Trinity College, which in its origin goes back to 1838. Originally an inter-denominational undertaking called Union Institute and located in Randolph County, it was incorporated as Normal College under state control in 1851. Normal College became Trinity College in 1859, and passed into affiliation with the North Carolina Conference of the Methodist Episcopal Church, South. In 1892 Trinity College was moved to Durham and operated under the name of Trinity College until 1924, when it was merged into Duke University, of which Trinity College remains an integral part.

The University comprises the following schools: Trinity College, Woman's College, Graduate School of Arts and Sciences, School of Law, School of Medicine, School of Nursing, School of Religion, Summer School.

Finances: Endowment, \$29,880,267.26, income from endowment, \$1,009,627.04, student fees, \$1,091,789.90, income from other sources, \$584,888.84. Total annual expenditures (June 30, 1935), \$2,669,615.93. Total budget for 1935-36, \$2,735,354.78.

Grounds and Buildings: 5,300 acres valued at \$4,693,455.50, buildings, \$18,422,715, total plant and equipment, \$26,147,076, 5 groups of residence halls accommodating 1,700 men, 7 halls accommodating 800 women, one campus of Gothic architecture, separate adjacent Georgian campus for women.

Library: Woman's College Library (1927), University Library (1930), 420,264 volumes (June 30, 1935), 2,462 current newspapers and periodicals, special collections of books, newspapers, and periodicals, separate departmental libraries.

Laboratories: Science Building (Woman's College, 1927), \$525,998, Chemistry (1930), \$528,081, Biology (1930), \$393,938, Physics (1930), \$349,162, Science equipment (exclusive of medicine), \$250,559, medical school, hospital, and equipment (1930), \$3,727,974.

Requirements: For Admission: Trinity

College and Woman's College. On a selective basis, graduation from accredited high school with minimum of 15 units, including mainly Languages, Mathematics, Science, and History, and requiring 3 units in English and $2\frac{1}{2}$ in Mathematics, recommendation from principal and satisfactory evidence of good character and ability.

Graduate School: Bachelor's degree from approved 4-year college. Admission does not necessarily imply admission to any particular course or to candidacy for a degree.

School of Law: Graduation from an approved college, or completion of $\frac{3}{4}$ of the requirements for graduation.

School of Medicine: At least 70 semester hours of approved college work, mainly science.

School of Nursing: Graduation from an approved high school.

School of Religion: Graduation from approved college.

Summer School: Graduation from approved high school.

For Degree: Trinity College and the Woman's College. A.B. and B.S., 122 semester hours; B.S. in Engineering, 138 semester hours. 10 groups of studies leading to B.A.: General, Business Administration, Religion, Pre-Medical, College Teaching, Public School Teaching, Pre-Legal, Social Sciences, Honors, Academic-Law Combination, 2 groups leading to B.S.: General and Pre-Forestry, 3 degrees in Engineering: B.S. in E.E., C.E., and M.E. Both minimum uniform requirements for all groups and special requirements for the particular group selected must be met.

Graduate School: Year of residence required for master's degree, 3 years of study required for doctor's degree, of which either first 2 or the last must be in residence. Both general requirements of the graduate school and special requirements of the department must be met. Reading knowledge of 2 Foreign Languages acceptable to department required for all degrees. M.A., 24 semester hours and acceptable thesis; M.Ed., 24 semester hours, acceptable thesis, and 2 years of teaching experience; Ph.D., not

less than 3 years beyond bachelor's degree "This degree is based primarily upon evidence of high attainments in a special field of knowledge and upon the production of a thesis embodying the results of original research"

School of Law LL B, 3 years of approved work, LL M, 1 year of resident study beyond LL B, S J D, granted after interval of year beyond LL M on basis of distinguished essay or series of essays

School of Medicine BS in Medicine, 70 semester hours of college work and 6 quarters in Medicine, extra departmental work and a thesis, MD, 12 quarters in Medicine and 2 years of internship

School of Nursing Diploma of Graduate Nurse, 3 years of 11 months each, BS in Nursing, 60 semester hours of college work and the course leading to Diploma of Graduate Nurse

School of Religion BD, 90 semester hours and a thesis, 2 semesters must be in residence

Summer School Offers professional credit (for teachers), and undergraduate and graduate credit identical with that offered in Trinity College, the Woman's College and the Graduate School of Arts and Sciences

General Average grade of C on all work 6 semester hours of Physical Education, except for engineering students, required in Trinity College and the Woman's College

Departments and Staff: (Total) *Professors*, 87, *associate professors*, 22, *assistant professors*, 57, *instructors*, 109 (*instructional assistants*, 62) Botany 3, 0, 1, 3 Chemistry 2, 1, 1, 5 Economics and Business Administration 3, 1, 5, 11 Education 4, 1, 1, 3 Civil and Mechanical Engineering 3, 0, 0, 2 Electrical Engineering 2, 0, 0, 2 English 6, 2, 4, 8 Fine Arts 0, 0, 0, 2 Forestry 2, 0, 1, 1. DUQUESNE UNIVERSITY

PITTSBURGH, PENNSYLVANIA

Main campus situated on high bluff overlooking the Monongahela River in downtown Pittsburgh

University for men and women, Roman Catholic, operated by the Order of the Holy Ghost

Duquesne University began as a College of Arts and Letters in 1878. 3 years later it was incorporated by the state legislature under the title of Pittsburgh Catholic College of the Holy Ghost, and was empowered to grant degrees in the Arts and Sciences. The University received its charter in 1911 and the name changed to Duquesne University with authority to grant degrees in Arts and Science, Law, Medicine, Dentistry, and Pharmacy. This charter was further extended in 1930 to include degrees in Education and Music. The University now comprises a College of Arts and Letters, a College of Science, a School of Education, a School of Pharmacy, a School of Business Administration, a School of Law, a School of Music, and a Graduate School. Pre-Medical and Pre-Dental courses are also offered.

Finances: Consecrated services equivalent to an endowment of approximately \$2,000,000

Grounds and Buildings 6 acres, approximate value \$3,500,000, 2 resident halls for men and 1 for women

Library: A total of 40,000 volumes
Laboratories The College of Science is housed in a separate building and has existed as a distinct division of the University since 1915

Requirements: For Admission Graduation from accredited high schools with proper certification of records by the principal. The record must show a definite recommendation, by the principal of the applicant's fitness to pursue college work. An applicant who is not so recommended must take the entrance examinations given by the University.

For Degree The requirements for graduation are the completion of a minimum quantitative requirement of 120 semester hours of credit with further scholastic qualitative requirements. When students are transferred from other colleges the minimum resident requirement is 30 semester hours.

Enrollment: For year ending June 30, 1935, 2,610

Degrees: Conferred 1934-35, 300 Bachelor's, 288, master's, 8, doctor's, 4

Fees Total fees, \$600 average per annum which includes a tuition charge of \$240

Scholarships: Scholarships and fellowships varying in amount from \$600 to \$60. Applications for scholarship aid close on May 1.

Appointments office 1934-35, 30% of students earned all or part of their expenses.

Dates of beginning and ending sessions September 23, 1935, June 6, 1936

Summer session July 2 to August 10
Enrollment, 856

Evening session June 4 to August 22

EMORY UNIVERSITY

ATLANTA, GEORGIA

University, controlled by Methodist Episcopal Church, South

Emory College, nucleus of the University, founded in 1836 by Georgia Conference of Methodist Episcopal Church. Named in honor of Bishop John Emory of Maryland. College continually in session at Oxford, Georgia, 40 miles northeast of Atlanta, until 1919, when it was removed to Atlanta. In 1914, decision of the Educational Commission of the Methodist Episcopal Church, South, to create 2 new universities, 1 east and 1 west of the Mississippi River, led to making the college the College of Arts and Sciences of Emory University. At the same time the Atlanta Medical College, founded in 1854, became the School of Medicine.

University chartered in 1915 and School of Theology founded in same year. In 1916, School of Law organized. The Graduate School, the School of Business Administration, and the Summer School established in 1919, on removal of the College to Atlanta. In 1924 the Wesley Memorial Hospital, which for some time had been connected with the Emory Medical School, was made the property of the University by joint action of the trustees representing the 2 institutions. In 1925, the Library School, Carnegie Library of Atlanta, established in 1905, was affiliated with the University, was moved to the University campus in 1930. The Emory Junior College was established at Valdosta, Georgia, in 1928, the Emory Junior College at Oxford, Georgia, in 1929.

Women who can reside with their parents

are accepted as day students in the senior division of the College of Arts and Sciences, but not in the junior division. Women are admitted to all of the graduate and professional schools except Medicine.

Self-perpetuating board of trustees, whose election is subject to the approval of the General Conference of the Methodist Episcopal Church, South, or of some agency designated by it. This agency at present is the General Board of Christian Education of the Church. 30 trustees are selected from the various conferences in the University's territory, and 3 alumni trustees elected by alumni.

Finances: Endowment and other productive funds, \$5,460,000. Annual budget, \$800,000.

Grounds and Buildings: Grounds, 235 acres, valued at \$400,000, 16 buildings, \$5,100,000, 13 buildings valued at more than \$600,000 on the old college campus at Oxford, are now used by the Emory Junior College and the Emory University Academy. The Emory Junior College at Valdosta, Georgia, has buildings valued at \$250,000.

Library (1925) 130,000 volumes, 300 current periodicals. School of Law, School of Medicine, School of Theology, and Library School have separate libraries in their respective buildings. Special collections: Thursfield Smith Collection of Wesleyana, the Park Collection of books dealing with the War between the States, and the original manuscripts of Joel Chandler Harris, Charles Egbert Craddock, Henry Woodfin Grady, and Frank L. Stanton.

Laboratories: Separate buildings for Anatomy, Chemistry, Physics, Physiology. Biology on one floor of College building. Pathology in Wesley Memorial Hospital and Grady Hospital.

Museum: Library building under direction of full-time curator. Egyptian-Babylonian collection (American Scientific Expedition of 1920), LaPrade collection of Georgia birds, Cobb collection of Indian relics, various Oriental antiquities contributed by Methodist Missionaries in Japan and China.

Requirements: For Admission. College of

- Arts and Sciences and School of Business Administration 15 units from an accredited high school No conditions allowed School of Medicine and School of Law 2 years of acceptable college work School of Theology 3 years of college work Library School on graduate basis Law School offers J D degree for students meeting additional requirements

For Degree 36 courses, a course being a subject meeting 5 hours weekly during a quarter (12 weeks), required for bachelor's degree Average grade of C must be maintained General examination is required The College of Arts and Sciences is divided into a Junior and Senior College of 2 years each, and graduation from Junior College is required for admission to Senior College Last 2 years must be spent in residence for bachelor's degree Minimum residence required for master's degree 3 quarters School of Medicine 4-year course, School of Theology and School of Law 3 years, Library School 1 year College also offers special degrees in the following divisions Public Affairs, Education, Religion and Social Service, Engineering

GEORGE WASHINGTON UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA

An urban university, coeducational, privately controlled, non-sectarian.

Chartered as Columbian College by Act of Congress in 1821 Name changed to Columbian University by Act of Congress in 1873 Title of The George Washington University authorized by Act of Congress of 1904 The Senior College of letters and sciences still bears the name of Columbian College Medical School in continuous operation since 1825 Law School organized in 1826, discontinued, and re-opened in 1865, offered the first graduate course in law in the country

Original charter provides that "persons of every religious denomination shall be capable of being elected Trustees, nor shall

any person either as President, Professor, tutor or pupil, be refused admittance into said college or denied any of the privileges, immunities or advantages thereof for or on account of his sentiments in matters of religion "

Governed by self-perpetuating board of 36 trustees, of whom 6 are nominated by the alumni association President of the University an ex-officio member of the board

University comprises Junior College (first 2 years of college study), Columbian College, senior college of letters and sciences, awarding the bachelor's and master's degrees, the Graduate Council of the University, supervising the work for the Doctor of Philosophy degree, the School of Medicine, the Law School, the School of Engineering, the School of Pharmacy, the School of Education, the School of Government (offering training in Public Affairs, Foreign Commerce, Foreign Service, Public Administration, Business Administration, Public Finance, and Public Accounting), the Division of Library Science, the Division of Fine Arts, the Division of University Students, and the Summer Sessions

Finances: Endowment 1934-35, \$2,249,-428 89, income from endowment, \$60,352 98, income from other sources, \$1,407,622 20 Total annual expenditures 1934-35, \$1,454,-969 93 Budget, 1935-36, \$1,350,000 Gifts 1934-35 Strong Residence Hall for women, \$250,000, Emma K Carr Scholarship Fund, \$50,000.

Grounds and Buildings: Value of buildings, grounds (4 acres), and equipment, \$2,777,442 78

Library 108,104 volumes, including 3,000 government documents, 560 periodicals are currently received Special collections Heinzel collection of 7,200 books and pamphlets in Germanic philology and literature, Wachsmuth collection of 7,900 books and pamphlets in Greek and Roman literature, archeology, and history, the Mount Vernon Alcove, containing 4,000 volumes in political history, international law, and the social sciences; the Spanish-American collection, a gift of the Government of the Argentine

Republic, the American Institute of Architects collection of 1,063 volumes, the Russell Sturgis collection of 7,500 mounted photographs (Fine Arts), departmental, seminar, Medical, Law, Physical Science, and Biological Science libraries. There are over 200 libraries in Washington, D C. The resources of the Library of Congress and many highly specialized libraries are available for advanced students.

Laboratories A new building for the biological sciences erected in 1935 at a cost of \$125,000. New equipment has been provided for these new laboratories. The 58 laboratories of the University occupy 6 buildings exclusively and parts of 5 other buildings.

Requirements: For Admission Entrance by certification, College Entrance Board Examinations or The George Washington University entrance examinations. The latter examinations include (1) a scholastic aptitude test and (2) an examination covering certain high school or preparatory school subjects. A certificate of graduation from a fully accredited secondary school carrying not less than 15 units of satisfactory quality and the recommendation of the principal is accepted for admission. Students with at least 15 units but not the certificate of graduation must present prescribed units as follows: English, 3, Foreign Languages, 2, Mathematics or Science, 2. Students entering on the basis of College Entrance Board Examinations must present the same prescribed units. The School of Engineering requires 15 units for admission, 12 prescribed as follows: English, 3, Foreign Language, 2, Algebra, 2, Plane Geometry, 1, Solid Geometry, $\frac{1}{2}$, Plane Trigonometry, $\frac{1}{2}$, History, 1, Physics, 1, Chemistry, 1. Students entering the Pre-Medical curriculum on certificate must have the following prescribed units: English, 3, Foreign Language, 2, Algebra, 1, Plane Geometry, 1, History, 1, Science, 1, additional units, 2.

For Degree For bachelor's degree in Columbian College, 120 semester hours, School of Education, 126 semester hours, School of Engineering, 144 semester hours, School of Pharmacy, 124 semester hours, School of

Government, 120 semester hours. The average of the work counted for the degree must be of C grade or better. In Columbian College and the School of Education, major of 24 semester hours in 1 department. For the master's degree, 30 semester hours. The degree of Doctor of Philosophy is conferred only for broad and thorough scholarship, and for marked ability in original research. Not less than 3 years' study and research subsequent to the bachelor's degree are required. For the degree of LL B, 80 semester hours. For the degree of M D, the completion of the 4-year curriculum. For the combined degrees of A B and LL B, 3 years of collegiate study and the full Law course, for the combined degrees of A B and M D, 3 years of collegiate study and the full medical course, for the combined degrees of B S and LL B (in preparation for the field of Patent Law), 3 years of Engineering study and the full Law course.

General Physical Education is required of freshman and sophomore students.

Enrollment: For year ending June 30, 1935, 6,692, divided as follows: Junior College, 2,242, Columbian College, 627, Graduate Council, 36, School of Medicine, 291, Law School, 1,018, School of Engineering, 423, School of Pharmacy, 13, School of Education, 287, School of Government, 84, Division of University Students, 1,204, Division of Library Science, 66, Division of Fine Arts, 35, Summer Sessions, 1934, 1,204, duplicates in computing these figures, 838. Total number of men, 4,153, women, 2,539. Since foundation, the University has had approximately 65,000 matriculants.

Degrees: Conferred year ending June 30, 1935, 921, divided as follows: Junior Certificates, 230, B A, 147, B A in Education, 38, B A in Government, 27, B A in Library Science, 43, B A in Fine Arts, 4, Bachelor of Fine Arts, 1, B A in Architecture, 2, Bachelor of Architecture, 2, B S, 28, B S in Engineering, 2, B S in Civil Engineering, 9, B S in Electrical Engineering, 3, B S in Mechanical Engineering, 5, B S in Home Economics, 12, B S in Physical Education, 10, Graduate in Pharmacy, 10, B.S. in Pharmacy, 2, Bachelor of Laws,

159, M A, 55, M A in Education, 41, M A in Library Science, 1, Master of Laws, 8, Doctor of Medicine, 70, Civil Engineer, 1, Doctor of Education, 1, Ph D, 10. Since foundation, the University has conferred 18,714 degrees.

Fees: University fee of \$8 paid by all students entitles them to certain medical and hospital benefits, the University paper, admittance to home games, and to other special privileges. Tuition fees in all Schools and Divisions, save the School of Medicine and the Graduate Council \$8 a semester hour. Laboratory fees School of Medicine, \$484 per annum, Graduate Council, for regular candidates for the Ph D degree, \$240 per annum.

Scholarships: During 1935-36, there were 13 fellowships awarded carrying from \$600 to \$800 plus tuition. The date of application for fellowships closes March 1. 66 scholarships were awarded for varying amounts. The date of application for scholarships closes May 15.

Research: The following annual contributions for research in Medicine were available for 1935-36: Rockefeller Foundation, \$9,000, Lilly Foundation, \$1,200, Kaim-Kotz Fund, \$1,600, Parke-Davis Foundation, \$1,800, National Research Council, \$700.

Employment bureau: Assists in finding part-time employment for students and aids graduates in procuring positions. Approximately 55% of the student body is self-supporting to some extent.

Dates of beginning and ending sessions: September 25, 1935, June 6, 1936.

Summer sessions: 6 weeks term begins July 6, 1936, 9 weeks term begins June 15, 1936, both terminate August 15. Enrollment for 1935, 1,375.

Publications: University Bulletin, including catalog, Departmental, School, and Technical Bulletins, Summer Sessions Announcements, Administrative Reports, The George Washington University Law Review, and The Hispanic American Series, published by The George Washington University Press.

Achievements of year ending June 30, 1935 New Science Hall, containing modern classroom, laboratory, and library facilities for the biological sciences, opened in 1935, program in theoretical Physics inaugurated, Dr George Gamow, formerly of the Institute of Science at Leningrad, made a member of the resident faculty, in the School of Medicine, a 4-year integrated curriculum in public health teaching made a part of the regular course for the degree of Doctor of Medicine and opened to special and graduate students in the field of public health, selected by the Education and Law Conference of the U S Senate to supervise the college, university and teacher-training aspects of the character education experiment in progress in the schools of the District of Columbia, the University inaugurated a series of "in-service" seminars through which some 200 Washington teachers studied various phases of character education

of Fine Arts, Norris Ingersoll Crandall, *Director*, Center of Inter-American Studies, Alva Curtis Wilgus

GEORGETOWN COLLEGE

GEORGETOWN, KENTUCKY

Coeducational college, controlled by Kentucky Baptist Education Society

Chartered in 1829 A classical school opened in Georgetown in 1787 by Elijah Craig, pioneer Baptist preacher of Kentucky, was absorbed by Rittenhouse Academy Chartered in 1789 and operated until 1829 In 1892 women were admitted

Board of 24 trustees elected by Baptist Education Society of Kentucky

Requirements: For Admission 15 units, including English, 3, Algebra, 1, Plane Geometry, 1 No conditions allowed

For Degree For A B, 128 semester hours, in addition to required work in Physical Education, 128 quality credits (an average grade of C in all courses) First 2 years are prescribed, major of 24 or more semester hours, a minor of 18 hours in another department

General Tri-weekly chapel attendance required

Enrollment: For year 1934-35, 497 Men, 263, women, 234

Degrees: Conferred year ending June 30, 1935, A B 47

Fees: Tuition, \$67 50 a semester, registration fee (includes library, gymnasium, athletics, medical examination, and student publications), \$25, laboratory, \$1 to \$10 Rooms for men \$5 to \$7 a month, board, \$75 a semester Room and board for women, \$110 to \$115

Dates of beginning and ending sessions September 16, 1935, June 3, 1936

Administrative Officers: *President*, Henry Noble Sherwood

GEORGETOWN UNIVERSITY

WASHINGTON, DISTRICT
OF COLUMBIA

Situated in the northwestern section of Washington, in what was the colonial village of Georgetown. Campus consists of 93 acres on which are located 14 buildings. The Medical and Dental Schools Building is on main campus, separated from undergraduate buildings. The University Hospital is 2 blocks from main campus. The Law Department is at 6th and E Streets, N W, in downtown Washington.

University for men in charge of the Fathers of the Society of Jesus. The training school for nurses and for dental hygienists open to women only.

Government by the president and 5 directors assisted by advisory board of 17 regents. Founded 1789. Charter and power to grant degrees conferred by Act of Congress in 1815. Astronomical Observatory founded 1843, School of Medicine, 1851, Department of Military Science, 1851, School of Law, 1870, University Hospital, 1898, School of Dentistry, 1901, Training School for Nurses, 1903, Seismic Station, 1911, School of Foreign Service, 1919.

Grounds and Buildings: Grounds, \$1,500,000, buildings, \$6,621,337, total grounds, buildings, and equipment, \$8,901,212.

Libraries: Riggs Memorial (1890), 167,174 volumes, 50,000 papers and manuscripts, 15,000 government documents for faculty and for research work, Hirst Library for all students, 11,327 volumes and current publications. Special library collections: John Gilmary Shea Americana and Indian Languages, Morgan Colonial History, the Sherman, Decatur, Gonzaga Papers. Professional schools, Astronomical Observatory, and Hospital have departmental libraries.

Laboratories: Biological, in separate buildings, Chemical in White-Gravenor Building, Physics in Old and New North Buildings. Medical and Dental Schools use hospital laboratories as well as their own.

Museums: Coleman Natural History in Copley Hall. Morgan Memorial Colonial

Endowment and the University Archives contain many colonial and liturgical articles and rare examples of ecclesiastical vestments, 7 holographic letters of George Washington, many of other early presidents of the U S, original manuscript of "Tom Sawyer" by Mark Twain, author's manuscript copy of "School for Scandal."

Observatories: Astronomical Observatory consists of 4 buildings, instruments, and accessory equipment, and library of 5,000 volumes, seismic station in a specially constructed cave beneath college quadrangle.

Requirements: For Admission: 15 units, including English, 3, Foreign Language, 2, History, 1, Algebra, 1, Plane Geometry, 1, Science, 1. For the A B course, Latin, 3. No student admitted on condition. School of Medicine requires 3 years of college work, Law, 2; Dental, 1.

For Degree A B, B S, and B S in Social Science, 128 semester hours, courses largely prescribed, in junior and senior years, 18 hours are elective, in professional schools, practically all prescribed. Degrees conferred by professional schools: M D, LL B, LL M, J D, D D S, B S, M S, and Ph D. in Foreign Service. Graduate degrees: M A, M S, Ph.D.

Departments and Staff: College Philosophy: Professors, 2, associate professors, 4, assistant professors, 2, instructors, 0. Religion: 2, 7, 1, 0. Biology: 6, 1, 1, 0. Chemistry: 1, 1, 3, 2. Classical Literature: 2, 1, 1, 0. English: 1, 1, 2, 0. History and Government: 1, 1, 1, 1. Mathematics: 1, 0, 1, 0. Military Science: 1, 1, 1, 2. Modern Languages: 0, 2, 1, 2. Physics: 1, 1, 1, 3. Social Science: 2, 2, 0, 2.

Professional School of Medicine: Regent, Dean, 217 faculty, Law: Regent, Dean, Assistant Dean, 27 faculty, Dental: Regent, Dean, 31 faculty, School of Foreign Service: Regent, Dean, 50 faculty.

Enrollment: 1934-35, College of Arts and Sciences, 558, Medicine, 507, Law, 512, Dentistry, 192, Foreign Service, 289, Graduate, 30, School of Nursing, 93, Dental Hygiene, 14.

Degrees: Conferred, June 9, 1935, A B, 53, B S, 47, M D, 113, graduate degrees,

14, LL B, 119, LL M, 16, J D, 10, D D S, 65, BS in Foreign Service, 42, M S in Foreign Service, 2, Ph D in Foreign Service, 3

Fees. College of Arts and Sciences, tuition, \$400 Average total for room, board, tuition, etc (in college dormitories), \$1,050 to \$1,250 Matriculation fee, \$10, annual registration fee, \$5 Tuition in professional schools Medicine, \$425, Law, \$200, Dentistry, \$300, Foreign Service, \$200 to \$300

School year September 16, 1935 to Commencement, June 15, 1936

General catalog of University, bulletins of several Departments, Law Journal, College Journal, Student weekly, "Hoya", books by Georgetown University Press

Achievement of year ending June 30, 1935 Completion of new White-Gravenor Building at cost of \$275,000 for classrooms, chemical laboratories, dean's office, cafeteria, and faculty lounge and conference rooms

Administrative Officers: *President*, Rev Arthur A O'Leary, S J, *Vice-President*, Rev Edmund A Walsh, S J, *Secretary*, John J Kehoe, S J, *Treasurer*, Joseph A Farrell, S J, *Dean of College*, John E Grat-tan, S J, *Registrar*, Walter J O'Connor, *Dean*, Graduate School, F W Sohon, S J, *Regent*, School of Medicine, David V McCauley, S J, *Regent*, School of Law, Francis E Lucey, S J, *Dean*, Law, George E Hamilton, J U D, *Dean*, Dentistry, W N Cogan, *Dean*, School of Foreign Service, Thomas H Healy

GEORGIA SCHOOL OF TECHNOLOGY

ATLANTA, GEORGIA

The technological college of the Uni-versity System of Georgia

Founded in 1885, opened in 1888

Controlled by board of regents, 12 in number, appointed by the Governor of the State of Georgia for term of 6 years The governor is an ex-officio member of the regents

Finances: Endowment, \$425,000, income from endowment, \$20,000 Income from other sources State appropriation, \$180,000, student fees, \$280,512, City of Atlanta, \$16,000 Total annual expenditures for year ending June 30, 1935, \$581,174 79 Budget for 1935-36, \$523,530

Grounds and Buildings: Approximately 50 acres valued at \$444,340, value of build-ings, \$2,085,000, equipment, including li-brary, \$779,000, dormitories, including the Y M C A building, \$510,000

Library (1935) 33,564 volumes, 2,434 volumes of government documents, 273 current periodicals Special collection Julius L Brown Collection of rare old volumes

Laboratories Aeronautical Engineering, equipment, \$40,000, Ceramics, \$10,000, Chemical Engineering and Chemistry, \$59,000, Electrical Engineering, \$55,000, Experimental and Mechanical Engineering, \$103,000, Shops, \$145,000, Textile En-gineering, \$37,500, Physics, \$25,000

Requirements For Admission Gradua-tion from accredited high school with a record high enough to indicate student is prepared for college work Among the 15 units, 3 must be of English, 1½ of Elemen-tary Algebra, ½ of Advanced Algebra, 1 of Plane Geometry, 1 of History, 1 of Physics, except for those applicants who are going to take courses in Architecture, Industrial Management, and Textile Engineering—these may substitute another science for Physics Applicants for Architecture should offer 2 units in French Prospective students in Chemistry and Chemical Engineering should take either French or German in high school Students may be admitted by ex-amination

For Degree B S degrees (4-year courses). 150 semester hours' credit Grades at least 1 8 (C equals 2) for the 4 years and 1 8 for the senior year A student must do the work of the senior year in residence

Courses by Cooperative Plan Students alternate every 12 weeks between school and industrial plants Time, 5 years, 140 semes-ter hours' credit required Grades, as for 4-year courses A student must do the work of the junior and senior years in residence

The Architectural course, leading to the professional degree, B S. in Architecture. Time, 5 years, 175 semester credit hours required. Other requirements same as for the 4-year courses

Master's degree Time, 1 year, 32 semester credit hours required Grades, at least 3 (B equals 3) for the year's requirements All of the work offered for the M S degree must be done in residence Thesis required

General 2-year basic course in Military Science required, advanced course optional

Departments and Staff: Aeronautics *Professors*, 1, *associate professors*, 0, *assistant professors*, 1, *instructors*, 2 Architecture 2, 1, 3, 0 Biology 1, 0, 1, 0 Ceramics 1, 1, 0, 0 Chemistry and Chemical Engineering 3, 3, 5, 5. Enrollment: (Exclusive of summer school enrollment and duplicates), 1,853 Graduate students, 21, Aeronautical Engineering, 70, Architecture, 66, Ceramics, 5, Civil Engineering, 105, Chemical Engineering, 135, Chemistry, 28, Electrical Engineering, 189, Industrial Management, 135, Mechanical Engineering, 222, Textile Engineering, 56, General Science, 194, unclassified, 648 Evening School of Applied Science, 510, Summer School, 317.

Degrees: Conferred year ending June 30, 1935, 303

Total number of degrees conferred since the foundation, 5,554

Fees: Student activities, \$20 50, Medical, \$2 00 annually, resident tuition, \$100, non-resident, \$200, laboratory and materials, \$3 to \$15, lodging, \$42 50 to \$112 50, board, \$15 to \$25 per month

Scholarships: Loan funds and scholarships vary in amount from \$60 to \$700

Dates of beginning and ending sessions September 17, 1934, June 8, 1935

Summer session July 20 to September 14, 1935 Enrollment, 317

Georgia Tech Extension Enrollment, 510

Publications Catalog in April Technique weekly, Yellow Jacket monthly, Blue Print yearly.

Administrative Officers: *President*, Marion L Brittain, *Dean*, William U Skiles, *Registrar*, Hugh H Caldwell, *Local Treasurer*, Frank K Houston, *Dean of Graduate Courses*, Gilbert H Boggs, *Dean of General Studies*, William G Perry, *Dean of Engineering*, Domenico P Savant, *Dean of Men*, Floyd Field

GEORGIA STATE COLLEGE FOR WOMEN

MILLEDGEVILLE, GEORGIA

College for women, state controlled, unit of State University System under control of 12 regents

Created by act of legislature in 1889, opened in 1891 First state supported college for women in Georgia, first named Georgia Normal and Industrial College, name changed to Georgia State College for Women in 1922

Finances: State appropriation, 1934-35, \$120,000, student fees, \$61,343 92 Total expenditures, \$181,343 92 Budget, 1935-36, \$193,000

Grounds and Buildings: 38 acres valued at \$161,400 Total value of buildings, \$1,666,300 5 dormitories with a capacity of 1,150

Library (1932) 27,972 volumes, 195 current periodicals

Laboratories Facilities for Biology, Chemistry, Physics

Requirements: For Admission Graduation from an accredited high school with 15 units including 3 of English, 2 of Mathematics, 2 of Social Science, and 1 of Science

For Degree. 1 year of residence, 38 single courses (126½ semester hours), a major, 6 courses or more, and a minor, 4 courses, 76 quality points earned as follows A, 6 points for each course, B, 4 points for each course, C, 2 points for each course, D, no points 40% of the work must be of senior college level

General Residence in dormitory required of all except local students, Physical Education required in first 2 years, assembly 4 times a week required

Departments and Staff: Departments organized into 8 divisions Division of Education and Teacher Training including Education, Library Science, Psychology, Training School *Professors, 4, associate professors, 3, assistant professors, 2, instructors, 11* Division of Fine Arts including Art, Music 2, 1, 5, 1 Division of Health including Health, Physical Education 1, 1, 2, 3 Division of Home Economics 2, 1, 3, 0 Division of Language and Literature including English, French, Humanities, Latin, Spanish 4, 7, 0, 3 Division of Mathematics and Natural Science including Astronomy, Biology, Chemistry, Mathematics, Physics 7, 2, 3, 0 Division of Secretarial Training including Accounting, Business Law, Secretarial Subjects, Shorthand, Typewriting 2, 2, 0, 1 Division of Social Sciences including Economics, Geography, History, Political Science, Social Studies, Sociology 3, 1, 1, 3

Enrollment: For 1934-35, 1,245 Total number of matriculants since foundation, 23,000, estimated

Degrees: Conferred year ending June 7, 1935, 251 Total number of degrees conferred since foundation, 1,557

Fees: College fee, \$20 per quarter, room, board, and laundry, \$60 or \$69, annual expenses, \$243 to \$270

Employment 37% of students earned all or part of expenses during year ending June 7, 1935

Dates of beginning and ending sessions College year begins third Monday in September, ends second Monday in June

Summer sessions. Begin second Wednes-

day in June, continue for 2 six-week terms, total enrollment, 1935, 1,034

Extension work 306 part-time students in classes and in correspondence courses

Catalog annually in spring, other bulletins

Achievements of year ending June 7, 1935 Junior college curriculum reorganized, most departmental courses abandoned and survey courses substituted in Social Science, Natural Science, and Mathematics

Administrative Officers: *President, Guy H Wells, Dean, Instruction, Hoy Taylor, Dean of Women, Ethel Adams, Registrar, E H Scott, Bursar, I. S Fowler*

GEORGIA STATE TEACHERS COLLEGE, SOUTH

COLLEGEBORO, GEORGIA

Teacher training institution, coeducational, supported by state

Established as a state agricultural and mechanical high school in 1908, changed to normal school in 1924, degree-granting privilege given in 1929

Controlled by State Board of Regents of University System of Georgia, made up of governor of state ex-officio and 11 members appointed by the governor (1 from state at large and 1 from each congressional district)

Finances: Total annual expenditures for year ending June 30, 1935, \$157,955 82 Budget, 1935-36, \$158,901

Grounds and Buildings 260 acres valued at \$50,000, present worth of buildings, \$300,000 Dormitories 2 for women accommodating 200, 1 for men accommodating 160

Library 13,000 volumes, 82 current periodicals

Laboratories Science Hall (1934) houses Biology, Chemistry, and Physics Home Economics and Art laboratories in Administration Building Manual Arts laboratory in basement of gymnasium

Requirements: For Admission. 15 units

prescribed as follows English, 3, Mathematics, 2, Social Studies, 2, Science, 1, electives, 7

For Degree 1-year residence, 38 courses or 126½ semester hours, average of C, major and minor Prescribed courses English, 3, Biological Science, 2, Physical Science, 2, Social Science, 4, Mathematics, 1, Home Economics or Industrial Arts, 1, Physical Education, 2, Education, 7

HARVARD UNIVERSITY

CAMBRIDGE, MASSACHUSETTS

University, privately controlled
Harvard College founded in 1636

There are 2 governing boards, one known as the Corporation, consisting of the president, treasurer, and 5 fellows appointed for life, and choosing their own successors, the other the Board of Overseers, consisting of 30 members elected by the alumni for 6 years, 5 retiring at the end of each year

Finances: Endowment, \$128,827,000, income from endowment for educational purposes, \$4,935,000 Income from other sources Gifts for current purposes, \$1,235,000, tuition and other student fees, \$3,220,000, other sources for educational purposes, \$473,000 Total expenditures for educational purposes year ending June 30, 1935, \$9,552,000

Grounds and Buildings. 28 dormitories, and 7 house units (4,432 men)

Library Widener Library (1914) Total number of volumes in all libraries, 3,598,040 In addition to the Widener Library there are the following special libraries Engineering, Divinity, Law, Medical, Dental Schools, Schools of Business Administration, Architecture, Landscape Architecture, Education, Bussey Institution, Arnold Arboretum, Museum of Comparative Zoology, Peabody Museum, Gray Herbarium, Astronomical Observatory, Blue Hill Observatory, and 7 house libraries

Museums Botanical, Comparative Zoology, Fogg Art, Geological, Germanic, Mineralogical, Peabody Museum of Archaeology and Ethnology, Semitic, Social Ethics, University, Warren Anatomical at the Medical School

Observatory The University maintains observatories at Cambridge, Massachusetts, and Oak Ridge, Massachusetts, and in the southern hemisphere at Bloemfontein, South Africa. There is also the Meteorological Observatory at Blue Hill in Milton, Massachusetts

Requirements: For Admission Students ranking in the highest seventh of the boys in their class in the last 2 years of their

preparatory school course may be admitted without examination, provided they have attended small public high schools in rural communities or larger towns or city high schools in the extreme South or West. All candidates for admission by examination must take examinations of the College Entrance Examination Board. 2 plans of admission: Plan A, examination in certain studies, 15 units. Grades of 70 or over in not less than 6 units. Prescribed studies: English, Foreign Language, History, Mathematics, Science. Plan B, candidate must present high school record and must take in addition to the Scholastic Aptitude Test, College Board Examinations in English, and any other 3 subjects from the following list: Latin, Greek, French, German, Spanish, History, Mathematics, Physics, Chemistry, Botany, Zoology, Biology. The student's whole high school record is taken into consideration in Plan B, and some freedom is allowed with regard to the subjects presented in his school certificate. Candidates for the A B degree entering by either plan must present 3 years of Latin or 2 years of Greek on their school certificate or by examination. Freshman class limited to 1,000. Admission of foreign students. The principles of Plan B will be used in admitting students from foreign countries in which English is not the native language.

For Degree For B A or B S. 15 courses and as much work in English as may be prescribed, fulfillment of requirements for concentration and distribution and passage of general examination if this is required in the field of concentration. Reading knowledge of French or German. Grade of C or better in two-thirds of work.

For M A. Minimum of 1 year's residence. Approved program of advanced study including in some fields a general examination. French and German, reading knowledge of one and elementary knowledge of the other.

For Ph D. Not less than 2 years devoted to advanced study and research. Reading knowledge of French and German. Examination and thesis.

Staff: Number of teaching staff in the

whole university is as follows: Professors, 267, associate professors, 86, assistant professors, 183, lecturers, 64, associates, 42, instructors, 488, tutors, 251, Austin teaching fellows and teaching fellows, 20, fellows for research, 88, assistants, 329.

Enrollment: For 1934-35, College, 3,593, Graduate School of Arts and Sciences, 793, special students under Faculty of Arts and Sciences, 27, Engineering School, 122, Divinity School, 56, Law School, 1,452, Medical School, 523, Dental School, 135, School of Public Health, 19, Graduate School of Business Administration, 724, School of Architecture, 53, School of Landscape Architecture, 17, School of City Planning, 10, Graduate School of Education, 205.

Degrees: Conferred year ending June 1934, 2,243. Total number of degrees conferred since foundation, 74,887.

Fees: College expenses. Tuition, \$400, board, \$280 to \$300, lodging, \$100 to \$600.

Scholarships: 500 scholarships carrying stipends from \$100 to \$900 awarded to undergraduates annually. 200 of these are open to first year men. Applications for freshman scholarships except those awarded after mid-years must be filed on or before May 1, mid-year scholarships by December 15, applications for upperclassmen by April 15.

College prize fellowships. 5 Prize Fellowships for students of distinction from Ohio, Indiana, Illinois, Michigan, Wisconsin, and Minnesota awarded annually. Stipends are awarded according to need and may be renewed after the first year. In addition there are 2 scholarships for worthy students from Kentucky and Iowa. For information address the Secretary of the Committee on Scholarships and Other Aids for Undergraduates, 4 University Hall.

Graduate School scholarships and fellowships. 50 resident or traveling fellowships with total annual income of \$45,000 are open to graduate students in Arts and Sciences. 13 teaching fellowships of \$1,000 each, 110 endowed scholarships of from \$400 to \$575, and scholarships from certain Harvard Clubs of from \$250 to \$550.

Fellowships are awarded by the deans or chairmen of the departments concerned. The Sheldon Fund has an annual income of \$20,000 for traveling fellowships.

Some scholarships are open to men in any department of the University and applications should be made to the Committee on General Scholarships by March 1.

Freshman aid. The Price Greenleaf Aid, with an annual income of \$17,000, is available for needy freshman candidates for the A B degree. Limited funds are also available for B S degree candidates.

College loans. Loan funds and beneficiary funds with total annual incomes of \$75,000 are available to needy undergraduates. Applications are filed with the dean.

Student employment. Work was found in 1934-35 for about 1,000 men. Applications must be filed at the Student Employment Bureau, University Hall. Approximately 40% of the undergraduates in the College received financial assistance in 1934-35 in the form of scholarships, loans, or student employment.

Prizes. There are about 40 prizes of from \$25 to \$250 awarded annually, about half of these are awarded to freshmen.

Dates of beginning and ending sessions. September 23, 1935, June 18, 1936.

Summer session. July 6 to August 15, 1936.

HAWAII, UNIVERSITY OF HONOLULU, HAWAII (Cable and Wireless Address Colwai, Honolulu)

Campus and University Farm occupy 100 acres in Manoa Valley, a residential district 3 miles from center of Honolulu, with an additional 200 acres on an adjoining plateau used in forestry experiments Aquarium and Marine Biological Laboratory about 2 miles from the main campus, the Agricultural Experiment Station has its laboratories on the campus, with several outlying areas for experimentation, one on the island of Oahu in the heart of the sugar and pineapple districts, another in the coffee region of the island of Hawaii, and a third on the island of Maui, the Experiment Station of the Pineapple Producers' Cooperative Association maintains its headquarters and research laboratories at the University and has about 95 acres of experimental land in Wahiawa, about 20 miles from the campus, the Hawaii Sugar Planters' Association maintains an experiment station about a mile from the University campus, by a co-operative agreement, its facilities constitute a part of the Graduate School of Tropical Agriculture of the University The Bernice Pauahi Bishop Museum, devoted to Polynesian history and ethnology, is located about 6 miles from the University, its facilities and technical staff are available to the University for graduate work The Honolulu Academy of Arts is located about 2 miles from the campus and makes its excellent collections of art objects readily available to University students and faculty.

University for men and women, with same relationship to Territory of Hawaii as the several state universities bear to their respective states, land-grant university, being supported in part by federal grants under the Second Nelson Amendment of Morrill Act of Congress

First establishment in 1907 by act of territorial legislature, the name originally being College of Agriculture and Mechanic Arts, this name changed to College of Hawaii by legislature in 1911, in 1919 the

legislature passed an act broadening the scope of the institution, increasing its financial support considerably, and changing the name to University of Hawaii

Board of regents, 5 appointed for periods of 5 years in such manner that 1 appointment expires each year, 2 members ex-officio, the superintendent of public instruction and the president of the University Undergraduate colleges Applied Science (including Agriculture, Home Economics and General Science), Arts and Sciences, and Teachers College Graduate Division includes Graduate School of Tropical Agriculture and Oriental Institute, in addition to offering a general graduate curriculum General Extension Service included in Adult Education Division, Agricultural Extension Service offered in cooperation with U S Department of Agriculture, as in other land-grant colleges Psychological Clinic conducts research in addition to laboratory work for schools and courts Hawaiian Experiment Station, including former U S Experiment Station, included in the University faculty, also technical staff of Pineapple Experimental Station Hawaiian School of Religion, independently supported, is affiliated with the University

Finances. No endowment except a small amount for scholarships Financial support from 3 principal sources, namely appropriations by territorial legislature, federal aid appropriations, and income from tuition and other fees Total expenditures for year ending June 30, 1935, \$672,742 71, of this, \$320,000 came from territorial appropriations, \$130,000 from federal sources, and the balance from student fees, dormitory and cafeteria receipts, sales of farm products, gifts, and other special sources Total budget for 1935-36, \$703,672

Grounds and Buildings: Total area of campus and experimental lands about 400 acres, value of land and improvements other than buildings approximately \$650,000, inventory value of buildings and equipment, \$1,750,000, residence hall for men, owned by the University Y M C A and operated for the benefit of the University as a whole,

with a capacity of 50 men, small temporary building for women, capacity 16

Library (1924) 79,281 volumes, including 17,329 government documents, 285,700 unbound volumes, many of these being cataloged books in paper covers, cataloged titles, about 150,000 in all, 737 current periodicals Special emphasis being placed on following collections Hawaiiana, Pacifica and Oceania, Far East (especially Japan and China), race relations and miscegenation, and tropical agricultural sciences Libraries of Bishop Museum, H S P A Experiment Station, Honolulu Academy of Arts, Territorial Archives are available for advanced students in the University, library of Institute of Pacific Relations housed at University

Laboratories Gartley Hall (1922) for Physics and Chemistry, Dean Hall (1928) for Botany, Zoology, Geology, and Anthropology, together with the Marine Biological Laboratory at Waikiki, erected in 1920, group of 5 buildings for Engineering, new building erected in 1935 for Agricultural work, including instructional, research, and extension, small building for foods and nutrition laboratories, Home Economics and Art in Hawaiian Hall All reasonably well-equipped for both undergraduate and graduate work and general research P P C A Experiment Station has erected 1 large building and 5 smaller structures for its use on the University campus The U S Bureau of Entomology occupies a building erected for it by the University devoted to the study of the Mediterranean fruit fly

Museums Botanical and Zoological collections of the University housed in Bishop Museum by cooperative agreement Honolulu Academy of Arts provides art museum facilities for University Honolulu Aquarium maintained by University at Waikiki

Observatory Small building on a hill in the Kaimuki section of Honolulu, with a 6-inch telescope

Requirements: For Admission 15 units, including English, 3, Mathematics, 1 Of the remaining 10, at least 5 must be selected from Languages, Mathematics, History, and

Sciences Psychological examination required Candidates are judged on the basis of quality of high school record and results of psychological examination 1 condition rarely allowed

For Degree A B Minimum of 128 semester hours and 264 grade points Prescribed subjects English, 12 semester hours, American Institutions, 6, Science, 6, Military Science or Physical Education, 8 By the end of second year all candidates must possess a reading knowledge of at least one language besides English

S B Prescribed programs in Agriculture, Civil Engineering, Sugar Technology, Home Economics, and Vocational Education General Science program is more elastic with approximately one-half the electives in either Physical Sciences or Biological Sciences Minimum requirement in any program is 136 semester hours, a minimum of 264 grade points required All curricula must include English, 10, Chemistry, 8, and Military Science or Physical Education, 8

Ed B Prescribed course with minimum of 130 credits and 264 grade points

M A and M S At least 1 year of residence after bachelor's degree involving not less than 24 semester hours of course work with 6 credit hours allowed for work on thesis, an examination in candidate's field of work, and an acceptable thesis involving original investigation

Ph D. In Graduate School of Tropical Agriculture, in various sciences pertaining to Agriculture, requirements include 3 years after bachelor's degree

General All able-bodied male citizen students required to take 8 semester hours of Military Science All students are required to take 1 semester hour of Physical Education throughout 2 years

Departments and Staff: (1) College of Arts and Sciences Anthropology *Professors*, 1, *associate professors*, 0, *assistant professors*, 1, *instructors*, 0 Art 0, 0, 1, 2 Botany 1, 0, 2, 1 Economics and Business 3, 0, 0, 3 English 1, 2, 3, 6 Geography 0, 0, 1, 0 German 0, 0, 2. Fees. Tuition fee of \$50 per semester (2 semesters a year) charged all students whether residents of Hawaii or not, part-time students pay \$5 per semester hour, registration fee, \$10 per semester for full-time students, diploma fee, \$5, laboratory fees, \$1 to \$5 depending on course, board and room (including evening meal only 6 nights a week), \$25 per month Annual expenses, including fees, books, cost of living but not other personal expenses \$350 to \$600

Scholarships. Number varies from year to year, now being about 88 undergraduate scholarships with stipends from \$50 to \$150, also several fellowships for graduate students in Tropical Agriculture, Race Relations, Oriental Studies, and other departments, being 11 this year

Research in Racial Psychology, Sociology, Anthropology, Tropical Agricultural Sciences, Biological and Physical Sciences, Nutrition, Pacific History, Oriental

Civilizations, and other fields Liberal grants in aid received from Rockefeller and Carnegie Foundations, Rosenwald Fund, and others. Sugar and Pineapple industries support special research in their fields to the extent of about \$500,000 per year, not included in the University budget

Academic year begins September 25, second semester begins February 20, ending June 23

Summer session begins June 27 and extends 6 weeks Enrollment, 1935, 1,039

University extension service conducted as part of Adult Education Division, enrollment of adult part-time students in classes, 970, courses by radio to be inaugurated in 1935

Publications Quarterly Bulletin started in 1922, comprises the annual catalog published in spring, and other official publications, including annual report and various announcements Other publications include Occasional Papers, Research Publications, Bulletins and Circulars of the Hawaii Experiment Station and the Cooperative Extension Service in Agriculture and Home Economics The Associated Students publish a weekly newspaper, Ka Leo, and an annual, Ka Palapala, also a literary magazine, the Hawaii Quill

Among developments of 1935 are the establishments of the Oriental Institute, an outgrowth of the Department of Oriental Studies and the School of Pacific and Oriental Affairs, detailed announcement of which may be had by addressing a request to the University Noteworthy among new buildings of the year are the Outdoor Theatre seating 4,000 people and a new building for Agriculture

Degrees: Conferred year ending June 30, 1935, 43 Total number of degrees conferred since foundation, 245

Fees: Fees, \$20, meals, \$67 50, room, \$18, Chemistry and Physics laboratory, \$5 Average cost per student for year, \$250

Employment bureau About 25% of students earned part of their expenses during year ending June 30, 1935

Dates of beginning and ending sessions September 9, May 28

Summer session June 3 to August 10 Enrollment, 355

Catalog in April

Achievements of year ending June 30, 1935 New departments—Secretarial, Business Administration, Home Economics, and Nursery School

Administrative Officers: *President,* J P Womack, *Registrar,* P T Proctor, *Dean of Men,* Solon B Sudduth, *Dean of Women,* Margaret Alcorn

HENDRIX COLLEGE

CONWAY, ARKANSAS

A coeducational college of arts and sciences, under the control of the Methodist Episcopal Church, South

In 1884, the Methodists bought Central Collegiate Institute, which had been established at Altus, Arkansas, in 1876. The name was changed to Hendrix College in 1889, moved to Conway in 1890.

In 1929, by order of the Church, Henderson-Brown College at Arkadelphia was merged with Hendrix College at Conway. In 1930, Galloway Woman's College at Searcy and Hendrix College were consolidated into 1 institution, operating as a junior college for women at Searcy under the name of Galloway Woman's College and a coeducational senior college at Conway under the name Hendrix College. In 1933 Galloway Woman's College at Searcy was discontinued.

Board of trustees has 27 members, 22 of whom are nominated by the board itself and 5 by the alumni association, the annual conference confirming the nominations.

Finances. Endowment, \$1,005,971, income from all sources, 1934-35, \$164,196, budget, \$158,846.

Grounds and Buildings: 200 acres with 15 buildings and equipment, valued at \$762,055. 3 dormitories accommodate about 150 men and 2 dormitories accommodate about 140 women.

Library (1928) 34,000 volumes, including government documents, 10,000 pamphlets, a special collection of Arkansas documents and Methodist history.

Laboratories Science Hall (1931), given by the General Education Board, houses laboratories of Biology, Chemistry, and Physics, and museum. Value of building and equipment, \$200,000.

Requirements: For Admission 15 standard units, including English, 3, Mathematics, 2, and History, 1, and character recommendation.

For Degree 64 semester hours for the A A, 124 for the B A or B Mus, good character, quality credit, and comprehen-

sive examination, superior students may pursue a limited amount of independent study.

General Boarding students must reside in college dormitories. Physical Training is required of freshmen and sophomores, chapel attendance is required of all.

Departments and Staff. Ancient Languages Professors, 1, associate professors, 1, assistant professors, 0, instructors, 0 Bible, Religion, and Philosophy 2, 1, 0, 0 Biology 1, 0, 0, 0 Chemistry and Physics 2, 0, 0, 0 Economics 1, 0, 1, 1 Education 2, 0, 0, 0 English 1, 1, 3, 1 History and Social Science 1, 1, 0, 1 Mathematics 1, 0, 0, 0 Modern Languages 1, 0, 1, 1 Music and Art 1, 0, 0, 5 Physical Training 1, 0, 1, 1 Extension Division Lecturer 1, 0, 0, 0.

Enrollment For 1934-35, 330 Men, 186, women, 144.

Degrees. Conferred in 1935, 55 A A, 10, B A, 44, B Mus, 1.

Fees Tuition, \$100, room rent, \$30 to \$110, board, \$171, registration, library, gymnasium, and activities, \$90. Annual expenses Liberal, \$492, low, \$418.

Scholarships A few honor and work scholarships, \$50 to \$100, loan fund of \$15,588. In 1934-35, about 19% of students earned part of their college expenses.

Monthly bulletin during school year including a catalog number in May.

Dates of session 1935-36 Opens September 9, closes May 30.

Administrative Officers: *President*, John Hugh Reynolds, *Vice-President*, Charles Jerome Greene, *Dean*, Thomas Starling Staples, *Registrar*, Guy Andrew Simmons.

HILLSDALE COLLEGE

HILLSDALE, MICHIGAN

College of liberal arts and sciences with special departments of Music, Commerce, and Home Economics, coeducational, affiliated with Baptist denomination.

Founded in 1844 as Michigan Central College at Spring Arbor, Michigan, 1853,

removed to Hillsdale, 1855, incorporated, first class graduated, 1856 Hillsdale claims to be first college in Michigan organized under general college law, first to educate women on equal basis with men, first to have degree-conferring theological school, first to comply with law whereby teachers' certificates were issued to graduates, first to erect building for gymnasium, first to establish military department, and first to elect women to board of trustees

Self-perpetuating board of 35 trustees Associated with board of trustees is board of women commissioners

Finances. Endowment, \$828,208 46, income from endowment, \$39,009 94 Total annual expenditures year ending April 30, 1935, \$119,468 23 Budget, 1935 36, \$121,732 Gifts, \$639 18

Grounds and Buildings. 60 acres valued at \$36,253 10, present worth of buildings, \$593,857 44 Total value of grounds, buildings, and equipment, \$718 213 81 Dormitories 4 for men (2 not college-owned), accommodating 80, 7 for women, accommodating 175

Library (1874) 34,660 volumes, 147 current periodicals Special collections Hill Civil War Collection, Ambler Collection, Cushing Memorial Collection (English), Ashbaugh Shakespearian Collection

Laboratories Knowlton Hall (1874), present worth, \$100,000 Value of equipment in principal departments Biology, \$5,676 13, Physics, \$3,111 79, Chemistry, \$5,869 40, Psychology, \$2,000

Requirements. For Admission 15 units, including English, 3, Algebra, 1, Plane Geometry, 1, Laboratory Science, 1 Not more than 3 units allowed in Art, Manual Training, Domestic Science, Business, and Agriculture 1 unit of condition allowed, must be made up within first year Optional plan 3 units in each of 2 groups of which 1 group must be English, and 2 units in each of any other 2 groups The groups are English, Foreign Language, Mathematics, Social Science, and Natural Science 5 units in any course taken in high school for credit

For Degree 124 semester hours, 248

points For A B 12 hours in each of the following groups Group 1, Literature, Music, and Art, Group 2, Foreign Language, Group 3, Social Sciences, Group 4, Natural Sciences, Mathematics, and Psychology For B S 20 hours in Groups 1 and 2, 12 hours in Group 3, 36 hours in Group 4 Prescribed Rhetoric, 8 hours, Physical Education, 2 years, 1 major and 2 minors, 32 hours in major and minor fields during junior and senior year, all of which must be of upper division work, including not less than 4 semesters of major work and 2 semesters of work in each minor Not less than 16 hours of work of junior-senior grade outside major and minor fields Senior year in residence Comprehensive examinations

General Chapel attendance required.

Departments and Staff. Art Professors, 0, associate professors, 0, assistant professors, 1, instructors, 0 Biology 1, 0, 1, 0 Chemistry 1, 0, 0, 0 Classical Languages 0, 1, 0, 0 Dramatic Art 0, 0, 1, 0 Economics and Business Administration 1, 0, 1, 0 Education 1, 0, 0, 1 English 1, 2, 0, 1 History 1, 1, 1, 0 Household Economics 0, 1, 1, 0 Mathematics 1, 0, 1, 0 Modern Languages 2, 1, 0, 0 Music 3, 0, 1, 2 Nursery School 0, 0, 0, 1 Psychology 1, 0, 0, 1 Philosophy 1, 0, 0, 0 Physics 1, 0, 0, 0 Physical Education 0, 0, 2, 1 Religious Education 1, 0, 0, 0 Sociology 1, 0, 0, 0

Enrollment. For year ending June 30, 1935, 383 College Men, 204, women, 179 Department of Music (not counted in academic department), 41 Total number of matriculants since foundation, 12,821

Degrees Conferred year ending June 30, 1935, 56 A B, 33, B S, 20, honorary, 3 Total number of degrees conferred since foundation, 2,492

Fees. Tuition, 12 16 hours, \$75 a semester, general fees, \$27 50 a semester, matriculation, \$5, graduation, \$10 Annual expenses Liberal, \$650, low, \$400 Dormitory room, \$72 per semester Board (13 meals a week), \$75 per semester Cafeteria breakfast

Scholarships: 8 established Varying number of others according to merit and need

Employment bureau. Approximately 50% of students earned part of their own expenses

Dates of beginning and ending sessions. First semester, September 17, 1935, February 7, 1936 Second semester, February 10, June 19, 1936

Catalog in April

Achievements of year ending June 30, 1935. Debt refunded, plans for increased endowment begun Principle of comprehensive examinations for seniors adopted. New regulations designed to raise standards in use of English as requirement for graduation and for recommendation for teacher's certificate

Graduates with properly selected courses in Education may qualify for Michigan Life Certificate for teaching

Administrative Officers: *President*, Willfred Mauck, *Dean of the College*, Clark Lincoln Herron, *Dean of Women*, Lola B McCollough, *Dean of Men*, David McCamel Trout, *Registrar*, Florence L Kreiter, *Director*, Health Service, Frayzer Mattson Officer in charge of foreign students, Dean of the College

HIRAM COLLEGE

HIRAM, OHIO

Coeducational, liberal arts college, privately controlled, non-sectarian. Chartered and opened in 1850 as Western Reserve Eclectic Institute. James A Garfield, principal, 1856-63 Name changed to Hiram College in 1867

Self-perpetuating board of 24 trustees One-fourth of members elected by alumni

Finances: Endowment, \$1,252,614 27, income from endowment, \$41,156 64, income from other sources, \$102,352 93 Total annual expenditures, 1934-35, \$139,228 72 Budget, 1935-36, \$144,008.28

Grounds and Buildings: Area in acres, 8 Total value of grounds, \$39,331, total present worth of buildings, \$600,000 1 dormitory for men, capacity, 87, 3 dormitories for women, capacity, 132

Library (1900) Volumes, 30,329, periodicals, 185

Observatory Located in library building erected in 1900, 9-inch Brashear refractor

Requirements: For Admission. 15 units in acceptable subjects, including English, 3, one Language, 2, Algebra, 1, Geometry, 1, History or Social Science, 1, and Natural Science, 1 Ranking in upper two-thirds of class required Conditional entrance permitted with not less than 14 acceptable units, deficiencies to be made up before the sophomore year

For Degree 124 semester hours and 124 quality points (C average) including required Physical Education Required fields English, 6 hours, one Foreign Language, 2 years, Laboratory Science, 6 hours, elective Science or Mathematics, 6, Religion, 3, elective Social Sciences, 9, Physical Education, 4, a major of 24 or more hours as specified by department, a minor of 12 Final year (30 hours) must be spent in residence, except in case of combination curriculum with technical school

General Except those living at home, all freshmen are required to room and board in college dormitories Chapel or convocation services are held once a week at which attendance is required.

Departments and Staff: Biology *Professors*, 1, *assistant professors*, 0, *instructors*, 0 Chemistry 1, 0, 0 Economics-Sociology 1, 1, 0 Education 1, 0, 0 English and General Literature 2, 0, 2 Greek and Latin 0, 1, 0 History and Political Science 0, 1, 0 Home Economics 0, 1, 0 Mathematics and Astronomy 2, 0, 0 Music 0, 0, 2 Philosophy and Religion 0, 1, 0 Physical Education 0, 0, 3 Physics 1, 0, 0 Psychology 1, 0, 0 Public Speaking and Dramatics 0, 1, 0 Romance Languages 1, 0, 1

Enrollment: For 1934-35, 422 Men, 214, women, 208

Degrees: Conferred in 1934-35, 68 B.A.

Fees: Yearly expenses, unit rate of \$550 including tuition, fees, loaned texts, dormitory room and board, graduation fee, \$5, private music lessons, \$35 per semester for 1 half-hour lesson weekly. Average student's

expenses including incidentals, \$575

Scholarships: 90 varying from \$50 to \$150 Upperclass scholarships are granted in June and freshman scholarships beginning in May and throughout the summer A loan fund is available during the school year

66% of the students enrolled earned an average of \$131.70 of their college expenses through college and F E R A work assignments

1934-35 session opened September 8 and closed June 10.

Summer session, 1936, June 15 to July 24

Catalog issue of the Bulletin in February

Achievements of 1934-35 A new study plan was inaugurated in the regular session of 1934-35 whereby the student spends four-fifths of his time on one subject for a period of 9 weeks and then turns to another for the same period He completes 4 courses in this way in the year A fifth course is pursued throughout the year

Administrative Officers *President*, Kenneth Irving Brown, *Dean of Men*, Edward J. Sparling, *Dean of Women*, Adah Peirce, *Registrar*, Lawrence C. Underwood

HOBART COLLEGE

GENEVA, NEW YORK

College of arts and sciences for men, having a coordinate department for women, known as William Smith College; privately controlled, affiliated with Protestant Episcopal Church

Provisional charter for Geneva College granted to Geneva Academy in 1822 and permanent charter in 1825 Name changed to Hobart College in honor of Bishop John Henry Hobart, 1852 In September 1908, the Trustees of Hobart College opened William Smith College for women, made possible by a gift of \$500,000 from the late William Smith of Geneva William Smith College operates independently of Hobart College, but with a common faculty

Board of 23 trustees Self-perpetuating except for 2 ex-officio members (President of the College and Bishop of the Episcopal

Diocese of Rochester), 5 members elected by graduates of Hobart and 1 by graduates of William Smith

Finances: Endowment, \$1,496,000, income from endowment, \$42,860.73, income from other sources, \$194,365.28 Total annual expenditures, \$251,884.55 Budget, 1935-36, \$254,633.57

Grounds and Buildings. 40 acres valued at \$140,250, present worth of buildings, \$1,114,959.10. Dormitories 2 for men, accommodating 111, 3 for women, accommodating 100

Library (1885) 97,835 volumes, 275 current periodicals Special collections John Safford Fiske Romance Literature Collection, Colonial History of New York Collection.

Laboratories Trinity Hall (1836), Physics, Merritt Hall (1879), Chemistry, Smith Hall (1907), Biology and Psychology, Biological Museum, Smith Observatory (1888), 10-inch refractor, Astronomy

Requirements: For Admission (1) Graduation from accredited preparatory or high school (2) 15 units, including 3 of English (3) Certificate of principal recommending student as capable of doing satisfactory college work

For Degree 120 semester units, 240 credits, in third and fourth years' work, concentration amounting to 36 semester units with grade not less than C

Honors work may be taken by selected students with the approval of the department

General All students must reside in college dormitories or in approved student houses. Physical Training required of freshmen and sophomores Chapel attendance required

Departments and Staff: Bible Instruction *Professors*, 0, *assistant professors*, 0, *instructors*, 1. dents in classes, enrollment, 26

Catalogs Hobart College in November,
William Smith College in December

New developments The Hobart Plan
—the new college calendar was inaugurated
during the academic year 1934-35 In order
to prevent the break in continuity of study
in the conventional calendar caused by the
Christmas vacation, the first semester was
from the fifth of September until Decem-
ber 22 continuously, the second semester
began January 21 and ended May 27 The
inter-semester period was used by 33% of
the students in planned reading and project
work

HOWARD UNIVERSITY

WASHINGTON, DISTRICT
OF COLUMBIA

Main campus located in the northwest section of Washington, 2401 Sixth Street, N.W. The School of Medicine is located near the University Campus, Fifth and W Streets, N.W. The School of Medicine and Freedmen's Hospital, a government institution, cooperate in their work. The Law School is located opposite Court House Square, center of the city, at 420 Fifth Street, N.W.

The museums and libraries supported by the national government located in Washington offer Howard University students many advantages. The Army Medical Museum, for example, is the most com-

plete of its kind in the world, and contains more than 200,000 volumes on medicine and collateral sciences. The Library of Congress, the public libraries of the District of Columbia, and the special libraries of the various bureaus and departments of the government afford facilities for research.

Chartered by Act of Congress in 1867. In 1928, the President of the U. S. approved an Act authorizing annual appropriations to aid in the construction, development, improvements, and maintenance of the University.

The board of trustees consists of 24 members, including the president of the University. Groups of 8 trustees are elected annually by the board for 3 years each.

Howard University, in its organization and equipment, offers a wide variety of schools and colleges with courses leading to degrees. Graduate School, College of Liberal Arts, including courses in Art and in Home Economics, School of Engineering and Architecture, School of Music, School of Religion, School of Law, School of Medicine, including Colleges of Medicine, Dentistry, and Pharmacy. Each of these schools and colleges is duly accredited and provides courses of study accepted for full value toward advanced work in the leading universities of America and Europe. Coeducational. Open to all races and both sexes.

The University plant comprises 55 acres, with 23 buildings devoted to educational purposes.

Finances: Endowment, \$910,127.15, income from endowment, \$27,007.66, income from government appropriations, \$638,854.84, from student fees, \$216,851.77, from other sources, \$104,498.44. Total annual expenditures year ending June 30, 1935, \$953,386.35. Budget, 1935-36, \$1,020,345.

Grounds and Buildings: 55 acres valued at \$1,783,083.90. Present value of buildings, \$2,595,836.66. Residence halls 3, accommodating 300 women, 1, accommodating 145 men.

Library: 92,821 volumes, no record of government documents, 416 current periodicals. Special collection: Moorland

Foundation, 5,147 volumes, 3,000 pamphlets, 300 bound periodicals

Laboratories Chemistry and Physics (1909), value, \$83,000, equipment, \$95,731 Engineering (1910), \$23,000, \$12,233 Medical Building (1925), \$370,000, \$57,398

Requirements: For Admission Graduation from an accredited high school with 15 units, among which must be 3 units of English, 1 of Algebra, 1 of Geometry, and 2 of either a Foreign Language, Science, or History Students admitted conditioned in Geometry or Algebra, provided they present 15 other acceptable units, condition must be removed within 1 year

For Degree For BA and BS Last 30 hours in residence, 120 hours with a minimum of C average, at least 50 semester hours in concentration group, and at least 12 hours in each of the other 2 groups For BS in Architecture 155 hours For BS in Civil Engineering 150 For BS in Electrical Engineering 161 For BS in Mechanical Engineering 152, last 30 hours in School of Engineering and Architecture For Mus B. Last 30 hours in residence in School of Music, 120 hours, major of 32 to 40 hours Minimum of C average required for each of above degrees

For LL B 60 hours of college work, 3 years in Law School, three-fourths of which must be of at least C quality, last year must be spent in residence in Howard Law School, BA granted by arrangement between College and the School of Law

For MD 60 hours of college work, 4 years in Medical School, BS granted by arrangement between College and Medical School

For DDS 60 hours of college work, 4 years in Dental School, BS granted by arrangement between College and Dental School

For Phar C Graduation from accredited high school, 4 years in Pharmaceutical School

For BD Graduation from an approved college, 3 years in School of Religion

Masters' degrees granted by Graduate School upon completion with high quality of 1 year and 2 years of resident work, the

passing of satisfactory oral and written examinations, and the submission of a satisfactory thesis

General 2 years' Physical Education, or 2 years' Military Science, the latter is compulsory for male students

IDAHO, UNIVERSITY OF

MOSCOW, IDAHO

State university, including State Agricultural College and experiment station, coeducational

Established by act of territorial legislature in 1889 Act confirmed by state constitution adopted in 1889, opened in 1892

Board of regents, which is also the State Board of Education of Idaho 5 members named by governor of state, 1 each year for a term of 5 years State superintendent of public instruction, elected biennially, is ex-officio member of state board of education University includes schools and colleges of Letters and Sciences, Agriculture, Engineering, Law, Mines, Forestry, Education, Business Administration, and a Graduate School In College of Letters and Sciences there are also curricula in Home Economics and Music Independent curricula are Physical Education for Men and Physical Education for Women Southern Branch of University at Pocatello, a junior college except in 4-year Pharmacy

Finances: As a state university and land-grant college, the University of Idaho receives support from 3 general sources (1) Federal appropriations for instruction, experimentation, and extension in Agriculture and related subjects, (2) the income from federal land-grants amounting in all to 286,000 acres, only a part of this being productive, (3) state appropriations made at biennial sessions of the legislature The fiscal year of the University is the calendar year beginning January 1 Budget, calendar year 1935, \$1,067,000

Grounds and Buildings: Campus, 50 acres, and adjacent university farms, 785 acres Sub-station farms at 4 other points in state, 750 acres, 36 buildings Value of property exceeds \$2,000,000 5 residence halls and 3 cottages occupied by students, together with 20 fraternity and sorority houses

Library (1935) 100,000 volumes, including government documents, over 500 current periodicals

Laboratories Science Hall (1923-25),

\$450,000, Chemistry, Agricultural Chemistry, Bacteriology, Architecture, Botany, Zoology, and part of Physics laboratories Agriculture, Plant Pathology, Soils, and Forestry in Morrill Hall (1906) Engineering laboratories in Engineering Building (1902), in annex (1918), and in Engineering Shops (1923) Mining and Geology in Geology Building (1906) and in Metallurgical Laboratory (1906) Dairy Building (1918) Home Economics, and Physics in Administration Building Equipment, \$600,000

Requirements: For Admission 15 units, including English, 3, History or Social Science, 2, Physical Science, 2, Mathematics, 2 (for Engineering and Mines, 3), Latin or Modern Language, 2 (required for Letters, Science, Law, and Business only), high school graduation without course requirements (Education) Deficiencies in specific requirements must be removed by beginning of second year Applicants who present a record of scholarship which does not show grades in 10 units of high school work which are at least one grade above lowest passing grade of school are admitted only on probation Applicants for admission to the College of Law satisfy requirements for College of Letters and Science, and in addition 2 years of work as specified by the Association of American Law Schools with an average of C and with three-fourths of their credits better than D

For Degree Letters and Science, 128 semester hours, Engineering, 145-146, Mines, 146, Education, 128, Agriculture, 142; Law, 74, Forestry, 142, Business, 128 All curricula but Letters and Science, Agriculture, and Education, largely prescribed. In these, there is a list of prescribed subjects and an election controlled by a system of major and minor subjects In all cases students must have grades above D in three-fourths of credits presented for graduation.

For Master's Degree Minimum requirement, 24 semester credits of graduate work, at least 12 of these in major subject 1 year residence requirement and better than passing grades are required Thesis and oral examination required

General 2 years of Physical Education required of all students, 2 years of Military Science and Tactics required of men Women not residing with their own families must live in university halls or sorority houses Men must live in university halls or approved places of residence

Departments and Staff: Agricultural Chemistry *Professors*, 0, *associate professors*, 2, *assistant professors*, 1, *instructors*, 0 Agricultural Education 1, 0, 0, 1 Agricultural Engineering 1, 0, 1, 2 Agronomy 1, 1, 1, 0 Animal Husbandry 1, 1, 0, 0 Architecture 0, 0, 1, 2 Bacteriology 1, 0, 0, 1 Botany 1, 0, 1, 1 Business Administration 1, 1, 4, 1 Chemistry 2, 0, 3, 2 Civil Engineering 1, 0, 3, 0 Classical Languages 1, 0, 1, 0 Dairy Husbandry 1, 1, 0, 2 Education 3, 2, 0, 0 Electrical Engineering 1, 0, 1, 1 English 1, 0, 1, 10 Entomology 1, 0, 1, 0 Forestry 2, 2, 1, 2 Geology 3, 0, 0, 0 History 3, 0, 0, 0 Home Economics 1, 2, 1, 1 Horticulture 1, 0, 1, 0 Law 2, 1, 1, 0 Mathematics 1, 0, 1, 3 Mechanical Engineering 1, 0, 0, 2 Military 1, 0, 3, 0 Mines 1, 0, 2, 1 Modern Languages 1, 2, 3, 1 Music 1, 1, 3, 1 Philosophy 1, 0, 0, 1 Physical Education (men) 2, 2, 1, 1 Physical Education (women) 0, 1, 0, 2 Physics 1, 0, 2, 0 Plant Pathology 1, 1, 0, 0 Poultry Husbandry 1, 0, 0, 1 Psychology 2, 0, 0, 1 Zoology 1, 0, 1, 2

Enrollment: Fall of 1935, 2,478 Men, 1,773, women, 705 College of Letters and Science, 257, College of Agriculture, 218 College of Engineering, 298, College of Law, 58, School of Mines, 92, School of Forestry, 324, School of Education, 472, School of Business Administration, 107, Junior College, 652 Enrollment at Southern Branch (Pocatello), 850 Men, 515, women, 335 College of Pharmacy, 115, Division of Letters and Science, 635, Division of Engineering, 100 1935 Summer Session (Moscow), 895. Total number of matriculants since foundation, 16,894

Degrees: Conferred in June, 1935, 314 bachelors' degrees, 54 masters' degrees Degrees conferred since foundation Bachelors'

degrees, 4,346, masters' degrees, 588, Ph D degrees, 6

Fees: Tuition free to residents of Idaho, for nonresidents of Idaho, tuition fee, \$30 a semester Health fee, \$4 a semester, associated students of University of Idaho fee, \$8 50 (a semester), extracurricular fee, \$5, diploma fee, \$5 Rooms in university halls, \$27 a semester, board, \$4 50 a week Annual expenses, \$400 to \$500

Scholarships: A limited number of graduate scholarships and fellowships, value \$250 to \$750, according to amount of service rendered the department concerned

State and U S Bureaus of Mines and Geology use laboratories of University School of Mines for research

50% of students earn all or part of expenses through college

University opens middle of September Each semester 18 weeks

Summer session of 6 weeks for graduate and undergraduate courses, begins second or third Tuesday in June Attendance, 1935 sessions, 895

ILLINOIS, UNIVERSITY OF

URBANA, ILLINOIS

Main campus at Urbana At Chicago, the College of Medicine at 1853 West Polk Street, the College of Dentistry at Harrison and Honore Streets, and the College of Pharmacy at 715 South Wood Street

State university, coeducational, non-denominational, publicly controlled and supported chiefly by the State of Illinois, and partly by federal funds (for Agriculture and Mechanic Arts) and endowment

Incorporated in 1867, by the general assembly of the state as The Illinois Industrial University Name changed to The University of Illinois, 1885, following the passage of the Morrill Land-Grant Act, opened in 1868 Instruction from the first included Literature and the Arts, Classical and Scientific Studies, Agriculture, Engineering, Military Science and Tactics Colleges and schools were founded later as follows Graduate School, 1892, Summer Session, 1894, School of Music, 1897 (made a department of the College of Fine and Applied Arts in 1931), School of Library Economy, 1897 (this school was established in 1893 at the Armour Institute of Technology in Chicago and was transferred to the University in 1897 The Director of that school was appointed Librarian of the University, and the Library School was opened), College of Law (organized in 1896 as School of Law), 1900, College of Liberal Arts and Sciences

(merger of the College of Literature and Arts and the College of Science), 1913, College of Commerce and Business Administration, 1915, College of Education, 1918, School of Journalism, 1927, College of Fine and Applied Arts, 1931, the School of Physical Education, 1932, and the University Extension Division, 1933 Research divisions were founded as follows Agricultural Experiment Station, 1888, Engineering Experiment Station, 1903, Bureau of Educational Research, 1918, Bureau of Business Research, 1921, Bureau of Community Planning, 1934, Bureau of Institutional Research, 1931 Research and Educational Hospital of State of Illinois, operated administratively by State Department of Public Welfare and professionally staffed by University medical faculty, 1925 Chicago College of Pharmacy, founded in 1859 became School of Pharmacy of University of Illinois in 1896 and College of Pharmacy of University of Illinois in 1932 College of Physicians and Surgeons of Chicago was affiliated with University in 1897, arrangement discontinued in 1912, in 1913 property of College of Physicians and Surgeons was given to University and became College of Medicine, School of Dentistry, organized as a department of the College of Medicine in 1901 became College of Dentistry in 1905, was closed with the College of Medicine in 1912 and reopened in 1913

Board of 11 trustees Governor of state and superintendent of public instruction ex-officio members The other 9 members are elected by the people of the state for terms of 6 years For the purpose of administration, the University is divided into colleges and schools, not educationally separate, but interdependent forming a single unit I College of Liberal Arts and Sciences II College of Commerce and Business Administration III College of Engineering IV College of Agriculture V College of Fine and Applied Arts VI College of Education VII College of Law VIII School of Journalism IX School of Physical Education X Library School XI Graduate School XII Summer Session XIII University Extension Division XIV. College

of Medicine XV College of Dentistry XVI College of Pharmacy

Finances: Income for 1934-35 State appropriations, operation, \$3,818,092, total federal funds, \$441,976, student fees, \$962,665, residence halls, hospital, \$155,720, departmental sales, \$269,529, gifts, \$131,086, F.E.R.A., \$136,367, other non-educational, \$24,935, from endowment, \$48,505, miscellaneous, \$24,258, grand total income, \$5,968,357 Total annual expenditures for year ending June 30, 1935, \$5,901,170

Grounds and Buildings: Total book value Of land, \$1,611,416, of buildings, \$19,620,762, of equipment, \$4,204,231, of books, \$2,423,878 Total, \$27,860,287 Improvements other than buildings, \$1,414,034 Expenditures for plant additions, 1934-35, \$102,205

Main campus, 430 acres, total including experimental farms, 2,225 acres, Chicago Colleges of the University, 2 acres 67 important buildings on the main campus, 5 in Chicago, and 27 on the experimental farms in Champaign County Three residence halls house 349 women Notable for their architecture are the buildings for Commerce (1925), Architecture (1927), the Library (1924-25), New Agriculture Building (1922-23), Men's Gymnasium (1925), Armory Addition (1927), McKinley Hospital (1925), and the Auditorium

Library Volumes, 1,011,938. In Urbana (1925 and 1929), 961,274, in Chicago, 50,664 Special collections in Urbana Architecture, Classics, Chemistry, Entomology, Mathematics, Law, Western United States History, Transportation, Economic Theory, Municipal Government, International Law, government publications (federal, state, and city), Illinois newspapers since 1916, foreign language newspapers published in United States since 1916, and Italian History, in Chicago, Medicine Over 8,000 serials are currently received in Urbana and over 250 in Chicago 389 sets of journals in library of College of Medicine

Laboratories Separate buildings for Chemistry, Physics, Astronomy, Electrical Engineering, Mechanical Engineering, Theoretical and Applied Mechanics, Ceramic

Engineering, Farm Mechanics, Dairy Husbandry for Dairy Manufactures, Animal Pathology, Genetics, Agronomy, Floriculture, Horticulture, Vegetable and Plant Breeding, other buildings housing laboratories are Natural History, Vivarium Building, Agricultural Building, New Agricultural Building, Research Laboratory and Library in connection with the Colleges of Medicine, Dentistry, and Pharmacy, Electrical Engineering Laboratory Extension, Medical and Dental College Laboratories, and Materials Testing Laboratory There are also numerous small buildings housing special laboratories of the College of Agriculture and Engineering

Museum Art collection of casts, photographs, engravings, prints and paintings 4 museums (1) Classical Art and Archaeology, (2) European Culture, (3) Oriental Museum, (4) Natural History Museum, the latter in Natural History Building having a research collection of 500,000 specimens including special exhibits of Greenland Eskimo material from the Crocker Land Expedition and the Archaeology of the Cahokia Mound Builders, research collections of specimens for Botany, Entomology, Geology and Geography, and Zoology Collections of materials and products of farm and manufacture in Colleges of Agriculture and Engineering College of Commerce has exhibits for courses in Industrial Economics

Observatory (1896) 12-inch refracting telescope and other equipment

Admission Requirements: (1) *The Undergraduate Colleges and Schools* 15 units of secondary work in acceptable subjects No conditions permitted 10 of the 15 units must be from fields of English, Mathematics, Foreign Language, Social Studies, and Laboratory Science These 10 units must include 2 majors (of 3 units each), one of them in English, and 2 minors (of 2 units each) from at least 3 of the above fields. The remaining 5 units may be any subjects which are accepted by an accredited school toward its diploma (2) *College of Education and School of Journalism* 2 full years of recognized college work (3) *College of Law* As a regular student, applicant must be a

graduate of a college or university of recognized standing, or a student in the University of Illinois of senior standing, having at least an average grade of C (4) *College of Medicine* 4 years of acceptable secondary school work and 2 years of college work including certain prescriptions, with a scholastic average of 3.5 (between C and B on a grading system of A, B, C, D, and E), or its equivalent as determined by the University of Illinois (5) *College of Dentistry* 2 years of approved college work, including prescribed subjects, in addition to secondary school work (6) *College of Pharmacy* 1 year of approved college work, including prescribed subjects, in addition to secondary school work (7) *Library School* a bachelor's degree (8) *The Graduate School* a bachelor's degree required, admission dependent on character of college work of applicant and standing of the institution from which he received his degree

Degree Requirements. In all undergraduate curricula, 120 to 136 semester hours of credit required for bachelor's degree exclusive of requirements in Physical Education and Military Training. Undergraduate men and women must take Physical Education 2 years and Hygiene 1 year. Undergraduate men are also required to take Military Science and Tactics during first 2 years. All undergraduates are required to take 6 hours of Rhetoric. The requirements in Physical Education, Hygiene, and Rhetoric may be met by passing proficiency examinations. Candidates for a bachelor's degree must spend either the first 3 years or the last year in residence at the University. Degrees conferred: A.B. (general course in Liberal Arts and Sciences) and B.S.

In the various professional schools the requirements are as follows: *College of Law* LL.B., 84 semester hours distributed over 3 years, J.D., an A.B. or B.S. degree plus curriculum for LL.B. with a minimum grade of B, plus a thesis. *Library School* One year of work after bachelor's degree, leading to B.S. in Library Science. Thereafter a second year of work in Library Science is offered in the Graduate School leading to M.S. in Library

Science. *College of Medicine* For B.S., entrance requirements plus 2 years in the College of Medicine, for M.D., prescribed and elective work covering a period of 4 years, plus 1 year of internship in an approved hospital. *College of Dentistry* For B.S., 2 years in a college of liberal arts and sciences and 2 years in the College of Dentistry, for D.D.S., 4 years in the College of Dentistry. *College of Pharmacy* For B.S. in Pharmacy, entrance requirements plus 3 years in the College of Pharmacy.

In the *Graduate School* the requirements for master's degree (A.M. or M.S.) are at least 1 full year's work (from 4 to 5 unit courses a semester) in residence, including a thesis. For professional degrees in Engineering: M.Arch., A.E., Cer.E., Ch.E., C.E., E.E., M.E., E.M. and Engineer-Physicist may be conferred on 2 classes of candidates: (1) Those who have received an academic degree in Engineering from the University of Illinois, (2) those who have received an academic degree in Engineering from other institutions of equal standing and who have been members of the teaching or research staff of the College of Engineering, the Engineering Experiment Station, or the Department of Chemistry of the University of Illinois for at least 3 years prior to the conferring of the professional degree. A thesis is also required. Requirements for Ph.D.: Pursuit of a major subject in which the candidate's research lies and 1 or 2 minors, a minimum period of study of 3 years, the first 2 or the last 1 of which must be in residence at the University, a preliminary examination before the beginning of the third year to determine whether the applicant shall be accepted as a candidate for the degree in the following year, ability to read French, German, and other languages needed in candidate's work, a final examination based on the research of candidate, a thesis demonstrating the power of independent research.

Enrollment: Summary of students, 1934-35. Total undergraduates, 9,076, men, 6,393, women, 2,683 Liberal Arts and Sciences 3,744, men, 2,211, women, 1,533 Commerce 1,698, men, 1,534, women, 164 Education 534, men, 214, women, 320 Engineering 1,146, men, 1,144, women, 2 Agriculture 931, men, 582, women, 349 Fine and Applied Arts 586, men, 394, women, 192 Physical Education 295, men, 228, women, 67 Journalism 142, men, 86, women, 56 Law 300, men, 284, women, 16 Library 68, men, 9, women, 59 Total undergraduate and professional students, Urbana departments 9,444, men, 6,686, women, 2,758 Graduate School, Urbana departments (less duplicates) 921, men, 744, women, 177 Total, Urbana departments, winter session 10,365, men, 7,430, women, 2,935 Chicago departments Medicine 627, men, 606, women, 21 Dentistry 129, men, 127, women, 2 Pharmacy 264, men, 230, women, 34 Graduate School (less duplicates) 90, men, 76, women, 14 Total, Chicago winter session 1,110, men, 1,039; women 71 Total in University, winter session 11,475, men, 8,469, women, 3,006 Matriculants since foundation, 91,-737.

Degrees: Conferred year ending August 1935, 2,667. Total number of degrees

conferred from foundation through August 1935, 52,227 Baccalaureate degrees, 33,274, graduate degrees, 6,912, Law, 1,328, Library Science, 1,121, Music, 298, Medicine, 5,276, Dentistry, 1,303, Pharmacy, 2,715

Fees: All colleges and schools with exception of Law, Medicine, Dentistry, and Pharmacy Matriculation fee of \$10 and a graduation fee of \$10 payable once only, incidental fee each semester to residents of Illinois, \$35, nonresidents, \$62 50, laboratory fees, \$50 to \$15 a course College of Law Incidental fee each semester to residents, \$50, nonresidents, \$75 College of Medicine Incidental and laboratory fees a year to residents, \$200, nonresidents, \$300 College of Dentistry Incidental and laboratory fees a year to residents, \$200, nonresidents, \$300 College of Pharmacy Incidental and laboratory fees to residents, first year, \$149, second year, \$163, third year, \$166, nonresidents pay \$50 additional each year Estimated annual expenses for undergraduate students attending at Urbana, exclusive of clothing, railroad fare, and laboratory fees, are from \$392 to \$630 Average charge for lodging and board in the women's residence halls, \$335 a year

Scholarships: To first year graduate students a number of scholarships are open with a stipend of \$300 and remission of incidental and certain other fees Fellowships with stipends of \$500 and \$600 with same remission of fees are open to second and third year graduate students Candidates must be graduates of the University or of colleges or institutions having equal requirements for the bachelor's degree Other scholarships and fellowships Carr Fellowship in Chemistry or Chemical Engineering (\$750) and 10 annual fellowships in Organic Chemistry carrying a stipend of \$600 each A number of 2-year research graduate assistantships have been established in the Engineering Experiment Station open to graduates of approved technological schools and universities (\$600 each). Similar assistantships in the Engineering Experiment Station have been established from time to time by industries and industrial associations. Katharine L Sharp Scholarship in

Library Science, \$300 Applications should be made before March 1

Undergraduate scholarships are limited to residents of Illinois On the basis of competitive examinations in June, 3 scholarships are awarded in each county, 1 for any undergraduate division of the University, 1 for work in Home Economics, and 1 for work in Agriculture One scholarship in each county for work in Ceramics is awarded on nomination of the Illinois Clay Manufacturers' Association Each member of the Illinois General Assembly may nominate 1 resident of his district each year for a scholarship in the University Undergraduate scholarships excuse the holder from paying the matriculation and incidental fees for 4 years

Research Organized research and scholarship investigations in all departments under direction of Graduate School Special research in Agricultural and Engineering Experiment Stations Bureau of Educational Research and Bureau of Business Research Various cooperative investigations are also undertaken by Engineering Experiment Station and Agricultural Experiment Station under agreements between University and several industrial organizations, e.g., Investigation of the Fatigue of Metals, in cooperation with the National Research Council, the Engineering Foundation, General Electric Company, Allis-Chalmers Company, Copper and Brass Association, and the Western Electric Company, Investigation of the Fatigue of Structural Parts, Ageing of Porcelain, Boiler Feed Water Treatment, Refractories, in cooperation with the Utilities Research Committee of Illinois, Fatigue of Steel Castings, in cooperation with the American Steel Foundries, Investigation of Warm Air Heating, in cooperation with the National Warm Air Heating and Air Conditioning Association, Steam and Hot Water Research, in cooperation with the Illinois Master Plumbers' Association and National Boiler and Radiator Manufacturers' Association, Cooperative Investigation of Problems of Illinois Mineral Industries, Cooperative Investigation in the Use of Electricity on the Farm,

in cooperation with the Illinois Electrical Association and Central Illinois Public Service Company, Cooperative Investigation in Canning, in cooperation with the Illinois Canning Association. Facilities for investigation and research are further enhanced by location at the University of the following state bureaus: State Natural History Survey, State Water Survey (1897), and State Geological Survey (1905). Funds donated for special research, year ending June 30, 1935, amount to \$125,862. Total research expenditures year ending June 30, 1935, \$778,421. Trust Research Donations, \$125,862, State and Federal Funds: Agricultural Experiment Station, \$512,293, Engineering Experiment Station, \$174,590, Bureau of Educational Research, \$7,826, Bureau of Business Research, \$6,688. Graduate Research, \$45,254, Medicine, \$18,623, Liberal Arts and Sciences, \$13,147.

Employment. An employment bureau with a full-time secretary is located in the Office of the Dean of Men. 38% of the students enrolled in the University earned all or part of their expenses during 1934-35. A Committee on Appointment of Teachers recommends qualified graduates for positions. Dean of the College of Education is Chairman of the Committee, and the Principal of University High School is the Secretary. Student loan funds as of June 30, 1935, \$244,232.

Dates of beginning and ending sessions, 1935-36: Graduate School registration, September 13-14, freshman registration, September 14, upperclass registration, September 16-17, instruction begins September 18. Second semester registration, February 3 and 4, instruction begins February 5, Commencement, June 8.

Summer session. Registration on the Monday following Commencement, and continuing 8 weeks. Instruction is offered in departments in the College of Liberal Arts and Sciences, Commerce and Business Administration, Education, Engineering, Agriculture, Fine and Applied Arts, Law, in the Schools of Journalism and Physical Education and in the Library and Graduate Schools. Enrollment, 1935, 2,793.

Correspondence courses: 492 adult part-

time students enrolled in the extension courses offered in 1934-35, for which University credit was given.

Extension. All departments of the College of Agriculture do extension work through specialists provided for this purpose, and through County Farm Advisers. 100 of the 102 counties of the state cooperate with the College in this way. University credit is not given for this type of extension work. Other extension activities include short courses held throughout the year, especially by the Colleges of Agriculture and Engineering.

Achievements in instructional and organizational policy during the past year in the effort to adjust effectively the work of the institution to changing conditions, needs, and opportunities: (1) A tutorial system with general examinations and special honors in the College of Liberal Arts and Sciences. (2) A system of proficiency examinations in all freshman and sophomore courses enabling students to secure credit in such work by passing examinations. (3) Lectures to all students by members of the faculty of the College of Liberal Arts and Sciences on methods of studying the various subjects. Attendance is urged but not compulsory.

Publications. Annual Register (General Catalog) in March, The University of Illinois Press, organized 1918, has charge of the editing, printing, and distribution of publications of the University. The following periodicals are published: Agriculture. The bulletins, circulars, and soil reports of the Illinois Agricultural Experiment Station. Engineering. The bulletins and circulars of the Engineering Experiment Station and the Ceramics Bulletin. Scientific Bureaus. The bulletins on Illinois natural history, geological survey, water survey, and coal mining investigations, also Geological Survey Monographs. Education. Bulletins from the College of Education, those of the High School Visitor's office, and bulletins and circulars of the Bureau of Educational Research. Commerce. Bulletins and circulars of the Bureau of Business Research. English. Bulletin of The Illinois Association of Teachers of English. Graduate School. The Journal of English and

Germanic Philology, The University Studies (occasional), The University of Illinois Studies in the Social Sciences, The University of Illinois Studies in Language and Literature, The Illinois Biological Monographs.

Enrollment: For 1934-35, 166 Men, 86, women, 80

Degrees: Conferred year ending June 30, 1935, B.A., 14 Total number of degrees conferred since foundation, 293

Fees. Tuition a quarter, \$40, rent, \$24, board, \$60, student activity fee, \$5, graduation, \$10, Biology, \$2, Chemistry, \$3 50, Quantitative Analysis, \$5, Physics, \$2, Practice Teaching, \$5, Surveying, \$2, Chemistry breakage deposit, \$5, room deposit, \$5 Special fees are charged for the various music courses Annual expenses Liberal, \$475, low, \$410

Scholarships: 33, varying in amounts from \$30 to \$120, loan fund Applications for scholarship aid close August 1

Employment bureau In 1934-35, 80% of students earned all or part of expenses

Dates of beginning and ending sessions Third Tuesday in September, first Wednesday in June

Summer session Began third Tuesday in June, ended last day of August 35 enrolled

Catalog in June

Administrative Officers: *President*, Jesse W Bunch, *Registrar*, Ida M Yates, *Dean of Men*, Nobel C Nagler, *Dean of Women*, Mrs Noble C Nagler, *Business Manager*, C H Cruttenden

INTERNATIONAL YOUNG MEN'S CHRISTIAN ASSOCIATION COLLEGE

SPRINGFIELD, MASSACHUSETTS

Privately controlled, for men only It is an arts and science college combined with vocational majors in Physical and Character Education The College is independently organized but is officially recognized by the Young Men's Christian Associations as a training agency It trains graduates for all forms of leadership in social, physical, and religious activities among boys and young men

Founded in 1885, under the corporate name of the School for Christian Workers The course covered 2 years and was chiefly professional in character The year following a course in Physical Education was established The name of the institution was changed in 1890 to the International Young Men's Christian Association Training School and in 1911 to the International Young Men's Christian Association College The present location was acquired in 1891 In order to meet the demands for a better academic training the course was extended to 3 years in 1896 and to 4 years in 1916 A 1-year graduate course was added in 1927

The charter of the College provides for a self-perpetuated corporation which elects from its own number a board of 45 trustees who have entire control of the affairs of the institution

Finances: Endowment for the year ending August 31, 1935, \$1,169,096 Dividends, \$48,980, tuition, \$122,079, contributions,

\$39,547, income from other sources, \$49,539, total income, \$260,145, total expenditures, \$273,525, expenditures over income, \$13,380 The budget for the year ending August 31, 1936 is estimated at \$298,705 Estimated income from fixed sources, \$250,000 Necessary from contributions, \$48,705 This budget includes the operation of a cafeteria, balanced by receipts

Grounds and Buildings: The College possesses 195 acres Gymnasiums, athletic fields, a camp site, and Lake Massasoit serve as laboratories for the technical course in Physical Education College grounds valued at \$281,580, buildings at \$1,010,303, total property aside from endowment, \$1,480,492

Library (1913) 23,669 bound volumes, approximately 135,800 unbound volumes, 215 current periodicals The College Library is particularly notable as having one of the largest collections in existence on Physical Education and on Christian work among boys and young men

Laboratories Biology, Chemistry, Physics, and Physiology Field science museum for the training of leaders in Nature Study

Requirements: For Admission 15 units from an approved 4-year high school or secondary school distributed as follows English, 3, Mathematics, 2, History, 1, Chemistry, 1, Physics, 1, a Modern Language or additional Science, 2, electives, 5 No students are admitted without a high school diploma but students applying without prerequisites in Chemistry, Physics, and Mathematics are required to take these before entering advanced courses No college credit is given for these preliminary courses Intelligence tests are given before students are accepted

For Degree The academic requirements for graduation are 124 semester hours in addition to physical practice 17 loaded classroom hours of 50 minutes each are rated as 1 semester hour. 2 laboratory hours are rated as 1 loaded hour and 3 hours of physical practice as 1 loaded hour Students in the course in Physical Education must secure 16 semester hours in practice work. The number of hours required for all bache-

lors' degrees is the same but for the B S degree the student must present 12 semester hours either in Science or a Modern Language No student will be graduated unless he secures at least 125 honor credits

For a Master of Education degree the requirements are 31 semester hours on the graduate level and a thesis for which 7 semester hours credit is given

Concentration requirements are chiefly in the technical branches The curriculum in general is based on the study of man physically, intellectually, socially, and spiritually through courses in Biology, Psychology, the Social Sciences, and Religious Education

The minimum requirements in Physical Education are 16 semester hours for which no academic credit is given For graduation at least 1 year's residence is required for all courses

Departments and Staff: The faculty numbers 37 full-time professors and 10 part-time members

Enrollment. For year ending August 31, 1935, academic year, 530, summer school, 70, graduate course, 67, total, less duplicates, 552 Total number of matriculants since foundation, 4,289

Degrees: Conferred year ending August 31, 1935, academic year, 117, summer school, 20, total, 137 Total number of degrees conferred since foundation, 2,409.

Fees: Tuition, \$300 per year, registration, \$5, graduation, \$5, laboratory fees, \$9 to \$13, student association, \$26 Total estimated expenses per year, \$700 to \$850

Scholarships: Foreign students to the number of 20 are given scholarships ranging from \$450 to \$650 5 graduate scholarships are granted of \$300 to \$600 each, and freshman scholarships of \$100 each are granted to students from the upper quarter of their high school course

Employment bureau The Student Association maintains an employment bureau for undergraduates and the College maintains a placement bureau for alumni and for undergraduates during the vacations

Dates of beginning and ending sessions. September 24, 1934, June 16, 1935

Summer session July 1 to August 2, 1935.

Administrative Officers: *President Emeritus*, Laurence L. Doggett, *Acting President* and *Dean*, Albert Z. Mann, *Vice-Presidents*, Herbert L. Pratt and Walter J. Campbell, *Director*, International Relations, Frank M. Mohler

IOWA STATE COLLEGE OF AGRICULTURE AND MECHANIC ARTS

AMES, IOWA

Land-grant institution, coeducational

The institution was first authorized by the General Assembly of the State of Iowa in 1858, site secured in 1859, in 1862, conditions of Morrill Act accepted. College formally opened in 1869. Divisions (colleges) or major fields were organized in the beginning in Agriculture, Engineering, and Science. Home Economics organized in 1872, Veterinary Medicine in 1879, and the Graduate School in 1913.

The State Board of Education of Iowa is the governing board, including under its jurisdiction also the State University of Iowa and Iowa State Teachers College. It consists of 9 members appointed by the governor of the state and confirmed by the senate. This board appoints a finance committee of 3 men who give their entire time to the state institutions of higher education.

Finances: Income from endowment, \$34,000, income from other sources, 1934-35, \$2,815,000 (including State of Iowa, \$1,780,000, U. S., \$379,000, fees, \$324,000, gifts, \$25,000, miscellaneous, \$307,000). Total budget, 1934-35, \$2,849,000.

Grounds and Buildings. Total area of land in campus and experimental farms, 2,194 acres (250 acres in the campus proper). The land is valued at \$693,000, the buildings at \$5,527,000, equipment and supplies at \$2,604,000. The total value is \$8,824,000.

Library (including seminar rooms) Volumes, 236,000, pamphlets, 54,000. Periodicals, transactions of learned societies and other serials currently received, 5,100. In most cases the complete sets are available.

The library consists almost exclusively of material in technical and scientific fields. Collections in Biological Sciences, Chemistry, Agriculture, and Veterinary medicine. Annual library budget, \$95,000.

Requirements: For Admission. Agriculture, Engineering, Home Economics, and Industrial Science, 15 units. 14 units permit conditional admission. Conditions must be removed within 1 year. Veterinary Medicine, 1 year of college work. For admission to the Graduate School, graduation with a rating in upper half of class from an institution on the accredited list of the Association of American Universities or equivalent.

For Degree. For the bachelor's degree, from 192 to 213 quarter credits. For M. S., minimum of 1 year of residence and examination upon completion of an approved program of advanced study. For Ph. D., reading knowledge of French and German, at least 3 years devoted to research and study. Qualifying and final examinations. Dissertation.

General Physical Training is required of all undergraduate students during the first 2 years, and all men physically fit are required to take 2 years of Military Training.

Departments and Staff: Total number on teaching, extension, and research staffs (1934-35), 650. Summary of staffs by colleges. Agriculture (including Agricultural Experiment Station) *Professors*, 35, *associate professors*, 28, *assistant professors*, 39, *instructors* (and research assistants), 37. Engineering (including Engineering Experiment Station) 25, 17, 17, 16. Home Economics (including research staff) 12, 9, 11, 19. Industrial Science (including research staff) 53, 49, 46, 46. Veterinary Medicine (including Veterinary Research Institute) 8, 6, 3, 6.

Enrollment: Total number of matriculated students (excluding duplicates, including summer quarter) in year ending June 30, 1935, 4,695. Men, 3,292, women, 1,403. Graduate School 831. Men, 549, women, 282. Division of Agriculture 1,006. Men, 990, women, 16. Division of Engineering 1,190. Men, 1,186, women, 4. Division of Home Economics. Women, 956. Division

of Industrial Science 636 Men, 491, women, 145 Division of Veterinary Medicine Men, 151

Degrees: Conferred year ending June 30, 1935 B S., 570, professional, 7, M S., 105, Ph D., 35, honorary, 2, total, 719 Total number of degrees conferred since foundation, 16,844

Summer quarter enrollment, 1934 Graduate School, 501, undergraduate, 611, total, 1,112

Fees: Tuition, \$90 to \$118 per year depending on curriculum Matriculation fee, \$10, graduation, \$15, fee for nonresident students, \$40 Total expense including board and room, \$450 to \$650 per year

Scholarships: For year 1934-35 the following scholarships, fellowships and graduate assistantships were awarded to graduate students Teaching scholarships, 1, stipend \$225, research scholarships, 11, stipend \$225, teaching fellowships, 29, stipend \$450, research fellowships, 43, stipend \$450, teaching graduate assistantships, 52, stipend \$540 to \$600, research graduate assistantships, 16, stipend, \$540 to \$600, also a number of industrial research fellowships with stipend from \$540 to \$960 2 institutional fellowships are usually awarded to foreign students

Research Research funds were provided for the year 1934-35 as follows Funds of faculty council on research, \$3,000, grant for work on basic sciences, \$14,000, Agricultural Experiment Station, \$313,000, Engineering Experiment Station, \$55,000, Veterinary Research Institute, \$30,000, gifts (largely for industrial research), \$5,200, Rockefeller grant (biological sciences), \$5,000, total, \$425,200

Calendar Autumn quarter, September 23 to December 19, 1935 Winter quarter, January 2 to March 20, 1936 Spring quarter, March 25 to June 13, 1936 Summer quarter, June 16 to August 27, 1936.

Publications Official Publications, a series of pamphlets including the general catalog (issued in February), and announcement of each undergraduate college, the Graduate College, the Summer Quarter, etc Also the quarterly, Iowa State College Journal of

Science (devoted to research), Research Series of Bulletins of the Agricultural Experiment Station, Bulletins of the Agricultural and Engineering Experiment Stations, Bulletins of the Agricultural Extension Service

Administrative Officers (general) *Acting President*, C E Friley, *Vice-President*, C E Friley, *Business Manager*, H C Gregg, *Registrar*, James R Sage, *Dean*, Junior College and *Director*, Personnel for Men, M D Helser, *Director*, Personnel for Women, Frances A Sims *Dean*, Graduate College, R E Buchanan, *Dean*, Summer Quarter, John E Foster

DIVISION OF AGRICULTURE

This includes the resident teaching in Agriculture, the Agricultural Extension (extra-mural teaching) and the research of the Iowa Agricultural Experiment Station

Grounds and Buildings. About 1,900 acres of land are devoted to the uses of the College departments and Agricultural Experiment Station The farms included are College Farm (Department of Animal Husbandry), Animal Husbandry Experimental Farm, Poultry Husbandry Farm, Dairy Husbandry Farm, Agricultural Engineering Farm, Horticulture and Agronomy Farm In addition smaller tracts are allotted to Genetics, Apiculture, Botany, and Plant Pathology Temporary experimental farms and plots are distributed over Iowa

Laboratories Students in Agriculture take their basic science in the Division of Industrial Science Laboratories are maintained for work in Agricultural Economics, Agricultural Engineering, Animal Husbandry (including Dairy Husbandry, Animal Nutrition, Poultry Husbandry, Animal Breeding), Dairy Industry (including Dairy Bacteriology and Dairy Chemistry), Agronomy (including Crop Breeding, Soil Bacteriology, Soil Fertility), Forestry, Genetics, Horticulture (including Floriculture, Pomology and Vegetable Crops), Landscape Architecture, Agricultural (Technical) Journalism and Agricultural Education

Major buildings Agricultural Hall, value with equipment, \$520,000 Agricultural

Hall Annex, \$82,000 Agricultural Engineering, \$110,000 Dairy Industry, \$514,000. Landscape Architecture, \$30,000 Meats Laboratory, \$58,000 Animal Husbandry Judging Pavilions, \$34,000 Animal Husbandry Barns (6), \$147,000 Dairy Husbandry Barns (4), \$54,000 Poultry Husbandry Laboratory Buildings (3), \$29,000 Greenhouses, \$60,000 Miscellaneous smaller buildings (10), \$110,000 Total, \$1,748,000

Departments and Staff: Agricultural Economics and Rural Sociology *Professors*, 3, *associate professors*, 5, *assistant professors*, 2, *instructors*, 3 Agricultural Engineering 2, 3, 0, 1 Agronomy 3, 6, 3, 0 Animal Husbandry 8, 3, 4, 1 Dairy Industry 3, 1, 2, 3 Forestry 1, 1, 2, 0 Genetics 1, 0, 1, 1 Horticulture 6, 0, 4, 0 Landscape Architecture 1, 0, 2, 0 Technical Journalism 1, 0, 2, 0 Vocational Education 1, 5, 1, 1

Enrollment: 1934-35, undergraduate, 1,006, graduate, 164, total, 1,170

Degree: Bachelor of Science

Research The funds for research are largely (though not exclusively) those of the Agricultural Experiment Station (for 1934-35 about \$313,000) The staff is recruited from departments in Agriculture, in Science, and in Home Economics Professors, 52, associate professors, 29, assistant professors, 35, assistants, 43

Extension The staff has charge of all extra-mural and adult teaching in Agriculture The budget for 1934-35 was \$428,000 The staff consists of professors, 10, associate professors, 11, assistant professors, 13, instructors and assistants, 13, county agricultural agents, 100

Administration *Dean*, Agriculture, H H Kildee, *Director*, Agricultural Experiment Station, R E Buchanan, *Vice-Director*, Agricultural Experiment Station, W H Stevenson, *Director*, Agricultural Extension, R K Bliss

DIVISION OF ENGINEERING

This includes resident teaching in Engineering, Engineering Extension Service and

the research of the Engineering Experiment Station

Buildings: Main Engineering Hall, \$300,000 Engineering Hall Annex, \$175,000 Chemical Engineering, \$95,000 Agricultural Engineering, \$110,000 Mechanics Laboratory, \$48,000 Steam and Gas Laboratory, \$72,000 Industrial Arts, \$92,000 Automotive and Aeronautical Laboratory, \$30,000 Shop buildings, \$70,000 Total, \$992,000

Departments and Staff: (Including Engineering Experiment Station) Agricultural Engineering *Professors*, 2, *associate professors*, 3, *assistant professors*, 0, *instructors* (including research assistants), 1 Architectural Engineering 1, 1, 2, 2 Ceramic Engineering 1, 1, 0, 1 Chemical and Mining Engineering 2, 1, 1, 2 Civil Engineering 5, 2, 1, 1 Electrical Engineering 2, 1, 3, 2 General Engineering 4, 0, 1, 2 Industrial Arts 2, 0, 2, 0 Mechanical Engineering 5, 4, 4, 1 Theoretical and Applied Mechanics 1, 1, 2, 3

Enrollment: 1934-35, undergraduate, 1,190, graduate, 128, total, 1,318

Degree: Bachelor of Science

Research The funds for research are largely (though not entirely) those of the Engineering Experiment Station (for 1934-35, \$55,000) The staff is drawn largely from the Divisions of Engineering and Industrial Science Professors, 12, associate professors, 7, assistant professors, 3, assistants, 4

Extension The staff of Engineering Extension has charge of the extra-mural teaching in Engineering Budget for 1934-35, \$33,000 Professors, 2, associate professors, 1, assistant professors, 5

Administration. *Dean*, Engineering, and *Director*, Engineering Experiment Station, T R Agg, *Director*, Engineering Extension, Daniel C Faber

DIVISION OF HOME ECONOMICS

Buildings: Home Economics Hall, \$650,000 Home Management Houses (6), \$75,000 Total, \$725,000

Departments and Staff: Applied Art *Professors*, 1, *associate professors*, 1, *assistant professors*, 3, *instructors*, 5 Child

Development 1, 1, 0, 1 Foods and Nutrition 1, 2, 3, 4 Home Economics Education. 1, 2, 2, 2. Home Management 1, 0, 0, 0 Household Equipment 1, 1, 1, 0 Institution Management 1, 0, 0, 2 Textiles and Clothing 4, 2, 1, 3. Physical Education for Women 1, 0, 1, 2

Enrollment: 1934-35, undergraduate, 956, graduate, 232, total, 1,188

Degree: Bachelor of Science

Research The research funds are drawn largely from the Agricultural Experiment Station Budget, 1934-35, \$8,600

Extension The staff has charge of all extra-mural education in Home Economics in Iowa. Professors, 2, associate professors, 0, assistant professors, 5, instructors, 10

Administration: *Dean*, Genevieve Fisher

DIVISION OF INDUSTRIAL SCIENCE

This division administers the work in the basic sciences and arts. The fields of specialization open to students are Bacteriology, Botany, Chemistry, Economics, Economic History, Genetics, Geology, Mathematics, Physics, Zoology, and Entomology. There is no liberal arts curriculum.

Buildings: Central Hall (Mathematics, Languages, Psychology, History), \$400,000. Chemistry (Chemistry and Geology), \$485,000. Physics, \$337,000. Science Hall (Bacteriology and Zoology), \$160,000. Insectary, \$50,000. Botany, \$150,000. Greenhouses, \$18,000. Armory, \$155,000. Other buildings for military work, \$35,000. Total, \$1,790,000.

Departments and Staff: Bacteriology (including General, Sanitary, Dairy, Soils, and Pathogenic) *Professors*, 5, *associate professors*, 1, *assistant professors*, 0, *instructors*, 3. Botany 5, 3, 2, 2. Chemistry 8, 4, 5, 10. Economics and Sociology 5, 7, 4, 7. English. 4, 6, 3, 5. Geology 0, 1, 1, 0. History and Government 1, 4, 0, 1. Hygiene 1, 0, 4, 0. Library 1, 1, 1, 3. Mathematics 5, 6, 5, 5. Military Science and Tactics 1, 2, 5, 0. Modern Languages 1, 0, 3, 0. Music 1, 1, 0, 3. Physical Education for Men 1, 3, 3, 1. Physics 3, 4, 5, 2. Psychology 2, 3, 0, 0. Public Speaking 2, 0, 3, 1. Religious

Education 1, 0, 0, 0. Zoology and Entomology: 6, 3, 2, 0.

Enrollment: 1934-35, undergraduate, 636, graduate, 313, total, 949

Degree: Bachelor of Science

Research This is financed in part by special grants (1934-35, \$14,000) and by funds of the Agricultural and Engineering Experiment Stations.

Administration: *Dean*, C. E. Friley

DIVISION OF VETERINARY MEDICINE

This includes the resident teaching of the College and the Institute for Veterinary Research.

The Institute for Veterinary Research is located on a farm of 65 acres.

Buildings: Veterinary Medicine and Administration, \$38,000. Veterinary Anatomy, \$49,000. Hospital and Surgery, \$45,000. Physiology and Pharmacology, \$36,000. Pathology, \$44,000. Cattle Clinic Building, \$26,000. Research Institute, \$44,000. 6 small buildings, \$24,000. Total \$306,000.

Departments and Staff: Veterinary Anatomy *Professors*, 1, *associate professors*, 0, *assistant professors*, 2, *instructors*, 1. Veterinary Hygiene 2, 3, 0, 0. Veterinary Medicine 1, 0, 0, 1. Veterinary Obstetrics 1, 0, 0, 1. Veterinary Pathology 1, 1, 0, 1. Veterinary Physiology 1, 1, 0, 0. Veterinary Surgery 1, 0, 0, 1.

Requirements: For Admission 1 year of college work.

Enrollment: 1934-35, undergraduate, 151, graduate, 11, total, 162

Degree: Doctor of Veterinary Medicine (D. V. M.).

Research Budget of the Institute for Veterinary Research, 1934-35, \$30,000. This is supplemented by grants to departments and through the Agricultural Experiment Station. Research professors, 1, research associate professors, 3, research assistant professors, 2, research assistants, 1.

Administration: *Dean*, College of Veterinary Medicine and *Director*, Institute for Veterinary Research, C. H. Stange, *Vice-Director*, Institute for Veterinary Research, C. H. Murray.

IOWA STATE TEACHERS COLLEGE

CEDAR FALLS, IOWA

Teacher training institution, coeducational, supported by state

Established in 1876 by act of general assembly as Iowa State Normal School. In 1909, name changed to Iowa State Teachers College

Controlled by Iowa State Board of Education. Former board of trustees replaced in 1909 by the Iowa State Board of Education made up of 9 members appointed by the governor for 6-year terms. Board exercises control over State University of Iowa, Iowa State College of Agriculture and Mechanic Arts, and Iowa State Teachers College

Finances: Total expenditures for the fiscal year ending June 30, 1935, \$755,700.12. Budget for 1935-36, \$795,000

Grounds and Buildings: 127 acres valued at \$45,200, present worth of buildings, \$2,337,500. Housing facilities: Dormitory for men, accommodating 111, dormitory for women, accommodating 500. The Commons houses food service department and recreational facilities of college

Library 104,239 volumes, 539 current periodicals

Laboratories: Science Hall (1906) houses Physics, Chemistry, and Agriculture. Vocational Building (1914) houses Biology, Home Economics, and Industrial Arts

Requirements: For Admission 15 units prescribed include English, 3 units required, 1 additional unit accepted, Foreign Language, 1 to 8 units accepted, Social Science, 1½ units required, 2½ additional units accepted, Mathematics, 2 units required, 2 additional units accepted, Natural and Physical Science, ½ to 4½ units accepted, miscellaneous group, 4 units accepted. Conditional admission may be granted upon completion of 14 units, conditions must be removed during the first year

For Degree 1 year residence, 180 term hours, average grade C, 1 major and 2 minor subjects 40 term hours of work for the major and 2 minors of at least 20 term

hours each, the last 15 term hours must be taken in residence

General. 6 terms of Physical Training

Departments and Staff: Arts *Professors*, 2, *associate professors*, 0, *assistant professors*, 2; *instructors*, 2. Education 4, 6, 2, 0. English 4, 4, 2, 1. Home Economics 1, 0, 1, 1. Languages 1, 2, 2, 0. Mathematics and Commercial Education: 4, 2, 1, 2. Music 1, 0, 5, 7. Physical Education for Men 1, 0, 1, 3. Physical Education for Women 1, 1, 2, 4. Science 7, 2, 2, 0. Social Science 3, 3, 3, 0. Teaching 1, 3, 17, 23. Extension 2, 2, 1, 1.

Enrollment: For year ending June 30, 1935, 3,115. Men, 808, women, 2,307

Degrees: Conferred year ending June 30, 1935, 246. Total number of degrees conferred to 1935, 3,710

Fees: Matriculation fee, \$5, tuition for freshmen and sophomores, \$26 per term, or \$78 per year, tuition for juniors and seniors, \$32 per term, or \$96 per year, graduation fee, \$10, lodging and board, \$6 per week. Annual expenses: High, \$500, low, \$300

Scholarships: Tuition exemption amounting to \$60 per year is given to a boy and girl from each county in the state (99 in all, making a total of 198 per year), nominations are made by the city superintendents, selections for each county are made on the basis of financial need, scholarship ability, good citizenship in high school, and participation in extracurricular activities. Applications close on June 15

During the year ending June 30, 1935, 30% of women students and 50% of men students earned all or a part of their expenses

Dates of beginning and ending sessions: Fall term, September 10 to November 28, 1934, winter term, December 3, 1934 to March 8, 1935, spring term, March 11 to June 3, 1935.

Summer session June 5 to August 23, 1935. Enrollment, 1,575

Enrollment in extension classes during 1934-35, 9, enrollment in correspondence courses during 1934-35, 194

Catalog issued in January

Achievements of 1934-35 (1) The

establishment of the office of the Dean of the Faculty to coordinate the instructional work of the several departments, to serve as a clearing house for problems of instruction, and to assist students in making proper curricular adjustments (2) The establishment of a Bureau of Research to conduct investigations relating to the instructional problems of the College, and to aid members of the staff in formulating and carrying out significant research (3) The establishment of a Bureau of Alumni Affairs and Public School Relationships to keep alumni informed of the activities of the College and to better interpret the objectives and the work of the College to the people of the state (4) Increased attention to the development of valid and reliable instruments for the measurement of academic achievement (5) Comprehensive revision of the curricula in music, reduction in the number of 2-year curricula from 4 to 2, adoption of 2 survey courses in the sciences, establishment of a system of advance registration, first publication of a program of recitations for a full academic year, inauguration of a series of professional faculty meetings, and reduction in the number of departments of instruction (6) Extensive improvements throughout the physical plant, completion of plans for a new dormitory for men costing \$155,000 and housing 111 students, completion of plans for the remodeling of the women's gymnasium and the construction of an addition thereto to house a swimming pool at a cost of \$110,000

Administrative Officers: *President*, O R Latham, *Financial Secretary*, Benjamin Boardman, *Dean of Men*, Leslie I Reed, *Dean of Women*, Sadie B Campbell, *Dean of the Faculty*, M J Nelson, *Registrar* and *Examiner*, C S Cory, *Director, Extension*, I H Hart, *Director, Alumni Affairs* and *Public School Relationships*, A C Fuller, *Director, Placement*, E W Goetch, *Director, Publicity*, George H Holmes, *Director, Religious Activities*, Harold A Bosley, *Director, Research*, J B Paul, *Health Director*, F N Mead, *Librarian*, Anne Stuart Duncan Officer in charge of foreign students, M J Nelson

IOWA, STATE UNIVERSITY OF IOWA CITY, IOWA

The campus is located on the east and west sides of the Iowa River State university, coeducational Provided for by first General Assembly of Iowa in 1847 In 1855, the capital having been removed to Des Moines, the first statehouse and the land upon which it stood were given to the University, which opened in 1855

Organization From 1847 to 1909 the government of the University was by trustees or a board of regents In 1909 control of all state educational institutions was assumed by the Iowa State Board of Education, consisting of 9 members, appointed by the governor and confirmed by the senate Under the law not more than 5 members of the board may belong to the same political party, and not more than 1 alumnus of any of the institutions may be a member Members of the board choose, from outside their own membership, a finance committee consisting of 3 members who are required to visit each of the institutions each month The office of the Iowa State Board of Education is at Des Moines The University comprises Graduate College, Colleges of Liberal Arts, Law, Medicine, Dentistry, Pharmacy, Engineering, Education, and Commerce, Schools of Fine Arts, Letters, Journalism, Nursing, and Religion, Child Welfare Research Station, Summer Session, Extension Division, Division of Physical Education, and Institute of Hydraulic Research

Finances: (As of June 30, 1935) Income derived chiefly from appropriations made by the general assembly State appropriations, \$1,801,770, endowment, \$808,183, income from endowment, \$8,514, student fees, \$656,230 87, other sources, \$266,-222 46

Grounds and Buildings. 408 acres valued at \$1,697,306, grounds, buildings, and equipment or total plant value, \$19,384,231 Residence halls 2 for men, accommodating 850 and 2 for women with accommodations for 384, in addition there are 6 cooperative dormitories for men housing 210 and 3 for women housing 65.

Libraries (1935) 457,200 volumes, of these, 64,700 are in the Law library, 83,360 volumes in State Historical Society library also available 3,027 current periodicals and serials Special collections Americana library pertaining chiefly to American history, Currier collection comprises University publications from 1855 to 1909, Leigh Hunt collection of approximately 2,000 volumes, Mark Ranney Memorial of nearly 4,000 volumes with many editions de luxe, the Pick library of 7,000 items pertaining to psychology and psychiatry, the Talbot library covering chiefly natural history, exploration, and travel, the Extension collection for extension and correspondence students

Grounds and Buildings Value of grounds, \$626,246 65, value of grounds and buildings, \$13,889,766 69 The Philosophical and Engineering faculties housed on campus at Homewood, the School of Medicine and the School of Hygiene and Public Health occupy buildings in the city adjacent to the Johns Hopkins Hospital

Library (1935) 464,760 bound volumes Archaeological Museum in Gilman Hall

Admission Requirements Those who wish to become candidates for the degree of A B and B E must present evidence of a satisfactory knowledge of the following subjects Mathematics Algebra a and b, 1½ units, Plane Geometry, 1 unit, English, 3 units, Foreign Language (4 units required,

not less than 2 units accepted in any one language) Latin Grammar, Composition, and Caesar, books I-IV (2 units), Cicero, 6 orations (1 unit), Vergil, books I-VI (1 unit), Greek, French, German, Spanish, Italian Elementary (2 units), intermediate (1 additional unit), History, 1 unit, electives, to make 15 units in all, from the following subjects only Solid Geometry, $\frac{1}{2}$ unit Plane Trigonometry, $\frac{1}{2}$, Languages, 1 to 5 additional, History, 2 additional, Physical Geography, 1, Biology, 1, Botany, 1, Zoology, 1, Physics, 1, Chemistry, 1, Drawing, 1

Those who wish to become candidates for the degree of BS in Economics must offer the required subjects listed above with the exception that two Foreign Language units are required instead of four The electives may be chosen from the following list as well as from the above list Economics, 1 unit, Commercial Law, 1, Commercial Geography, 1, Bookkeeping, 1, Accounting, 1, General Science, 1, Mechanical Drawing, $1\frac{1}{2}$, Commercial Arithmetic, 1

Candidates for the degree of BS must have the following required subjects English, 3 units, History, 1, Algebra, 1, Plane Geometry, 1, a modern Foreign Language, 2, Science, 1 Electives, to make up 15 units may be chosen from the following Domestic Science, 1 unit, History, 1 or 2 units additional, Latin, 2 to 4, Algebra, 1 or $1\frac{1}{2}$ units additional, Solid Geometry, $\frac{1}{2}$, Trigonometry, $\frac{1}{2}$, modern Foreign Language 2 to 4 units additional, Music, 1 or 2 units Peabody Certificate, Science, 1 or 2, Bookkeeping, 1, Commercial Arithmetic, 1, Commercial Geography, 1, Commercial Law, 1

School of Higher Studies of the Faculty of Philosophy Students are admitted with a bachelor's degree or, in exceptional cases, at the end of a satisfactory 2- or 3-year program Persons in both groups may be accepted as candidates for advanced degrees or may follow courses in which they have a special interest Admission to all courses is determined by the professors in charge

School of Higher Studies in Education A school of advanced courses for persons

interested in educational work as a profession Students who have a bachelor's degree or who have completed with distinction a 2- or 3-year college program, are admitted Candidates for the degrees of Master of Education and Doctor of Education must have had at least 3 years of approved experience as teachers, supervisors, or administrators

School of Hygiene and Public Health Course leading to the degree of Doctor of Public Health Open to students who are graduates of approved medical schools, holding degrees of arts or sciences, or equivalent, and who have completed the course leading to a Certificate in Public Health or its equivalent

Courses leading to the Certificate in Public Health Graduates of approved medical schools, graduates in arts or science who can furnish credentials of adequate courses in Physics, Chemistry, and Biology and in the basic medical sciences Anatomy, Histology, Physiology, and Pathology

Course leading to the degree of Doctor of Science in Hygiene A degree in arts or science, or in medicine, with a reading knowledge of French and German In exceptional cases, students without a college degree may be accepted by special action of the Advisory Board Certificates of the satisfactory completion of adequate courses in Physics, Chemistry, and Biology Certificates of the satisfactory completion of adequate courses in anatomy including Histology, Physiology, and Pathology

Course leading to the degree of Master of Science in Hygiene A degree in arts or science, or in medicine, from an approved school Admission without a degree in exceptional cases allowed Certificates of the completion of adequate courses in Physics, Chemistry, and Biology

Public health officers and other qualified persons who may wish to pursue 1 or more courses, without applying for a degree or certificate, may be admitted as special students

Degree Requirements. *College of Arts and Sciences* For AB Prescribed courses in first and second years include English

Composition and Literature, 1 course in each, Biology, Chemistry, Geology, or Physics, 1, History, 2, Elements of Economics, 1 course each in French and German, beyond the elements, Military Science or Physical Education for 2 years. At the end of the second year a student's program is arranged so that his studies will fall within a group selected by him. There are 3 groups, as follows: Natural Science, Social Science, and Literature and Language. In general, 4 years are needed to complete the curriculum, but a capable student may complete this work in 3 years by anticipating certain courses, by passing examinations in courses pursued during the summer, by undertaking reading courses during the summer, or by carrying a greater number of courses than is called for in the program.

School of Engineering B.E. degree. Completion of a prescribed 4-year curriculum in one of the following branches: Civil, Electrical, Mechanical, Gas, and at least 6 months in the employ of an approved engineering or other industrial organization.

Higher degrees in Engineering. For M.C.E., M.E.E., M.GasE., M.M.E. 2 years of advanced study following B.E. or equivalent. For D.E. 3 years following B.E. or equivalent and completion of original investigation, results of which must be embodied in a dissertation.

School of Business Economics For B.S. in Economics. 125 points largely prescribed in first 2 years and elective courses in third and fourth years from 4 major groups: Finance, Accounting, Marketing, Production.

Courses in the College for Teachers, Evening Courses in Business Economics and Night Courses for Technical Workers leading to the B.S. degree. 120 points. Each student must meet the requirements of his major subject and prescribed courses including English Literature, English Composition, 2 courses in advance of elements in Foreign Languages, 1 course each in History, Science, and Mathematics.

School of Higher Studies of the Faculty of Philosophy For admission to candidacy a student must be able to pass a satisfactory

written examination in not less than 2 Foreign Languages designated as essential by his department. A foreign student must have a satisfactory reading knowledge of English. The distinctive requirement for advanced degrees is evidence of successful completion of an original investigation upon a theme approved by the department. The results must be embodied in a dissertation or an essay. A foreign student is not permitted to choose a subject for which the chief sources of information are not available to the professors in charge. Dissertations and essays of foreign students, if in English, will be judged by the same standards with reference to English style as are applied to other students. If the dissertation is not printed in full, an abstract or an extract must be printed. Minimum residence requirement for students with baccalaureate degree is at least 2 years for the M.A. and at least 3 years for the Ph.D. At least 1 year additional is required of students who are accepted without the baccalaureate degree.

School of Higher Studies in Education For admission to candidacy a student must have a reading knowledge of such Foreign Languages if any, as are deemed necessary in his work by the Department of Education. For both the master's and doctor's degrees, an acceptable investigation, presented in the form of an essay or dissertation, is required. Minimum residence requirements correspond to the requirements for the advanced degrees in the Faculty of Philosophy.

School of Medicine The degree of Doctor of Medicine is conferred upon those, who, after fulfilling all the requirements for admission, have completed satisfactorily a 4-year course of study.

School of Hygiene and Public Health Doctor of Public Health. This course is arranged to occupy 2 academic years. Specific requirements for the degree are as follows. Completion of the course leading to a Certificate in Public Health, a full academic year in residence, devoted to advanced work in 1 subject or a group of related subjects under the direction of the

head of a department specified by the candidate, preparation of a thesis presenting an individual study of some subject in public health or hygiene, credentials of at least 3 months of practical work in a public health organization

Certificate in Public Health A full academic year in residence and satisfactory completion of an approved schedule of studies which must include required courses in Bacteriology, Biostatistics, Epidemiology, Sanitary Engineering, Public Health Administration, and Personal and Social Hygiene. Additional elective courses may be selected from any of the other courses in the School.

Doctor of Science in Hygiene Completion of 3 academic years of graduate work, 1 year, at least, in residence, completion of satisfactory research in the principal subject, and its presentation in the form of a dissertation, final written examinations in the principal and 2 subordinate subjects, final oral examination.

Master of Science in Hygiene Completion of 2 academic years of graduate work in a principal subject and 1 full quarterly course in 1 or 2 more subordinate subjects, presentation of a satisfactory thesis in the principal subject, final written examination in the principal subject.

General 2 years of Physical Education

Departments and Staff. Art *Faculty*, 1 Biology 2 Education and Psychology 5 English. 2 Geography 1 History 2 Kindergarten 1 Mathematics 2 Music 1 Physical Education and Health 3 Speech 1 Training School 32

Enrollment. For year ending June 30, 1935, 165 Men, 19, women, 146 Total number of matriculants since 1918, 8,000

Degrees Conferred year ending June 30, 1935, 56 Degrees conferred since 1931, when degree-granting privilege was gained, 222

Fees: Tuition and student activities, \$26 a year

Scholarships: 16 scholarships of N Y A, student loan fund, fellowship gift-loan fund, scholarship funds

During year ending June 30, 1935, 45% of students earned all or part of expenses

Dates of beginning and ending sessions.
September 3, 1934, June 7, 1935.

Summer session June 10 to July 19, 1935
Enrollment, 829

Extension classes enrollment, 696

Administrative Officers: *President*, George W. Diemer, *Dean Emeritus*, Gertrude E. Greene, *Registrar*, Thelma Reed

KANSAS STATE COLLEGE OF AGRICULTURE AND APPLIED SCIENCE MANHATTAN, KANSAS

Land-grant college, state controlled, scientific and technological, coeducational

Provisions of land-grant act accepted by Kansas, in 1863, located at Manhattan as the Kansas State Agricultural College, in 1863, and received building, library, and land of Bluemont Central College in consideration Instruction began 1863, name changed in 1931

Board of 9 regents appointed for 4-year terms by governor of state, in charge also of other state educational institutions Serve without salary Seven divisions Graduate, Agriculture, Engineering, General Science, Home Economics, Veterinary Medicine, and College Extension Agricultural Experiment Station, Engineering Experiment Station, and Bureau of Research in Home Economics

Finances: Endowment, \$505,508 56, income from endowment, \$27,130 Income from other sources, state appropriations, \$979,239, federal appropriations, \$328,511, fees and sales, \$455,652 Expenditures for fiscal year 1934-35, \$1,754,589 Budget for 1935-36, in excess of \$1,900,000

Grounds and Buildings. Campus at Manhattan, 155 acres Adjacent farms and experimental fields, 1,274 acres Land at branch agricultural stations, 4,304 acres Value of land exclusive of unsold endowment land, \$625,347 Value of buildings, \$2,003,478 Total value of land, buildings, and equipment, \$4,136,180 Valuation, in addition, of 7,521 acres of unsold endowment land, \$56,407.

Library (1927) Cost, \$250,000, 108,374

volumes, including about 30,000 government publications, 30,000 pamphlets, 1,000 current periodicals Outstanding library on poultry

Laboratories Laboratories are housed together with offices and classrooms of the several departments Value of equipment of departments having much laboratory material Agricultural Economics, \$3,299, Agricultural Engineering, \$8,951, Agronomy, \$19,327, Anatomy and Physiology, \$8,648, Animal Husbandry, \$36,421, Applied Mechanics, \$33,902, Architecture, \$20,236, Art, \$8,919, Bacteriology, \$7,837, Botany and Plant Pathology, \$32,593, Chemistry, \$40,108, Child Welfare and Euthenics, \$2,390, Civil Engineering, \$14,978, Clothing and Textiles, \$6,010, Dairy Husbandry, \$29,058, Education, \$4,098, Electrical Engineering, \$30,175, Entomology, \$19,481, Food Economics and Nutrition, \$10,783, Geology, \$4,283, Horticulture, \$5,463, Household Economics, \$2,745, Industrial Journalism and Printing, \$9,453, Institutional Economics, \$9,212, Machine Design, \$3,549, Mechanical Engineering, \$31,265, Milling Industry, \$30,782, Music, \$25,274, Pathology, \$13,474, Physical Education and Athletics, \$19,356, Physics, \$13,901, Poultry Husbandry, \$7,917, Shop Practice, \$33,497, Surgery and Medicine, \$5,983, Zoology, \$23,526

Museums and collections Herbaria of 86,500 flowering plants, 1,500 ferns, and 27,000 fungi, 300 stock cultures of fungi, plant pathology museum, 300 preparations, collections of insects, Warren Knaus collection of Coleoptera Zoology, Geology, and Mineralogy Animal pathology and anatomy collection Institution maintains herds of beef cattle, dairy cattle, horses and swine, and flocks of sheep and poultry

Requirements: For Admission 15 units, English, 3, and Science, 1, prescribed for all curricula, and 2 to 3 units of Mathematics depending upon the curriculum chosen 1 year of general college work also is required for admission to the Veterinary curriculum A condition of 1 unit allowed, must be made up first year

For Degree For B S, B M., and D V.M.,

120 to 135 semester hours, besides requirements in Physical Education and Military Science, total varying with curriculum. As many quality points as semester hours required for graduation. English required in all curricula. Most of the work specified. Graduates in Agriculture are required to have at least 6 months of approved practical farm experience. Senior thesis required in some of the Engineering curricula.

M S conferred upon those who complete satisfactorily 32 semester hours of graduate work, including a thesis, in addition to undergraduate work equivalent to that of this institution.

Ph D conferred on completion of 3 years of work beyond the bachelor's degree, equivalent to 90 semester hours, including a dissertation in one of the major fields, Bacteriology, Chemistry, Entomology, or Milling Industry.

General Military Training required of freshman and sophomore men, Infantry and Coast Artillery units of the Reserve Officers' Training Corps maintained 2 years of Physical Education required of both men and women.

Departments and Staff. Division of Agriculture. Agricultural Economics *Professors*, 2, *associate professors*, 1, *assistant professors*, 4, *instructors*, 0. Agronomy 5, 3, 4, 0. Animal Husbandry 4, 3, 1, 0. Dairy Husbandry 3, 1, 1, 0. Horticulture 2, 3, 2, 1. Milling Industry 1, 2, 1, 1. Poultry Husbandry 2, 1, 0, 0. Division of Engineering. Rural Engineering 1, 0, 1, 0.

Enrollment: Year ending June 30, 1935, 2,989, including Summer School, 3,436. Men, 2,300, women, 1,136. Agriculture, 467, Engineering, 814, General Science, 1,073, Home Economics, 483, Veterinary Medicine, 233, Summer School, 722.

Degrees: 1934-35, 502. 457 bachelors' degrees, 45 masters' degrees. Degrees conferred since foundation, 11,243.

Fees. For residents of Kansas, general fees. Matriculation, \$7.50, incidental, \$18.75, health, \$3, student activity, \$7.50 a semester, graduation, \$7.50. Laboratory charges to cover cost, \$5 to \$20 a semester. Nonresidents pay a matriculation fee of \$15 and an incidental fee of \$37 a semester, other charges being the same as for residents. For 9-week summer session no matriculation fee charged, incidental fee, \$15 for residents, and \$25 for nonresidents, health fee, \$1.50. For 4-week summer session, incidental fee, \$7.50. In Van Zile Hall (for women) charge for room and board is \$7.25 a week. Total annual expense, excepting clothing. Low, \$300, high, \$550.

Scholarships: Graduate assistantships in about 10 departments awarded each spring to graduate students who give half time to teaching or research and receive about \$500 for academic year. 2 scholarships in debate, \$100 each. The Union Pacific Railroad

offers in each of the 36 Kansas counties touched by it, one \$100 scholarship to the winner in 4-H Club work, and another to the student standing highest in vocational agriculture Senator Arthur Capper offers each year a \$150 scholarship to the boy, and also to the girl, standing the highest in the 4-H Club leadership project

Research funds available from federal appropriations under the provisions of Hatch Act, \$15,000, Adams Act, \$15,000, Purnell Act, \$60,000 State funds used for research are in excess of \$200,000

Dates of beginning and ending regular sessions Second Monday of September, second semester opens 20 weeks from the next Tuesday Commencement, last week in May.

Summer session Begins next day after Commencement, continues for 9 weeks A program of 4-week courses is given the last month of the 9-week session 39 departments offered 473 courses in 1935 to 989 students

College Extension Division For the year ending June 30, 1935, enrollment in classes, 78, in correspondence courses, 673

Publications Catalog in May Kansas State College Bulletins, semimonthly The president prepares a biennial report for board of regents, part of which is published. Annual report of director of Agricultural Experiment Station published Extension series of agricultural bulletins and other publications Bulletins issued by Agricultural Experiment Station, Engineering Experiment Station, and Bureau of Home Economics Research Official organ of the college, The Kansas Industrialist, has been issued weekly during the academic year since April 24, 1875, except for a short time when it was issued monthly Several publications chiefly under student management are issued, including Royal Purple, the college annual

Administrative Officers: *President*, Francis D Farrell, *Vice-President*, Julius T Willard, *Dean*, Division of Graduate Study, James E Ackert; *Dean*, Division of Agriculture, Leland E Call, *Dean*, Division of Engineering, Roy A Seaton, *Dean*, Division

of General Science, Rodney W. Babcock, *Dean*, Division of Home Economics, Margaret M. Justin, *Dean*, Division of Veterinary Medicine, Ralph R Dykstra, *Dean*, Division of College Extension, Harry J C Umberger, *Dean of Women*, Mary P Van Zile, *Dean*, Summer School, Edwin L Holton, *Registrar*, Jessie McI) Machir The vice-president is in charge of foreign students

KANSAS STATE COLLEGE, HAYS

See Fort Hays Kansas State College

KANSAS STATE TEACHERS COLLEGE

EMPORIA, KANSAS

Teachers college

Founded in 1863 by act of state legislature and opened for students in 1865, with 18 students and 1 faculty member who was president and faculty

Under control of board of regents, 9 members appointed by the governor for terms of 4 years and in classes so that not more than one-fourth of the board is new at any one time except in cases of death or resignation

Finances: Expenditures for year ending June 30, 1935, \$383,939 91. Budget for current year, \$360,275.15.

Grounds and Buildings: Campus of 45 acres Total value of grounds, \$25,000 Total present worth of buildings, \$1,475,000 2 dormitories for women, 1 for men, total capacity, 150

Library (1902) 75,000 volumes, 150 periodicals

Science building erected in 1906

Requirements: For Admission 15 units Graduates of accredited high schools admitted to freshman class by law.

For Degree Residence requirement for degree, 1 year, 120 semester hours 75% of grades must be C or better

General Physical Education required
Rooming houses under direction of Dean of Men and Dean of Women

Departments and Staff: Art Professors, 1, associate professors, 0, assistant professors, 0, instructors, 2 Biology 1, 1, 0, 0 Chemistry 1, 0, 0, 0 Commerce 2, 0, 0, 1 Education 3, 6, 24, 1 English 1, 4, 4, 0 Geography 1, 0, 0, 0 Health 1, 0, 0, 0 History 1, 2, 1, 0 Home Economics 1, 0, 0, 1 Industrial Arts 1, 0, 1, 0 Latin 1, 0, 0, 0 Library 1, 0, 2, 6 Mathematics 2, 0, 0, 0 Modern Languages 1, 1, 0, 0 Music 1, 2, 6, 2 Physical Education for Men 1, 1, 0, 1 Physical Education for Women 1, 0, 0, 3 Physics 1, 0, 0, 0 Psychology 3, 1, 0, 0 Sociology 1, 1, 0, 0 Speech 1, 1, 2, 2

Enrollment: For year ending June 30, 1935, 2,580 Men, 874, women, 1,706 Total matriculants since foundation, 148,730 estimated

Degrees: Conferred year ending June 30, 1935, 204 Total degrees conferred since foundation, 3,055

Fees: Incidental, \$14 per semester, Hospital, \$1 per year Living expenses extremely low

During 1934-35, 35% of students earned part of expenses

Dates of beginning and ending sessions September 9, 1935, January 17, 1936 January 20, May 22, 1936

Summer session June 1 to July 31, 1935 1,550 students

Correspondence students, 375

Bulletin of information, published annually

Administrative Officers: *President*, Thomas W Butcher, *Dean of Women*, Maude Minrow, *Dean of Men*, Brian Tomlinson, *Registrar*, W D Ross

KANSAS STATE TEACHERS COLLEGE

PITTSBURG, KANSAS

Teacher training institution, coeducational, supported by state

Established in 1903 B S degree-granting privilege given in 1913, M S given in 1929

Controlled by state board of regents, composed of 9 members appointed by the governor for a term of 4 years

Finances: Total annual expenditures, year ending June 30, 1935, \$345,415 45 Budget, 1935-36, \$407,580 19

Grounds and Buildings: 55 acres valued at \$150,000, present worth of buildings, \$2,000,000 Dormitories Hall for women, accommodating 112

Library Porter Library (1926) 47,686 volumes, 261 current periodicals, 26 collections of books and periodicals

Laboratories Science Hall (1918) houses Departments of Biology, Chemistry, and Home Economics, Mechanic Arts Building (1927) houses Physics and Auto Mechanics, Industrial Arts Building (1912) houses all phases of Industrial and Vocational Education, and Fine Arts, Music Hall (1929)

Museums Special collections important for research Ornithology, Mammalogy, Geology, Paleontology, Mineralogy, Invertebrate Zoology, Entomology, Archaeology

Observatory 10-inch telescope

Requirements: For Admission Kansas law requires that graduates of accredited Kansas high schools be admitted For others, 15 acceptable units from an accredited high school including English, 3, Algebra, 1, Geometry, 1, Science, 1, History, 1 Condition of 1 unit allowed, to be removed within a year

For Degree 120 semester hours exclusive of Physical Education Minimum of 120 grade points and 75% of the 120 hours required for the degree must be in grades above the lowest or D grade level Concentration requirements Major minimum is 24 hours in 3 departments (Education, Speech, and Psychology and Philosophy) and 30 hours in the other departments, maximum in major is around 45 hours Minor minimum is 20 hours with maximum around 25 hours Prescribed courses vary with curricula

General All houses approved by board from faculty Physical Education required

of all freshmen and sophomores unless excused for specific reasons

Departments and Staff: Art *Professors*, 1, *associate professors*, 1, *assistant professors*, 0, *instructors*, 0, *assistants*, 0 Biology 3, 1, 2, 0, 0 Commerce and Business Administration 1, 2, 2, 0, 0 Education 7, 1, 10, 1, 0 English Language and Literature 3, 3, 1, 0, 0 Foreign Languages, 1, 1, 1, 0, 0 Geography 1, 0, 1, 0, 0 History and Social Science 5, 1, 2, 0, 0 Home Economics 2, 3, 1, 0, 2 Industrial and Vocational Education 2, 4, 2, 3, 1 Mathematics 5, 1, 0, 0, 0 Music 1, 0, 3, 5, 0 Physical Education 1, 1, 3, 3, 0 Physical Science 4, 2, 1, 0, 0 Psychology and Philosophy 3, 0, 0, 0, 0 Speech 1, 0, 1, 0, 0

Enrollment: For year ending June 30, 1935, 3,747 Men, 2,118, women, 1,629 Total number of matriculants since 1903, 92,102

Degrees: Conferred year ending June 30, 1935, bachelor, 249, master, 55 Bachelors' degrees conferred since 1913, 3,603, masters' degrees conferred since 1929, 252

Fees: General fees per academic year, \$36, graduation fee, bachelor, \$7 50, master, \$10 Board, \$3 25 to \$4 25 per week, rooms, \$4 to \$7 50 per month Annual expenses High, \$400, low, \$225

Scholarships: 18 fellowships (11 at \$25 per month, and 7 at \$30 per month), 6 to 10 scholarships, \$27 per semester, scholarships granted through high school contest each year

During year ending June 30, 1935, 50% of students earned all or part of expenses

Dates of beginning and ending sessions September 10, 1935, May 28, 1936

Summer session June 1 to July 31, 1936 College enrollment, 1935, 1,340

Extension classes enrollment, 55, correspondence courses enrollment, 318

General catalog in February, Extension and Correspondence Bulletin, annually, Graduate Division Bulletin, annually

Achievements of year ending June 30, 1935 Carried on adult education throughout the year, enrollment more than 1,000, evening classes for C C C camps within

driving distance of college, emergency excused work in connection with U S relief program

Administrative Officers *President*, W A Brandenburg, *Dean of the College*, G W Trout, *Chairman*, Graduate Council, O P Dellinger, *Financial Secretary and Secretary to the President*, Belle Provorse, *Dean of Women*, Hattie Moore Mitchell, *Dean of Men*, George D Small, *Registrar*, L A Guthridge

KANSAS, UNIVERSITY OF LAWRENCE, KANSAS

Main campus extends over Mt Oread to the southwest of the town Clinical division of School of Medicine at Bell Memorial Hospital on separate campus at Kansas City, Kansas

State university for men and women

Provided for in first constitution of Kansas Territory, 1855, and in state constitution, 1861 On admission in 1861, Congress reserved for use and support of a state university 72 sections of land University located by special commission in 1863, organized by legislature in 1864, first board of regents met in 1865, and first faculty elected in 1866

Board of 9 regents appointed by governor for 4-year overlapping terms, without salary. Graduate School, College of Liberal Arts and Sciences, School of Business, School of Education, School of Engineering and Architecture, School of Fine Arts, School of Law, School of Medicine, School of Pharmacy, Division of Libraries, Division of Museums, Division of Physical Education and Intercollegiate Athletics, Division of Reserve Officers Training Corps, Division of State Service Work, Division of Summer Session, Division of University Extension, Division of Publications

Finances: Endowment, \$250,000, income from endowment, \$10,000 Income from other sources State appropriations, \$996,000, student fees, \$310,000, other sources, \$420,000 Total annual expenditures year ending June 30, 1935, \$1,677,424. Budget, 1935-36, \$1,715,000

Grounds and Buildings: 163 acres at Lawrence and 15 acres at Kansas City, valued at \$278,600 Present value of buildings, at Lawrence, \$3,127,939, at Kansas City, \$878,367 Residence halls 2, accommodating 157 women

Library (1935) 268,000 volumes, 1,669 current periodicals Special collections Shakespeare, Nineteenth Century European History, French Revolution, journals in Chemistry, Bacteriology, Physiology, and Zoology, Vollbehr collection of 200 Western Hemisphere maps

Laboratories Physics (1895) Original cost of buildings, \$58,000, value of equipment, \$41,736 Chemistry and Pharmacy (1901) \$65,000, \$73,983 Biology (1929) \$220,000, \$123,606 Machine Shops (1899) \$21,000, \$29,517 Geology and Mining (1908) \$57,500, \$80,345 Electrical and Mechanical Engineering (1908 and 1921) \$108,800, \$98,669 Anatomy (1921) \$16,000, \$36,062 Clinical laboratories of School of Medicine located at Kansas City division, in Bell Memorial Hospital and attached buildings

Museums Dyche Museum (1902) Natural history collection—mammalian, ornithological (16,000 bird specimens and 6,000 articulated bird skeletons), ethnological (18,000 specimens), fish and reptile (20,000 specimens), and paleontological collections Snow Entomological Museum Collections of Coleoptera (10,000 species), Diptera and Hemiptera, total of over 500,000 specimens Haworth Museum Geological collections Wilcox Museum Classical collection Thayer Art Museum (1894) Extensive collection of textiles, ceramics, glassware, costumes, and prints Brynwood Paintings Collection of oil paintings, water colors, and pastels

Observatory (1919) 27-inch reflecting telescope, 6-inch refracting telescope (Alvin Clarke lens)

Requirements: For Admission Graduates of accredited high schools admitted under state law Among the 15 units the University requires, 3 must be of English, 2 of Social Science, and 1 of Mathematics or Laboratory Science In Engineering and

Architecture, 2½ units of Mathematics and 1 of Laboratory Science, including laboratory work, are required No students admitted with entrance conditions

For Degree (1) For A B Last 30 hours in residence at University of Kansas, 124 hours and 124 grade points, major of 20 to 40 hours with minimum of 1 grade point per credit hour, 40 hours of junior-senior work, with 60 grade points after enrollment as junior (2) For B S in Business Last 30 hours in residence, 124 hours and 124 grade points, 50 to 70 hours of professional credit with average of at least C (3) For B S in Education Last 30 hours in residence, 124 hours, with average of 1 3 grade points per hour for total and 1 5 grade points per hour for major, major of 30 to 40 hours, at least 40 hours of junior-senior work University Teacher's Diploma also offered, in cooperation with other divisions (4) For B S in Engineering and Architecture Last 30 hours in residence, 137 to 139 hours, depending on curriculum, with three-fourths of work at least C grade, curriculum fixed in various fields (5) For B M, B M E, or B F A Last 30 hours in residence; 120 hours and 120 grade points, major of 22 to 40 hours (6) For LL B Last year in residence, 90 hours of College work, with grade point average of 1 1, 82 hours in School of Law, three-fourths of which must be at least of C quality (7) For M D 60 hours of college work, of at least C quality, 4 years in School of Medicine, with at least C average (8) For B S in Pharmacy Last 30 hours in residence, 130 hours and 130 grade points (9) For B S in Nursing 94 hours of college work of at least C quality, of which 30 hours must be in residence at University of Kansas, with major of 15 to 25 hours and with at least 20 hours of junior-senior work, fourth and fifth years in Department of Nursing of School of Medicine, average of at least C for entire course By special arrangement A B granted by College in combined 6-year College-Law course and 7-year College-Medicine course, and B S in Medicine for 6-year College-Medicine course (10) Master's and doctor's degrees granted by Graduate School upon completion with

high quality of 1 year and 3 years of residence work respectively, and the passing of satisfactory oral and written examinations, and the submission of a satisfactory thesis

General Physical examination and psychological test required of undergraduate matriculants Military Science and Physical Education optional

Finances: Income, year ending June 30, 1935, from state for operation, \$347,400, for permanent improvements and all other sources including fees, degrees, rents, board, etc., \$168,299 25 Expenditures for operation, \$456,571 83, for permanent improvements, equipment, repairs, supplies, etc., \$40,883 38

Grounds and Buildings: Campus of 60 acres with farm of 625 acres for agriculture demonstration. Value of grounds including landscaping, \$379,591 61, present worth of buildings, \$1,791,804, total value of grounds, buildings, and equipment, \$2,470,293 80

Library 50,000 volumes, exclusive of public documents, 234 current periodicals, special collection of Kentucky history and literature

Laboratory Equipment Biology, \$15,-687 16, Chemistry, \$9,925 68, Geography, \$3,661 66, Home Economics, \$4,746 07, Physics, \$6,894 48, Psychology, \$1,287 72

Museum The Kentucky Building, erected by private subscription, and now nearing completion, will be used to house Kentucky museum materials, collections of books, and products peculiar to the state

Requirements: For Admission 16 units, including English, 3 units, Algebra, 1, Plane Geometry, 1. Only 4 vocational units accepted

For Degree For baccalaureate degree, 128 semester hours and an average grade of C. Major subject, minimum 24 semester hours, English, 12 hours, Foreign Language, 12, Science, 12, Education, 18. M A degree, 28 semester hours above the bachelor's degree, with an average grade of B. Thesis required. Minimum residence requirements for any degree, 36 weeks

General Students must live in dormitories or approved homes

Departments and Staff: Agriculture and Biology *Faculty*, 8. Chemistry 3. Economics-Sociology 3. Education 8. English 12. Geography 3. History and Political Science 7. Mathematics 5. Military Science 2. Modern Language 5. Penmanship 1. Physical Education and Athletics 7. Physics 2. Psychology 2. Training School 28

Enrollment: 1935, 2,584 on basis of 36 weeks

Total number students enrolled since establishment of the college, counting no student twice in a single year, and not including those enrolled in the Training School, 56,015

Degrees: Conferred in the year 1934-35

including summer session, 312. Total number degrees conferred since 1924, 2,030

Fees. Registration, \$15 per semester, graduation, \$6, science laboratory fee, \$5

Student loan fund maintained by College Heights Foundation

Employment office in charge of secretary to the president. Approximately 20% of students earn part or all of expenses

Appointments office in charge of the director of personnel, assists graduates in finding positions

Dates of beginning and ending of the regular sessions. September 16, 1935, May 29, 1936. Summer session, June 8 to August 14, 1936, is an integral part of the school year with all departments offering instruction

Administrative Officers: *President*, H H Cherry, *Dean*, F C Grise, *Registrar*, E H Canon

KENTUCKY, UNIVERSITY OF LEXINGTON, KENTUCKY

Main campus is in southeastern section of Lexington

State university for men and women

Chartered in 1865 as a department of Agriculture and Mechanic Arts in the institution called Kentucky University. This arrangement continued until 1878, when the legislature created a separate institution under state control at Lexington. City of Lexington gave 50 acres of land and \$50,000, the County of Fayette gave \$25,000, and with these amounts the first buildings were erected. In 1908, name changed from State Agriculture and Mechanic Arts College to State University of Kentucky. In 1916 the name was changed to University of Kentucky.

Board of 15 trustees appointed by governor for periods of 6 years. Governor, superintendent of public instruction, and commissioner of agriculture ex-officio members, 6 members from state at large, 3 from state board of agriculture, 3 from alumni

Graduate School, College of Arts and Sciences, College of Agriculture, College of

Engineering, College of Law, College of Education, College of Commerce

Finances: Endowment, \$185,000, income from state appropriations, \$723,600, from student fees, \$290,410 29, federal appropriation, \$42,750, federal and state vocational education, \$22,870 44, income, Agricultural Experiment Station and Agricultural Extension Division, \$732,102 44, rentals and miscellaneous receipts, \$36,-461 94 Total annual expenditures year ending June 30, 1935 General fund, \$1,147,-335 16, Experiment Station and Agricultural Extension Division, \$743,995 51 Budget, 1935-36 General Fund, \$1,179,442 43, Experiment Station and Agricultural Extension Division, \$980,220 78

Grounds and Buildings. 94 acres in main campus, valued at \$100,000 Other real estate including grounds of residence halls, \$195,697 32 Farm of 593 acres, valued at \$505,588 47 Buildings (39) valued at \$3,573,-248 39 Experiment Station buildings valued at \$372,554 35 Residence halls 3 for men and 2 for women, accommodating 485 students

Library (1931) 170,000 volumes

Laboratories Biology and Geology, \$60,-000, equipment, \$27,861 35 Chemistry, \$264,482 02, \$36,118 21 Physics, \$100,000, \$40,617 22 Engineering buildings \$123,-048 75, \$163,743 12 Agricultural buildings \$325,956 01, \$29,126 71

Museums Geological Museum Anthropological Museum (old library building, remodeled in 1931)

Observatory (1931) 8-inch refractor

Requirements For Admission To any undergraduate college except Law, 15 units, so chosen as to include the 5 basic units prescribed by all the colleges Only students who hold certificates of graduation from an accredited high school will be admitted without examination For admission to College of Law, 60 semester college credits exclusive of Gymnasium and Military Science These 60 must include 6 credits in English

For Degree For B A and B S, last 30 hours in residence, 127 hours with a minimum of C average, major, 40 hours in field

of interest, 40 hours of junior-senior work For LL B, 60 hours of college work, 80 hours in College of Law, average must be of at least C quality, 3 years in residence, the last of which must be spent at University of Kentucky B A and B S granted by arrangement between University of Kentucky and medical school of other institutions For M D, 97 hours of college work, 4 years in medical school. Master's and doctor's degrees granted by Graduate School upon completion with high quality of 1 year and 3 years of residence respectively, and the passing of satisfactory oral and written examinations, and the submission of a satisfactory thesis

General 1 year of Physical Education, 2 years of Military Science, 1 semester of Hygiene

KENYON COLLEGE

GAMBIER, OHIO

College and theological school for men, privately controlled, historically affiliated with the Protestant Episcopal Church

Funds for this institution were secured in England in 1823-24 by the Rt. Rev. Philander Chase, first bishop of the Episcopal Church in the Northwest Territory, 2 of the principal donors being Lord Kenyon and Lord Gambier Incorporated in 1824

Controlled by a self-perpetuating board of 27 trustees, 3 ex-officio members, 18 elected by the board and 6 by the alumni

Finances: Endowment in June 1935, \$2,018,422 65, income from endowment, \$72,810 38, income from fees, \$101,838 70 Gifts for current expenses during the year, \$5,690 Total expenditures, June 1934 to June 1935, \$173,505 51

Grounds and Buildings. 350 acres valued at \$40,000 Total insurable value of buildings, \$1,351,000, total value of grounds, buildings, and equipment, \$1,630,850 3 dormitories accommodate 275

Library Stephens Stackroom (1902),

Alumni Library (1910), 36,000 volumes, 50,000 pamphlets, 215 current periodicals

Laboratory Samuel Mather Science Hall (1926), cost \$350,000, new equipment, over \$30,000, houses Physics, Chemistry, Biology, Geology, and Aeronautics laboratories

Observatory In tower of Ascension Hall, 5½-inch telescope

Requirements: For Admission 15 units, including 2 in Mathematics and 2 in Foreign Language

For Degree For A B 122 semester hours
Average of C Attainment examinations in English, Foreign Language (based on 3 years of 1 or 2 years each of 2), and Physical Training Distribution 6 semester hours in 6 of 8 curriculum divisions, concentration in a major satisfactory to head of department and covered by comprehensive examination For A B with honors Same except heavier major, mostly in seminary courses, covered by comprehensive examination administered by outside examiners For B D Prescribed seminary course of 3 years For all degrees, 1 year in residence

General Church and chapel attendance one-half of daily and Sunday services

Departments and Staff: Biology *Professors*, 1, *assistant professors*, 0, *instructors*, 0 Chemistry 1, 0, 0 Economics 1, 1, 0. Enrollment: For year ending June 15, 1935, College, 240, Seminary, 17

Degrees: Conferred year ending June 30, 1935, College, 31, A B, 10, Ph B, 13, B S, 8 Divinity School Graduation, 1, B D, 7, S T M, 1

Fees: Tuition, \$300 a year, graduation, \$5, board, \$250, room, \$100 to \$150, incidental, \$20, student assembly, \$25, health,

\$10, registration, \$5, laboratory, \$5 and \$10 a course Annual expenses High, \$850, low, \$750.

Scholarships: 61, \$100 to \$400

Dates of beginning and ending of sessions September 20, 1934, June 17, 1935

Catalog in January, President's Report in May

Administrative Officers: *President*, Rev William F Peirce, *Dean*, Clarence P Gould, *Dean*, Bexley Hall (theological seminary), Rev Charles E Byrer

KEUKA COLLEGE KEUKA PARK, NEW YORK

College of arts and sciences for women, privately controlled, affiliated with the Northern Baptist Board of Education

The original Keuka College was chartered in 1892 and with Keuka Institute, a preparatory school, operated until 1915. Both institutions then closed In 1921 the new Keuka College was opened as a college In 1924 an absolute charter was obtained from the Regents of the University of the State of New York. The capacity of the original plant was reached in 1924, at which time 2 new buildings were erected, Richardson Hall, a dormitory, and John Rogers Hege-man Hall, a classroom and administration building The capacity was again reached in 1926, with 220 in the dormitories The number of day students varies from 10 to 20 The advertised limit is 240

Self-perpetuating board of 36 trustees, on 3-year basis

Finances: In 1920 the net assets of the college totaled \$189,000 At present they exceed \$1,000,000 The invested funds amount to \$388,398 88 Endowment, \$322,-741 77, income from endowment, \$9,085 18, income from other sources, \$144,171 35 Total annual expenditures, 1934-35, \$166,-578 97 Budget, 1935-36, \$172,000

Grounds and Buildings: 120 acres valued at \$31,937, present worth of buildings, \$881,896 45 Two dormitories

Library: Occupies a wing of Ball Memorial Hall (1892), 14,911 volumes, 10,000 government documents, 160 current periodicals

Laboratories Hegeman Hall (1925) houses laboratories of Biology, Chemistry, Physics, and Home Economics

Museum In Hegeman Hall, important Indian relics, rare minerals, and Yates County (New York) collection of birds, some of which are now extinct

Requirements: For Admission (1) Graduation from accredited preparatory or high school with recommendation of school principal (2) 15 units, including 3 of English, 2 of Mathematics, 1 of History, and 5 of Foreign Language for B A, 3 for B S From 4 to 6 units are elective, of which from 2 to 4 must fall within specified limits (3) No conditions allowed Scholastic standing in highest third of graduating class, with a few exceptions

For Degree 130 credit hours, with as many quality points as credit hours From 24 to 60 credit hours in field of concentration with 56 hours distributed among Humanities, Science and Mathematics, and Social Sciences

General Unless living with their parents, all students must reside in college dormitories or in approved private homes Physical examination and health certificate filled out by home physician required before admission, after matriculation, check-up by college physician, resident nurse, and physical education director 7 credit hours required in Physical Education, 3 in Health Science

Departments and Staff: Biology *Professors*, 1, *associate professors*, 1, *assistant professors*, 0, *instructors*, 1 Business and Economics 1, 1, 0, 0 Chemistry 1, 0, 0, 0 Christian Leadership 1, 0, 1, 0 Dramatics 1, 0, 0, 0 English 1, 1, 0, 0 French 1, 0, 0, 0 German 1, 0, 0, 0 Greek 1, 0, 0, 0 History 1, 1, 0, 0 Home Economics 1, 0, 0, 0 Latin 1, 0, 0, 0 Mathematics 1, 0, 0, 0 Music 1, 0, 0, 3 Pedagogy 1, 0, 0, 0 Physical Education 1, 0, 0, 0 Physics 1, 0, 0, 0 Political

Science 1, 0, 0, 0 Psychology and Philosophy 1, 0, 0, 0 Public Speaking 1, 0, 0, 0 Sociology 1, 0, 0, 0 Spanish 1, 0, 0, 0

Enrollment: 1934-35, 205 women Total number of matriculants since foundation, 960

Degrees Conferred year ending June 3, 1935, 33 B A, 11, B S, 22 Total number of degrees conferred since foundation, 545, before closing of old institution in 1915, 47, since opening of new institution in 1921 (first graduating class in 1925), 498

Fees: Tuition for year, \$260 Board and room for year, \$340 No matriculation, graduation, or laboratory fees Low estimate for annual college expense, \$700, high estimate, \$900, including living expenses

Scholarships: 81, varying in amounts from \$100 to \$25 and totaling \$4,400 Applications for scholarship aid close on August 15

Employment bureau In 1934-35, 50% of students earned part of expenses Appointments office placed 60% of graduating class in remunerative positions

Dates of beginning and ending sessions Monday nearest September 15, first Tuesday in June

Administrative Officers: *President*, J Hillis Miller, *Dean*, Marie C Lyle, *Registrar*, Helen M Space, *Treasurer*, L R Loomis *Officer in charge of foreign students*, Marie C Lyle, dean

KNOX COLLEGE GALESBURG, ILLINOIS

Coeducational college, privately endowed In the beginning affiliated with both Presbyterian and Congregational denominations For many years it has had no denominational affiliations

Chartered in 1837, by legislature of State of Illinois Foundation laid by a colony formed at Whitesboro, New York, in 1836 In original agreement name was Prairie College Changed in charter to Knox

Manual Labor College, and in 1857 to Knox College Galesburg is in Knox County, a part of the tract set aside for sailors and soldiers of the Revolutionary War and the War of 1812, named for General Henry Knox

Self-perpetuating board of 25 trustees of whom the president of the College is an ex-officio member and chairman

Finances: June 30, 1935, endowment, \$1,-884,775 30 Annual budget expenditures, \$225,831 91, of which \$157,061 21 is from tuition and the balance from endowment income and other sources

Grounds and Buildings: Present value of 10 buildings with equipment, \$699,809 02, of grounds (25 acres), \$224,484 49

Library (1928) 45,000 volumes Finley collection of books and documents relating to early French and English period in Mississippi Valley Cassidy collection of books and magazines dealing with international affairs Post collection of books on the Southwestern United States Preston Player collection of books, prints, maps, on Mississippi River

Davis Science Hall (1911), valued at \$111,447, equipment, \$30,000, Physics, Chemistry, and Biology

Observatory 5-inch telescope

Requirements: For Admission 15 units, including English, one Foreign Language, Mathematics, a laboratory science and History. One condition allowed, must be removed within 1 year

For Degree For A B, 125 semester hours including a major of 42 hours with not more than 30 hours in 1 department The work of the freshman and sophomore years is based on the group system

General Chapel attendance required Military Training required of freshmen and sophomores

Departments and Staff. Art *Professors*, 1, *assistant professors*, 0, *instructors*, 0 Biblical Literature 1, 0, 0 Biology 2, 0, 2 Chemistry 1, 1, 0 Comparative Literature 2, 0, 0 Economics 4, 0, 0 Education 0, 1, 0 English 5, 0, 3 Greek 2, 0, 0 History and Government 2, 0, 1

Enrollment: 543 Men, 306, women, 237 Total number of matriculants since foundation, 15,653

Degrees: Conferred year ending June 30, 1935, 86 Total degrees since foundation, 4,040

Fees: Tuition a semester, \$130, matriculation fee, \$10, laboratory, \$1 to \$6 a semester, diploma, \$5 Board and room in Whiting Hall (for women), \$290 to \$355, in Seymour Hall (for men), \$120 to \$225

Scholarships: \$25,000 awarded annually Loans to students from a capital fund of \$25,453

Employment bureau Approximately 67% of men in college earn at least a part of their expenses during the college year

Dates of beginning and ending sessions First term, third Monday in September, continues for 18 weeks Second term, Monday following close of first term, continues for 18 weeks Commencement, second Wednesday in June

Annual catalog in March President's Report annually in October The Green Book (schedules and general information for students) on September 1st

Administrative Officers: *President*, Albert Britt, *Dean of Freshmen*, Charles J Adamec, *Registrar*, James Andrew Campbell

LAFAYETTE COLLEGE

EASTON, PENNSYLVANIA

College of arts and science, engineering, for men, privately controlled, affiliated with Presbyterian Church

Chartered in 1826 by Commonwealth of Pennsylvania as result of action on December 27, 1824, when citizens of Easton decided to found a college and "as a testimonial of respect for the talents, virtues, and signal service of General Lafayette in

the great cause of Freedom, to name the institution Lafayette College." Board of trustees organized in 1826, instruction was begun in 1832. Entered into formal relations with Presbyterian Church in 1849.

Self-perpetuating board of 33 trustees

Finances: Endowment, \$3,835,000, income from endowment, \$140,760, income from other sources, \$457,778. Total annual expenditures, 1934-35, \$598,538. Budget, 1935-36, \$595,000.

Grounds and Buildings: 95 acres and 59 buildings, total value, \$3,782,567. Ten dormitories accommodating 334.

Library (1899) 90,000 volumes, 393 current periodicals, books and prints relating to General Lafayette.

Laboratories Gayley Hall (1901) houses Chemistry, Pardee Hall (1872) houses laboratories of Physics and Civil Engineering. Separate building for Electrical and Mechanical Engineering laboratories. Markle Hall (1928) houses Mining Engineering, Metallurgy, and Geology laboratories. Jenks Hall (1865) houses Biology.

Museums Museum of Natural History in Jenks Hall. Mining and Anthropological Museum in Markle Hall. Museum of Political Science in Kirby Hall of Civil Rights.

Requirements: For Admission (1) Graduation from accredited preparatory or high school with recommendation of school principal, (2) 15 units which must include an adequate course in English and, in addition, Algebra and Plane Geometry or an Ancient Language, (3) scholastic standing in upper two-fifths of class or examination by College Entrance Examination Board.

For Degree A B degree 120 semester units earned during 4 years of residence. Curriculum in first 2 years largely prescribed. In last 2 years there is free election subject to a major and a minor requirement. Courses in Chemistry or Engineering have a prescribed freshman course, and for 3 last years different curricular leading respectively to degrees of BS in CE, in EE, in ME, in EM, in Chemical Engineering, and in Chemistry. Honors work for outstanding students who have demon-

strated unusual ability during freshman and sophomore years.

General: All students not living at home must live in dormitories or fraternity houses, 2 years of Physical Education or Military Science required for graduation, attendance at week day convocation and Sunday chapel service required.

Departments and Staff: Biology *Professors*, 2, *associate professors*, 0, *assistant professors*, 1, *instructors*, 0. Chemistry 1, 2, 1, 2. Economics 1, 1, 1, 1. Education 1, 0, 0, 0. Enrollment: For 1934-35, 827.

Degrees: Conferred year ending June 30, 1935, 167. Total number of degrees conferred since foundation, 7,356.

Fees: Annual college fee, \$400. Approximate cost of room and board, \$300 to \$600. Matriculation fee, \$10, graduation, \$10, laboratory, \$5 a course. Annual expenses Liberal, \$1,300, low, \$800.

Scholarships: Awarded 1934-35, \$35,600, loans, \$14,408. The Edward Hart Fellowship in Chemistry, income of \$10,000, the Francis A. March Fellowship in English, income of \$11,000.

33% of students earn their way in part.

Dates of beginning and ending sessions. First term Thursday nearest September 20, continues for 19 weeks. Second term Monday following close of first term, continues for 18½ weeks. Commencement is second Friday of June.

Summer session 3-week practice schools for Engineering students.

College Bulletin, including catalog, annual reports, and news bulletins, 5 times a year

Achievements for year ending June 30, 1935 Lafayette Community College, Boys' Engineering Conference, Alumni College

Administrative Officers: *President*, William Mather Lewis, *Dean*, Theodore A Distler, *Registrar*, William M Smith Officer in charge of foreign students and personnel, Professor George H Fickes

LAKE ERIE COLLEGE

PAINESVILLE, OHIO

College of arts and sciences, for women, privately controlled, interdenominational

Founded in 1847 as Willoughby Seminary at Willoughby, Ohio, on the model established 10 years before by Mary Lyon at South Hadley, Massachusetts In 1856 the building was burned and the institution was rebuilt in Painesville Lake Erie Seminary was incorporated in 1856 and opened in 1859 In 1898 a charter was granted to Lake Erie College and Seminary In 1908 the Seminary was discontinued and a charter granted to Lake Erie College

Governed by a self-perpetuating board of 15 trustees

Finances Endowment, \$795,885, income from endowment, \$36,454, income from other sources, not including dormitories and dining hall, \$40,894 Total annual expenditures, not including dormitories and dining hall, \$109,958 Budget, 1935-36, not including dormitories and dining hall, \$102,500

Grounds and Buildings: 40 acres valued at \$132,000, present worth of buildings, \$951,552 Dormitories 2, accommodating 216

Library (1908) 24,200 volumes, 105 current periodicals

Laboratories Bentley Hall (1897) houses laboratories of Biology, Chemistry, Home Economics, Physics, Psychology

Requirements: For Admission (1) Graduation from accredited preparatory or high school with recommendation of school principal and 2 other persons not relatives (2)

15 units including 3 in English, 2 of Foreign Language, 2 of Mathematics, and 1 of History (3) Average of B in work offered

For Degree 120 semester hours, in third and fourth years, concentration in 1 department (24 hours) with 12 hours in a supporting field, and 9 hours in a correlating field Prescribed courses, English, 6 semester hours, Foreign Languages on attainment basis of ability to read, write, and speak 1 language, or to comprehend ordinary prose at sight in 2 languages One-fourth of the work offered for the degree must be of A or B grade and no more than one-fourth may be of barely passing grade

General All students except Painesville girls living in their own homes must reside in college dormitories, 3 years' work in Physical Education required, attendance at college assemblies required twice a week and at vesper services once a month

Departments and Staff: *Art Professors*, 0, *associate professors*, 1, *assistant professors*, 0, *instructors*, 0 Biology 1, 0, 1, 0 Chemistry 1, 0, 0, 1 Classics 0, 1, 0, 0 Economics and Sociology 1, 0, 0, 0 English 2, 0, 0, 0 German 1, 0, 0, 0 History and Government 1, 1, 0, 0 Home Economics 0, 1, 0, 0 Mathematics and Physics 1, 0, 0, 0 Music, 2, 1, 0, 0 Philosophy and Religion 1, 0, 0, 0 Physical Education 1, 0, 0, 1 Psychology and Education 1, 0, 1, 0 Romance Languages 0, 2, 1, 0 Speech and Dramatics 0, 0, 1, 0

Enrollment For 1934-35, 119 women Total number of matriculants since foundation, 36,251

Degrees Conferred year ending June 30, 1935, 24 A B Total number of degrees conferred since foundation, 689 Total number of graduates, including those of the Seminary period, 1,085

Fees: Tuition, \$300, room and board, \$500, gymnasium fee, \$10, graduation, \$10, laboratory and studio fees from \$10 to \$20 Annual expenses Liberal, \$1,100, low, \$950

Scholarships \$4,500 awarded annually in amounts varying from \$50 to \$300 One fellowship for graduate study yields \$300 annually

Appointment bureau conducted by dean In 1934-35 about 15% of students earned way in part through service for the college No student undertakes service outside the college or attempts to earn entire way

Dates of beginning and ending sessions last Thursday in September, third Tuesday in June

Extension work Local adult part-time students are enrolled in a limited number of evening classes, departments assuming responsibility in rotation

Catalog in January

Administrative Officers. *President*, Vivian Blanche Small, *Dean*, Marv Hewitt Hildreth, *Registrar*, Helen Brewer Dunlap

LAKE FOREST COLLEGE

LAKE FOREST, ILLINOIS

Liberal arts college, coeducational, privately controlled Trustees must be confirmed by Presbyterian Synod of State of Illinois

Chartered 1857, College organized 1869, reorganized 1876

Self-perpetuating board of 25 trustees

Finances: Endowment, \$1,515,000, income from endowment, \$61,540, income from other sources, \$197,711 Total annual expenditures, 1934-35, \$258,742 Budget, 1935-36, income, \$268,920, expense, \$271,197

Grounds and Buildings. 50 acres valued at \$750,000 Present worth of buildings, \$867,500 Dormitories 3 for men, accommodating 142, 2 for women, accommodating 82

Library (1899) 46,553 volumes, 130 current periodicals Special collection of books on Art

Laboratories Physics Building (1907-08) Chemistry and Biology in College Hall (1878)

Requirements: For Admission 15 units, including Foreign Language, 2, English, 3, History, 1, Mathematics, 2, Laboratory Science, 1, plus 2 additional units from

these groups May present 11 major units, exclusive of Foreign Language or Plane Geometry, and receive conditional admission if scholastic standing is in the upper three-fourths of graduating class Condition must be removed by beginning of sophomore year

For Degree At least 1 year in residence, 120 semester hours and 120 quality points, 2 years of English, 1 to 2 years of Foreign Language, 1 year of Laboratory Science, 1 year of Philosophy, Psychology, or Education, 1 semester of Religion, 1 year of Social Science, 2 years of Physical Education 18 hours in major field, 12 hours in division

Independent study in the field of concentration or in the major may be carried on by seniors who have shown superior ability Graduation with special honors is granted those who complete this independent work with unusual distinction

General Resident students must live in college dormitories, compulsory attendance at weekly chapel program

Departments and Staff: Biblical Literature *Professors*, 1, *associate professors*, 0, *assistant professors*, 1, *instructors*, 0 Biology 1, 0, 0, 1 Chemistry 1, 0, 0, 0 Economics 1, 0, 1, 1 Education 1, 0, 0, 0 English 1, 0, 1, 2 German, French, Spanish 2, 0, 0, 2 Latin 0, 0, 0, 1 History 1, 0, 0, 1 Italian 1, 0, 0, 0 Mathematics 2, 0, 0, 0 Music 0, 0, 0, 1 Philosophy and Psychology 1, 0, 0, 0 Political Science 0, 1, 0, 0 Physics 1, 0, 0, 0 Speech 0, 0, 1, 0 Physical Education 2, 1, 0, 0

Enrollment. For 1934-35, 332 Men, 201, women, 131

Degrees: Conferred year ending June 30, 1935, 61 Bachelor of Arts, 50, Bachelor of Arts in Business Administration, 11 Total number of degrees conferred, 1,358

Fees. Tuition, \$275, room, \$120 to \$255, board, \$225, matriculation fee, \$5, activities fee, \$28, laboratory fee, \$15 Annual expenses Liberal, \$950, low, \$375

Scholarships: Vary in amounts from \$275 to \$50 One \$500 scholarship is granted each year to an outstanding boy who is a graduate of a recognized secondary school Several

full tuition scholarships are granted each year to designated high schools throughout the country. Applications for scholarship aid close on July 1.

Dates of beginning and ending sessions
September 16, Commencement, June 6, 1936

LA SALLE COLLEGE

PHILADELPHIA, PENNSYLVANIA

College of arts and sciences for men, privately controlled, affiliated with the Catholic Church

Founded in 1863. Nucleus of La Salle College had been formed in 1862 as the Christian Brothers Academy. Present buildings occupied in February, 1930.

Board of 9 elected trustees

Finances: Endowment, \$650,000, income from endowment, \$39,000, income from tuition and fees, \$55,000. Total annual expenditures year ending June 30, 1935, \$106,000.

Grounds and Buildings 10 acres, value of grounds, \$250,000, present worth of buildings, \$800,000, total value of grounds, buildings, and equipment, \$1,104,500.

Library 10,000 volumes, 50 current periodicals.

Laboratory. Equipment valued as follows: Biology, \$15,000, Chemistry, \$20,000, Physics, \$17,000.

Requirements. For Admission 15 units distributed as follows: English, 3, History, 1, Geometry, 1, Algebra, 1, Foreign Language, 2, electives, 7.

For Degree 128 semester hours

Departments and Staff: Business Administration *Professors*, 2, *assistant professors*, 2. Biology 1, 1. Chemistry 1, 1. Education 1, 1. English 2, 1. Economics 1, 0. Languages 4, 0. History 1, 0. Mathematics 1, 1. Philosophy 1, 1.

Physics 1, 1. Physical Education 2, 1.

Enrollment: For 1934-35, 288.

Degrees: Conferred year ending June 1935, 60 B. A., 42, B. S. 18. Total number of degrees conferred since foundation, 528.

Fees Matriculation, \$5, tuition, \$300 per year, graduation, \$30, general fees, \$20 a quarter. Charge for lodging and board, \$700.

Scholarships 5 tuition scholarships awarded on competitive examination.

Dates of beginning and ending sessions
September 24 (approximately) to first week in June.

Summer session June 22 to July 31. Nine departments offer 16 courses. Attendance, 1935, 72.

Catalog in April

Administrative Officers *President*, Brother E. Anselm, F. S. C., *Dean*, Brother E. Felix, F. S. C., *Registrar*, Brother G. Joseph, F. S. C.

LAWRENCE COLLEGE

APPLETON, WISCONSIN

College of Liberal Arts and Conservatory of Music, coeducational, privately controlled.

Founded in 1846, chartered 1847, named for benefactor, Amos A. Lawrence of Boston. Department of Music designated as Conservatory since 1894.

Self-perpetuating board of trustees consists of president of College and 36 trustees. Not less than 6 trustees elected on nomination of the alumni.

Finances. Endowment, \$1,732,932. Expenditures for year ending July 31, 1935, \$456,056.

Grounds and Buildings Total value of grounds (65 acres), \$304,589. Total value of grounds, buildings, and equipment, \$2,002,315. Dormitories 1 for men accommodating 132, 4 for women accommodating 295.

Carnegie Library. Volumes, 53,216, pamphlets, 6,304, government documents, 57,392, periodicals, 411.

Library of 1,526 phonograph records and 251 scores at Peabody Hall.

Laboratories Laboratory buildings valued at \$113,000, scientific apparatus valued at \$49,653

Museum Natural Sciences in Stephenson Hall of Science, American History in Main Hall

Requirements: For Admission Upper half of accredited high school graduating class

For Degree 124 semester hours and an equal number of grade points A B offered to students taking 3 years of Foreign Language Students not taking Foreign Language offered Ph B degree Mus B degree offered to students in the Conservatory of Music who elect majors in Public School Music, Applied Music, Theory and Composition, and Church and Choral Music M.A degree offered to graduate students in special fields Mus M degree offered in Applied Music, Church and Choral Music, Composition, and Music Education

Every liberal arts student, in his senior year, is given a comprehensive examination on his major field

Honor standings are awarded each year to those students of the College who, on the work of the course prior to the senior year, have shown excellence in scholarship

General Physical Education required first 2 years Women students must live in the dormitories, men are required to live in dormitory first year, thereafter in dormitory or fraternity house Convocation 3 times a week

Departments and Staff: Biology (including Botany and Zoology) *Professors*, 1, *associate professors*, 0, *assistant professors*, 1, *instructors*, 2 Economics and Sociology 4, 1, 0, 0 English and Speech 3, 4, 1, 1 Fine Arts 3, 0, 2, 1 Foreign Languages and Literatures 4, 1, 1, 3 History and Government 4, 0, 1, 0 Philosophy, Religion, and Bible 2, 0, 1, 0 Physical Education 0, 0, 1, 2 Physical Sciences and Mathematics 2, 2, 1, 3 Psychology and Education 2, 0, 2, 0

The Conservatory of Music Organ and Music History *Professors*, 0, *associate professors*, 0, *assistant professors*, 1; *instructors*, 0 Piano 1, 1, 0, 5 Public

School Music 0, 2, 0, 0 Theory and Composition 1, 0, 0, 0 Violin and 'Cello 1, 0, 0, 1 Voice 1, 1, 0, 0 Wind Instruments 1, 0, 0, 1, assistants, 2 Professors of Theory and Composition and Voice and Choral Music and assistant professor of Music History also included in Fine Arts Department of College of Liberal Arts

Enrollment: For year ending June 30, 1935, College of Liberal Arts, 703 Men, 341, women, 362. Conservatory of Music, 276 Men, 94, women, 182

Degrees: Conferred year ending June 30, 1935, 111 A B, 76, Ph B, 9, B M, 16, M Mus, 2, M A, 1, M S, 6, Ph D, 1

Fees. Tuition and incidental fees, \$225 per year, matriculation, \$10, graduation, \$10, student activities, \$16 50, board and room, \$300 to \$350 Annual expenses High, \$1,000, low, \$600

The Conservatory of Music Tuition and fees, \$375 to \$400, graduation fee, \$10, practice rental in applied music courses, \$40 to \$104 Annual expenses High, \$1,200, low, \$725

Scholarships. Scholarships available

Dates of beginning and ending sessions Freshman Week, September 12, registration, September 17, 1935, Commencement, June 8, 1936

College bulletins including catalog and Conservatory of Music catalog

Administrative Officers. *President*, Henry M Wriston, *Dean of the College*, Thomas N Barrows, *Dean of Women*, Marguerite Woodworth, *Dean*, Conservatory of Music, Carl J Waterman, *Director*, Admissions, Milton C Towner, *Business Manager*, Ralph J Watts, *Alumni Secretary*, Rexford S Mitchell, *Secretary*, Conservatory of Music, Marshall Hulbert, *Recorder*, Martha Jentz

INSTITUTE OF PAPER CHEMISTRY

Affiliated with Lawrence College

Graduate school for the training of technical men for the pulp and paper industry affiliated with, and degrees conferred by Lawrence College, privately controlled

Founded in 1929, first class admitted in 1930

Board of trustees consists of the director of the Institute and 9 men elected from the membership

Finances: Voluntary support from representative industries throughout the United States Endowment, \$69,796 31 Expenditures for year ending June 30, 1935, \$179,-832 81 Budget, 1935-36, \$200,000

Grounds and Buildings Total value of grounds, buildings, and equipment, \$324,-022 84

Library 5,140 technical volumes, of which 4,500 volumes represent bound volumes of technical periodicals, 120 current periodicals

Laboratories Buildings valued at \$137,-095 57, scientific apparatus valued at \$147,-139 95

Requirements. For Admission A bachelor's degree from an accredited college or university, with at least 30 hours and 4 full years of Chemistry, including 8 hours of Organic Chemistry, 6 hours of Analytical Chemistry, as well as a year of Physical Chemistry, a full year of College Physics and a minimum of 10 hours, 2 years of College Mathematics, including a full year of Calculus and a minimum of 16 hours, a satisfactory reading knowledge of German

For Degree 2 years of course work or their equivalent are required for M S, the first year providing background in Chemistry and related sciences, the second year, courses in pulp and paper A satisfactory M S thesis also must be presented For Ph D The equivalent of the work for M S at the Institute of Paper Chemistry, and at least 2 additional years' work Advanced technical courses in the Technology of Pulp and Paper and in the fundamental sciences comprise 1 year, and the other year is devoted to the presentation of a satisfactory thesis In no case will a degree be granted until 2 full years of residence have been completed

Courses and Staff: Work is offered by 7 major groups, Analytical *Faculty*, 2 Organic 5 Physics 4 Colloid 7 Pulp and Paper Technology 6 Pulp and Paper Testing 6 Microscopy and Photomicroscopy 3 Additional work is also pro-

vided in German and bibliographic investigation The teaching staff includes 18 full-time members of the staff of The Institute of Paper Chemistry, 3 special lecturers from the industry, and 4 part-time members from the academic staff of Lawrence College

Enrollment. For the academic year beginning 1934, 31

Degrees: Conferred by Lawrence College, June 10, 1935, M S, 6, Ph D, 1

Fees: Tuition and laboratory fees, \$200, matriculation, \$10, graduation, \$10, gymnasium and infirmary, \$5, board and room, \$320

Scholarships Scholarships are available to students of all classes

Dates of beginning and ending sessions September 16, 1935, Commencement, June 8, 1936

Library Bulletin of the Institute of Paper Chemistry, appearing monthly, Quarterly Technical Research Bulletin, annual catalog

Administrative Officers. *Director*, Henry Merritt Wriston, *Technical Director*, Otto Kress, *Dean*, Harry Fletcher Lewis, *Executive Secretary*, Westbrook Steele, *Treasurer*, Ralph Jerome Watts, *Librarian*, Edith Stroschneider, *Assistant Executive Secretary*, John Giffin Strange

LEBANON VALLEY COLLEGE

ANNVILLE, PENNSYLVANIA

College of liberal arts, coeducational Maintained and controlled by East Pennsylvania, Pennsylvania, and Virginia Conferences of the Church of the United Brethren in Christ

Founded in 1866, in 1867 the Legislature of the State of Pennsylvania granted charter

Charter rights vested in East Pennsylvania Conference which has delegated some of its rights to board of 37 trustees East Pennsylvania Conference, 13 members,

Pennsylvania Conference, 13, Virginia Conference, 6, Alumni Association, 3, at large, 2. These members are elected by their respective units at their annual stated meetings with the exception of the trustees at large who are elected by the board of trustees at their annual meeting. The selection of the last 4 units are confirmed by the first, in whom the charter rights are vested.

Finances: Endowment, \$911,597 73, income from endowment, \$23,000, income from other sources, \$163,886 59. Total annual expenditures, year ending June 30, 1935, \$195,019 76. Budget, 1935-36, \$192,000.

Grounds and Buildings: Value of grounds (17 acres) and pipe line, \$58,089 39, value of 10 buildings, \$495,149 44, value of equipment, \$101,785 92. Dormitories 1 for men, accommodating 105, 3 for women, accommodating 100.

Library (1904-05) Carnegie Library 17,537 volumes, 160 current periodicals.

Laboratories Biology, Chemistry, and Physics laboratories in north end of Administration Building (1905). Value of apparatus, \$19,500.

Requirements: For Admission Graduation from 4-year high school course, and 16 units including 4 of English. 2 units of condition in prescribed units are permitted. Units prescribed for all degrees: English, 4, Mathematics, 2, Foreign Languages, 2, History and Social Science, 1, Physical Science, 1.

For Degree 126 semester hours, and 126 quality points, major of 24 semester hours and minor of 18 semester hours.

General Physical Education required in first 2 years, chapel attendance required 4 times weekly.

Departments and Staff Bible and New Testament *Professors*, 1, *assistant professors*, 1, *instructors*, 1. Biology, 2, 0, 5. Chemistry 1, 0, 3. Education and Psychology 2, 0, 3. English 2, 0, 3. French 2, 0, 2. German 1, 1, 2. Greek 1, 0, 1. History 2, 2, 1. Latin 1, 0, 0. Mathematics 2, 0, 3. Philosophy and Religion 1, 0, 0. Physics 1, 0, 2. Political and Social Sciences 1, 1, 0. Business Administration 1, 1, 1.

Enrollment: For 1934-35, College, 354, Conservatory of Music, 128, Extension Courses, 30. Net enrollment, 487. Men, 287, women, 280.

Degrees: Conferred year ending June 30, 1935, 76 A B, 29, B S, 47. Total number of degrees conferred since foundation, 2,101.

Fees. Tuition, \$225 a year, matriculation, \$5, room rent, \$50-\$104, boarding, \$200, student activities fee, \$25, graduation fee, \$15, laboratory fees, \$10-\$24. Annual expenses Liberal, \$675, low, \$565.

Scholarships. 64, \$35 to \$225. Small loan fund.

Employment bureau 36% of students earned all or part of their expenses during year ending June 30, 1935.

Dates of beginning and ending sessions September 19, 1934, June 10, 1935.

Summer session June 24 to August 3, 1935. In 1935, 9 departments offered 20 courses. Attendance, 1935, 44.

Extension work Harrisburg, Pennsylvania 3 departments offered 3 courses. Enrollment, 30.

Catalog in March, financial report in May, President's Report in June.

Administrative Officers: *President*, Rev Clyde Alvin Lynch, *Registrar*, Samuel O Grimm, *Dean*, A H M Stonecipher, *Dean of Women*, Mary C Green, *Dean of Men*, D Clark Carmean, *Bursar*, J W Esbenshade.

LEHIGH UNIVERSITY

BETHLEHEM, PENNSYLVANIA

Privately controlled university for men.

Chartered by Legislature of Pennsylvania, 1866; founded by the Hon Asa Packer of Mauch Chunk, Pennsylvania, who made an initial donation of a tract of land and \$500,000 to which he added during his lifetime and by his will.

Self-perpetuating board of 10 corporate trustees elected for life, together with 6 alumni trustees each elected for a term of 6 years, and, at present, 1 honorary trustee.

Three colleges Arts and Science, Business Administration, and Engineering.

Graduate work leading to a master's degree Lehigh Institute of Research

Finances: Endowment, approximately \$5,000,000 with the income from an additional trust fund of over \$1,500,000 Income from endowment, \$222,456 53, student fees, \$548,343 06, other sources, \$187,385 36 Total expenditures year ending August 31, 1935, \$927, 925 62 Budget, 1935-36, \$1,028, -334

Grounds and Buildings 180 acres Value of buildings, \$4,000,000 Two dormitories

Library 215,000 volumes, 500 current periodicals Special collections Eckley B Coxé Library of early Science, the Joseph W Richards Library of Metallurgy, Civil War collection, collection of English books printed prior to 1640, the 4 Shakespeare folios, incunabula, collection of bound newspapers and books bearing particularly on the American Revolution and on geography and travel

Laboratories Physics Laboratory Value, \$115,000, value of equipment, \$90,000 W A Wilbur Engineering Laboratory and Power House \$75,000, \$85,000 Fritz Engineering Laboratory (hydraulics and testing of materials of construction) \$70,000, \$40,000 Eckley B Coxé Mining Laboratory \$50,000, \$25,000 William H Chandler Chemistry Laboratory \$290,000, \$120,000 James Ward Packard Laboratory of Electrical and Mechanical Engineering \$1,100,000, \$165,000 Williams Hall (Biology, Geology, and Metallurgical Engineering) \$100,000, \$90,000

Robert H Sayre Astronomical Observatory 6-inch equatorial telescope and other equipment

Requirements For Admission 15 units including English, 3, Algebra, $1\frac{1}{2}$, Plane Geometry, 1 For Arts and Science Latin, Greek, German, French or Spanish, 2 For Engineering Plane Trigonometry, $\frac{1}{2}$, and Solid Geometry, $\frac{1}{2}$ or Advanced Algebra, $\frac{1}{2}$ Students are admitted by certificate from approved high schools and preparatory schools, by examination at the University, and by the College Board and Regents Examinations

For Degree For B A, 128 hours, about

$\frac{3}{4}$ prescribed and $\frac{1}{4}$ elective For BS in Business Administration, 140 hours, nearly all prescribed For BS in College of Engineering, 144 hours and summer requirements in Surveying, Assaying, or Engineering Laboratory

General Physical Education, 4 years, Military Science and Tactics, 2 years (advanced courses in Infantry or Ordnance Unit optional), chapel or courses in Moral and Religious Philosophy

Departments and Staff Biology Professors, 2, associate professors, 0, assistant professors, 0, instructors, 2 Business Administration 3, 2, 3, 2 Chemistry 3, 5, 3, 6 Civil Engineering 2, 3, 3, 2 Education 1, 0, 1, 0 Electrical Engineering 2, 1, 2, 2 English 2, 1, 2, 8 Fine Arts 0, 1, 0, 0 Geology 1, 1, 2, 0 German 1, 1, 1, 0 Greek 1, 0, 0, 0 History and Government 2, 2, 0, 0 Latin 1, 1, 0, 0 Mathematics and Astronomy 4, 1, 3, 5 Mechanical Engineering 4, 1, 1, 2 Metallurgical Engineering 1, 2, 0, 1 Military Science and Tactics 1, 0, 4, 3 Mining Engineering 1, 1, 0, 0 Moral and Religious Philosophy 1, 0, 0, 0 Music 0, 0, 0, 1 Philosophy 1, 0, 1, 0 Physical Education 1, 0, 2, 6 Physics 1, 3, 3, 3 Psychology 1, 0, 1, 1 Romance Languages 1, 1, 2, 2

Enrollment: For 1934-35, 1,541 Undergraduates, 1,340, graduates, 123, summer session, 420 Total number of matriculants since foundation to January 1936, 10,344

Degrees: Conferred 1934-35, 303 M A, 12, M S, 21 Total number of degrees conferred since foundation to January 1936, 6,002

Fees: Tuition, \$400, matriculation, \$5, annual health service, \$12, annual athletic, \$15, annual library, \$5, graduation, \$10, annual dormitory rentals, \$50 to \$120 Total expenses Low, \$850, medium, \$1,000

Scholarships. 24 free undergraduate scholarships, 100 undergraduate and 25 graduate deferred payment of tuition, with interest from date of graduation, loan funds, \$250,000

Research 6 endowed fellowships and 13 cooperative fellowships in the Lehigh Institute of Research

Placement bureau For alumni and undergraduates In 1934-35, 28% of students earned part of expenses

Dates of beginning and ending sessions
September 19, 1935, June 9, 1936

Summer session July 1 to August 10, 1935

Register in March, Treasurer's Report, Institute of Research bulletins

Administrative Officers: *President*, C C Williams, *President*, Board of Trustees, E G Grace, *Secretary*, Board of Trustees and *Treasurer*, W. R. Okeson, *Vice-President* and *Comptroller*, N M Emery, *Dean*, C M McConn, *Registrar* and *Associate Dean*, G B Curtis, *Director*, Admissions, W H Congdon, *Secretary of the Faculty*, G B Curtis.

LENOIR RHYNE COLLEGE

HICKORY, NORTH CAROLINA

Lenoir Rhyne College is a 4-year standard college for men and women, owned and controlled by the Evangelical Lutheran Church of North Carolina

Founded in 1891 The board of trustees consists of 22 men, selected by the North Carolina Synod

Finances: Endowment, \$417,552 53, income from endowment, \$8,009 18, income from other sources, \$155,612 45 Total annual expenditures, 1934-35, \$144,801 07 Budget for 1935-36, \$150,000

Grounds and Buildings: 37 acres in campus valued at \$92,332 34, buildings valued at \$461,224 30, equipment, \$79,405 47 Dormitory capacity for resident men and women students is 175

Library (1928) In Administration Building, 13,454 volumes, 80 periodicals.

Laboratory (1916) Yoder Science Building

Museum On the second floor of the Administration Building

Requirements: For Admission 15 units and graduation from high school Required 4 units of English, 3 Mathematics (1 of which is condition), 1 History, 5 elective

(not more than 2 units in Commercial and Home Economics work) 2 units of Language are conditional, if student is recommended by principal these units may be made up in College

General Physical Education required of all freshmen and sophomores, chapel attendance encouraged but not compulsory

Departments and Staff: *Biology Professors*, 1, *associate professors*, 1 *Chemistry* 1, 2 *Commercial* 2, 2 *Education* 2, 0 *English* 3, 0 *Foreign Language* 3, 0 *History and Government* 2, 0 *Mathematics* 1, 1 *Music* 3, 0 *Physics* 1, 0 *Physical Education* 1, 0 *Religious Education* 1, 0

Enrollment: For year ending June 30, 1935, 375 Men, 203, women, 172

Degrees: Conferred June 4, 1935, 60 B A, 54, B S, 6 49 Commercial Certificates were given

Fees: The total college expenses for girls amount to \$395, for boys, \$375, \$150 of which is tuition, \$3 to \$15 laboratory fees, \$160 board

Employment bureau The Administrative Department is the employment bureau About 33% of the students last year earned from one-fourth to all of their expenses

Dates of sessions September 10, 1935 to June 2, 1936

Summer school 2 summer sessions were held in 1935 The first session began June 5, ending July 13, with 231 students enrolled The second session began July 15, ending August 23, with 115 students enrolled The total enrollment for the summer school was 346

Extension Enrollment, 1934-35, 450 6 instructors

4 bulletins a year are published The March number is the catalog

Administrative Officers: *President*, P E Monroe, who does the work of a *Dean*, assisted by the *Dean at Highland Hall*, E L. Setzler and the *Dean of Women at Mauney Hall*, Margaret Alleman, and the Faculty Committee, *Registrar*, E L. Setzler

LEWIS INSTITUTE

CHICAGO, ILLINOIS

College of science, literature, and technology for men and women, privately controlled, non-sectarian

John and Allen C. Lewis bequeathed a large part of their estates in 1874 and in 1877 to found the Institute Incorporated in 1895, opened in 1896

Self-perpetuating board of 5 trustees, who are authorized to associate with themselves a number of educational advisers, the 2 bodies constituting board of managers

Finances: Endowment, \$1,500,000 Annual budget, \$300,000

Grounds and Buildings The grounds, buildings, and equipment represent an expenditure of approximately \$1,000,000

Library 30,000 volumes

Laboratories In addition to shops and drafting rooms there are laboratories for Physics, Chemistry, Biology, Steam Engineering, Mechanical Engineering, Electrical Engineering, and Home Economics Scientific apparatus valued at \$150,000

Requirements: For Admission (1) Full equivalent of graduation from a 4-year high school (2) 15 units, including 3 in English

For Degree For the title of Associate, reckoned from beginning of usual high-school period, 8 courses in English, of which 2 in English Composition must be in advance of admission requirements, 4 in Social Science, which includes History, Civics, Economics, Psychology, and Education, 4 in Foreign Languages, all in 1 language, 4 in Mathematics, 2 in Algebra and 2 in Geometry, and 4 in Science, of which 2 must be in a Laboratory Science, and electives amounting in all to 60 semester hours of college work For degree of B S in Arts and Sciences, 60 additional semester hours of electives, including 40 in senior college, in Engineering and Home Economics, 140 semester hours required, nearly all prescribed

Departments and Staff: Art Professors, 0, associate professors, 0, assistant professors, 1, instructors, 3 Biology 1, 0, 0, 2 Business Administration 0, 0, 3, 0 Chem-

istry 3, 0, 0, 5 Education 1, 0, 0, 1 Engineering 4, 0, 2, 4 English 3, 0, 0, 5 Foreign Languages 3, 0, 0, 3 History and Economics 2, 0, 2, 2 Home Economics 1, 0, 1, 2 Mathematics 1, 0, 3, 2 Physics 1, 0, 1, 3 Psychology and Philosophy 2, 0, 0, 0

Enrollment. In regular session for year ending June 30, 1935, as candidates for title or degree, 1,397 Men, 1,001, women, 396

Degrees: Conferred year ending June 30, 1935, 166 Total number of degrees conferred since foundation, 2,006

Fees: Average annual tuition for full-time students, \$150

Scholarships: \$7,000 awarded annually.

A majority of students earn enough to pay their way in whole or part

Dates of beginning and ending sessions Autumn quarter of day sessions begins last Monday in September and continues for 12 weeks, winter quarter begins first Monday in January, spring quarter begins first Monday in April

Summer session of 10 weeks begins in June in time to close before September first Attendance, 1935, 503

Evening session begins second Monday in October and is divided into 2 terms of 15 weeks each Attendance, 1935, 1,658 most of whom were adults Total enrollment September 1934, to August 1935, 3,055.

Administrative Officers: *Director*, Dugald Caleb Jackson, Jr, *Registrar*, Agness Joslyn Kaufman, *Business Manager*, R W Mowat.

LIMESTONE COLLEGE

GAFFNEY, SOUTH CAROLINA

College of arts and science, for women, owned by the Baptist denomination in South Carolina

Founded and opened in 1845

Controlled by a board of trustees elected by the Baptist Convention of the State of South Carolina

Finances: Endowment, \$406,308 68, income from endowment, 1934-35, \$15,992 71 Total income, 1934-35, \$106,719 92 Budget,

1935-36, \$94,000 Estimated income, 1935-36, \$116,000

Grounds and Buildings: Value of land (80 acres), \$57,462 50, value of buildings, \$423,073 88, value of furniture and equipment, \$104,886 96 Four dormitories for women, accommodating 263

Library Volumes, 15,000, periodicals, 63
Laboratories (1924) Hall of Science

Requirements: For Admission 15 units required for admission to freshman class, graduation from accredited high school

For Degree 130 semester hours required for graduation, including work in Physical Education 130 quality credits required

General 5 chapel exercises a week

Enrollment: For 1934-35, 319 Enrollment present session, 1935-36, 340

Degrees. In 1935, 45

Fees: Tuition, \$120 per session, room and board, \$206 Other fees bring total per student per session to \$366 Student government fee of \$10 in addition to \$366 All Science fees, \$5 per session Music, Art, and Expression in addition Average annual expenses per student, \$500

Session begins middle of September and closes first of June

Catalog in February

Administrative Officers: *President*, R C Granberry, *Dean*, Miriam Thompson

LINCOLN UNIVERSITY

JEFFERSON CITY, MISSOURI

College of arts and sciences, coeducational, state controlled

Founded in 1866 by officers and members of the sixty-second and sixty-fifth U S Colored Infantries, named in honor of Abraham Lincoln, opened in 1866 with Richard B Foster as president

Organization The board of curators consists of 6 members appointed by the governor of the state to serve for a term of 4 years The state superintendent of education is ex-officio member of the board

Finances: Total income for 1934-35, \$177,754, total expenditure, \$174,182

Budget for 1935-36, \$220,284 (Includes \$50,000 for capital outlay)

Grounds and Buildings: 100 acres valued at \$80,000, present worth of buildings, \$501,000 Dormitories 1 for men, accommodating 116, 2 for women, accommodating 180

Library (1930) 13,500 volumes, 170 current periodicals

Laboratories. College Hall (1930) houses laboratories of Physics, Biology, Chemistry Schweich Hall (1930) houses laboratory of Home Economics

Requirements: For Admission Applicants for admission to Lincoln University are required to fulfill 1 or more of the following general requirements (1) Graduation from an accredited preparatory or high school (2) Presentation of a minimum of 15 units of acceptable preparatory work, 12 of which must be in academic subjects as outlined in the catalog (3) Passing a standard College Entrance Examination The candidate must be officially recommended by a teacher and the principal or some other certified officer of the school from which he comes

For Degree B A, B S, and B S in either Elementary or Secondary Education conferred In addition to acceptable entrance credits, there is required for any degree a minimum of 120 semester hours of academic credit with an equal number of grade points, 4 units of Physical Education and the passing of a comprehensive examination in the major field (The University also grants a 60-hour certificate to teach in the elementary schools, on fulfillment of the prescribed requirements of the first 2 years of the 4-year curriculum in Elementary Education)

General Students must reside in dormitories or in approved student quarters

No student will be admitted to classroom instruction and recitation until he has formally registered and his instructors have received Class Admission Cards for each course Registration is not complete until fees have been paid

Every student is required to take Physical Education or equivalent during

freshman and sophomore years, chapel twice weekly

Main campus south of city limits of Baton Rouge School of Medicine in New Orleans on grounds of Charity Hospital Northeast Center, organized as a junior college, on 38 acres in eastern suburb of Monroe, Louisiana

A state university for men and women

The University had its origin in certain grants of land to Louisiana in the years 1806, 1811, and 1827 by the U S government "for use of a seminary of learning" The state constitution of 1845 provided for the establishment of such an institution from the proceeds of the sale of these lands, but it was several years before the legislature put into effect this constitutional mandate A plan of organization was adopted in 1848, and in 1853 a site about 3 miles from Alexandria, on the east bank of the Red River, was chosen for the new institution, which was officially designated as the Louisiana State Seminary of Learning During the next 6 years various changes and improvements in the plan of organization were adopted by the legislature Among these was a law providing for military instruction in the Seminary The first session began on January 2, 1860, and continued in operation until 1863, when the school suspended its activities Academic work was resumed in 1865 In 1869, the Seminary building was destroyed by fire but this interrupted its work for only a fortnight, as accommodations were secured in Baton Rouge in the building of the School for the Deaf, which remained the domicile of the institution until 1886 In that year, quarters were found in the buildings of the U S Army post in the northern part of the city, from which the regular troops had been withdrawn some years before A loan of these buildings and grounds was made by the U S government, and by an Act of Congress, 1902, this loan was converted into a gift, full title to the property being vested in the University This site was

occupied until the beginning of the session of 1925-26. At this time the University transferred most of its activities to its new home which had been in course of construction for about 3 years, and transition from the old to the new site was completed in 1932. The Louisiana State Agricultural and Mechanical College was established by an act of the legislature approved in 1874 to carry out the U S Act of 1862, granting lands for this purpose. It was located at Chalmette Battle Ground, but temporarily located in New Orleans. In 1876, an act was passed by the Legislature of Louisiana uniting the Louisiana Seminary of Learning and the Louisiana State Agricultural and Mechanical College under the name of the Louisiana State University and Agricultural and Mechanical College.

The governing body is a board of supervisors of which the governor of the state is ex-officio president. Other members are appointed by the governor, for 6-year terms, with overlapping tenure.

Divisions: Lower Division, Northeast Center, College of Agriculture, Division of Agricultural and Home Economics Extension, Agricultural Experiment Stations, College of Arts and Sciences, School of Geology, School of Journalism, College of Commerce, College of Engineering, School of Pure and Applied Science, Institute of Industrial Research, Teachers College, School of Music, Law School, School of Library Science, School of Medicine, Schools of Dentistry and Pharmacy, Graduate School, Summer School, General Extension Division.

Finances: Federal funds, \$322,996.69, state, \$2,142,788.92, student fees, \$234,622.76, auxiliary agencies, \$356,330.65, donations, \$10,500, sales and services, \$46,904.53, other sources, \$326,211.57, building fund, \$833,966.12. Budget for 1935-36, less building, auxiliary, and other expenditures, \$2,419,370.

Grounds and Buildings: 4,229 acres valued at \$1,126,827.18. Residence halls: Men, 6, accommodating 1,662; women, 5, accommodating 720. Memorial Tower (1924), present worth, \$200,000, built by

public subscription as memorial to Louisiana soldiers who lost their lives in the World War. Music and Dramatic Arts Building (1933), present worth, \$630,000. Field House (1933), present value, \$525,000.

Library (1924-25) 154,512 volumes, about 80,000 volumes and pieces not included in general figures, 1,100 current periodicals, special collections, Romance Philology and Literature, Thilly collection on Philosophy, Library Science and Bibliography, newspapers and manuscripts. Community facilities: Louisiana Library Commission in State Capitol, reference and circulating library, Baton Rouge Public Library, various large libraries in New Orleans furnish special facilities for Louisiana research work.

Laboratories: Agricultural group (1924) present worth, \$477,000, value of equipment, \$85,000. Engineering Hall (1924) \$240,900, \$66,000. Engineering Laboratory (1925) \$115,000, \$25,000. Engineering Shops (1925) \$185,000, \$75,000. Highway, Petroleum, and Geological Laboratory (1926) \$88,900, \$80,000. Chemical Building (1924) \$471,500, \$50,000.

Museum: Located in Memorial Tower. 200 letters of General W. T. Sherman, the first president of the institution, concerning the founding (1860), original Chart of Secession of Louisiana. Museum first listed in catalog of 1867-68. Housed in library until moved to present building (1933).

Requirements: For Admission: Graduation from accredited high school. Mature and worthy students who have not had the full advantage of a secondary education may be admitted to certain classes as special students.

General: 2 years of Military Science and Drill or 2 years of Physical Education.

Departments and Staff. Aeronautical Engineering: *Professors*, 1, *associate professors*, 0, *assistant professors*, 1, *instructors*, 1. Agricultural Education: 1, 0, 1, 0. Agricultural Engineering: 1, 1, 0, 0. Agriculture: 1, 0, 0, 0. Agronomy: 1, 1, 1, 0. Animal Industry: 1, 2, 1, 1. Poultry

Degrees: Conferred 1934-35, total, 709. M A, 55, M S, 64, M M, 6, C E, 1; M D, 28, B S Lib Sci, 20, LL B, 26, B M (Medicine), 20, A B, 191, B S, 208, B M (Music), 18.

Fees: Out-of-state tuition, \$30 a semester, general University fee. Matriculation, library, athletics, lyceum, communication, lockers, letter boxes in the Recreation Center, swimming pool, health service, and student publications, including 1 copy of the Gumbo and a subscription to the Reveille, \$30 a semester. Graduate students pay a fee of \$10 a semester for 1

class, \$20 for 2 classes, and \$30 for 3 or more classes.

Annual student expenses. Military students in dormitories. High, \$571, low, \$358. Non-military and women students in dormitories. High, \$580 and \$607, low, \$367 and \$376. Off-campus students. High, \$627, low, \$403.

Scholarships: 606 scholarships and fellowships varying in amount from \$15 to \$60 per month.

Appointments office. In 1934-35, 45% of students earned all or part of expenses.

Dates of beginning and ending sessions. September 19, 1934, June 3, 1935.

Summer session. June 7 to August 3, 1935. Enrollment, 1,640.

University extension. Enrollment in classes, 3,441, enrollment in correspondence courses, 320.

Catalog in May. University bulletins, 10 issues, monthly. Southern Review, quarterly. Louisiana Leader, monthly. Louisiana State University Studies. Student publications.

Achievements and special features, 1934-35. Year designated as Diamond Jubilee, centering in 10-day celebration, participating guests, representatives from 138 colleges and universities and 57 societies and other organizations, inaugurating Diamond Jubilee Loan Fund, first objective, \$75,000, about one-third paid in during first year, provisions for School of Dentistry and Pharmacy, establishment of center of French literature and culture for Louisiana as activity of Romance Languages Department, erection and equipment of Maison Française.

Administrative Officers. *President*, James Monroe Smith, *Dean*, Administration, James F. Broussard, *Commandant of Cadets*, Major Troy H. Middleton, *Dean*, Student Affairs, J. Perry Cole, *Dean of Women*, Nora Neill Power, *Academic Dean*, Ophelia Stone Stone, *Registrar*, Theodosia Jones Gates, *Business Manager*, Edgar N. Jackson.

LOUISVILLE, UNIVERSITY OF LOUISVILLE, KENTUCKY

Main campus in southern section of Louisville. Schools of Medicine, Dentistry, Law, Music, and Louisville Municipal College for Negroes occupy sites near center of city. Entire professional staff of the City Hospital is recruited from the membership of the faculty of the University School of Medicine, and all appointments to this staff are made by the board of trustees of the University upon recommendation by the dean of the School of Medicine and the president. Louisville Legal Aid Society is a clinic of the Law School.

Municipal university for men and women

Founded by act of city council, 1837, which gave 4 acres of ground and appropriated \$50,000 to provide building and equipment for a Medical School. University of Louisville has been in continuous operation ever since and is, therefore, the oldest municipal university in the U S.

Board of 10 members. These are divided into 5 classes of 2 each. 2 are appointed each 2 years by the city board of aldermen upon recommendation by the mayor, for terms of 10 years each. President is not a member of the board but is elected by the board.

University consists of School of Medicine (1837), School of Law (1846), College of Liberal Arts (1907), School of Dentistry (1918), Summer School (1923), Speed Scientific School (Engineering) (1924), Graduate School (1928), Louisville Municipal College for Negroes (1931), School of Music (1932).

Finances: Endowment, \$906,851.31, income from endowment, \$31,976.05, income from other sources, \$678,153.90. Total annual expenditures year ending June 30, 1935, \$701,408.59. Notable financial items for 1934-35: Gifts, \$14,275; appropriations, \$226,552.97. Budget, 1935-36, \$682,363.06.

Grounds and Buildings: (The following figures do not include 119 West Broadway.) Area in acres, 44, total value of grounds (estimated), \$222,500, total present worth

of buildings (based on insurance valuations), \$863,000.

Library. Temporarily located in Administration Building, erected in 1927. General Library: Total number of volumes, 34,000, including 3,600 government documents, 17,000 pamphlets, 227 periodicals currently received. Medical School Library: 12,350 volumes, 14,000 pamphlets, 214 periodicals currently received. Dental School Library: 1,935 volumes, 28 periodicals currently received. Law School Library: 15,000 volumes, 35 periodicals currently received. Speed Engineering School Library: 2,040 volumes, 52 periodicals currently received. The Louisville Free Public Library (350,000), the Filson Club Library (Historical), and the libraries of the Baptist and the Presbyterian Seminaries are open to students.

Laboratories. The following buildings house laboratories as well as offices, departmental libraries, and classrooms: Biology: *Building valuation*, \$34,500, *value of equipment*, \$10,000. Speed Scientific School: \$57,600, \$60,000. (Values for Speed School do not include heating plant equipment used both for heating buildings and for educational purposes.) Speed Annex: Chemical Engineering \$21,200, \$10,000. Physics \$32,350, \$7,000. Home Economics \$27,000, \$5,500. Chemistry \$53,000, \$13,000. Medical \$318,000, \$100,000. Dental \$61,000, \$60,000. Music \$50,000, \$5,000. Louisville Municipal College for Negroes: Science Building \$25,000, \$7,700.

Museums. J B Speed Memorial Museum of Fine Arts (1927), Alpha Omega Alpha Museum of Pathology (1935).

Requirements. For Admission: *College of Liberal Arts* and *Louisville Municipal College for Negroes*: Graduation from an accredited secondary school with a minimum of 15 units credit, of which 11 must be academic, not vocational, in character. Of these 11 units, 3 must be of English, 1 of Algebra, and 1 of Plane Geometry. No conditions allowed. *Speed Scientific School*: Graduation from an accredited secondary school with a minimum of 15 units credit, of which 11 must be academic, not vocational, in character. Of these 11 units, 3

must be of English, $1\frac{1}{2}$ of Algebra, 1 of Plane Geometry, and $\frac{1}{2}$ of Solid Geometry or Trigonometry *School of Dentistry* 60 semester hours from an accredited college, of which 8 must be of General Chemistry, 4 of Organic Chemistry, 6 of Physics, 6 of English, and 6 of General Biology *School of Law* 60 semester hours from an accredited college *School of Medicine* 60 semester hours from an accredited college, of which 8 must be of General Chemistry, 4 of Organic Chemistry, 8 of Physics, 6 of English, and 8 of General Biology *School of Music* Graduation from an accredited high school with a minimum of 15 units of credit, 12 of which must be academic, not vocational, in character Of the 12 units, 3 must be of English, 1 of Mathematics, 2 of Foreign Languages, 1 of Science or History, in addition, satisfactory evidence of prerequisite training in Applied Music *Graduate School* Bachelor's degree required for admission to the School, for admission to candidacy for master's degree, approval of Graduate Faculty

For Degree Bachelors' degrees Last 30 hours in residence, 121 hours required, of which not more than 71 may be of Junior College level, at least as many quality points as hours credit, that is, at least a C average For promotion to Senior College a student must pass a comprehensive examination covering freshman and sophomore years, and before graduation he must pass a foreign language qualifying examination (one language), a comprehensive examination in his major department, and a comprehensive examination in the division of his major department Exceptional students may read for Honors No thesis required For masters' degrees 24 semester hours exclusive of thesis, one-half in major subject chosen, and at least 1 minor and not more than 2 shall be chosen from another department No credit given for work in absentia Maximum of 6 hours may be accepted from other institutions Oral examination Thesis required Degrees of Doctor of Dental Medicine. 136 semester hours and same number of quality points as hours, completion of required courses and fourth-year comprehen-

sive examination Degrees of Bachelor of Law 80 or more hours of law work, with quality points equal at least to the total number of semester hours, last 28 hours in residence Degrees of Doctor of Medicine Completion of prescribed four-year curriculum, no student permitted to enter third or fourth years without a clear record Engineering degrees B S in Electrical Engineering, B S in Chemical Engineering, B S in Civil Engineering, B S in Mechanical Engineering, completion of prescribed 4-year curricula including cooperative work in industries Music degrees Bachelor of Music and Bachelor of Music Education, completion of prescribed 4-year curricula

General 1 year of Physical Education and one-half year of Freshman Survey are required in the College of Liberal Arts

LOYOLA COLLEGE

BALTIMORE, MARYLAND

College of arts and sciences, for men, privately controlled

Founded in 1852

Board of 9 trustees, all members of the Society of Jesus

Finances: Income for the year 1934-35, \$50,498 Expenditures for the year 1934-35, \$62,918

Grounds and Buildings: 18 acres valued at \$200,000, present worth of buildings, \$800,000, equipment, \$200,000

Library (1929) 28,000 volumes, 25 periodicals

Laboratories Science building (1921) houses laboratories of Physics, Biology, and Chemistry

Requirements: For Admission (1) Graduation from accredited preparatory or high school with recommendation of school principal (2) 15 units including 3 of English

(3) Applicants must present evidence of sound moral and physical character

For Degree 128 semester units, certain prescribed courses Grade of 65% Thesis of 3,500 words

Departments and Staff: Ancient Classical Literature *Professors*, 1 Biology 2 Chemistry 2 English 4 Greek 2 History 2 Latin 2 Mathematics 2, instructor, 1 Modern Foreign Languages 2 Philosophy 3 Physics 2, instructor, 1 Social Sciences 1

Enrollment. For year ending June 30, 1935, 217

Degrees: Conferred year ending June 30, 1935, 50 A B, 18, B S, 18, Ph B, 14 Total number of degrees conferred since foundation, 885

Fees: \$250 to \$300

Scholarships: 25 partial

12% of students earned part of expenses during year ending June 30, 1935

Dates of beginning and ending sessions September 17, 1935, June 6, 1936

Catalog in June
